Ensuring you Receive Emails

To ensure emails from the system are not filtered in your "Junk" or "Spam" folder, you will need to ADD Governmentjobs.com *AND* the recruiter for the job(s) you've applied for - to your list of trusted senders.

Tips

- Each applicant must have his/her own user account and it should not be shared with another person. Multiple applications with multiple users may jeopardize your status in the recruitment process for any positions you apply for.

- If you already have an account, login using your username and password. You will not be able to create another account using the same e-mail address.

- If the position you're applying for has Supplemental Questions, it may be a good idea to first prepare your answers on a word processing tool such as Microsoft Word or Works. Then when you are ready to apply, simply copy and paste your answers into the application.

- Make sure you **SAVE** your application throughout the steps in the application process! If you lose your internet connection in the middle of filling out an application, the information you've entered could be lost!
