AQUA-CLEAR TACKLE

Manufacturers of single and double bottom fishing rigs utilizing clear injection molded components that minimize tangles and ready to use right out of the package. A longtime favorite for anglers throughout the Mid-Atlantic region, Aqua-Clear Tackle has been producing and selling high quality rigs for over 40 years. Our rigs are hand tied with the highest quality components. The patented Aqua-Clear standoff helps prevent tangles and maintains a distance between the main leader and hook sub leaders.

RIG CONSTRUCTION

Aqua-Clear uses only the finest quality components from suppliers with a proven track record.

Hooks: Aqua-Clear uses hooks manufactured by reputable and proven suppliers that have been around for many years: Mustad (established 1877), Addya (established in 1943), and Eagle Claw (established 1925).

Swivels: Aqua-Clear swivels are manufactured by Rome Specialty Company (ROSCO) and American Fishing Wire (AFW). ROSCO is the nation's oldest and largest manufacturer of terminal tackle. ROSCO has been manufacturing terminal fishing tackle in Rome, NY since 1925. AFW Brands has a rich history dating back to 1926.

Floats: Our floats are from long time companies in the US. Our float suppliers are iconic and have produced the highest quality floats in excess of 50 years.

Line: Aqua-Clear has manufactured rigs with DuPont Tynex line since the beginning. Our fluorocarbon rigs are tied with AFW Triple Fish line, and, wire rigs are assembled with AFW wire.

Hair: FisHair, a synthetic hair, is used for consistency and durability. FisHair is strong and durable and has a natural texture and float in the water.

Fish Finders: Beginning in 2019, Aqua-Clear is producing all rigs with braid resistant fish finders.

Stand-offs: Injection molded with high quality plastic resin.

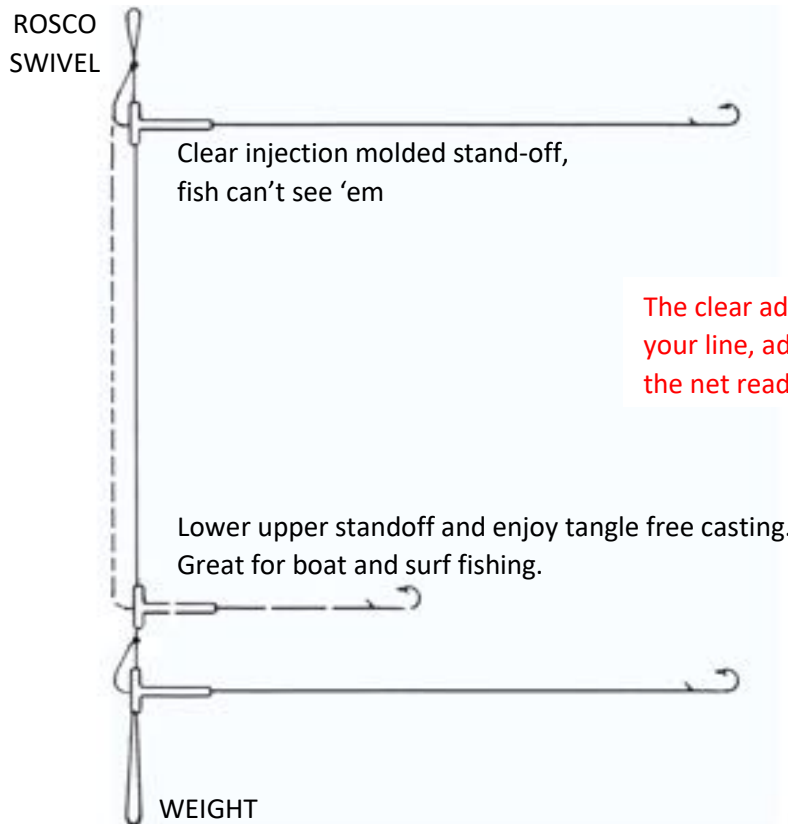

Assembly: 100% of our rigs are assembled and tied by hand utilizing the finest components as outlined above.

AQUA-CLEAR Concept

Aqua-Clear concept is unique, tested, and has been proven with millions of rigs sold throughout the Eastern United States.

THE AQUA-CLEAR CONCEPT

All clear and tangle free rigs ready to go

The clear advantage, snap this rig on your line, add bait and weight and get the net ready.

Lower upper standoff and enjoy tangle free casting. Great for boat and surf fishing.

HOW TO USE

Prior to lowering to the bottom: The upper stand-off should be in the normal position with the top hook leader fully extended. The stand-off will keep tangles to a minimum.

Prior to casting: Tangles are normally incurred when casting. This can be reduced by setting the adjustable upper stand-off to the lowered position. The hook must be baited. The stand-off will return to its normal position with the leader fully extended before reaching the bottom.
