This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Students come to graduate and professional school energized and eager to learn. How does graduate school transform so many students into anxious and overwhelmed learners? How can we reimagine graduate education in a way that supports both rigorous education and wellbeing? Applying problem solving tools, students from law, education, social work, the humanities, and other fields will grapple with how to redesign the university to help graduate students flourish to address this structural challenge.								
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.								
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 15-30, 2021. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Slavery Legacies Built Env This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.								
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.								
Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu .

Chemical Engineering Department

Chemical Engineering (CHE) Open Sections

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS) Open Sections

For any EECS course, the EECS department may give away a student's seat in a class if the student does not attend the first week of lectures and labs/discussions. In addition, it is up to the discretion of the course instructor to determine whether or not to allow a student to enroll in an EECS course after the first week of classes.

Note that the EECS department may withdraw you from the class, but the department is not obligated to withdraw students from the course even if a student has been informed that his/her seat is no longer available. Students are responsible for the accuracy of their own schedules.

This section (038) is reserved for CSP students during the early registration period. Any undergraduate student may join the waitlist once the section is closed. Given the enrollment restrictions, most sections may not close until early August. On 08/16/2021 any remaining available seats will be released for any undergraduates who wish to register. Waitlisted students should attend the first class meeting for override consideration.

STUDENTS MUST ELECT DISCUSSION AND LECTURE SECTIONS. In order to meet demand, this additional section will allow students to attend lectures that will be livestreamed from 12:00-1:30pm. If students want to attend in person, they can to the extent that physical seats are available. However, students enrolled in the in-person section will be given priority. Students in this section will be able to ask questions through a webinar interface and receive an answer in real-time from an instructor. In addition, if students are unable to attend in person due to seat availability, instructors will be available for group Q&A. Please note that students in all sections are expected to attend discussion in person. All exams will also be administered in person. All major restrictions and prerequisites are strictly enforced. For policy questions, please contact the CSE Undergraduate Advising Office.

STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT A LABORATORY. This is a hands-on lab-based course. Students will be largely expected to be in the lab during the designated times to do their hands-on projects and have teaching staff support during the lab to provide guidance. The course will be run in conjunction with ROB 550, sharing lecture materials, though the projects will differ. The lectures will be provided as recordings. Students can reach out to instructors for any clarification or meet them during the lab. If lecture room space permits, students can also attend ROB 550 lectures live (see schedule for ROB 550) that shares lecture material with EECS 467.

Thermodynamics, kinetics and p										
Thermodynamics, kinetics and properties of amorphous solids.										
Formation of atomic and molecular amorphous solids from the gas, liquid and solid phases; thermodynamic and kinetic stability; experimental characterization techniques; theoretical and numerical modeling of the atomic structure and mechanical and electrical properties; recent research results.										
28378	P LEC 019 MW	12-130PM	3433 EECS	Laine	15	N				
Battery Basics										
Battery Basics - The electrification of society is proceeding at an extremely rapid pace. There are insufficient numbers of people trained in battery technologies to meet the growing need for individuals with the basic knowledge needed to serve society at entry level positions and above. This course is designed to provide, initially, basic understanding of battery design, assembly, and testing to entry level individuals. As time goes on, an advanced level of sophistication will be implemented based on learning from this first course.										
As envisioned, lectures provided will enable individuals to acquire basic knowledge that can eventually be used to qualify for a practical course in battery assembly and testing.

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

Remote sections are reserved for students who cannot attend in-person												
17515	A LEC 001	MW	1130-1250PM	REMOTE	Schueller							
Remote lecture will be on Zoom and recorded for those who are absolutely unable to attend synchronously. Remote lab sections are for those students who cannot attend in-person; remote students are expected to be able to attend on Zoom synchronously during the scheduled lab time. Do not expect to take a different class during remote meeting times! In-person lab sections (room "TBA") meet only outdoors at sites within walking distance of campus, and section times include travel time to and from the site to campus. During the second 7 weeks of class: Both In-person and remote students will meet remotely during lab section times for project planning, analysis, and presentations.												
THIS COURSE IS RESTRICTED TO 1st YEAR SEAS MASTERS STUDENTS

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Students come to graduate and professional school energized and eager to learn. How does graduate school transform so many students into anxious and overwhelmed learners? How can we reimagine graduate education in a way that supports both rigorous education and wellbeing? Applying problem solving tools, students from law, education, social work, the humanities, and other fields will grapple with how to redesign the university to help graduate students flourish to address this structural challenge.									
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 15-30, 2021. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Slavery Legacies Built Env									
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will									

CAT#	Course Title						CR	PREREQ	LAB FEE		
Class #	CODE	CMP	SEC	DAYS	TIME	LOCATION	INSTRUCTOR		OPEN SEATS	WL	

create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu.

32981	PD LAB 002 W		315-630PM	0220 JEFFRIES	Hannon, Schram, Carr	1	N		
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Students come to graduate and professional school energized and eager to learn. How does graduate school transform so many students into anxious and overwhelmed learners? How can we reimagine graduate education in a way that supports both rigorous education and wellbeing? Applying problem solving tools, students from law, education, social work, the humanities, and other fields will grapple with how to redesign the university to help graduate students flourish to address this structural challenge.									
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 15-30, 2021. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .									
37112	PD LAB 005 W		315-630PM	1070 JEFFRIES	CdeBaca	3	N		
Slavery Legacies Built Env									
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.									
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu .

Literature, Sci, and the Arts

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND:

---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;

---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;

---THE FIRST TWO MEETINGS OF HISTORY 496 AND 497;

---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;

---THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

The majority of seats for this section are reserved for students in the Comprehensive Studies Program. A limited number of seats are available to any undergraduate student during early registration.

15 seats reserved for any CSP students,
5 seats reserved for any undergraduate students.

Any undergraduate student may join the waitlist once the section is closed. Given the enrollment restrictions, most sections may not close until early August. On 08/23/2021 any remaining available seats will be released for any undergraduates who wish to register. Waitlisted students should attend the first class meeting for override consideration.

--SECTION 400 - STUDENTS MUST ELECT DISCUSSION 410-414. The intensive lecture section (Section 400) is intended for those students who would benefit from a smaller lecture section (maximum 100 students) and more lectures so that the pace is slower and there is more feedback. This section is reserved for CSP students and students who have placed into CHEM 130.

<p>Do not hesitate to register because of exam time conflicts; we offer same-day alternate exam times. Information about alternate time exams will be provided by instructors after the semester begins.</p>

English Language Institute

English Language Institute (ELI) Open Sections

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Students come to graduate and professional school energized and eager to learn. How does graduate school transform so many students into anxious and overwhelmed learners? How can we reimagine graduate education in a way that supports both rigorous education and wellbeing? Applying problem solving tools, students from law, education, social work, the humanities, and other fields will grapple with how to redesign the university to help graduate students flourish to address this structural challenge.								
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.								
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 15-30, 2021. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Slavery Legacies Built Env								
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.								
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.								
Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu .

History Department

History (HISTORY) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS.
 --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.
 --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

For Fall 2021: During the Fall term, we will meet both in an in-person format and remotely via Zoom meetings. In both modes of meeting we will collaborate, discuss and work in small group activities.

French (FRENCH) Open Sections

--A student who misses either of the first two meetings of any course offered by the Department of Romance Languages may be dropped from the course for non-attendance.
 --Students with any previous study of French must take the French placement test before enrolling. Placement test dates are online at:

www.lsa.umich.edu/rll/undergraduate/languageplacement/languageplacementtests.

--All students must take action through the registration system to make sure that their official schedule of courses matches the courses they are attending.

Spanish (SPANISH) Open Sections

--A student who misses either of the first two meetings of any course offered by the Department of Romance Languages may be dropped from the course for non-attendance.
 --Students with any previous study of Spanish must take the Spanish placement test before enrolling. Placement test dates are online at:
www.lsa.umich.edu/rll/undergraduate/languageplacement/languageplacementtests.
 --All students must take action through the registration system to make sure that their official schedule of courses matches the courses they are attending.

Sweetland Center for Writing

Gayle Morris Sweetland Center for Writing (WRITING) Open Sections

100	Practice of Writing		3.00						
11089	PI REC 002	TTH	2-3PM	G421B MH	Piippo			2	Y

Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.

It is department policy that registered students must participate in the first two class sessions or activities in whichever format offered by the instructor or notify the instructor that they will be unable to do so and why. Failure to do so may result in the student being dropped from the course.

Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.

Meditation and the Mind										
This course will meet in 4129 Undergrad Science Building. This course is pass/fail ONE credit course.										
Your Mind: An Objective and Subjective Approach to Studying Brain Function During Meditation										
Throughout recorded history, meditative practices have been used to generate insights into the mind and human consciousness. For example, tenets of Buddhism hold that meditation can be used as a tool for self-exploration and alleviation of pervasive suffering. These ancient practices remain applicable today, as they are able to provide perspective on and treatment for common issues including stress, anxiety, and depression. The main purpose of this practice-based course is to explore one's own subjective mental processes through meditation and journaling. Students will explore various forms of meditation and movement to help build an individualized and useful meditation practice. Complementing this self-exploration, we will touch upon brain neuroimaging findings of novice and experienced meditators as well as examine the known benefits of meditation for pain, depression, anxiety, and stress using data from human clinical trials. At the end of this class, students will walk away with a greater scientific understanding of meditation and the fundamentals of a personal meditation practice that can be pragmatically applied, both professionally and in daily life.										
This course is open to all graduate students at UM. For more information, please contact course instructors Dr. Richard Harris (reharris@med.umich.edu) or Dr. Kevin Boehnke (kboehnke@med.umich.edu).

Neural Basis of Consciousness										
The nature and the neural basis of consciousness is a foundational question in neuroscience. As a scientific inquiry, it speaks to the existence of reality as we perceive it, and from a translational and therapeutic perspective, a fundamental understanding of the biological basis of consciousness has implications for disorders ranging from psychiatric disorders to the disorders of consciousness. In this course, we will start with a brief overview of the current neuroscientific frameworks and theories to study consciousness, and then as we move forward, will discuss the recent literature on the neurobiology of physiological (sleep), pharmacological (anesthesia, psychedelic states), and pathological states (coma, vegetative state) of consciousness. The students will participate in discussion and presentation of recent relevant literature.										
What: NS704, The Cognitive Neuroscience of Consciousness										
Who: Neuroscience and psychology students (and other interested people)										
When: Fall semester, Wednesdays at Noon										
Where: Medical School, Med-Sci I, 7th floor conference room (#7433D)

Psychedelic Neuroscience										
Psychedelic neuroscience is one of the most dynamic fields in 21st century neurobiology. This course will examine current research on canonical and non-canonical psychedelic drugs as well as the psychedelic experience itself. The focus will be on systems neuroscience, including studies on neurophysiology, neuroimaging, and circuit-level mechanisms. Multidisciplinary engagement is welcomed but the course is designed primarily for graduate students in a related field (e.g., neuroscience, pharmacology, psychology, physiology).

406	Extreme Physiology					3.00	ENFORCED					
25150	PDR LEC 001	TTH	10-1130AM	ARR	Oakley			17				Y
The course is a mixture of undergraduate (Physiology 406) and MS in Physiology (Physiology 506) students. It is predicted that half the open registration slots for combined Physiology 406/506 will be open for Physiology 406. Because the combined Physiology 406/506 course is restricted to a limited number of students and Physiology 506 is a required course for a subset of master's students (whose course schedules are not set until the end of summer term), enrollment for Physiology 406 IS BY WAITLIST ONLY. Overrides will be issued by the department as space becomes available, which may occur after the first course meeting. As such, interested students on the waitlist must attend the first class. An enrolled student who does not attend the first meeting may be dropped from the course for non-attendance. Students will be notified and given 2 days to use the override, after which the spot will go to an alternate student on the waitlist.												
505	Physiol Lab					2.00	ADVISORY, ENFORCED	270.00				
23263	PIR LAB 001	F	1230-330PM	ARR	Houchin			13				N
Classes will be held in 3797 Med Sci II.												
506	Extreme Physiology					3.00	ENFORCED					
25151	PDR LEC 001	TTH	10-1130AM	ARR	Oakley			16				Y
Students must attend the first class; an enrolled student who does not attend the first meeting may be dropped from the course for non-attendance. Undergraduate students are not eligible to register for Physiology 506; they are eligible to register for Physiology 406.

Music, Theatre & Dance

--Performance Instruction in the School of Music (Individual Studio Assignment in Music Performance): All students requesting performance instruction must apply online at <https://smt.d.umich.edu/current-students-2/policies-procedures/academic-procedures/#mfw-accordion-action-11>, click on the 'students' tab and then click on the 'online individual studio assignment in music performance' form. Do not register until you have received an email verifying placement in a studio.

Department Of Dance

Dance (DANCE) Open Sections

100	Intro to Dance	1.00	ADVISORY				
19478 P	LAB 001	MW	9-10AM	DANCE STUDIO 1	O'Donnell she-her	11	Y
Musical Theatre Students will learn original musical theater dances with an emphasis on musicality, specificity, and embodiment of character. We will survey seminal performances, identify choreographic styles, and consider how dance drives a drama forward.							
35051 P	LAB 014	TTH	12-1PM	DANCE STUDIO 3	Howard	14	Y
Improvisation Improvisation: Be Ready							
In this class, we will engage in exercises and improvisational structures to heighten our awareness, broaden our individual movement vocabulary and develop our skills in instant composition. We will play, sing, write, create scores, use objects, prompts, and other experimental approaches to share space and be present with each other.							
35052 P	LAB 015	TTH	1-2PM	DANCE STUDIO 3	Rutherford	21	Y
African/Modern Fusion This beginner level course will introduce students to dance styles originating from the African Diaspora. Students will learn fundamentals of movement derived from West African, Caribbean, and African American forms and will gain historical and cultural context of these styles. Throughout the course, we will discover how these techniques inform and influence American modern dance and use those principles to create unique and diverse movement scores.							
Throughout this course students are encouraged to take their own self exploration through movement, history, and culture. Dance is deeply informed to our personal experiences, where our ancestors are from, and where we hope to end. This course will be a quest of how we transform and develop as individuals through movement and dance.							
20062 P	LAB 002	MW	9-10AM	DANCE STUDIO 4	Mitchell	12	Y
Tap This is an introductory level course that will cover the history and fundamentals of tap dance. We will focus on rhythm, musicality, and basic tap technique. We will also discuss the evolution of tap dance from its folk origins to the hoofing and Broadway styles popular today. This class will improve your rhythm, coordination and expand your knowledge of American tap dance. No prior dance experience is required. Tap shoes are recommended but not required. Class will culminate in a virtual performance of the historic tap dance the Shim Sham Shimmy.							
19479 P	LAB 003	MW	10-11AM	DANCE STUDIO 3	O'Donnell she-her	6	Y
Contemporary Class will begin with a gentle warm up using elements of yoga and dance to increase strength, alignment, balance, flexibility and well-being.							
Students will learn and perform original choreography that pulls from modern, ballet, jazz, social dance, and commercial dance techniques, set to a variety of musical genres.							
Basic improvisation and floor work will be incorporated, and most importantly, musicality, expression, and the joy of movement!							
19480 P	LAB 004	MW	10-11AM	DANCE STUDIO 1	Miao	10	Y
Modern Taught by dance students enrolled in DANCE 481.001.							
19481 P	LAB 005	MW	11-12PM	DANCE STUDIO 3	Taylor	19	Y
West African In this course we will uncover the history, context, and techniques of several West-African rhythms and dances that derive from the African civilizations associated with the people of modern-day Ghana, Guinea, Mali, and Senegal. Throughout the semester we will focus on the polyrhythmic nature of the dances, songs, rhythms, folklore traditions, customs, and music. Together as we journey throughout the entirety of this course, we will grow to develop a deeper understanding and appreciation of West-African music, dance, and culture.							
19482 P	LAB 006	MW	2-3PM	DANCE STUDIO 4	Taylor	17	Y
Healing Dance and Drum Circle We will sing, we will dance, we will make our own music, and beat our own drums utilizing common household items that are often overlooked. Together we will share our voices, ideas, and dances we create as we offer them to the community we cultivate together. Healing Dance Sessions is a course that brings the intention and concept of ritual into multiple contexts to embrace student points of view. This improvisational dance class is designed to get us up and moving while we cultivate healing movement that can be comforting during troubling times.							
19483 P	LAB 007	MW	3-4PM	DANCE STUDIO 4	Rosario	7	Y
Hip Hop							
19485 P	LAB 009	MW	10-1145AM	DANCE STUDIO 4	Mitchell	18	N
Body Language Body Language is a Detroit-based dance practice originally offered by The Body Shop Xperts that incorporates elements of contemporary dance, jazz-funk, improvisation, and commercial dance to empower students to explore							

CAT# Class #	Course Title CODE CMP SEC	DAYS	TIME	LOCATION	CR INSTRUCTOR	PREREQ	LAB FEE OPEN SEATS	WL
<p>sensuality through movement and performance. This class invites people of all shapes and sizes to embrace their bodies as beautiful instruments for dance, resulting in the development of full-body awareness, and confidence. Students can expect to reflect on personal ideas of sensuality and sexuality, explore how to embody sensuality through movement, and learn to fully express sensuality through learning and performing choreography. The course will focus on posture, walking/moving with confidence, musicality, dynamics, isolations, undulations, lines, and increasing flexibility and strength. Heels are encouraged but not required. This class will also discuss Body Language?s relationship to and definition of commercial dance and explore commercial dance in comparison to concert dance. Brief reading and writing assignments may inform the work in the studio. This course will culminate in the sharing of technical accomplishments and creative work. that incorporates elements of contemporary dance, jazz-funk, improvisation, and commercial dance to empower students to explore sensuality through movement and performance.</p>								
19486	P LAB 010	TTH	9-10AM	DANCE STUDIO 4	Rutherford		22	Y
<p>Afro-Jazz</p>								
20244	P LAB 011	TTH	10-11AM	DANCE STUDIO 4	Wang		23	Y
<p>Chinese Folk</p> <p>In this course, we will focus on Xinjiang Uyghur dance, which is one of the 56 nationalities dance styles in China. Through practicing movements, watching documentary videos, and enjoying the traditional Chinese music, and learning the Chinese language, the studio space can bring up a traveling experience. This course will guide students to experience a new culture and explore the rich dance traditions of China?s numerous ethnic tribes and nationalities.</p>								
20245	P LAB 012	TTH	11-12PM	DANCE STUDIO 4	Howard		7	Y
<p>Contemporary</p> <p>Contemporary: Studies of Release Technique</p> <p>In this class, we will study Release technique, which focuses on the principles of ?ease of movement? and ?fluidity?. With breath as the instigator of movement, students will learn to minimize tension in the body, allowing freedom of movement and the release of body weight into the floor. We will work with energy, gravity, and momentum to create dynamic movement.</p>								
23068	P LAB 013	TTH	2-3PM	DANCE STUDIO 4	Wilson		6	Y
<p>Modern</p> <p>Taught by dance students enrolled in DANCE 481.002.</p> <p>This introductory course in Modern Dance explores the art form of Modern Dance as a studio practice. We embrace the creative source of modern dance (Improvisation, Expression of the Inner Self, & Imagination) as well as its movement techniques and concepts. Students will learn a variety of basic movement vocabularies through movement exercises & phrases. Through improvisation and exploration of basic movement concepts, you will create a group composition as a final project, performed at the end of the term. Throughout the semester, we will observe dance on video, in performance; read about and discuss dance. But mostly, we will dance ?sweat, and jump, and slither, and extend, and shape, and curve, and splash, and slice, and laugh ? (a lot!) Because you can?t really understand dance unless you experience it. The course will be team-taught by advanced dance majors under the supervision of this instructor.</p>

Character Dance

This class is a technique class where you will explore rhythm, steps, movements of the arms and upper body. You will learn and develop characteristic nuances of Polish, Russian, Hungarian, Italian, and Spanish national dances among others. The focus of the class will be on musicality, proper alignment, use of upper body and head, coordination, and precise rhythms, all accompanied with live music!! And most of all to express a joy of the movement and having fun!! The class consists of stylizations of folk dances as danced on the concert stage. Everybody can learn and benefit from this class!

We will cover Barre work (set of combinations to learn particular steps from simple to more difficult), Center work (either in place or travel), and explore basic movements and steps from simple to more difficult combinations from Mazurka, Czardas, Tarantella, Spanish, and Russian dances. Also turns, stamping, and jumps.

Anatomy and Physiology for Dancers

Course Description:

The Dancer is a body-aware performer, who requires understanding of how their body works and knowledge of how the different parts of their body work together to optimize their movement. This course will give an overview of the musculoskeletal anatomy and its association to movement, common dance injuries linked to specific anatomy, with interaction of physiological systems into whole body anatomy. Injury risk screening will also be discussed to assess understanding of this material and its application to the individual dancer.

Upon completion of this class, you should be able to:

- Describe anatomical positioning, planes of motion, and basic joint movements.
- Summarize and comprehend musculoskeletal anatomy pertinent to dance movement.
- Recognize the anatomy of the Nervous, Lymphatic, Circulatory, Respiratory, Integumentary Systems and contributions toward dance movement and injury.
- Realize the effects of injury on body tissue and systems and the timeline of body tissue healing.
- Understand what happens anatomically in concussion and how to utilize return to learn and return to performance progressions.
- Express areas of concern to screening the body for musculoskeletal injury risk and how it relates individually to the dancer.

191	1st Year Seminar	2.00							
34981	PD SEM 001	T	4-545PM	2032 MOORE	West			5	N

This course is designed for first-year and transfer students to navigate through their first semester as college students. Throughout the course, students will be provided with tools to make informed choices about nutrition, injury prevention, balancing physical practice with academic requirements, and will be taught how to navigate advanced studies in dance within the university culture.

201	Modern Dance II	1.00	ADVISORY						
12955	PD LAB 001	TTH	10-1145AM	DANCE STUDIO 1	Gillen she-her			15	Y

Partnering/You Me Us

The aim of this class is to nurture the industrious technical baseline of partnering and align it with our shared risk-taking and choice-making sensibilities, in essence to activate adaptable and dynamic partners. We begin by generating heat via contact based exercises, sustaining tensile strength while others push, pull, pivot, and slide. We will become builders of evolving architecture that is made possible through collaboration. We will continue to awaken our ability to read each other through sequences/prompts that traverse the space together in tandem. This training is simultaneously coupled with improvisational and awareness propositions that aim to awaken the senses and their direct relationship to moving with another body. These opportunities reach beyond the singular agency of choosing for oneself and extend it to the composite understanding of shared decision making, of choice/consequence; this brings dancers' natural empathic acumen to the community level. Dancers learn to move with one another, not alongside, and they work to deepen their availability to witnessing others and to truly being seen themselves. Contact, connection and exchange are the primary engines for our exploration. Sharing weight and riding momentum, along with the playful study of our shared physics, will foster new awareness and possibilities in the moment. Emphasizing the listening skills between dancers, the class builds into complex duet/group phrase work drawn from Gillen's latest choreographic research. Traversing surprising and challenging landscapes of size, direction, tone and texture, each duet will reset the limits of their trust and reliability. Sweat, surprise and full-bodied ardor awaits.

203	Modern Dance II	1.00	ADVISORY						
19490	PD LAB 001	MW	12-145PM	DANCE STUDIO 1	Rosario			20	Y

Essence of Groove

This course will explore the nature of movement in spaces inspired by rhythm and expression of emotion. These spaces include nightclubs, festivals, and social gatherings. The terms groove and groovin? have various meanings that still continue to evolve over time. We will experiment with these definitions and their relationship to movement and interaction. This class is not defined by any particular movement style, but will have influences in funk, jazz, soul, disco, hip-hop, west-african, afro-caribbean and anti-pop. Dancers will be asked to utilize improvisation and to exercise creativity as they learn choreography and movement scores.

Beginner/Int. Concert Jazz

Beginner/Intermediate Concert Jazz Dance will cover the basics of "classic" jazz dance with a focus on performance. Styles/Jazz dance choreographers that will be covered include; Fosse, Luigi, Frank Hatchet, Fred Benjamin, Gus Giordano and more. Music from the 1940's to present day will be explored through this dance form. Please join me and a few special guests as we dance our way through the Lindy hop and swing eras to the present day!

Body Language								
Body Language is a Detroit-based dance practice originally offered by The Body Shop Xperts that incorporates elements of contemporary dance, jazz-funk, improvisation, and commercial dance to empower students to explore sensuality through movement and performance. This class invites people of all shapes and sizes to embrace their bodies as beautiful instruments for dance, resulting in the development of full-body awareness, and confidence. Students can expect to reflect on personal ideas of sensuality and sexuality, explore how to embody sensuality through movement, and learn to fully express sensuality through learning and performing choreography. The course will focus on posture, walking/moving with confidence, musicality, dynamics, isolations, undulations, lines, and increasing flexibility and strength. Heels are encouraged but not required. This class will also discuss Body Language's relationship to and definition of commercial dance and explore commercial dance in comparison to concert dance. Brief reading and writing assignments may inform the work in the studio. This course will culminate in the sharing of technical accomplishments and creative work. that incorporates elements of contemporary dance, jazz-funk, improvisation, and commercial dance to empower students to explore sensuality through movement and performance.

Ballet Fundamentals This course is designed to impart a strong foundation in ballet technique. Students will gain proficiency in foundational steps, positions, transitions, and concepts of ballet technique. Throughout the semester, we will be building a vocabulary of ballet steps, combinations, skills, terminology, and concepts of movement. We will explore how barre work imparts transferrable skills for center work. Ballet specific conditioning exercises and ideokinesis work will function as an integral part of the class because it allows the student to isolate and identify proper initiation and flow of specific movements. Additionally, each student will be challenged to work with the proper alignment for their specific body. We will also be exploring the artistic elements beyond the technique, that is, how to dance with personality and with a sense of performance. Both skills ? technique and artistry ? must develop simultaneously and not one at a time. Be prepared to be an active participant in the learning process. Progress in ballet technique is achieved through a commitment to consistent cognitive, physical, and mental daily practices which include: repetition, rigor, attention to detail, and growth mindset. Integral to these explorations will be the expansion of flexibility and muscle-coordination and the development of the student's willingness to cultivate a self-reflexive practice to enhance student centered learning strategies. These include; self-correction, self-praise, learning how to listen to your body and responding by choosing self-care.

Community Engaged Pedagogy This course will meet in the Dance Conference Rm.								
This course will provide students in the Dance BFA program with opportunities to teach and learn in multiple community settings throughout SE Michigan. It will serve as a precursor for the current pedagogy requirement, Teaching Methods, and will prepare them for more advanced teaching principles.

This class is a technique class where you will explore movements, and channel your own energy and artistry within the rules of classical ballet of A. Vaganova's methodology. The focus of the class will be on strengthening the dancer's technique, proper alignment, core strength, coordination, feeling of long lines, musicality, versatility/understanding of ballet techniques.

Partnering/You Me Us The aim of this class is to nurture the industrious technical baseline of partnering and align it with our shared risk-taking and choice-making sensibilities, in essence to activate adaptable and dynamic partners. We begin by generating heat via contact based exercises, sustaining tensile strength while others push, pull, pivot, and slide. We will become builders of evolving architecture that is made possible through collaboration. We will continue to awaken our ability to read each other through sequences/prompts that traverse the space together in tandem. This training is simultaneously coupled with improvisational and awareness propositions that aim to awaken the senses and their direct relationship to moving with another body. These opportunities reach beyond the singular agency of choosing for oneself and extend it to the composite understanding of shared decision making, of choice/consequence; this brings dancers' natural empathic acumen to the community level. Dancers learn to move with one another, not alongside, and they work to deepen their availability to witnessing others and to truly being seen themselves. Contact, connection and exchange are the primary engines for our exploration. Sharing weight and riding momentum, along with the playful study of our shared physics, will foster new awareness and possibilities in the moment. Emphasizing the listening skills between dancers, the class builds into complex duet/group phrase work drawn from Gillen's latest choreographic research. Traversing surprising and challenging landscapes of size, direction, tone and texture, each duet will reset the limits of their trust and reliability. Sweat, surprise and full-bodied ardor awaits.								
20250	PD LAB 003	F	12-2PM	DANCE STUDIO 2	Rush		32	Y
Taoist Improv We will explore spontaneous theatre/dance/sound or "improvisation". The approach delves into the notion of "Mindfulness", focusing primarily on Taoist readings from the Tao Te Ching, as well as influences from Hinduism (the Bhagavad Gita and Patanjali Yoga Sutras), which in turn point to later Buddhist readings and approaches. The class is for anyone who likes to make sound or move through space.

Spanish Fingerstyle & Arrange

No Instructor Approval Needed To Enroll. Prerequisite: Guitar 111 or equivalent guitar experience recommended

Designed for both music majors and non-music majors, this intermediate course in Spanish/Classical guitar style will teach students new performance skills and repertoire, as well as build a deeper understanding of the multi-cultural and geographical influence on guitar music. Students will learn to read standard music notation and tablature, learn a variety of pieces from various musical time periods, study some of the most important and influential composers and performers of classical guitar music, and create an original solo guitar arrangement of a popular, traditional, film or video game composition. Important music theory topics related to the classical guitar will also be discussed. Optimized for online learning, web based video lessons and individual instruction will be available throughout the semester to ensure that all students are able to receive the specific help needed for a successful and positive experience in the class.

Fund Rhythm A

Fundamentals of Rhythm A: The Grid

This course is taught entirely by ear, without instruments or written materials. We will explore rhythms on human made grid systems such as even pulses, quantized subdivisions, metric cycles and song forms. Students will develop rhythmic accuracy, beginning with linear figures and working towards polyrhythmic structures. Special emphasis will be given to rhythmic concepts from India, West Africa, and other oral traditions that fall outside of the typical Western canon. All work will be done with singing and clapping in order to develop hearing, memory, and internalization. The second semester will continue with "Fundamentals of Rhythm B: The Continuum."

Intro-Digital Media for Design								
Introduction to Digital Media will teach students the technical and artistic ways that digital images and motion graphics are used for entertainment design and live performance. The course will introduce students to industry standard software for creating images and multi-media content, with detailed instruction in Adobe Photoshop and After Effects.								
26297	P REC 006	MW	1-3PM	KEENE AUD EQ	Mendeloff		6	Y

Image of the American Family								
This interdisciplinary course examines practices, processes, and theories of producing independent theatre and performance in the United States in the 21st Century. The course will include theoretical readings and discussions, occasional field trips to Detroit, and guest speakers from the Detroit cultural landscape. The term "producer" will take on all the many forms it does in the theatre -- producer of: artworks, goods, services, spaces, experiences, capital, etc. Students will be expected to produce scholarly as well as creative responses to course material.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Students come to graduate and professional school energized and eager to learn. How does graduate school transform so many students into anxious and overwhelmed learners? How can we reimagine graduate education in a way that supports both rigorous education and wellbeing? Applying problem solving tools, students from law, education, social work, the humanities, and other fields will grapple with how to redesign the university to help graduate students flourish to address this structural challenge.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 15-30, 2021. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Slavery Legacies Built Env

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu.

Slavery Legacies Built Env

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu.

Communicating through visual presentation of data is a critical skill in a variety of industries. This course will introduce students to data visualization, from principles to practice. Topics in the course will include: principles of data communication, understanding types of data, grouping and summarization, static presentation of data, dynamic presentation of data, interactive presentation of data, presentation of model results and estimates, and matters of accessibility and style. You will be asked to examine and critique existing work and practice creating visualizations of your own. You will also be introduced to a variety of commonly-used software for data visualization.

Writing about Int'l Relations Topic: Writing Persuasively About International Relations										

It's been decades since the United States has faced such a critical mix of foreign policy challenges as today. This course aims to ensure students are equipped to take policy positions on foreign policy and defense issues and argue their cases cogently, clearly and effectively in the format of newspaper editorials and op eds. Writing for general interest publications is very different from academic writing and is an essential skill regardless of how your careers evolve. As a basis for these opinion pieces, we will examine an array of current challenges -- including threats to democracy, Iran's nuclear ambitions, the new Cold War with Russia and growing competition with China. How would you propose that Congress, the president, the United Nations, Beijing -- or any other major player -- act to address these challenges? The course will feature guest speakers who are prominent experts in their fields, specific readings for each class and regular discussion of news and opinion coverage by major publications. We will study the elements of effective opinion pieces and the best and worst examples of the genre. Students can expect 3 or 4 600-800 word assignments that offer students the chance to improve their writing skills as well as their ability to think critically about foreign policy. Each assignment has 2 parts: a draft that I will edit and give back and a rewritten final version.

476	Applied Learning	1.00								
25221	P R SEM 001 T	230-350PM	1120 WEILL	Sanders			5	Y		
Applied Learning Seminar This is a required course open only to current Ford School BA students.										

- Course Objectives:
1. Students will explore their social identities, values and emotions about a public policy issue and examine the factors that have contributed to their beliefs.
 2. Students will gain an understanding of the ways their beliefs and emotions are embedded in social networks and shared values.
 3. Students will learn to consciously employ effective communication (i.e. reflection, empathy, asking, and listening), as a tool for understanding public policy debates and advancing public policy solutions.
 4. Students will practice using narratives, reframing, and dialogue to work across differences.

This course is an introduction to programming in the R statistical language. R is a flexible, open-source statistics platform which has gained broad adoption in a variety of fields. Through interacting with R, RStudio, and elements of the Tidyverse (a collection of R packages for data manipulation, analysis, and visualization), students will learn the fundamentals of working in R. By completing this class, students should have the baseline skills necessary to continue their self-study in R on topics suited to their own interests. This course covers fundamentals of programming in R, object types and structure, import and use of packages for expanding R's capabilities, data management, and basic analysis. The course is graded credit/no credit (pass/fail), with weekly review tasks in R. Students are not expected to have prior experience in R or other programming, but familiarity with basic concepts in statistics is recommended.

Combined w/ PubPol 577.

Policy Seminar: Engaging the Public in Policy Making								
<p>The practice of public participation seeks to engage the public in decision-making about policy that affects them, or about which they have a special interest. This may occur at any level of government (federal, state, city, town), to varying extents, and with a variety of goals and tools. This course will explore the strategies commonly used to engage the intended targets of a new policy in policy-making and programmatic design both at the domestic and international levels. Topics include the 'why' and 'when' of participation within the policy process, design of participation activities, tools for engagement of participants, analyzing and using public insight, as well as key challenges of public participation such as ensuring representativeness, equity, and inclusion within participation activities. Students will delve into ethical issues inherent in balancing 'how much', 'when', and 'whose' participation is sought within a given context. Students will engage in theoretical and case-based work, and will practice designing, implementing, and analyzing outcomes from participation activities via simulation activities. Students will also be expected to hone their policy writing skills through written reflections and by developing a public participation manual in teams of 2-3. The manual will be drafted in sections throughout the semester, after which students will revise each section based on feedback for inclusion in the final manual.</p>

<p>This course examines the policy issues of international trade, including trade in both goods and services and also international flows of direct investment and migration. It builds on microeconomic theory, first to examine the basic theories of international trade and factor movements, including the classic Ricardian theory of competitive advantages, the neoclassical factor proportions theory, and the New Trade Theories that incorporate increasing returns to scale, imperfect competition, and product differentiation. These models are then used to examine the major policies and institutions that constrain and influence international trade and factor movements. Special attention is given to the WTO, to various elements of U.S. trade policy, and to the growing number of regional arrangements such as the European Union and NAFTA. Empirical evidence and applications of the theories are addressed, including their applicability for less developed and emerging economies. Although the major emphasis of the course is on the microeconomics of international transactions, a portion of the course will also put this into macroeconomic context. Topics here include the role and determination of exchange rates in the world economy, as well as how international movements of financial capital interact with trade and exchange rates in determining the balance of trade and the vulnerability of a country's macroeconomic variables to events abroad. This course presumes a prior knowledge of intermediate economics.</p>								
554 27435	Econ for Pub Affairs P R LEC 001 MW		10-1120AM	1110 WEILL	3.00 Leiser		11	Y
This class is open to MPA students only.								
<p>This course teaches fundamental concepts in microeconomics that are essential to the study and practice of public policy and public management. Our focus is on real-world applications and answering the question: ?Why do people who care about public policy need to know microeconomics?? The primary learning objective of this course is for students to become comfortable applying economic models to real world policy issues. Careful attention will be paid to understanding key model assumptions and limitations, identifying and manipulating model parameters, adapting models to address novel situations, and using models to evaluate and compare policy options.</p>

Strategic Public Policy Consulting (SPPC) is an opportunity for students to conduct a faculty-supervised consulting project for a public, private, or non-profit sector policy organization at the local, state, national or international level. Projects range widely in policy area, level of quantitative analysis required, size, and complexity. All projects culminate in the publication of a final report and an oral presentation to the client.								
Students must also register for PubPol 778: Project Skills Workshop (1 credit).

This course seeks to make students sensitive to and articulate about the ways in which moral and political values come into play in the American policy process, particularly as they affect non-elected public officials who work in a world shaped by politics. Topics covered include the tensions between ethics and politics, an introduction to various moral theories that figure in contemporary policy debates, a consideration of the principal values that animate American politics, and issues and dilemmas in professional ethics. The course addresses issues that affect international as well as U.S. policy and politics.

Leading Across Difference Policy leadership impacts the lives of all people, everywhere. Creating inclusive and equitable policy is at the core mandate of 21st century policy leaders. This course will explore the urgent topic of leading across difference. This course will provide students with an opportunity to explore how their own identities shape their ability to lead across differences, engaging in effective collaboration across social, cultural and power differences. Successful leaders engender trust, empower others, and create the conditions for more and more varied people to thrive. To be truly inclusive, these leaders act as brokers, leveraging their experiences to help others understand their differences and have productive conversations across divides. Students will complete the Intercultural Development Inventory? (IDI) and then work through their customized Intercultural Development Plan with activities and self-reflections that developmentally build intercultural competence. Using the Deliberate Leadership? framework, students will explore case studies of real world policy leadership.

Topic: The Role of Courts in Human Rights								
<p>This course will explore the legal enforcement of those human rights that are fundamental and are the birthright of all human beings. We will review the international political and legal framework established over the past fifty years to protect human rights. We will home in on how effectively those universally-accepted legal norms are enforced. Conventional legal wisdom holds that where there is a right, there is a remedy. We will explore whether this is, indeed, true in the international human rights context. Specifically, the central inquiry of this course is what needs to be done to give legal effect to the moral norms that embody human rights and fundamental freedoms?</p> <p>Of those institutions of government charged with the responsibility of enforcing these moral norms, we will explore the particular role of the courts?international and certain domestic ones. In the area of human rights and liberties, the United States has traditionally been a beacon of hope. And so, we will be particularly attentive to the special role of the Supreme Court of the United States in giving meaning to the words of the Constitution and laws that guarantee basic rights.</p>

U.S. Diplomacy in the Indo-Pac								
Topics: U.S. Diplomacy in the Indo-Pacific								
Instructor: Ambassador Daniel L. Shields								
<p>The course will examine the past, present, and future of diplomatic interactions between the United States and the other nations of the Indo-Pacific region, starting with the 1951 signing of the Treaty of San Francisco that ended the state of war in the Pacific after World War II. We will evaluate 1) how current diplomatic problems in the region developed historically, 2) how governments are seeking to use diplomacy, amid constraints, to address such problems today, and 3) what conditions might make it possible for future diplomats to address effectively at least some of the unfinished business from the Treaty of San Francisco in 1951. The course will focus on matters involving Mainland Southeast Asia, Maritime Southeast Asia, and the Korean Peninsula.</p> <p>First, we will analyze diplomatic efforts to integrate Mainland Southeast Asia into a broader regional order. We will assess how problems involving Burma/Myanmar, including the Rohingya issue, hinder the integration of the Association of Southeast Asian Nations (ASEAN) today and consider what might be done in the future to address such problems.</p> <p>Second, we will analyze efforts to manage tensions in Maritime Southeast Asia, centering on the South China Sea. We will examine current attempts to conclude an ASEAN-China South China Sea Code of Conduct and evaluate how claims and conduct issues might be settled in the future.</p> <p>Third, we will discuss efforts to bring stability to the Korean Peninsula. We will examine the challenges the United States currently faces in resuming diplomacy with the Democratic People's Republic of Korea (DPRK) and consider what it might take in the future to resolve the DPRK nuclear issue diplomatically. Assignments will include policy papers, presentations, and participation in three in-class simulation exercises focusing on future diplomacy.</p>

Legislation and Regulation								
Legislation and Regulation								
<p>In the modern regulatory state, the rules that most profoundly shape private conduct come not from the common law but, instead, from legislatures and agencies. This class will explore the lawmaking function of these institutions and the virtues and vices of administrative governance. Among other things, the class will cover: the nature of the legislative process; statutory interpretation; the justifications for regulatory intervention; regulatory tools and strategies; the allocation of authority between legislatures and agencies; the varied forms of agency decision-making; and judicial review of agency decisions. In offering a survey of public law, the course will introduce students to the essentials of both statutory interpretation and administrative law.</p>

32982	PD LAB 002	W	315-630PM	0220 JEFFRIES	Hannon, Schram, Carr	1	N		
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Students come to graduate and professional school energized and eager to learn. How does graduate school transform so many students into anxious and overwhelmed learners? How can we reimagine graduate education in a way that supports both rigorous education and wellbeing? Applying problem solving tools, students from law, education, social work, the humanities, and other fields will grapple with how to redesign the university to help graduate students flourish to address this structural challenge.									
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 15-30, 2021. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Slavery Legacies Built Env									
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture is not value-neutral, that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.									
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Non-law graduate/professional students seeking to apply should contact problemsolving@umich.edu .
