### Who is Banksy ?

A famous Banksy's painting, Gaza

Banksy is one of the greatest street artists in the world, you can for example admire his work in London, NYC, Gaza... Although his work is globally famous, his name and face are a real secret. Native from Bristol (England), it is almost the only thing we know about him. Since his beginnings, years ago, his identity is still unknown, or at the least uncertain.

### Street and scene-artist ?

Earlier in the month, Craig Williams, a Scottish blogger, contacted the *Daily Mail*, asserting he had discovered the real Banksy's identity. As a matter of fact, after a long investigation, the man noted that the apparition of the artist's work, and a Trip-Hop (kind of hip-hop music) band's concert dates were simultaneous, and this on twelve occurrences. Other surprising fact, the music group is British, from the Bristol area. According to him, Robert del Naja, nicknamed « 3D », singer and co-founder of « Massive Attack », and Banksy would be the same person.

Hitchcock and the birds.

### « We are all Banksy »...

...Replied 3D in front of 27.000 spectators. « Banksy is a friend, and this hypothesis is based on coincidences. », so he buried the rumor.

The day after, a Banksy-styled painting appeared near where the concert took place :  
People think I'm BANKSY

"The master of Suspense" is one of the numerous nicknames of Alfred Hitchcock. Today he is recognized as one of the best directors in the world. Considered as a genius by the critics, he revolutionized the world of cinema with his famous movies: "Psychose", "North by Northwest" or "The Birds".

Alfred Hitchcock was born in 1899 in London (England) and he died in Bel Air (California) in 1980. He worked in engineering for a short time before entering in the film industry in 1920 as an assistant-director. In 1925, Hitchcock directed his first film and began making the "thrillers" for which he became known in the entire world. In the 1930s he directed such classic suspense movies as "The Man Who

*Knew Too Much*" (1934) and "The 39 Steps" (1935). In 1939 he left England for Hollywood, and his first movie: "Rebecca" (1940) which won an Award! In the 1960s he directed the most famous movies of his career "Psycho" (1960) and three years later "The birds" (1963).

### A critic of "The Birds"

This movie is nice to see, it shows Hitchcock's talent. He succeeds in scaring us with something such as basic as birds. The atmosphere of the movie is stressful and overwhelming. The love story is very classic and quite boring. But I would recommend you to see this movie.

Next issue : Tim Burton and his new movie : "Miss Peregrine's home for peculiar Children"
