Thermowells

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: February 26, 2016

This Code will be revised when the Society approves the issuance of a new edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee Web page and under go.asme.org/InterpsDatabase. Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME Web site under the PTC Committee Page at go.asme.org/PTCcommittee as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at go.asme.org/PTCcommittee. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword	v
Committee Roster	vi
Correspondence With the PTC Committee	vii
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
Section 2 Nomenclature	2
Section 3 Jurisdiction of Codes	4
3-1 Reference Standards and Governing Codes	4
3-2 Specification of Thermowells	4
Section 4 Dimensions	5
4-1 Configurations	5
4-2 Dimensional Limits	5
Section 5 Materials	10
5-1 General Considerations	10
Section 6 Stress Equations	11
6-1 General Considerations	11
6-2 Corrosion and Erosion	11
6-3 Flow-Induced Thermowell Stresses	12
6-4 Strouhal Number, Drag Coefficients, and Lift Coefficient	14
6-5 Natural Frequency of Thermowells	15
6-6 Mounting Compliance Factor	17
6-7 Unsupported Length, Diameter, and Fillet Radius	19
6-8 Frequency Limit	20
6-9 Magnification Factor	23
6-10 Bending Stresses	24
6-11 Pressure and Shear Stresses	28
6-12 Steady-State Static and Dynamic Stress Limits	29
6-13 Pressure Limit	31
Section 7 Overview of Calculations	32
7-1 Quantitative Criteria	32
7-2 Fluid Properties	32
7-3 Fluid Velocity	32
7-4 Material Properties and Dimensions	32
7-5 Reynolds and Strouhal Numbers	33
7-6 Natural Frequency at Operation Temperature	33
7-7 Natural Frequency at Expected Mode of Operation	33
7-8 Steady-State and Dynamic Stresses	33
7-9 Allowable Fatigue Limits	33
7-10 Pressure Rating	33
Section 8 Examples	34
8-1 Tapered, Welded Thermowell for a Steam-Header Application (U.S. Customary Units)	34
8-2 Step-Shank, Threaded Thermowell for a Hot Water Application (SI Units)	39

Section 9	Statement of Compliance	46
9-1	Specification of a Thermowell	46
9-2	Velocity and Pressure Ratings	46
Section 10	References	47
10-1	Referenced Documents	47
10-2	Referenced ASME Documents	47
Figures		
4-1-1	Schematic Diagram of a Thermowell	6
4-1-2	Examples of Straight-Shank Thermowells	7
4-1-3	Examples of Step-Shank Thermowells	8
4-1-4	Examples of Tapered Thermowells	9
6-3.1-1	Fluid-Induced Forces and Assignment of Axes for Calculation of Thermowell Stresses	12
6-6-1	Unsupported Length of Thermowells	18
6-8.1-1	Schematic Indicating Excitation of Resonances When Excitation Frequency Coincides With the Thermowell Natural Frequency	20
6-8.1-2	Schematic Showing the Amplitude Response of a Thermowell Subjected to Fluid-Induced Forces as Solid Lines, for In-Line and Transverse Excitation Modes	21
6-10.1-1	Bending Moment, Stress at the Support Plane, and Locations of Maximum Steady-State or Oscillating In-Line Stress	25
6-10.7-1	Mounting of a Thermowell in an Elbow, With the Tip Facing Downstream	27
6-10.7-2	Geometry to Be Used in Calculation of Thermowell Ratings	27
6-10.7-3	Mounting of a Thermowell in an Elbow, With the Tip Facing Upstream	28
Tables		
4-1-1	Dimensional Limits for Straight and Tapered Thermowells Within the Scope of This Standard	7
4-2-1	Dimensional Limits for Step-Shank Thermowells Within the Scope of This Standard	8
6-5.3-1	Parameters for Natural Frequency Calculation for Step-Shank Thermowells	16
6-12.3-1	Allowable Fatigue-Stress Amplitude Limits for Material Class A and Class B	30
Nonmandatory Appendix		
A	Conversion Factors	49
