Grill Gazebo W/LED

Congratulations on your purchase of our SUNJOY LED lighted grill gazebo. Our clear, easy to follow, step-by-step instructions will guide you through the assembly process from start to finish.

### **IMPORTANT:**

1. When installing and assembling your gazebo, it is recommended that two or more adults are involved.
2. Do not use the gazebo during an electrical storm, as there is a remote chance of getting struck by lightning.
3. Do not climb on top of the gazebo. Falling off the gazebo can result in serious injury, possibly even death.
4. Do not leave the gazebo assembled when there is a risk of high wind, as possible damage will occur to the structure.
5. Do not use lanterns that contain open flames.
6. This package contains small items and plastic bags that should be kept away from children.
7. Ensure that all connectors & poles are firmly secured in position fully.
8. **KEEP ALL FLAME AWAY FROM THIS SHELTER FABRIC.** The fabric may burn if it is exposed to prolonged contact with a flame source. The application of any foreign substance to the fabric may render the flame-resistant properties ineffective.
9. Requires 3 AAA batteries (not included).

### **USE & CARE:**

1. This gazebo is not a permanent structure. The canopy top should never be left on during periods of extended or heavy rain nor any inclement weather where high winds or wind gusts can occur. If left up, damage to the gazebo and surroundings can occur.
2. Do not repack your gazebo until completely dry.
3. Steel components for garden accessories and furniture are treated with rust inhibiting paint that protects them from rust. However, due to the nature of steel, surface oxidation (rusting) will occur if this protective coating is scratched. This is a natural process.  
To minimize this condition, it is recommended that care be taken when assembling and handling the product in order to prevent the paint from being scratched. Surface rust can be removed easily using a very light application of common cooking oil. If surface oxidation (rusting) occurs and no measures are taken to correct it, the oxidation may start dripping onto the deck or patio, which may cause damaging stains that may be difficult to remove.
