HOW TO USE THE ATKINS CARB COUNTER

THE CARB COUNTER is an invaluable tool to help track your daily carb intake and plan meals. In concert with the Acceptable Foods Lists that precede it, the Carb Counter also assists you in reintroducing foods as you move from one phase to the next or increase your carb intake within a phase. In fact, before you delve into the Carb Counter, check out the lists of Acceptable (and Unacceptable) Foods for each phase of the program, which start on page 3.

Tuck this booklet into your purse or pocket when you go shopping to look for certain brands or compare others with the ones listed in the following pages. The Carb Counter is the perfect partner to the new free Atkins Mobile App, which includes a robust food search, daily meal planner and progress tracker, as well as an overview of each phase of the Atkins Diet. For more on the app, see *Chain Restaurants* on page 61.

Organizing Principles

Categories are listed alphabetically, as are items within each of the 24 categories. Brand names of processed foods are provided when necessary for clarity. Items such as fruit and vegetables are listed generically. The amount listed for each item is the one indicated on the package as a single serving. However, it's not necessarily an appropriate portion for Atkins, which is why the first column for each food is labeled "amount" instead. Sometimes the amounts are provided in cups, tablespoons or teaspoons; in other cases, they're in ounces. We've used the measurements provided by ESHA, a nutritional database compiled from the latest U.S. Department of Agriculture data. (Abbreviations appear on page 3.)

ESHA is also the primary source of the per-serving content of carbohydrate and fiber, as well as sugar alcohols, including glycerin (noncaloric sweeteners), from which Net Carbs are calculated. (See "Counting Carbs?" on page 2.) The numbers under the Net Carbs column refer to grams of Net Carbs. For products not listed in ESHA, we've used serving sizes and other data provided by the manufacturer.

The Right Choices

According to *Progressive Grocer* magazine, the typical well-stocked supermarket contains almost 39,000 items, encompassing thousands of brands. Although the Atkins Carb Counter provides an extensive list of low-carb foods, it clearly cannot include all of them. Nonetheless, the selection that follows, as well as offerings from major chain restaurants, provides a myriad of Atkins-friendly foods.

Also included are a number of foods that are unacceptable for one or more reasons and others that are best avoided. Some are just outrageously high in carbs. In other cases, two brands of a certain item may initially seem the same but one of them contains ingredients you're better off not consuming. Footnotes at the bottom of each page clarify such information.

What to Avoid

For example, manufactured trans fats, which are hydrogenated or partially hydrogenated oils, have no place in a healthy diet. Even if you stay away from sugary treats, added sugar (under numerous aliases) turns up in bread, sauces, marinades and salad dressings, to name just a few products. We also alert you to the presence of white flour, cornstarch and other

refined grains, as well as certain fats. Most of us get up to 40 times as much omega-6 fats as omega-3 fats in our diet because the former are used in most processed foods. Ideally, the ratio should be 1 to 1.

That's why we recommend you not cook with certain oils or eat products that contain them. Specifically, steer clear of soybean, regular safflower—the high-oleic type is fine—corn and peanut oil, as well as “vegetable” oil, which can contain any of the above.

In addition to relying on the Carb Counter, it's a good idea to become a careful reader of Nutritional Facts panels on processed foods, which allow you to calculate grams of Net

Carbs. Be sure to also scan the list of ingredients to make sure that hidden sugars and other problematic ingredients discussed above aren't included.

Note: Again, just because a food is listed doesn't mean that it's acceptable on the Atkins Diet. Some foods are included to allow you to compare those high in carbs with more appropriate foods.

Abbreviations and Symbols

We have abbreviated a number of terms that occur with frequency, as listed below.

C = cup	lg = large	pkg = package	T = tablespoons
dia = diameter	lb = pound	sl = slice	w/ = with
ea = each	med = medium	sm = small	w/o = without
env = envelope	oz = ounce	sq = square	" = inch
g = gram	pkt = packet	t = teaspoon	< = less than

ACCEPTABLE FOODS LISTS

When you're just starting out on Atkins, this “cheat sheet” can help you remember what you can and cannot eat in each phase. More extensive lists appear in the categories in the Carb Counter, as noted below. All Atkins brand products are coded on the package for appropriate phases.

Acceptable Foods in Phase 1, Induction

- **All fish and shellfish**, but no pickled or creamed herring with added sugar, artificial crab (surimi or “sea legs”) or other processed, battered or breaded products. Also, limit clams, oysters and mussels to about 2 ounces a day. See page 29.
- **All chicken, turkey and other poultry**, but no breaded, battered or processed products. See page 42.
- **Beef, lamb, pork and other meat**, but no bologna, kielbasa, hot dogs, meatballs, meatloaf or other products made with fillers. Also, no ham or bacon cured with sugar. See page 9.
- **Eggs** cooked any way.
- **Soy and other vegetarian products.** Almond or soymilk (plain and unsweetened), Quorn products (unbreaded), seitan, shirataki soy noodles, veggie or vegan “cheese,” tempeh (without grains), tofu and tofu meat analogs, some veggie burgers. See page 59.
- **Cheese.** All firm or aged cheese, but no cottage, ricotta or other fresh cheeses, cheese spreads with other ingredients or cheese “products.” See page 23.
- **Foundation vegetables**, which include all leafy greens and other salad vegetables, and many others that are often or usually cooked, but excluding most starchy vegetables. Some foundation vegetables, such as celery root, leeks, mushrooms, onions and pumpkin, are higher in carbs than others, so keep portions small. See page 54.
- **Salad dressings** with no more than 2 grams of Net Carbs per 2 tablespoons and that contain no sugar, honey, maple syrup or other caloric sweeteners. Look for products made with canola or olive oil.

- **Fats and oils.** Butter and canola, coconut, flaxseed, grape seed, olive, high-oleic safflower, sesame and walnut oils, preferably cold pressed or expeller pressed.
 - Avoid “low fat” products and all margarines and shortening products, which may contain small amounts of trans fats.
 - Avoid corn, soybean, sunflower seed and other “vegetable” oils discussed above.
- **Noncaloric sweeteners**, including sucralose, stevia, saccharin and xylitol are acceptable in moderation. A more complete list, including brand names, appears on page 51.
- **All condiments, herbs and spices**, as long as they have no added sugar, flour, cornstarch or other carb-filled thickeners. They include dozens of foods you'll find on pages 22–23 and 44–46.
- **Beverages.** Broth/bouillon (not low sodium and no added sugars, hydrogenated oils or MSG), club soda; heavy or light cream or half-and-half (1–1.5 ounces a day); caffeinated or decaffeinated coffee and tea; diet soda with noncaloric sweeteners; lemon juice or lime juice (2–3 tablespoons a day); plain or flavored seltzer (must say “no calories”); herb tea (no added barley or fruit sugars); unsweetened, unflavored milk substitutes.

Other Unacceptable Phase 1 Foods

In addition to any foods cited above, avoid the following:

- Fruits other than avocado, olives and tomatoes, which are actually fruits, but

are listed with foundation vegetables. See page 54.

- Any fruit or vegetable juice other than lemon and lime juice
- Regular sodas sweetened with sugar or corn syrup
- Grains, even whole grains, and any food made with flour or other grain products
- Any food with added sugar, such as evaporated cane juice, glucose, dextrose, honey or corn syrup
- Alcohol of any sort
- Nuts and seeds
- Kidney beans, chickpeas, lentils and other legumes
- Starchy vegetables such as parsnips, carrots, pod peas, potatoes, sweet potatoes, winter squash and yams. See page 58.
- Dairy products other than hard or aged cheese, cream, sour cream and butter
- Cow or goat milk of any sort
- Yogurt, cottage cheese or ricotta
- “Low-fat” products
- “Diet” products, unless they have no more than 3 grams of Net Carbs per serving

Additional Foods Acceptable in Phase 2, Ongoing Weight Loss

- **Nuts and seeds**, including nut and seed butters and meals (flours). For a complete list, see page 38.
 - Avoid chestnuts (very high in carbs) and honey-roasted or smoked products.
 - Avoid products, such as Nutella, that contain added sugar.
- **Berries and other fruits.** All fresh or frozen berries (without added sugar) and

cherries and cantaloupe, Crenshaw and honeydew melon (but not watermelon). Also, 1-tablespoon portions of preserves made without added sugar.

- **Fresh cheese and other dairy products**, including ricotta and cottage cheese, and plain, unsweetened, whole milk yogurt or Greek yogurt and kefir; also 2-ounce portions of whole milk.
 - Avoid yogurt made with fruit or other flavorings or with any added sugar.
 - Avoid low-fat and no-fat cottage cheese or yogurt products.
- **Legumes**, including lentils, chickpeas and other dried beans, and edamame, hummus and refried beans. For a complete list, see page 36.
 - Avoid jarred or canned baked beans, which are full of sugar, beans in tomato sauce with added sugar or starches and bean dips and other products with added sugar or starch.
- **Vegetable and fruit juices.** Up to 6 tablespoons a day of lemon and/or lime juice and 4-ounce portions of tomato juice or tomato juice cocktail.
- **Atkins All Purpose Baking Mix**
- **Alcohol**, in moderation, including “lite” or low-carb beer, red or white wine and spirits such as bourbon, gin, rum, Scotch and vodka.
 - Avoid flavored brandy and cordials.
 - Avoid regular beer.
 - Avoid fruit juice, tonic water and other mixers high in carbs.

Other Unacceptable Foods in Phase 2

- Fruits other than those previously listed
- Starchy vegetables
- Grains, including whole grains

Additional Foods Acceptable in Phase 3, Pre-Maintenance

The following foods are acceptable in this phase and in Phase 4, Lifetime Maintenance.

- **Fruit other than berries and melon**, including apples, grapes, grapefruit, peaches and pears. For a complete list, see page 31.
 - Avoid canned fruit packed in juice concentrate or syrup, including “lite” syrup.
 - Continue to avoid fruit juice, other than lemon and lime juice.
 - Avoid dried fruit.
- **Starchy vegetables**, including beets, carrots, corn, parsnips, peas in pods, potato, sweet potato and winter squash. For a complete list, see page 58.
- **Whole grains**, including couscous (whole wheat), cracked wheat, kasha (buckwheat groats), oatmeal (rolled or steel cut), quinoa, brown rice and wild rice. For a complete list, see page 34. (Atkins Cuisine Penne Pasta is acceptable only in Phase 4, Lifetime Maintenance.)
 - Avoid refined grains, such as white flour, “enriched flour” and white rice.
 - Baked goods should be made with 100-percent whole grains.
 - Continue to avoid products with added sugar.
- **Dairy products.** 4-ounce portions of whole milk or buttermilk—but continue to avoid skim, nonfat or low-fat milk.

ATKINS & OTHER LOW-CARB SPECIALTY FOODS

The full array of Atkins Nutritionals products appears below, including a new line of frozen meals. Also listed is a sprinkling of choices from other companies that specialize in low-carb products. Many websites that sell such products provide more extensive lists. There are no guidelines on what makes a food low carb. Most Atkins products have been tested on people to gauge their glycemic impact. We cannot vouch for the carb counts provided by other manufacturers. Some products marketed as low carb contain added sugars and white flour, so read ingredient lists carefully. We've noted when products contain sugar alcohols, as excessive consumption can result in gastric distress. Again, to calculate Net Carbs, subtract not just fiber but also sugar alcohols from grams of total carbs. Other low-carb products appear in *Breads, Crackers, Tortillas & Wraps, Baking Ingredients, Candy, Desserts* and *Snacks*.

BAKING INGREDIENTS

Low-carb baking requires ingredients such as nut meals, unsweetened chocolate and coconut flakes, and other ingredients without added sugar or refined grains. The following list includes both ingredients that are acceptable in some or all phases of the Atkins Diet, as well as some that should be avoided, including granulated and other forms of sugar and white flour provided for comparison purposes. Also see *Nuts & Seeds*, *Grains* and *Dairy, Eggs & Dairy Substitutes*. A more extensive list of sweeteners appears in *Sweeteners, Jams & Syrups*. Low-carb bake mixes are in *Atkins & Other Low-Carb Specialty Foods*.

BEEF, LAMB, PORK & OTHER MEATS

Most meat is composed completely of protein and fat, with calf's liver being a notable exception. However, ham, bacon or other pork products cured with sugar in any form, do contain carbs. Depending upon how these products were cured and how thick the slices are, the Net Carb gram count can vary significantly, so check both the Nutritional Facts panel and the list of ingredients. Pepperoni, salami and the like are also often cured with sugar. Sausages and frankfurters may contain fillers that add to the carb count. Any dish that is stuffed, breaded or deep-fried, including many pre-cooked frozen convenience products, also contains carbs. So do items such as meat-loaf or rolled stuffed pork loin prepared by a butcher. A number of sandwich and deli

BEEF, LAMB, PORK & OTHER MEATS*continued*

meats also contain added sugar. The amounts listed below reflect the weight after cooking and minus bones. Note that the Atkins Frozen meals listed on page 7 contain no added sugar or fillers.

& ALCOHOLIC
BEVERAGES**

Most of the entries below are acceptable on the Atkins Diet. However, a few unacceptable ones are included to compare, for example, cola sweetened with high-fructose corn syrup versus sucralose. In this case, the difference is more than 35 grams of Net Carbs (carb counts may vary by brand). We've also listed some fruit juices to make it clear that you're always better off eating whole fruit, which contains the fiber that when subtracted from the number of total carbs, results in the Net Carb count. Avoid most energy drinks, which are full of sugar and opt for sugar-free alternatives. There are numerous iced tea and lemonade choices made with a variety of sweeteners. Check the Nutritional Facts panel on herb teas to make sure they contain no added sugar. Spirits contain no carbs and most wines relatively few, but avoid wine coolers and conventional mixers. Instead, opt for sugar-free mixers.

BREADS, CRACKERS, TORTILLAS & WRAPS

The Net Carb counts provided for different types of bread are averages because both carb counts and ingredients can vary significantly from one brand to another. Always check the Nutritional Facts panel as well as the list of ingredients. Omitted are bagels, rolls, pastries and other conventional baked goods, which are almost always very high in carbs and full of refined white flour and/or added sugar. For example, a cinnamon raisin English muffin, a blueberry muffin and a croissant contain, respectively, 26.1, 25.8 and 19 grams of Net Carbs. Instead, baked goods that are within acceptable carb counts are listed, although some of these do contain white flour or added sugar, as noted. Be aware, as well, that some “whole grain” products also contain refined grains. Brand names appear when carb counts for similar products differ. Also, see *Snacks and Atkins and Other Low-Carb Specialty Foods*.

CANDY & CHEWING GUM

Since most conventional candy is almost all sugar, it's one of the most important "foods" to avoid on Atkins. For example, an Almond Joy bar has more than 26 grams of Net Carbs. A Milky Way: a whopping 42 grams. A packet of Skittles contains 50 grams of Net Carbs, 40 of which are sugar. There are numerous sugar-free alternatives, many of which mimic well known brands. They use a variety of sweeteners, including sugar alcohols. Some manufacturers offer low- or no-sugar versions of their candy or gum brands. Note the comparison of Pep-O-Mint with and without sugar, as a case in point. Look for products labeled sugar free, low glycemic or no added sugar. Some are formulated for people with diabetes. Even low-carb candy

should be consumed in moderation, especially those with sugar alcohols, which can cause gastric distress in excess. Also see *Atkins & Other Low-Carb Specialty Foods*.

CEREALS

Most breakfast cereals are full of white flour and other refined grains, as well as sugar, dehydrated berries, marshmallows, honey or maple syrup, raising the already high carb count of grains. Even “healthy” choices such as granola, muesli and bran cereals are often full of sugar. Nor are organic products any less likely to contain added sugar. We’ve included some of these products to drive home the point that you must always read labels. Your objective is to find 100 percent whole grain cereals without added sugars. Note that amounts vary based upon serving sizes listed on packages. Finally, carb counts don’t include the milk or milk substitutes served with cereal. Also look for cereals in *Atkins & Other Low-Carb Specialty Foods*.

CONDIMENTS & SEASONINGS

Condiments allow you to transform basics like chicken breasts into dozens of different dishes. Fortunately, there are many Atkins-friendly condiments, but hidden carbs lurk in others. Read labels to ferret out added sugar, flour and cornstarch. Most herbs and spices contain no carbs or minuscule amounts but watch out for spice mixtures spiked with sugar. Also see *Baking Ingredients* and *Sauces & Marinades*, as well as vinegars and salad dressings on pages 41-42.

DAIRY, EGGS & DAIRY SUBSTITUTES

Most of the following products are acceptable on Atkins in one or more phases. Low-fat products appear for comparison purposes only; full-fat versions are always preferable. Almost all cheeses are acceptable, but keep an eye out for cheese "products," which contain fillers, making them higher in carbs. They may also contain oils and other added ingredients. Likewise, fruit flavors such as strawberry and blueberry introduce added sugars to cream cheese, yogurt and other dairy products,

¹Contains added sugar ² Carb count varies by brand; may contain added sugar

¹Contains added sugar ² Carb count varies by brand; may contain added sugar

**DAIRY, EGGS
& DAIRY SUBSTITUTES** *continued*

elevating the carb count. We've also included creamers and other dairy substitutes, some of which are not recommended for Atkins followers because they include added sugar and/or other unacceptable ingredients, for comparison purposes. Likewise, we've included a few of the numerous low-fat yogurts full of sugary preservatives. Although not actually dairy products, eggs are also included below.

DESSERTS

When you consider that a serving of chocolate pudding sweetened with sugar tallies almost 33 grams of Net Carbs and a slice of apple pie a whopping 53.4 grams of Net Carbs, it's easy to see why desserts present such treacherous territory. Fortunately, there are numerous carb-conscious alternatives to satisfy your sweet tooth. (Also check out *Atkins & Other Low-Carb Specialty Foods and Snacks*.) However, this category requires extra vigilance as even some supposedly low-carb desserts contain added sugars and others harbor cornstarch and/or trans fats. We've also noted when products contain sugar alcohols. Carb counts for pudding mixes exclude the milk or nondairy product needed to make the dessert.

FISH & SHELLFISH

As long as it is not breaded or battered for deep-frying, almost all fish contains no carbs. However clams, oysters and mussels and any stuffed fish or shellfish do. Avoid surimi, usually labeled as "sea legs." The taste of this artificial crabmeat bears little resemblance to the real McCoy. It is made from various species of fish to which fillers and sugar are added, boosting the carb count. Also check the labels of pickled or creamed herring and gefilte fish, as sugar is often added in the processing. One more sugar alert: deli tuna fish and whitefish salad are often full of it. Fish shrinks when cooked; all amounts listed are for cooked fish.

FRUIT

The natural sugars in fruit that make it so delicious increase the carbs, but compared to sugar-laden desserts, fruit—in moderation—is a great alternative. Berries are among the lowest in carbs, partially because they are not as sweet as most other fruits, and also because they are high in fiber. As you can see from the carb counts below, it's a good idea to steer clear of dried fruit, which concentrates the natural sugars. Likewise, avoid fruit juice (see **Beverages & Alcoholic Beverages**), which usually eliminates the fiber found in whole fruit. Frozen fruit is fine as long as it doesn't contain added sugar, as is fruit canned in its own juice or water. Although olives, avocado and tomatoes are actually fruit, they are listed in **Vegetables**. However, rhubarb, listed here, is actually a vegetable.

GRAINS, NOODLES & PASTA

Whole grains are acceptable in the later phases of Atkins, but white flour and other refined grains (and anything made with them, including most pasta) are not. Unless a product is labeled 100 percent whole grain, it likely also contains refined grains, which have been stripped of their fiber and other nutrients. Labels on products made with some or all white flour also use the terms wheat flour (not to be confused with whole wheat flour) or enriched flour. Items that may contain refined grains are noted below, but check any product before purchasing it. Also see *Breads, Crackers, Tortillas & Wraps* and *Cereals and Baking Ingredients*.

LEGUMES

Although lentils and other legumes are vegetables, they are categorized separately because their protein content is greater. Most legumes also have a higher glycemic impact than the “foundation vegetables” you initially eat on Atkins. That said, there’s a considerable range in Net Carb count among legumes. For example, black soybeans are relatively low in carbs compared to lookalike black beans. In most cases, what we call legumes are dried beans, so fresh lima beans, for example, appear in **Vegetables**, and dried lima beans are listed below. Bean sprouts also appear in **Vegetables**. Some legumes go by more than one name, depending upon region, or because different varieties are used in a similar way. Hummus and other bean dips appear in **Snacks**, and tofu and other soy products in **Vegetarian Products**.

NUTS & SEEDS

High in protein and fat, nuts and seeds are important Atkins foods, although they should always be consumed in moderation. Although the grams of Net Carbs are usually the same, raw nuts are always more nutritious than roasted nuts. Although most nuts and seeds are high in fiber, moderating the Net Carbs, there is considerable variation in the carb content of various nuts, with macadamias at the low end and chestnuts at the high end. Although not true nuts, soy "nuts" are also listed below. Scrutinize the labels of nut and seed butters, particularly peanut butter, to avoid those with trans fats and/or added sugars. Also see *Baking Ingredients*.

OILS, FATS, VINEGAR & SALAD DRESSINGS

Natural fats are integral to Atkins, but try to stay away from cottonseed, corn and soybean oils, as well as “vegetable” oil. (Read more about fats and oils on the Nutritionist’s blog at blogs.atkins.com.) Olive, canola, high-oleic safflower and coconut oil are preferable for cooking, and extra virgin olive oil and walnut, sesame and other nut oils for dressing salads and vegetables. Butter is always preferable to margarine. Avoid fat-free or low-fat versions of mayonnaise and salad dressings, and those made with soybean oil and/or added sugar. Most salad dressings are full of both, but some brands make a line with canola or olive oil and omit added sugar. Listed below are just a few of the many salad dressings. Study the labels of others carefully, keeping in mind that the terms “organic” and “all natural” don’t mean that a product is necessarily free of added sweeteners, including agave nectar in some Steel’s dressings. Avoid sweetened or seasoned vinegars.

POULTRY

In and of itself, chicken and its kin are no-carb foods, with the exception of the liver. But when poultry is breaded, battered or stuffed, the carb count can climb. Chicken and turkey sausages often contain fillers, and those that include fruit or vegetables are also higher in Net Carbs. Although there

are numerous chicken and turkey convenience foods, chicken nuggets and all too many others are chockfull of ingredients best avoided: breading, added sugar, cornstarch and trans fats, as noted below. Many deli products also contain added sugar. Unfortunately, there is often a tradeoff between convenience and carbs. For example, many of the carved roasted and grilled chicken slices and chunks useful for making a quick salad or a stir-fry contain added sugar. Once again, check lists of ingredients carefully. Weights listed below are for cooked poultry without bones. Whether or not the skin is on doesn't impact the carb count of poultry.

SAUCES & MARINADES

Most sauces and marinades are literally awash in added sugars. Two tablespoons of one leading brand of barbecue sauce contains 16 grams of Net Carbs! Pasta and many other sauces are also full of the sweet stuff. We've concentrated on products that are Atkins acceptable, some sweetened with sucralose or stevia, and others with sugar alcohols. We have also included a few of representative sugar-filled products for comparison purposes. (Although agave nectar has a lower glycemic impact than table sugar, it is still an added sugar, and is noted as such in some Steel's products.) If you toss marinade after marinating food—which is the safest approach—and pat it dry before cooking it, the impact of any sugar is negligible. You can also use most salad dressings (see page 41) as marinades. Also see *Condiments & Seasonings*.

SNACKS

Most snack foods are a minefield of added sugars, refined grains and trans fats. (Even most savory dips contain added sugar.) So we've not wasted space on potato chips and the like and instead focused on snacks that meet or come close to Atkins guidelines. (We've included the occasional unacceptable product for comparison purposes.) Options in crunchy treats were once limited to pork rinds and nuts, but now there's a host of other choices, including baked cheese snacks and kale chips. Jerky, long touted as an ideal Atkins snack, is usually sugar cured, pushing up

the carb count. We did find some that are 100 percent meat (or soy). On the sweet treat front, just because a cookie contains no added sugar doesn't mean that it contains no white flour, so read ingredient lists carefully. Also see *Nuts & Seeds* and *Atkins & Other Low-Carb Specialty Foods*, as well as *Crackers* on page 16.

SOUPS

Most processed soups contain added sugars. Others are thickened with white flour and/or cornstarch or another starch. Some contain both added sugar and starches and/or trans fats. A very few have none of these ingredients, and you may want to explore those manufacturers' other options. Also watch out for pasta or other grains in vegetable soups. With numerous kinds of soup, we've chosen a few popular types and listed a number of choices for each to show the wide variety in ingredients and range of grams of Net Carbs. Assume that a soup is ready to serve, meaning it need not be diluted with water—the amount given is 1 cup—unless it is noted

SOUPS *continued*

as condensed. If so, the amount given is a half-cup. If you add milk or cream rather than water to seafood or tomato bisque, be sure to add in those extra carbs. A few soup-in-a-cup options are organized by brand. Amounts given are usually for the mix alone. Tabatchnick soups can be found in the frozen food department.

SWEETENERS, SPREADS & SYRUPS

There are now numerous sugar substitutes on the market. Some of those listed below also appear in *Baking Ingredients*, where the amounts are geared to cooking rather than single servings, as they are here. There are also numerous alternatives to conventional jams, jellies and preserves. They are sweetened with sucralose, sugar alcohol or even *luo han guo*, a natural noncaloric sweetener made from monk fruit. (Agave nectar, which is used in Steel's products, is also an added sugar although it has a lower glycemic impact than table sugar.) Most brands of preserves and

VEGETABLES

Vegetables are essential to the Atkins Diet. Many of them can be eaten either raw or cooked, so we provide carb counts both ways. For those that must be cooked, we often provide Net Carb counts both ways to help you in planning meals. A comparable amount of raw and cooked vegetables almost always yields a different carb count because cooking breaks down the fibers, decreasing the volume. Four cups of raw spinach might yield a quarter cup of cooked spinach, but a vegetable like carrots won't shrink as much in cooking. The carb count is also impacted by whether a vegetable is sliced or diced—half a cup of the former will typically have a lower carb count than the latter. Mashing further compresses vegetables, usually raising the carb count for a comparable amount. Check the list of ingredients in creamed or other frozen or prepared vegetable dishes to find hidden carbs from added sugars, flour and other ingredients.

VEGETARIAN PRODUCTS

We recommend vegetarians begin Atkins in Phase 2 so they can start with a higher number of daily grams of Net Carbs. That makes it easier to get enough vegetable protein. This section deals only with protein substitutes for animal products. Hundreds of other foods suitable for vegetarians are included in **Nuts & Seeds**, **Legumes**, **Vegetables** and other categories. The following list includes foods from several of the major brands that specialize in vegetarian products. Some items, like tofu, are very low in carbs, but the numbers can jump when an item has been marinated in certain sauces or seasoning. Also, some vegetarian products contain ingredients you're better off avoiding, particularly added sugar, starches and soybean or "vegetable" oil. Most tempeh products include grains in addition to soybeans, making them unsuitable for the two earlier phases of Atkins.

CHAIN RESTAURANTS

Although high-carb items dominate the menu, most fast food and casual dining chain restaurants do offer some Atkins-friendly choices. This may involve ditching the white flour bun for a "naked" burger—a regular Big Whopper logs in at 51 grams of Net Carbs, compared to 3 minus the bun. At some burger places, you can order your burger wrapped in lettuce leaves. Opt for grilled, broiled, roasted or "broasted" chicken that is neither battered nor breaded.

Most chain restaurants offer detailed nutritional data online. Some allow you to subtract the bun and/or various condiments and immediately see the nutritional impact. The new Atkins Mobile App includes a dining out guide with a restaurant finder that enables you to find menu items within your selected Net Carb range.

Here are a few acceptable options at 14 national chains, but they should give you an idea of what other chains also offer. No matter where you dine, watch out for salad dressings, which may be full of sugar or corn syrup. Your best bets are usually vinaigrette, blue cheese or butter/milk ranch dressing. Sauces may also include added sugar and/or white flour, cornstarch or other refined grains. We've omitted pizza chains from the listings because other than baked chicken wings with Buffalo sauce, their offerings are inherently high in carbs. Starbucks beverages are listed on page 13.

Contains: ¹added sugar ²grains and/or starches ³soybean/"vegetable" oil ⁴breeding

See footnotes on page 60.
