

# Attunity Solutions for Amazon Web Services

ATTUNITY

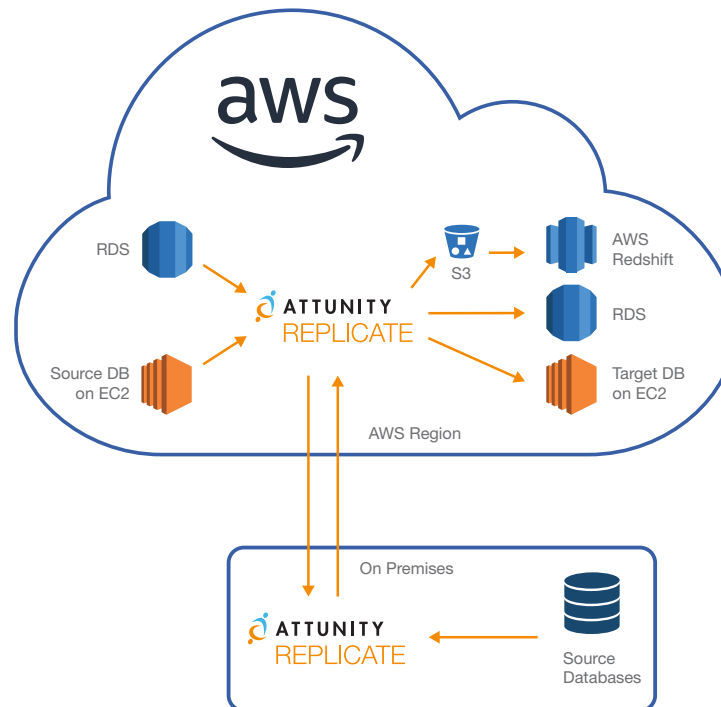

Attunity solutions have a 5-star rating on AWS Marketplace

Attunity technology has moved more data to the AWS Cloud than any other technology

# Attunity Solutions for Amazon Web Services

[Attunity Replicate](#) helps you automate bulk data loading and real-time change data capture from a wide variety of database sources, mainframes, SAP, and more to the AWS Cloud - continuously. The software helps you avoid the heavy lifting of manually extracting data, transferring via API/script, chopping, staging, and importing. It's easy to setup and helps you realize the benefits of Amazon Web Services in just minutes - not months.

## ATTUNITY SUPPORT FOR THE AWS PLATFORM AND PRODUCTS

### Storage

- Amazon Simple Storage Service (Amazon S3)

### Database

- Amazon Relational Database Service (Amazon RDS)
- Amazon Redshift

### Analytics

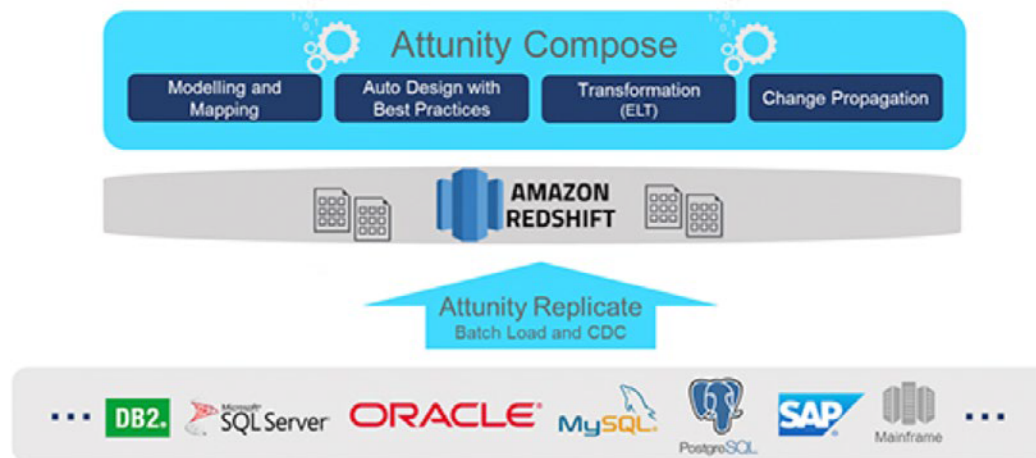

- Amazon Elastic MapReduce (Amazon EMR)
- Amazon Kinesis

### Compute

- Amazon Elastic Compute Cloud (Amazon EC2)

# Attunity Solutions for Amazon Web Services

[Attunity Compose](#) automates the transformation of data into analytics-ready structures. For data warehouses, it automates the design and deployment of models in Amazon Redshift. For data lakes, it automates the data ingest, schema creation, and continuous data updates in Hive. Attunity Compose automatically generates the ETL code and supports both batch and real-time movement with change data capture (CDC) that integrates with all major on-premises and cloud sources.

# Customer Success

Philips Healthcare uses Attunity software to transform and transfer data sets as large as 35 million records to Amazon Redshift in just 90 minutes.

Etix saved months of dev effort and almost \$250K over 3 years by using Attunity software to move data into Amazon Redshift for real-time analytics.

Glidewell Dental took only 6 months using Attunity software to move data into Amazon Redshift and enable rapid self-service analytics.

InDemand saved over \$500K and delivered throughput of two GB per second by using Attunity software to load data into Amazon EC2 for storage.

LeaseHawk using Attunity software to replicate Oracle data across on-premises and Amazon RDS (reducing refresh time from 14 hours to <15 seconds).

MarketLive uses Attunity software to automate near real-time replication of production data from on-premises Oracle to Amazon EC2.

Fanatics leverages Attunity software to accelerate data ingest from its heterogeneous on-premises data sources to a data lake in the AWS cloud.

DomainPower saved months of development work loading and syncing real-time Microsoft SQL Server data to Amazon Redshift using Attunity software.

Couchsurfing transformed three full months of data loading into just three hours using Attunity software to transfer their data to Amazon Redshift.

Veritix uses Attunity software to quickly and easily integrate hundreds of millions of records into Amazon Redshift for real-time analytics.

Wombat Security Technologies uses Attunity software to migrate half a billion records from Amazon Redshift to Amazon RDS, quickly and efficiently.

Cardinal Health uses Attunity software to move data from SQL, Oracle, and other sources to Amazon S3, where they can consume the data in Kafka and perform analytics to identify new ways of improving services for their customers.

# Attunity and AWS Working Together

## ABOUT ATTUNITY

Attunity is an Advanced Technology Partner of AWS offering solutions that help you accelerate data replication, ingest, and streaming across a wide range of heterogeneous databases, data warehouses and Big Data platforms. Used by hundreds of enterprises worldwide, Attunity solutions help you get more value from your data in the Amazon Web Services (AWS) Cloud easily, securely, and efficiently with zero downtime.

Attunity technology is validated by Amazon Web Services (AWS) for Data Integration in the [AWS Big Data Competency Program](#) and for Data Migration in the [AWS Migration Competency Program](#). For a free trial of Attunity solutions for AWS, go to the [AWS Marketplace](#).

## ABOUT AMAZON WEB SERVICES

For 11 years, Amazon Web Services (AWS) has been the world's most comprehensive and broadly adopted cloud platform. AWS offers over 100 fully featured services for compute, storage, databases, analytics, mobile, Internet of Things (IoT) and enterprise applications from 44 Availability Zones (AZs) across 16 geographic regions in the U.S., Australia, Brazil, China, Germany, Ireland, Japan, Korea, Singapore, and India. AWS services are trusted by more than a million active customers around the world – including the fastest growing startups, largest enterprises, and leading government agencies – to power their infrastructure, make them more agile, and lower costs. To learn more about AWS, visit <http://aws.amazon.com>.
