Samsung's Position

- §289 allows only the total profit attributable to the infringement of the patented design
- Congress really assumed that §289 would apply where designs are the principle feature, and the courts should not apply it to multi-component articles
- Apple didn't prove that Samsung's profits arose from the patented designs
- The total profits rule would create disproportionate or double awards and harm innovation and small businesses

Connect at the IDSA International Design Conference 2017 Design IS Business

From 1965 to present, IDSA hosts an annual International Design Conference to advance the profession by bringing together some of the biggest names and brightest minds in industrial design and related fields. A key mission of IDSA is community—creating environments that foster engagement, networking and knowledge exchange. IDSA International Design Conference do just that by offering one-on-one interaction with designers from around the world; leading speakers and sessions; and dynamic activities such as design studio tours, Career Centers and workshops.

The International Design Conference coincides with the annual International Design Excellence Awards (IDEA) Ceremony & Gala and also features the IDSA/Eastman Education Symposium and the IDSA Awards, which include inductions to the IDSA Academy of Fellows.

Learn more by visiting IDSA.org, and connect via @IDSA on [Twitter](#); Industrial Designers Society of America on [LinkedIn](#) and [Facebook](#); and @IDSAdesign on [Instagram](#).

Obtain a better understanding of the unique positioning of industrial design in the growth strategy of corporate business.

Learn from select Fortune 500 leaders from the stage who truly value and use ID as the foundation of their success.

Understand the “business value of design” via handpicked, stellar, keynote presentations sharing compelling insights and unique perspectives.

Get inspired by the rich engagement of our power keynote OEM creative supply chain panel.

Learn from a panel of founders and principals about the amazing world of business for independent design studios

New, “8 minute rapid fire” speaking sessions from an assorted mix of professionals; never cease to be amazed by the diversity of thoughts and action from this stage.

An IDSA first! **Bring your kids (5+ year olds) to our Saturday design sessions** with speakers from toy/games/play industries. Also, leverage kid-friendly Atlanta, such as the Georgia Aquarium, the hands-on Children’s Museum, Olympic Park.

No breakouts, no hassles, no decision, no missing out on anything. Just show up on day one and go with the flow. **Learn, connect and share.**

The evenings will be equally magical and transformational! Tour local design studios; take offsite trips; attend university open

A Message from the IDSA International Design Conference 2017 Chair

I invite you to join us Aug. 16–19 at the Atlanta Marriott Marquis for Design IS Business.

ID is among a handful of disciplines that really, really values and strives to improve the human condition. Not just intrinsic value—but fundamental, instrumental value. Whatever the world throws at us—digitization, electrification, sensorification, autonomy or connectivity—industrial designers surmount barriers, leveraging them as elements.

We make “design at scale.”

Even if your product/solution is the most meaningful, it has to sell on the fair, open market—giving businesses the confidence to invest in and continue the growth of their portfolios. Now, the business world is taking note of the strategic advantage brought by ID to the table. The world’s most innovative companies are declaring solidarity with design—reserving a seat on the board for a chief design officer; assimilating design strategy; or making room for design to influence business strategy significantly.

Business model patterns essentially research the target audience’s desires and meticulously develop meaningful product solutions and relevant ecosystems of experiences to improve the end user’s life—while profiting and—in many cases, keeping a watchful eye on our planet. From Harvard Business Review to Fast Company to The Wall Street Journal—the media, too, has newfound affection for the impact of ID on business—and on a greater scale—the global economy.

Where better to make the case with Industrial Design IS Business than in Atlanta, GA—with some of the most compelling speakers at the intersection of design and business; studio and other offsite tours; great parties; and family-friendly attractions. “Among the nation’s fastest-growing cities, the Georgia capital is attracting newcomers from around the country and people are looking to this part of the country for culture and commerce like never before,” declares US News & World Report in 2017. Atlanta means business—with a population of five and a half million; 150,000 businesses including some of the most iconic brands in the world; the fifth highest job growth rate in the United States; and quite an emphasis on higher education—with nearly 60 colleges and universities.
