Autism Awareness

*They looked at me with compassion
I hadn't a clue why,
Then they told me my son was challenged
and I began to cry.*

*Your son may be Autistic or
have some related disease.
I've never heard of it, I said
Explain it to me please?*

*It occurs one in every one hundred births,
four times more often in boys.
Families of all racial and ethnic backgrounds
Regardless of stature or poise.*

*It's a Lifelong neurological impairment
That affects the ability to speak,
Play or socially interact.
I felt my knees grow weak.*

*My husband took me in his arms
We held each other tight,
My five-year-old beside me asking,
Mommy, is Stevie alright?*

*We wouldn't have known there was a problem
If not for his speech delay
We thought he was just a little shy,
and preferred solitary play.*

*When she said, they don't know what causes it
I just wanted to die.
My God, this isn't happening,
They can't even tell us why?*

*God is not sleeping, I said to myself
over and over again
holding fast to my faith in God
to help me endure the pain.*

*Clearly there needs to be research
It's imperative we find a way
Of getting the programs funded,
If we're ever to gain some headway.*

*Our children are so precious
They look to us for care
Let's show them how much we love them
and make everyone aware.*

Casi's Quest (TAAP of Florida)

My name is April Oakes and I am the Founder of "Casi's Quest" and President of TAAP (The Autism Autoimmunity Project). We started our organization in honor of our 4-year-old autistic daughter, Casi, who passed away on June 13th, 1999. The only reason I'm able to breathe today, after losing the most important thing in my life, is because God has made my mission very clear. We realized Casi was vaccine injured, before we received the "label" of autism. I say labeled, because we believe this is what mainstream professionals want us to call these "vaccine injured" children. It implies that their condition is a **causeless, cureless, random happening**. Autism is **1 in 150** children today and this doesn't include other vaccine related disorders such as ADD and ADHD. We have dedicated the rest of our lives to doing **WHATEVER** is necessary to help these innocent victims and to protecting healthy children and children-yet-to-be, from the autism epidemic!!! We are a non-profit charity dedicated to obtaining funding for **independent** research addressing immune and immunogenetic abnormalities in autism. We feature prominent medical and natural practitioners with the latest and most successful treatment in autism and related disorders. We need your help in supporting research leading to a reduction in the number of autism cases and hopefully, put an end to this epidemic.

We are not searching for answers and we support the independent research that proves what we already know! These doctors are confirming what many parents have witnessed and they are counting on us to fund their research. No one knows our children, better than we do and it's time to be their voice! We are wiping out a generation, because the welfare of our children comes last and profits for a product like vaccines come first. We do not have 40 or 50 years to find answers, because our children are in a race against time. This epidemic is due to an immune insult and it's impossible to have a genetic epidemic!!

Evidence that autism is an autoimmune disease is extremely strong. Autoimmunity is a state in which the body attacks itself, because it mistakenly interprets its own components as foreign. We have learned that these multi-component vaccines, as well as the single vaccines that are often given together at one time and are injected into our baby's blood stream, contain many toxins. Vaccines contain ingredients such as Antifreeze, Phenol (used as a disinfectant), Formaldehyde (known as a cancer-causing agent), Aluminum (associated with Alzheimer's Disease and seizures), Thimerosal (a mercury derivative linked to brain injury and autoimmune disease), Neomycin and Streptomycin. These vaccines are grown and strained through animal or human tissue, like monkey kidney tissue, chick embryo, dog kidney tissue, calf serum, human diploid cells (the dissected organs of aborted fetuses), pig blood, horse blood and rabbit brain. The problem with animal cells is that during serial passage of the virus, the contaminating animal RNA and DNA can be transferred from one host to another. Undetected animal viruses and genetic material may slip past quality control testing procedures, as in 1955 through 1961 with SV40. This stands for simian virus #40, meaning the 40th monkey virus found, which contaminated the polio vaccine and has been linked to cancer. We are led to believe that all these ingredients and genetic material can be injected into immature immune systems, with no negative effects!!!

Congressman Dan Burton has held many hearings on the dangers of vaccines, but many parents are clueless. He has two vaccine-injured grandchildren, one of them having the autistic "label." He has uncovered many instances of federal government health agency officials taking money from or owning stock in pharmaceutical companies. These same people were sitting on government health agency review boards, making decisions concerning vaccines. The only information we hear on TV is that vaccines are safe and effective, meanwhile there is no science proving this! Parents know their children better than anyone and we, along with independent researchers are producing the science while they are producing smoke screens of opinions rather than solid science. There are currently 200 new vaccines in the pipeline and many will be mandated. No long-term studies have been, or will be, performed on these vaccines, but we are required to inject them into our newborn babies. We are basically playing Russian roulette with our children, because the US government health agencies are more in the business of promoting and regulating vaccines than to be concerned about their safety. One thing we have realized is that this is a serious conflict of interest!!!!

We are told our children are not able to attend school without all the mandatory vaccines. This is simply NOT TRUE!! There are exemptions for vaccines in almost every state, which allows our children to get into school. When exemptions **are** acknowledged by school or health personnel, they are often misrepresented. For example, when it's said that religious objections must be associated only with certain specified religious groups. This is not only incorrect, but also unconstitutional! God created us with a perfect immune system! He gave us fever to burn a virus, vomiting and diarrhea to eliminate a virus and we've allowed **man** to teach us to suppress the fever, suppress the vomiting, suppress the diarrhea. Then, we allow **man** to convince us to surpass God's defense mechanisms and directly into the bloodstream, inject biological toxins to create immunity. Don't trust God, trust man and we're literally allowing man to play the role of God!

In conclusion, we want parents to realize you **DO** have options and you **DO** have the right to make an informed choice. The solution to this problem is addressing the cause and not the symptom. There is no money in a cure for autism, but lots of money in treatment. We do not want to create a new industry, we want to address the cause and stop the insanity! I wish someone would have shared this information with me, before I chose to blindly hold my daughter down and allow her to be injected. Since Casi's passing, life has not been or ever will be the same. Please learn from our mistake and "Educate BEFORE you Vaccinate!!!"

Definition * Treatment * Prevention

The Autism Autoimmunity Project is a non-profit charity dedicated to obtaining funding for independent research addressing immune and immunogenetic abnormalities in autism.

The ultimate goals of Project research are to

- 1) fully define immune etiologies in autism;
- 2) develop appropriate treatment options for individuals who have autism through autoimmunity or immune system deficiency; and to
- 3) develop mechanisms for prevention of immune-based autism.

A LETTER FROM THE FOUNDER OF THE AUTISM AUTOIMMUNITY PROJECT

Lake Hiawatha, New Jersey
August 2001

Dear Friends,

The Autism Autoimmunity Project began, as you may know, with an idea I had early in 1998. The Project as a corporate entity was approved by the IRS in October 1998 as a 501 (c) (3) charity for autism research, begun after I had determined that neither government nor private autism organizations were funding substantive immune research. Unfortunately, this is still largely the case, in spite of Congress' recent appropriation of huge sums for autism biomedical research, the investiture of California's MIND Institute with major funding, and the existence of at least two multimillion-dollar private autism research organizations. Yet, it is increasingly clear that the regressive autism occurring in such horrifying numbers is an immune-mediated entity based on genetic immune and detoxification frailties.

Our organization of parents and professionals must somehow enable this crucial autism research to be done. Today, the Project's presence is regularly felt at the highest levels of governmental and scientific endeavor, as members and Project-supported researchers present at gatherings of worldwide importance, and publish in second-to-none scientific venues. Dr. Vijendra Singh was the inspiration for the Project, and I feel that his research of more than twenty years will be the key to obtaining definitive answers for our children with autoimmune indicators. His work, with that of Dr. Andrew Wakefield and other pioneers, is rewriting the textbook on autism. Currently, Project-supported scientists include Dr. Singh, of Utah State University, Logan; Dr. James Oleske, of the University of Medicine and Dentistry, New Jersey, and Dr. Andrew Wakefield, of the Royal Free Hospital, London; though other deserving researchers will be considered if funds allow.

As the autism epidemic accelerates, a new vision is taking shape for an Autism Research Center wherein Drs. Singh, Wakefield and Oleske, together with Dr. Harold Buttram and other innovative scientists, will combine their investigative efforts. As time goes on, I envision that the research projects we fund will not only define the nature of regressive autism, but will lead to new treatments for our children, as well as sound measures for the prevention of autism. We need solutions now – not forty to fifty years from now – and those answers will be derived from immunology- and environment-based study, rather than the long-prevailing genetic research. An NIH director just estimated the lifelong cost of caring for a child with autism at \$2,000,000! The human cost is immeasurable.

The answers we need are out there. With all of us working together, I am confident they will come to light soon.

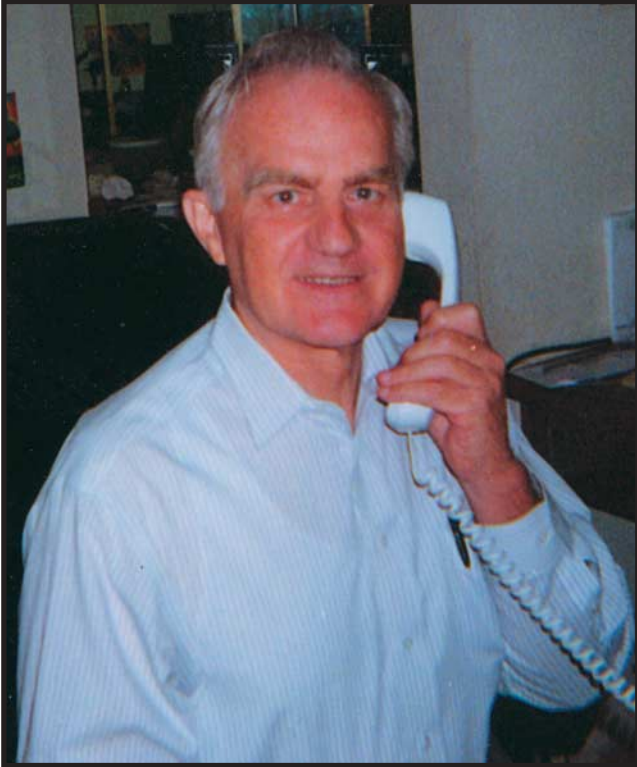

Ray Gallup, Founder

Ray Gallup, Founder of the Autism Autoimmunity Project, is an accountant with experience in private industry, non-profit, federal government and higher education settings, now working in public education. Gallup's sixteen-year-old son, Eric, is featured in the book, "Eric's Story: Autism and the Autoimmune Connection."

Biography

W. John Martin, M.D., Ph.D. founded “The Center for Complex Infectious Diseases” for investigators to pursue independent studies on the role of viral infection in neuropsychiatric illnesses. CCID subsequently became joined with a 501(c)3 non-profit corporation, MI-Hope (Mental Illness-Hope) to become S3Support (a public charity for scientific, social and spiritual support). Dr. Martin was born in Australia, where he obtained MD and Ph.D. degrees from the Universities of Sydney and Melbourne, respectively. He had his initial clinical training in Sydney, Australia, and subsequently pursued a pathology residency in the US, at the National Naval Medical Command, Bethesda, MD. He has also trained in research in distinguished institutions in Australia, US and Europe, including the Walter and Eliza Hall Institute of Medical Research in Melbourne, Australia; Harvard University, Cambridge, MA; National Institutes of Health, Bethesda, MD; and University College, London, England. From 1975-1980, he worked on vaccine safety within the US Food and Drug Administration (FDA). Dr. Martin holds Boards in both Anatomic and Clinical Pathology with subspecialty Boards in Medical Microbiology and in Immunopathology.

Dr. Martin has identified cell damaging (cytopathic) viruses, for which he coined the term “stealth viruses” in patients with various neuropsychiatric illnesses, including autism, and attention deficit in children, chronic fatigue and depression in adults and dementia in the elderly. Some of these viruses were originally derived from the monkeys used to produce live polio virus vaccine, but now pass readily between humans and even between humans and domestic pets. These viruses fail to be effectively unrecognized by the immune system, and unfortunately have also largely escaped the attention of Public Health authorities. Dr. Martin has recently demonstrated that these viruses can induce the formation of energy reactive materials that he has termed “alternative cellular energy (ACE)-pigments.” The ability of various traditional and non-traditional therapies to regulate the levels and activity of such pigments is an important topic of ongoing research.

Dr. Martin will speak on “The Potential Role of Energy Medicine in Addressing the Growing Epidemic of Chronic Viral Illnesses.” He will describe his work on stealth viruses and ACE-pigments. He will ask for the participation of members of the audience in an awareness program of the plight of many chronically ill patients in this country. He will also outline plans for placebo controlled clinical studies using natural products in various patient groups, including autistic children.

Biographical Sketch

Sherri J. Tenpenny, D.O. is the President and Medical Director of OsteoMed II, a clinic established in Strongsville, Ohio in 1996 to provide conventional, alternative, and preventive medicine. OsteoMed II's staff of three osteopathic physicians, two acupuncturists and a 10-member support team focuses on four specialized areas: allergy elimination; treating acute and chronic pain problems; all areas of woman's health; and the treatment of vaccine injured children.

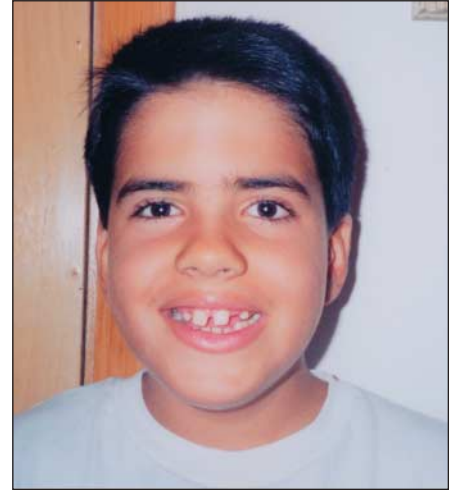

Dr. Tenpenny has lectured locally at both Cleveland State University and Case Western Reserve Medical School on topics related to alternative health. Nationally, she is a regular guest on many different radio talk shows, and has published articles in magazines, newspapers and internet sites, including the extremely popular www.mercola.com.

Dr. Tenpenny is respected as one of the country's most knowledgeable and outspoken physicians regarding the impact of vaccines on health. As a member of the prestigious National Speaker's Association, Dr. Tenpenny is an outspoken advocate for free choice in healthcare, including the right to refuse vaccination. As an internationally known speaker, she is highly sought after for her ability to present scientifically sound information regarding vaccination hazard and warnings that are rarely portrayed by conventional medicine. Her latest video: "Vaccines: What CDC Documents & Science Reveal" is a testimony of having spent over 4,000 hours researching documents put out by the Center for Disease Control, the World Health Organization and other prestigious medical journals. Most importantly, she offers hope through her unique treatments offered at OsteoMed II for those who have been vaccine-injured.

Dr. Tenpenny is a graduate of the University of Toledo in Toledo, Ohio. She received her medical training at Kirksville College of Osteopathic Medicine in Kirksville, Missouri. Dr. Tenpenny is Board Certified in Emergency Medicine and Osteopathic Manipulative Medicine. Prior to her career in alternative medicine, Dr. Tenpenny served as Director of the Emergency Department at Blanchard Valley Regional Hospital Center in Findlay, Ohio, from 1987 to 1995. In 1994, she and a partner opened OsteoMed, a medical practice in Findlay limited to the specialty of osteopathic manipulative medicine. In 1996, Dr. Tenpenny moved to Strongsville, Ohio, and founded OsteoMed II, expanding her practice and her vision of combining the best of conventional and alternative medicine.

Charlie's Story

On April 19th, 1993, I had the privilege and blessing of meeting my 10 lb 3 oz baby boy. I remember feeling so proud of this big baby, and almost gloating about his weight and length. He was the biggest in the nursery that day! I immediately fell in love with him and dreamed about a wonderful future. He might be a football player, or better yet, a "hero." I pretended to see him all grown up in a fireman's suit or United States Marine's uniform. My dreams continued until the age of two.

Then, after the pediatrician finally had enough of me and scheduled an evaluation for Charlie at Miami Children's Hospital.

Conclusion:

Charlie's hearing is perfect. Great!

Charlie's play skills are not appropriate. Not Great!

Charlie has no Fragile X. Great!

Charlie has "Autism." What?

How do you cure it? I'll do anything!
What do you mean, there is no cure?

This is going to be my chosen war against "Autism!" Faith, love and determination were my weapons. "Autism" has met his match. This will be my son's victory at God's chosen time. Everyday, I battle with faith in one hand and determination in the other. Everyday, I regain my son more. My "hero" and little Marine, Charlie!

Mother What Do You See?

OH, MOTHER WHAT DO YOU SEE?

A special child unexpected to me.

OH, MOTHER WHAT CAN YOU DO?

Tell him, "I love you."

OH, MOTHER BUT ISN'T HE TOO MUCH OF A HANDFUL?

My arms will stretch as far as he needs for me to love, hold, and encourage him to be.

OH, MOTHER WHAT PATH SHALL YOU TAKE?

The chosen entry gate of determination and faith.

OH, MOTHER DOESN'T THE CHILD HAVE MANY OBSTACLES LYING AHEAD?

Together, we will defeat and sweep plenty of them away.

OH, MOTHER WON'T YOU GROW TIRED AND SAD?

God will never let me become bitter and mad.

OH, MOTHER DON'T YOU WANT TO MEET OTHERS TO HELP THIS CHILD
SO FULL OF DEFEATS?

God will find and bring to me those special people for our journey.

OH, MOTHER BUT DO MANY PEOPLE REALLY CARE?

My prayer will continue to be asking forgiveness for those who have been very unfair.

OH, MOTHER ISN'T THERE TOO MUCH FOR THIS CHILD TO OVERCOME AND SUCCEED
IN THIS SOMETIMES CRUEL SOCIETY?

I will try and always portray a positive attitude for them to take away.

OH, MOTHER BUT YOU DON'T HAVE A TITLE AND DEGREE. CAN YOU REALLY MAKE
A DIFFERENCE WITH THIS CHILD SO FULL OF NEEDS?

The Lord almighty will give to me an anointment of wisdom and speciality.

OH, MOTHER BUT WON'T OTHERS BE QUICK TO CONDEMN AND NOT SEE?

God will quickly part them away from me.

OH, MOTHER DON'T YOU SEE HARD JUDGEMENT WILL FALL ON THEE?

Judgement can only come from he who gave me this very special child of needs.

OH, MOTHER ISN'T IT UNFAIR TO SOMETIMES NOT FIND A TRUE FRIEND THAT CARES?

Yes, this is sad indeed, but the Holy Spirit who dwells in me keeps good company.

OH, MOTHER CAN'T YOU BE REALISTIC AND SEE, HE IS A CHILD OF TRUE NECESSITY?

All I can really see, is the wonderful revealing of true miracles appointed for me.

GOD IS MERCIFUL AND GENEROUS TO THOSE THAT HUMBLE THEMSELVES IN PRAYER
AND RIGHTEOUSNESS. MAY ALL THE ANSWERS TO VERY HARD QUESTIONS SEEM TO
BE SO MUCH MORE THAN ALONE YOU MAY SPEAK.
