AUTOMOTIVE BEARINGS

Ball Bearings, Tapered Roller Bearings, Hub Bearings, Hub Repairing Kits, Rollers, Automotive Joint Cross, Auto Clutch Release Bearings, Timing Belt Tensioner Pulleys, DAC, DU

Features

CRAFT bearings Automotive offers a comprehensive range of automotive bearings for trucks, trailers, commercial vehicles and passenger cars, designing and manufacturing bearings for European and Asian vehicles. CRAFT's high quality automotive products, guaranteed through continued control, are designed to withstand harsh conditions.

Tapered roller bearing

Frequently used in truck axles. Tapered roller bearing is able to withstand considerable axial and radial loading. By enlarging the outer ring angle, the bearing ability to withstand the axial load increases.

Ball bearing

That is one of the most popular type of rolling bearings. Ball bearing is widely used also in trucks – transmission, reduction gears and engines. We present ball bearing in accuracy class 6, closed type.

Hub bearing

Used in the axles of commercial trucks. Hub bearings come with seals, greasing and mounting rings that are necessary for replacement.

Hub repairing kit

The set of two tapered roller bearings with seals and rings that are also used in the axle. All hub repairing kits come with seals, greasing, assembling and sealing rings that are necessary for replacement.

Rollers

Rollers and roller systems for the single & tandem side curtains, tent halls and roof & poultry systems

Automotive Joint Cross

Auto Clutch Release Bearing**Timing Belt Tensioner Pulleys****DAC**

Double Row Angular Contact Ball Bearing for passenger car wheels

DU

Double Row Tapered Roller Bearings for passenger car wheels
