Business products
2014

Introducing the new features and technologies in the latest lineup
of avast! security solutions for business.

Content

What makes avast! different

NO COMPROMISE IN PROTECTION

AVAST Software leads the security software industry – protecting close to 200 million PCs, Macs, and Android devices around the globe – by distributing FREE antivirus software that makes no compromises in terms of protection.

SPEAKS YOUR LANGUAGE

AVAST business partners distribute avast! solutions and help provide tech support to avast! users in their native languages. Our loyal user community – from forum support to volunteer translators – helps sustain our business model.

INCREDIBLE TECHNICAL ADVANTAGES

Millions of avast! users serve as anonymous sentries for avast! Community IQ™ technology, catching samples of suspicious file activity and sending information on emerging online threats to the avast! Virus Lab. CommunityIQ™ keeps us on guard, as over 80% of new malware infections now spread via the internet.

AWARDED AND CERTIFIED

Anchored by the CommunityIQ network of sensors and supported by multiple protective shields, avast! software has received many awards over the last 20 years, with performance certified by, among others, VB100, ICSA Labs, and West Coast Labs.

avast! Endpoint Protection

avast! Endpoint Protection PLUS

avast! Endpoint Protection Suite

avast! Endpoint Protection Suite PLUS

avast! Email Server Security

avast! File Server Security

avast!
Endpoint Protection

SOHO/SMB

Advantages:

→ Choice of 2 types of central administration
→ Antivirus and anti-spyware protection
→ Low-cost, manageable security solution

- Maximum protection for your Windows workstations
- avast! Small Office Administration tool for simple networks, or avast! Enterprise Administration console for complex networks and advanced administrators
- Comprehensive, adjustable, easy-to-read reporting options
- "Streaming updates" deliver virus signatures in real-time via connection to the AVAST Virus Lab cloud
- Remote Assistance, useful for technical support and general administrative purposes
- Prevents visits to infected websites
- Detects 'rogue' computers on the company network
- Lets you surf websites virtually
- High-performance, with a small resource footprint

Targeted Server Protection for
Business Data

File Server Security

- Stand-alone, high-performance server protection
- Prevents malware-causing data loss
- Scans all the traffic your servers can handle
- Simple to customize and deploy
- Each virus signature sent to you in real-time via connection to the AVAST Virus Lab cloud
- Microsoft SharePoint supported

Email Server Security

- Vital protection for your mailbox servers and data
- High-performance scanning, with superior scalability
- Clustering support, event in active/active mode
- Handling capability for an unlimited number of mailboxes
- Each virus signature sent to you in real-time via connection to the AVAST Virus Lab cloud
- Microsoft Exchange supported

  avast! Email Server Security is licensed per server (not per mailbox).

Central administration.
Choice is yours...

Small Office Administration

Web-based administration console suitable for networks with up to 200 PCs
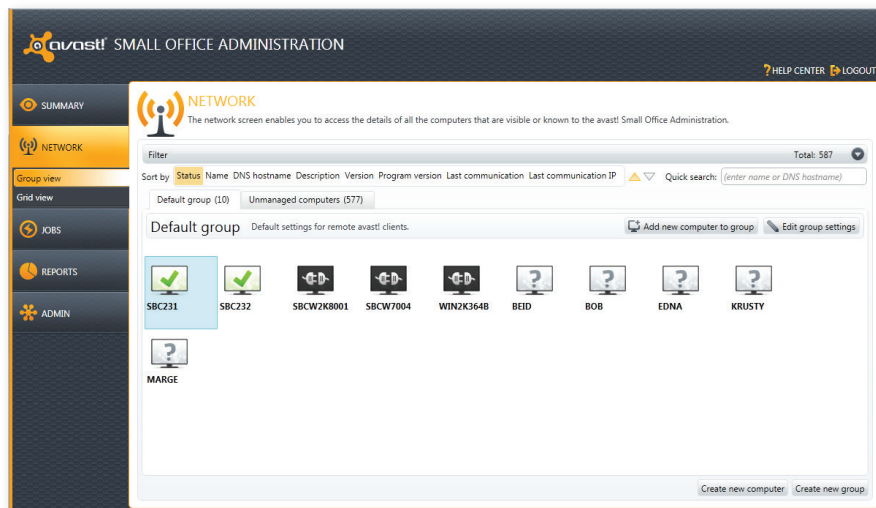

Enterprise Administration

Desktop application for networks of any size

avast!
Small Office Administration

Our improved web-based centralized console, avast! Small Office Administration,
provides you full control over your business computer networks – both endpoints and servers.
Designed for companies with limited IT staff, to manage networks of up to 200 PCs.

Advantages:

→ Easy-to-install management tool

→ Web-based administration console

→ One-level devices grouping

→ Easy-to-navigate graphical user interface (GUI)

→ Auto-discovery of new/unprotected (or 'rogue') PCs
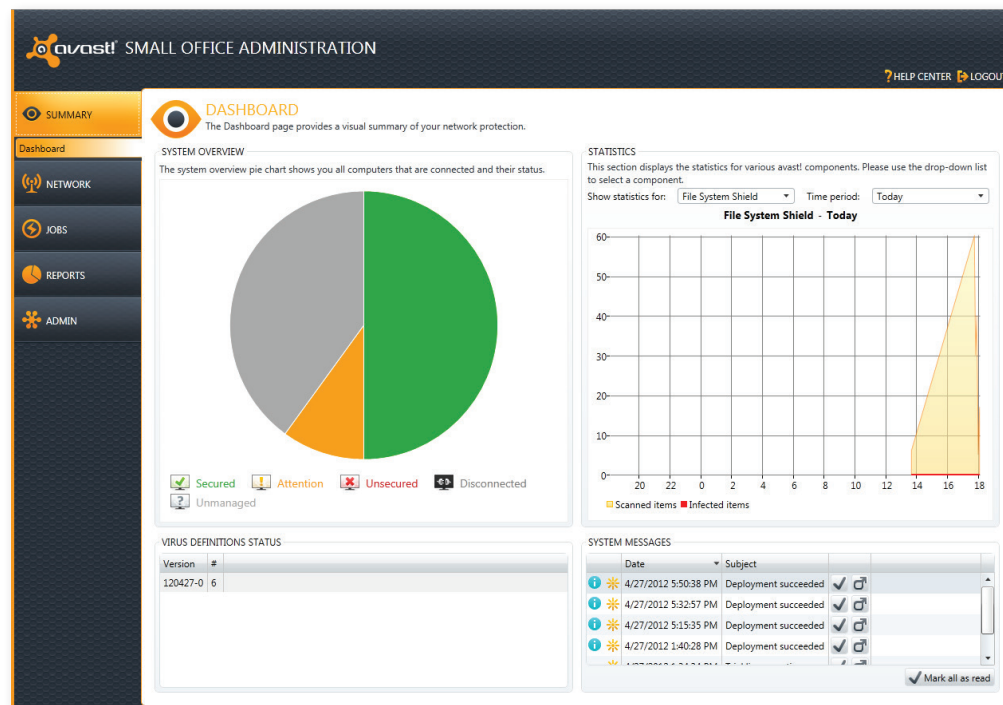

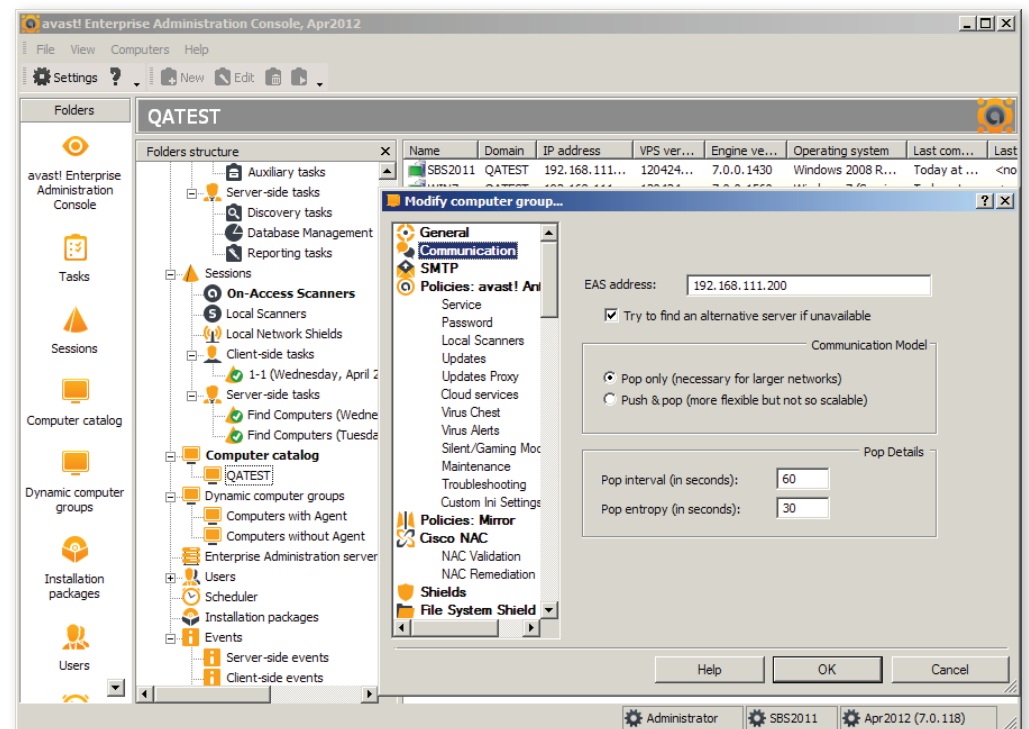

avast!
Enterprise Administration

Multiple avast! Enterprise Administration tools can be deployed for larger networks, with databases replicated regularly and scanning results uploaded to a dedicated avast! Enterprise Administration Server (EAS), from which enterprise-wide reporting can be enabled. PUSH or POP communications models can be chosen, with the latter suitable especially for larger networks or those with roaming users. Each EAS can scale up to tens of thousands of endpoints, provided they are all connected via LAN.

It consists of the following components:

- avast! Enterprise Administration Server (EAS)
- SQL Database
- Administration Console

Advantages:

→ Effective management tool for networks of any size
→ Desktop application
→ Hierarchical devices structured according your needs
→ Remote deployment available
→ Fast and automatic updates
→ Complex alert management
→ Suitable solution for advanced IT administrators

improved feature!

Streaming updates
Better protection against rapidly multiplying malware

With avast! Streaming Updates, you get each virus signature sent to you **in real-time** via connection to the avast! Virus Lab cloud, rather than needing to wait for traditional database updates only a couple times per day.

Every day, the avast! Virus Lab reviews around 50,000 suspicious files and adds signatures for over 30,000 new viruses. With **continuous** updates and faster delivery of virus definitions, your security **increases**.

avast! FileRep
Finding the bad files by knowing the clean ones

Identifying infected files or malware during scanning is a complex process. With the increasing virulence of new malware and the spread of **polymorphic** viruses, knowing which files are safe is a great advantage.

This is what avast! FileRep does. It is a database with hundreds of millions of executable files kept in a **cloud**, built with the help of our **community** of close to 200 million protected PCs, Macs and Android devices.

It enables us to evaluate each file based on its **prevalence** and **emergence**, which helps us determine whether it is clean or not.

new feature!

Remote Assistance

For IT administrators' quicker access of PCs

The Remote Assistance feature allows avast! users to connect
and share desktops with each other. This may be useful
for technical support as well as for general administrative purpose.

Note:
* Instead of our clients having to 'pull' in the updates from the servers, as in the competitor's pulse updates system, avast! 'pushes' updates directly to the client's PCs.

Join our avast! reseller team.
It's easy!

Partner with the computer security provider with the largest user base, two-thirds of which came from world via word of mouth.

- Great margins, which can increase based on performance

- Easy to install and use our software, leading to more-satisfied end users

- Widest range of multilingual support

- One of the simplest B2B portals available

- Close to 200 million people already know and trust our products
