

AXCT185 Compound Crossbow

OWNER'S MANUAL

READ ALL INSTRUCTIONS AND WARNINGS BEFORE USING

If you have any questions about this product or need some help, do not return the product to the store before talking with CenterPoint Hunting and Outdoors. Feel free to visit us at centerpointhunting.com, or speak with one of our friendly customer service (1-866-726-1122) representatives Monday through Friday between the hours of 8AM and 4:30PM EST.

AWARNING: RECOMMENDED FOR ADULT USE ONLY. MISUSE OR CARELESS USE MAY RESULT IN SERIOUS INJURY OR DEATH. READ ALL INSTRUCTIONS BEFORE USING.

AWARNING: ALWAYS KEEP HAND, THUMB AND FINGERS BELOW FLIGHT TRACK. FAILURE TO DO SO MAY CAUSE SERIOUS INJURY.

AWARNING: BUYER AND USER HAVE THE DUTY TO OBEY ALL LAWS ABOUT THE USE AND OWNERSHIP OF THIS CROSSBOW.

AWARNING: THIS PRODUCT CONTAINS ONE OR MORE CHEMICALS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER AND BIRTH DEFECTS (OR OTHER REPRODUCTIVE HARM).

1. Safety First

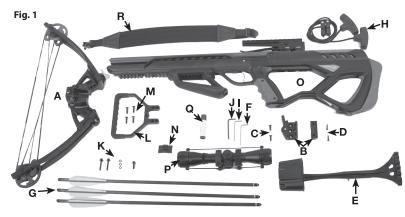

A. Target Safety

- ALWAYS treat the crossbow as though it is loaded and ready to fire.
- ALWAYS treat the crossbow with the same respect you would a firearm.
- ALWAYS store the crossbow unloaded and away from children.
- ALWAYS check to see if the crossbow is "ON SAFE" and unloaded when getting it from another person or from storage.
- ALWAYS keep the crossbow pointed in a SAFE DIRECTION.
- ALWAYS keep the crossbow "ON SAFE" until you are ready to shoot.
- **ALWAYS** keep finger off the trigger and out of the trigger guard until ready to shoot.
- ALWAYS be sure of your target and beyond.
- ALWAYS check your archery backstop for wear before and after such use. All target backstops are subject to wear and will
 eventually fail. Replace your target backstop if the surface is worn or damaged.
- **NEVER** cock or load the crossbow until you are ready to shoot.
- **NEVER** point the crossbow at any person.
- **NEVER** point the crossbow at anything you do not intend to shoot.

B. Crossbow Safety

- ALWAYS check the crossbow thoroughly for worn, damaged, loose or missing parts prior to shooting.
- ALWAYS inspect your arrows/bolts regularly. Damaged arrows/bolts may cause serious injury. Any nicked, dented, split, or splintered bolts should be discarded immediately.
- ALWAYS keep hands, fingers and thumbs below the travel path of the bow string and cables.
- **ALWAYS** be sure the crossbow limbs are clear from striking tree limbs and other obstacles before shooting.
- ALWAYS wear safety glasses with any type of archery product.
- NEVER dry fire the crossbow. Shooting without an arrow/bolts will cause damage to your crossbow and could cause injury
 to the shooter.
- **NEVER** use underweight arrows/bolts. This has the same effect as dry-firing a crossbow and may cause damage to the crossbow and injury to the shooter.
- NEVER shoot any projectile in the crossbow except for arrows/bolts recommended by CenterPoint Hunting and Outdoors
 for the specific crossbow. Shooting other than recommended bolts could result in injury or damage to the crossbow (see
 specification chart for bolt information).
- NEVER draw your crossbow beyond the maximum draw length or damage to the limbs, cables and strings could occur.
- **NEVER** use your hand or the rope cocker to uncock the crossbow as it may cause serious injury to the user or damage to the crossbow
- **NEVER** attempt to disassemble or tamper with the crossbow. Special tools are required for working on the crossbow. Contact an established archery shop for assistance. Using anything other than an established archery shop or modifying the function of the crossbow in any way may render the crossbow unsafe and will void the warranty.

2. Parts List (see Fig. 1):

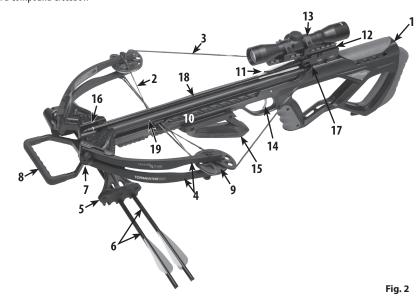

- **A.** Limbs/Riser Assembly (w/Strings/cables)
- **B.** Quiver Mount (2pcs)
- C. Ouiver Screws (2)
- **D.** Quiver Mount Screws (2)
- E. Ouiver
- F. Ouiver Small Hex Wrench
- **G.** Bolts (3)
- H. Rope Cocker
- I. Large Assembly Hex Wrench
- J. Small Assembly Hex Wrench
- K. Limb Screws/Lock Washers- (3)
- L. Foot Stirrup

- M. Stirrup Screws (4)
- N. Cable Slide
- **0.** Crossbow Main Body (Stock/Barrel/)
- P. 4x32 mm Scope
- Q. Rail Lube/String Wax
- R. Shoulder Sling

3. LEARNING THE PARTS OF THE CROSSBOW (see Fig. 2)

Parts of a Compound Crossbow

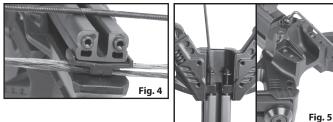

- 1. Stock
- Cables
- 3. String
- 4. Split Limb
- 5. Quiver
- 6. Bolts/Arrows
- 7. Limb Pocket
- 8. Foot Stirrup
- 9. Cam
- 10. Barrel
- 11. Bolt/Arrow Retention Spring
- 12. Sight Bridge
- **13.** Scope

- **14.** Trigger
- **15.** Fore grip
- **16.** Riser
- 17. Servina
- **18.** Flight Groove
- **19.** Rail

4. ASSEMBLING THE CROSSBOW

A. Installing the Limbs

- **1.** Attach the cable slide to the cables. (Fig. 3)
- 2. Slide the cable slide into the opening at the end of the barrel while sliding the string down the top of the rail. (Fig. 4)

B. Inserting the Stirrup

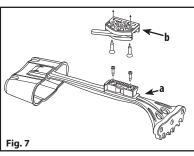

1. Attach the stirrup onto the riser by using the 4 screws using the small hex wrench (Fig. 6)

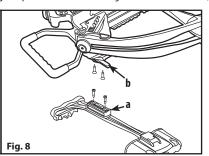

Note: Be sure that the limb screw and limb assembly is secured tightly to the crossbow barrel before using the crossbow. Assembly bolts may need to be retightened periodically after use.

C. Assembling the Quiver

- 1. Screw the quiver mount into the quiver with quiver screws use a screwdriver (not included) (Fig. 7)
- 2. Screw quiver mount onto the bottom of the stock using the quiver mount screws using the small hex wrench. (Fig. 8)

D. Attaching Quiver to Stock Assembly

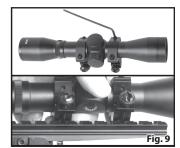

- 1. Connect quiver mount A to quiver mount B by sliding the two mounts together locking in place with locking lever.
- **2.** Ensure guiver is locked and secure.

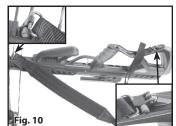

E. Attaching the Scope

- Attach the Scope mount rings onto the scope using the scope mount screws (4)
- Position your scope by moving it forward or backward until the proper eye relief is found. This is typically three or four inches from your eye to the eyepiece when you are holding the crossbow in a shooting position.
- 3. Align the scope mount with the slots on the sight bridge rail. (Fig. 9)
- Align the screws with the grooves on the rail, and tighten screw heads with a screw driver (not included).

F. Attaching the Shoulder Sling

- Attach the shoulder sling to the sling studs. Loosen the spring loaded thumb screw on the swivel and then press it to unlock the latch. (Fig. 10)
- 2. Hook it onto the stud under the stock and then tighten down the thumb screw to secure the latch.

5. OPERATING THE SAFETY

CAUTION: Like all mechanical devices, a crossbow safety can fail. Even when the safety is "ON SAFE", you should continue to handle the crossbow in a safe manner.

A. To put the Crossbow on "SAFE"

- Always keep the crossbow pointed in a SAFE DIRECTION.
- The safety is automatically engaged when the string is properly cocked.
- The safety is not engaged ("SAFE") unless it is all the way back (Fig. 11)

B. To put the Crossbow to "FIRE"

- Make sure the crossbow is pointed in a SAFE DIRECTION.
- Locate the safety on either side of the stock
- Push forward for "FIRE" (Fig. 12)
- Push the safety all the way forward.
- The safety is now disengaged ("FIRE").

6. COCKING THE CROSSBOW

- DO NOT cock or load the crossbow unless in a safe area and in a position to load and shoot safely.
- Be sure to apply the lube wax to the string including the center serving, cables and the flight track before cocking.

NOTE: TO COCK THE CROSSBOW, THE SAFETY MUST BE IN THE "FIRE" POSITION. AS YOU COCK THE CROSSBOW THE SAFETY WILL ENGAGE TO THE "ON SAFE POSITION".

- Place the safety in the "FIRE" position. The crossbow will not cock if the safety is in the "SAFE" position. Pull the trigger to verify that it is ready to accept the string. If the trigger will not move, the safety is on "SAFE" and the crossbow cannot be cocked.
- Place the cocking stirrup on the ground and place a foot securely inside.
- Place the center of the cocking rope in the rope groove. (Fig. 13)
- Place the hooks of the cocking rope onto the crossbow string on each side of the flight rail. For the maximum pull force, place the cocking hooks up, not hooks down, then pull with even force. (Fig. 14)
- Pull both t-handles simultaneously, smoothly drawing the crossbow string back under the bolt retention spring and into the string opening of the trigger mechanism. (Tension will keep the cocking hooks against the rail if done properly.
- Continue drawing until the trigger safety switch moves to the "SAFE" position. (Fig. 15)
- Relax the tension slightly to ensure the trigger latch has fully captured the crossbow string.

NOTE: The main string should click into place and the safety should automatically engage. If the string is being captured by the trigger latch, let go of the string.

- Once cocked, remove the rope cocker hooks from the crossbow string
- The crossbow is now cocked and ready for loading an arrow/bolt.

7. LOADING THE CROSSBOW

- Verify the crossbow safety is in the "SAFE" position
- Point the crossbow in a SAFE DIRECTION.
- Be sure to use only arrows/bolts that are the recommended weight and size. (See Section 8. Specification Chart for arrow/bolt information)

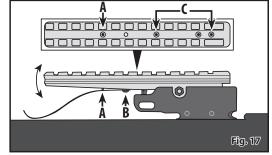

- Place the arrow/bolt so that the cocking vane/fletching (the odd colored vane/fletching), is down in the flight groove (Fig. 16)
- Slide the arrow/bolt back to the trigger assembly, under the arrow/bolt retention spring, until the arrow/bolt nock rests fully on the string.

8. To Adjust The Bolt Retention Spring:

- If Retention Spring is not holding the arrow/bolt firmly onto the rail, the tension of the Retention Spring can be tightened
 or loosened by turning the Retention Spring Adjustment Set Screw (Fig. 17 A).
- If the retention spring becomes loose or damaged, it can be replaced.

A. To Replace The Retention Spring,:

- 1. Remove the Retention Spring Screw (Fig. 17 B).
- 2. Remove old retention spring and replace with new, align the hole (Fig. 17 B) with The Retention Spring Adjustment Screw
- **3.** Tighten Retention Spring Screw (Fig. 17 B).
- **4.** Adjust tension by turning the Retention Spring Adjustment Screw.
- After following these steps and reading the entire manual, including the section on reviewing safety procedures, your crossbow is now loaded and ready to fire.

AWARNING: KEEP THE CROSSBOW IN THE "SAFE" POSITION UNTIL YOU ARE ACTUALLY READY TO SHOOT. THEN PUSH THE SAFETY FORWARD TO THE "FIRE" POSITION.

9. Aiming And Firing Safely

AWARNING: KEEP FINGERS AND THUMB BELOW THE TRAVEL PATH OF THE BOW STRING AND CABLES. FAILURE TO DO SO COULD RESULT IN SERIOUS INJURY.

A. Aiming the Crossbow

- Always point the crossbow in a SAFE DIRECTION.
- Always keep fingers and thumb below the travel path of the bow string (Fig. 18)
- You and others with you should always wear shooting glasses to protect your eyes. With the crossbow pointed down
 range, shoulder the crossbow, and place your hand on the stock with your fingers and thumb positioned on the fore grip,
 below the travel path of the string (Fig. 19)
- Do not shoot at hard surfaces or at the surface of water. The arrow/bolt may bounce off or ricochet and hit someone or something you had not intended to hit.
- Always choose the target carefully.
- THINK about what you will hit if you miss the target.

B. Sighting In The Crossbow

• The crossbow is equipped with a scope. Follow the instructions included with the scope for sighting and adjusting.

C. Sighting in the Crossbow: Sight Bridge Adjustment

If the elevation needs to be adjusted above or below the range of the scope adjustments, the Sight Bridge may be adjusted to change the elevation for different types of scopes. The sight bridge can be adjusted by:

- 1. Loosen the two set screws from the top of the sight bridge (Fig. 17 C) using a 3/32 hex wrench.
- 2. Raise or lower the front of the Sight Bridge (Fig. 17 C)
- **3.** When the desired angle is achieved, tighten the set screws.
- **4.** Install the scope to the sight bridge.

D. Firing

- With the crossbow pointed in a SAFE DIRECTION and hands in the proper position release the safety by pushing the safety all the way forward (see section 3B).
- Pull the trigger.

E. De-cocking the Crossbow

AWARNING: DO NOT USE YOUR HAND OR THE ROPE COCKER TO UNCOCK THE CROSSBOW AS IT MAY CAUSE SERIOUS INJURY TO THE USER OR DAMAGE TO THE CROSSBOW.

- You should not cock or load the crossbow unless you are in a safe area and in a position to shoot safely.
- ALWAYS identify the target and beyond the target prior to shooting.
- If for some reason you must de-cock the crossbow, DO NOT DRY FIRE IT. Load an old arrow/bolt and fire into a safe target after following the instructions in this manual. Dry firing can cause serious injury or damage to the crossbow.

10. Maintaining the Crossbow

- NEVER DRY FIRE THE CROSSBOW.
- DO NOT MODIFY OR ALTER THE CROSSBOW. Attempts to modify the crossbow in any way inconsistent with this manual
 may render the crossbow unsafe to use, cause serious injury or death, and will void the warranty.
- If you drop the crossbow, check to see that it works properly before you use it again. If anything seems changed, like a shorter or weaker trigger pull, this may mean broken parts.
- Always check the crossbow thoroughly for worn, damaged, loose or missing parts prior to shooting. Call customer service for assistance before using the crossbow again.
- Periodically place a light coat of silicon based lubricant on all metal parts to prevent rust and corrosion.
- We also recommend lube wax (included) to reduce fraying and wear. Apply a small amount of lube wax every 12-15 shots to the rail. Paying close attention to where the string comes in contact with the rail. Do not over lubricate the center section of the crossbow string as this may cause a buildup of lubricant in the trigger mechanism. Keep the flight track and the string serving waxed to reduce friction. Always check and replace frayed or worn strings and cables.
- Change strings when they become worn or frayed. Contact an established archery shop to change the strings. Changing strings requires experience and a bow press which can found at an established archery shop.
- Inspect all arrows/bolts for wear, damage, or nicks before using. If any wear damage or nicks are found dispose of the arrows/bolts properly.
- Always store your crossbow in a cool, dry place. Do not expose your crossbow to excessive heat such as leaving it in an
 automobile trunk on a hot day or storing it next to a furnace vent.

Specifications

Draw Weight	185	Riser	Aluminum Die Cast
FPS	370	System	Split limb
Stock	Reinforced Composite	Optics	4x32 Reticle
Limb	Compression Fiberglass	Trigger	Auto Safety, Anti Dry Fire, 2.7 lbs.
String Length	35 1/2"	Bolt Size	20"
Color	Black/Camo	Width	18" Uncocked,14" Cocked
Mass Weight	7.8lbs	Bolt Weight	400 grain
Length	35"		

LIMITED WARRANTY FOR CENTERPOINT CROSSBOW

Your CenterPoint™ crossbow is warranted to be free of defects in materials and workmanship for 5 years. This warranty is not transferable and as such is limited to the original owner. All parts are warranted for 5 year from date of purchase. This warranty does not cover damages due to fair wear and tear, failure to provide routine maintenance, and does not include strings or accessories. In the event of a defect under this warranty, we will, at our option, repair or replace the product; provided, however, our inspection indicates that an original defect exists. CenterPoint reserves the right to replace any product which is no longer available with a product of comparable value and function. If CenterPoint determines the repair is not covered under the warranty guidelines, there could be a charge to you for the repair. This is a limited warranty and does not cover damages caused by misuse, improper handling or installation or maintenance provided by someone other than a CenterPoint Authorized Service Station.

This limited warranty does not include consequential damages, incidental damages, or incidental expenses, including damage to property or any other expense. CenterPoint disclaims any implied warranties, including the implied warranties of merchantability and fitness. Some states do not allow the exclusion or limitation of incidental or consequential damages, or allow limitations on implied warranties so the above limitations or exclusions may not apply to you. To the extent any provision of this warranty is prohibited by federal, state or municipal law, which cannot be preempted, it shall not be applicable. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state and country to country.

STOP – BEFORE YOU RETURN THIS PRODUCT TO THE STORE

Save on gas and avoid the trip back to the store. Contact our Customer Service/Technical Support representatives for information and trouble-shooting help at 1-866-726-1122 or visit our web site at centerpointhunting.com.

WARRANTY CLAIMS/ REPAIR SERVICE

If your product needs repair, DO NOT ATTEMPT TO DISASSEMBLE IT! Any disassembly or modification not performed by a Centerpoint Authorized Service Station will void the warranty.

U.S. Customers - Contact CenterPoint Customer Service -1-866-726-1122 or email us at centerpointhunting.com. You will be instructed where and how to send your CenterPoint product in for repair/replacement under warranty or referred an authorized service center.

CenterPoint

Crosman Corporation Attn: Warranty Dept. 7629 Route 5 & 20 Bloomfield, NY 14469

Include with your product a copy of your receipt and a brief description of the problem. Be sure to indicate your name, mailing address, email address and telephone number. Allow 2-4 weeks for product repair/replacement. We recommend you use a method of shipping that provides you with a tracking number and insurance options. CenterPoint is not liable for any merchandise damaged, lost or stolen during shipping to and from CenterPoint.

Canadian Customers - Contact the Gravel Agency, in Quebec at 866-662-4869.

Outside U.S. Customers: Please contact your point of purchase dealer/distributor. If you do not know your dealer/distributor, contact our International Dept. for assistance at 585-657-6161 or email us at centerpointhunting.com.
