PROFESSIONAL EXPERIENCE

Dr. Singh has been active in the nuclear power industry since 1971, and has served as President and CEO of Holtec International since 1986. In his early career, Dr. Singh participated in the development of design of systems, structures and components, with special focus on critical service heat exchangers and pressure vessels for PWRs and BWRs for scores of nuclear units around the world. After the TMI accident, his professional focus shifted to the introduction and regulatory acceptance of safe and robust technologies to deal with the growing stockpile of used nuclear fuel and high-level waste. Under Dr. Singh's leadership, Holtec International has risen into a complex global organization with an active business presence in 20 countries on five continents and three world class manufacturing plants that produce a whole range of equipment and systems for the nuclear power industry. In recent years, Dr. Singh has been focusing on developing innovative solutions for *proto-prompt decommissioning* of aging nuclear power plants and a walk away safe small modular reactor. Holtec's ongoing efforts to establish world's first *subterranean* consolidated interim fuel storage facility is another area of Dr. Singh's professional concentration.
