Editor in Chief

Luboš Sobotka, MD, PhD

Professor of Medicine
3rd Department of Medicine
Metabolic Care and Gerontology
Medical Faculty – Charles University
Hradec Králové
Czech Republic

Associate Editors

Simon P. Allison, MD, FRCP

Professor in Clinical Nutrition
Department of Diabetes, Endocrinology
and Nutrition
Queen's Medical Center
Nottingham
United Kingdom

Alastair Forbes, BSc, MD, FRCP, FHEA

Clinical Professor of Medicine
Chief of Research and Innovation
Norwich Medical School
University of East Anglia
Norwich
United Kingdom

Rémy F. Meier, MD

Professor of Medicine
Head of Department of Gastroenterology,
Hepatology and Nutrition
University Hospital
Kantonsspital Liestal
Liestal
Switzerland

Stéphane M. Schneider, MD, PhD, FEBGH

Professor of Nutrition
Nutritional Support Unit
Archet University Hospital
Nice
France

Peter B. Soeters, MD, PhD

Emeritus Professor of Surgery
Department of Surgery
University Hospital Maastricht
Maastricht
The Netherlands

Zeno Stanga, MD, PhD

Professor in Internal Medicine and Clinical
Nutrition
Division of Endocrinology, Diabetes and
Clinical Nutrition
Division of General Internal Medicine
University Hospital
Bern
Switzerland

Andre Van Gossum, MD, PhD

Professor
Head of the Clinic of Intestinal Diseases
and Nutritional Support
Department of Gastroenterology
Hopital Erasme
Universite Libre de Bruxelles
Brussels
Belgium

List of authors**Michael Adolph, MD, PhD**

Associate Professor
Head of Nutrition Support Team
Senior Physician Anesthesiology and Intensive
Care Medicine
University Clinic Tuebingen
Tuebingen
Germany

Carla Aeberhard, PhD

Department of Endocrinology, Diabetes and
Clinical Nutrition
Bern University
Hospital and University of Bern
Bern
Switzerland

Simon P. Allison, MD, FRCP

Professor in Clinical Nutrition
Department of Diabetes, Endocrinology and
Nutrition
Queen's Medical Center
Nottingham, UK

Raffaella Antonione, MD

Internal Medicine
Clinica Medica, Ospedale di Cattinara
Azienda Ospedaliero-Universitaria
Trieste
Italy

Peter Austin

Senior Pharmacist
Southampton University NHS Hospitals Trust
Southampton
United Kingdom

Mette M Berger, MD, PhD

Professor of Intensive care medicine
Service of Intensive Care Medicine & Burns
Lausanne University Hospital (CHUV)
CH- 1011 Lausanne
Switzerland

Stephan C Bischoff, MD, PhD

Professor of Medicine
Institute of Nutritional Medicine
University of Hohenheim
Stuttgart
Germany

Gyorgy Bodoky, MD, PhD

Professor of Oncology
St. Laszlo Teaching Hospital
Department of Oncology
Budapest
Hungary

Prof Yves Boirie, MD, PhD

University of Clermont-Ferrand
Clinical Nutrition department of the University
Hospital of Clermont-Ferrand
Human Nutrition Research Center
Clermont-Ferrand
France

**Marian A. E. van Bokhorst – de van der
Schuere, RD, PhD**

Senior nutrition scientist
Department of nutrition and dietetics
VU University Medical Center
Amsterdam
The Netherlands

Dr Kurt Boeykens

Clinical Nutrition Nurse Specialist
Nutrition Support Team
AZ Nicolaas Hospital
Sint-Niklaas
Belgium

Federico Bozzetti, MD

Surgeon oncologist
Faculty of Medicine
University of Milan
Milan
Italy

Valentina Bozzetti, MD, PhD

Neonatal Intensive Unit
San Gerardo Hospital
Monza
Italy

Marco Braga, MD

Professor of Surgery
San Raffaele University
Milan
Italy

Fang Cai, MD

Physician
Unit of Nutrition
Geneva University Hospital
1211 Geneva 14
Switzerland

Philip C. Calder, PhD, DPhil

Professor of Nutritional Immunology
Institute of Human Nutrition and Human
Development and Health Academic Unit
Faculty of Medicine
University of Southampton
Southampton General Hospital
Southampton
United Kingdom

Maria E. Camilo, MD, PhD

Professor of Medicine and Nutrition
Research Unit of Nutrition and Metabolism
Institute of Molecular Medicine
Medical Faculty
Lisbon University
Lisbon
Portugal

Noël Cano, MD, PhD

Professor of Nutrition
Human Nutrition Research Center of Auvergne
Human Nutrition Unit, UMR 1019 INRA-
Clermont University
Clinical Nutrition Unit, Clermont-Ferrand
University Hospital
Clement-Ferrand
France

Anja Carlsohn, Prof, Dr

Department of Ecotrophology
Faculty of Life Science
University of Applied Science
Hamburg
Germany

Yvon A. Carpentier, MD

Professor of Pathological Biochemistry and
Nutrition
L. Deloyers Laboratory for Experimental
Surgery
Université Libre de Bruxelles
Brussels
Belgium

Tommy Cederholm, MD, PhD

Professor of Clinical Nutrition
Department of Public Health and Caring
Sciences
Uppsala University
Uppsala
Sweden

Emanuele Cereda, MD, PhD

Researcher and Physician
Nutrition and Dietetics Service
IRCCS Fondazione Policlinico San Matteo
Pavia
Italy

Irit Chermesh, MD

Deputy Director of Gastroenterology
Department
Medical Director of Clinical Nutrition
Rambam Health Care Campus
Haifa
Israel

Michael Chourdakis, MD, RD, MPH, PhD

Assistant Professor of Medical Nutrition
Dept. of Medicine
Aristotle University of Thessaloniki
Thessaloniki
Greece

Luc Cynober, PharmD, PhD

Professor of Nutrition
Head of Departments
Dept. of Experimental, Metabolic and Clinical
Biology
Pharmacy Faculty – Paris Descartes University
and Clinical Chemistry Department
Cochin and Hôtel-Dieu Hospitals, APHP
Paris
France

Erno Dardai, MD, PhD

Department of Anesthesiology and Intensive
Therapy
St. Stephen's Hospital
Budapest
Hungary

Sarah Delliere, MD, MS

Service de Biochimie
Hopital Cochin
Groupe Hospitalier HUPC, APHP
Paris
France

Nicolaas E. P. Deutz, MD, PhD

Professor of Geriatrics. Professor of Pediatrics
and Nutrition
Center for Translational Research in Aging
& Longevity
Department of Health and Kinesiology
Texas A&M University
College Station, TX
USA

David F. Driscoll, PhD

Vice President
Stable Solutions LLC
Easton, MA
USA

Wilfred Druml, MD

Professor of Medicine
Medical Department III
Division of Nephrology
University of Vienna and Vienna
General Hospital
Vienna
Austria

Stanley J. Dudrick, MD, FACS

Professor of Surgery
Chairman, Department of Surgery
Director, Program in Surgery
St. Mary's Hospital
Waterbury, CT
Yale University School of Medicine
New Haven, CT
USA

Marinos Elia, MD, FRCP

Professor of Clinical Nutrition & Metabolism
Institute of Human Nutrition
University of Southampton
Southampton General Hospital
Southampton
United Kingdom

**Nicholas D. Embleton, MD, MBBS, FRCPCH,
BSc**

Consultant Neonatal Pediatrician
Honorary Reader in Neonatal Medicine
Royal Victoria Infirmary
Newcastle Hospital
NHS Foundation Trust
Newcastle upon Tyne
United Kingdom

Joel Faintuch, MD, PhD

Senior Professor
Department of Gastroenterology
Sao Paulo University Medical School
Sao Paulo
Brazil

Joel J. Faintuch, MD, PhD

Professor of Medicine
Department of Medicine
Hospital das Clinicas
Sao Paulo University Medical School
Sao Paulo
Brazil

Enrico Fiaccadori, MD, PhD

Renal Failure Unit
Division of Nephrology
Parma University Hospital
University of Parma
Parma
Italy

Eric Fontaine, MD, PhD

Professor of Medicine
INSERM U1055 - LBFA
Joseph Fourier University
Grenoble Cedex
France

Alastair Forbes, BSc, MD, FRCP, FHEA

Clinical Professor of Medicine
Chief of Research and Innovation
Norwich Medical School
University of East Anglia
Norwich
United Kingdom

Konstantinos C. Fragkos, MB, BS, MSc, PhD

Clinical Research Fellow in Gastroenterology
and Clinical Nutrition
University College London
London
United Kingdom

Wim G. van Gemert, MD, PhD

Colorectal, Gastrointestinal and Pediatric
Surgeon
Academic Hospital Maastricht and Maastricht
University
Maastricht
The Netherlands

Laurence Genton, MD, PhD

Professor in Clinical Nutrition
Clinical Nutrition
Geneva University Hospital
Geneva
Switzerland

M. Cristina Gonzalez, MD, PhD

Professor of Post-Graduation Program in Health
and Behaviour
Catholic University of Pelotas
Pelotas RS
Brazil

Olivier Goulet, MD, PhD

Professor of Paediatrics
Department of Gastroenterology
Hopital Necker Enfants-Malades
Paris
France

Robert F. Grimble, BSc, PhD, RNutr

Professor of Nutrition
Division of Developmental Origins
of Health and Disease
School of Medicine
University of Southampton
Southampton
United Kingdom

Martin Haluzik, MD, PhD

Professor of Medicine
Department of Experimental Diabetology
Institute for Clinical and Experimental Medicine
Prague
Czech Republic

Folke Hammarqvist, MD, PhD

Professor in Emergency Surgery
Department of Surgical Gastrocenter.
CLINTEC – Department of Clinical Science,
Intervention and Technology
Karolinska University Hospital Huddinge
Stockholm
Sweden

Gil Hardy, PhD, FRSC

Professor of Pharmaceutical Nutrition
Faculty of Medical and Health Sciences
University of Auckland
Auckland
New Zealand

Laszlo Harsanyi, MD, PhD

Professor of Surgery
1st Surgical Department
Faculty of Medicine
Semmelweis University
Budapest
Hungary

Reem Hawarym RD

King Faisal Specialist Hospital & Research
Center
11578 Riyadh
Saudi Arabia

J Pat Howard, RD

Head of Nutrition and Dietetic Services
United Bristol Healthcare Trust
Bristol Royal Infirmary
Bristol BS2 8HW
United Kingdom

Pao Ying Hsiao, MS, RD, LDN

Assistant Professor and Registered Dietitian
Department of Nutritional Sciences
Pennsylvania State University
USA

Martin Hubner, MD, PD

Consultant Surgeon
Department of Visceral Surgery
Lausanne University Hospital - CHUV
Lausanne
Switzerland

Gordon L Jensen, MD, PhD

Professor of Medicine
Head of Department of Nutritional Sciences
Pennsylvania State University
USA

Philippe Jolliet, MD

Senior Lecturer
Medical Intensive Care
Geneva University Hospital
Geneva
Switzerland

Cora F. Jonkers-Schuitema, RD, Bc

Dietitian
Academic Medical Center
Amsterdam
The Netherlands

Francisco J. Karkow, MD, PhD

Full Professor
Department of Nutrition
Fatima Faculty
Caxias do Sul
Brazil

Luiza Kent-Smith, PhD, RD

Professional Leader Nutrition & Dietetics
Saskatoon Health Region
Saskatoon
Canada

Berthold Koletzko, MD, PhD

Professor of Paediatric
Division Metabolic and Nutritional Medicine
Dr. von Hauner Children's Hospital
Ludwig-Maximilians-University of Munich
Munich
Germany

Jens Kondrup, MD, Dr Med Sci

Professor in Clinical Nutrition
Clinical Nutrition Unit 5711
Rigshospitalet University Hospital,
Copenhagen
Denmark

Angela Koverech, MD

Department of Clinical and Molecular Medicine
Sapienza University
Rome
Italy

Zeljko Krznarič, MD, PhD, FEBGH

Professor of Medicine
Head of Division of Gastroenterology
Department of Medicine
University of Zagreb
Zagreb
Croatia

Irma Kushta, MD

Department of Clinical Medicine
Sapienza – University of Rome
Rome
Italy

Alexey V. Lapitsky, MD, PhD

Research scientist
Laboratory of Clinical Nutrition
Saint-Petersburg I.I. Dzhanlidze Research
Institute of Emergency Medicine
Saint-Petersburg
Russian Federation

Miguel Leon-Sanz, MD, PhD

Professor Endocrinology and Nutrition
Department of Medicine
Medical School
University Hospital Doce de Octubre
Complutense University
Madrid
Spain

Olle Ljungqvist, MD, PhD

Professor of Surgery
Faculty of Medicine and Health,
School of Health and Medical Sciences
Department of Surgery
Örebro University,
Örebro
Sweden

Valery M. Luft, MD, PhD

Professor, Head of Laboratory of Clinical
Nutrition
Saint-Petersburg I.I. Dzhanlidze Research
Institute of Emergency Medicine
Saint-Petersburg
Russian Federation

Stanislav Klek, MD, PhD

Professor of Surgery
General and Oncology Surgery Unit
Stanley Dudrick's Memorial Hospital
Skawina
Poland

Marek Kunecki, MD

Specialist in General Surgery
Department of Clinical Nutrition
Department of General and Vascular Surgery
M. Pirogow Provincial Specialist Hospital
Lodz
Poland

Alessandro Laviano, MD

Associate Professor of Medicine
Department of Translational and Precision
Medicine
Sapienza University of Rome
Rome
Italy

Dileep N Lobo, MS, DM, FRCS, FACS

Professor of Gastrointestinal Surgery
Nottingham University Hospitals
Queen's Medical Centre
Nottingham NG7 2UH
United Kingdom

Jan Maňák, MD, PhD

3rd Department of Medicine
Metabolic Care and Gerontology
Medical Faculty – Charles University
Hradec Králové
Czech Republic

Luis Matos, MSc

Department of Nutrition
USL Gurda
Porto
Portugal

Michael M. Meguid, MD, PhD

Professor Emeritus
Surgery, Neuroscience and Physiology
Department of Surgery
Upstate Medical University
University Hospital
Syracuse, NY
USA

Rémy F. Meier, MD

Professor of Medicine
Head of Department of Gastroenterology,
Hepatology and Nutrition
University Hospital
Kantonsspital Liestal
Liestal
Switzerland

Katarina Melzer, PhD

Equiliberty Consulting, LLC
University of Lausanne
Lausanne
Switzerland

Maarten F. von Meyenfeldt, MD, PhD

Professor of Surgical Oncology
Department of Surgery
University Hospital Maastricht
Maastricht
The Netherlands

Alvaro A. C. Morais, MD, MS

Full Professor
Department of Surgery
EMESCAM Medical Scholl
Vitoria
Brazil

Adéla Mrózková, MD

Department of Hygiene and
Preventive Medicine
Medical Faculty
Charles University
Hradec Králové
Czech Republic

Stefan Mühlebach, PhD

Professor of Pharmacology and Hospital
Pharmacy
Hospital Pharmacist FPH
Medical Faculty
Division of Clinical Pharmacology & Toxicology
University Hospital of Basel
Basel
Switzerland

Maurizio Muscaritoli, MD, FACN

Professor of Medicine
Department of Clinical Medicine
Sapienza – University of Rome
Rome
Italy

Ton Naber, MD, PhD

Professor of Clinical Nutrition
Department of Gastroenterology and
Hepatology
Medical Faculty
University Medical Center Nijmegen
Nijmegen
The Netherlands

Luis Alberto Nin, MD

Professor in Nutrition and Director Magister in
Nutrition
Catholic University
Montevideo
Uruguay

Kristina Norman, PhD

Professor of Nutrition and Gerontology
Department of Nutrition and Gerontology
German Institute for Human Nutrition Potsdam
Rehbrücke
University of Potsdam
Potsdam
Germany

Ibolya Nyulasi, MSc

Department of Medicine
Alfred Hospital
Faculty of Medicine
Nursing and Health Sciences
Clayton
Australia

Johann Ockenga, MD, PhD

Professor in Internal Medicine
Department of Gastroenterology,
Endocrinology and Clinical Nutrition
Klinikum Bremen Mitte
Bremen
Germany

Ann Ödlund Olin, PhD, RN

Manager of nursing development
Department of Quality and Patient Safety
Karolinska University Hospital
Stockholm
Sweden

Olivier Pantet, MD

Service of Intensive Care Medicine & Burns
Lausanne University Hospital (CHUV)
CH- 1011 Lausanne
Switzerland

Claude Pichard, MD, PhD

Professor of Medicine
Head of the Unit of Unit of Nutrition
Geneva University Hospital
1211 Geneva 14
Switzerland

Matthias Pirlich, MD, PhD

Professor of Medicine
Head of Department
Department of Internal Medicine
Evangelische Elisabeth Klinik
Lützowstr. 24-26
10785 Berlin
Germany

Loris Pironi, MD

Associate professor of Food and Dietetic
Sciences
Department of Medical and Surgical Science
School of Medicine
University of Bologna
Bologna
Italy

Mathias Plauth, MD

Professor of Medicine
Head of Department of Internal Medicine
Community Hospital Dessau
Dessau
Germany

Jean-Charles Preiser, MD, PhD

Clinical Director
Department of Intensive Care
Erasmee University Hospital
Brussels
Belgium

**John W. L. Puntis, BM (Hons), DM, FRCP,
FRCPC**

Consultant Paediatric Gastroenterologist
The General Infirmary at Leeds
Leeds, West Yorkshire
United Kingdom

Petronella Lucia Martha Reijven, MSc, PhD

Nutritional Scientist
Department of Clinical Dietetics
Maastricht University Medical Centre
Maastricht,
The Netherlands

Filippo Rossi Fanelli MD, FACN

Profesor of Medicine
Department of Clinical Medicine
Sapienza – University of Rome
Rome
Italy

Nada Rotovnik Kozjek, MD, PhD

Associate Professor of Oncology and Dietetics
Institute of Oncology
Clinical Nutrition Unit
Medical Faculty
University of Ljubljana
Slovenia

Hans P. Sauerwein, MD

Emeritus Professor of Energy Metabolism
Academic Medical Center
Amsterdam
The Netherlands

Anastasia M. Sergeeva, MD

Junior research scientist
Laboratory of Clinical Nutrition
Saint-Petersburg I. I. Dzhanelidze Research
Institute of Emergency Medicine
Saint-Petersburg
Russian Federation

Alan Shenkin, PhD, BSc, FRCP, FRCPath

Emeritus Professor
School of Clinical Sciences
University of Liverpool
Liverpool
L69 3GA
United Kingdom

Stéphane M. Schneider, MD, PhD, FEBGH

Professor of Nutrition
Nutritional Support Unit
Archet University Hospital
Nice
France

Jos M. G. A. Schols, MD, PhD

Professor of chronic care and nursing home
medicine
Department of General Practice
Maastricht University
Maastricht
The Netherlands

Philipp Shütz, MD, MPH

Professor of Medicine
Medical University Department
Kantonsspital Aarau
Aarau
Switzerland

Pierre Singer, MD

Clinical Professor in Anaesthesia and Intensive
Care
Department of General Intensive Care and
institute for Nutrition Research
Tel Aviv University
Rabin Medical Center, Beilinson Hospital
Petah Tikva
Israel

Antonio Sitges-Serra, MD, FRCS

Professor of Surgery
Head of Department of Surgery
University Hospital del Mar
Barcelona University
Barcelona
Spain

Jacek Sobocki, MD, PhD

Professor of Surgery
Department of Surgery and Clinical Nutrition
Medical University of Warsaw
Warsaw
Poland

Luboš Sobotka, MD, PhD

Professor of Medicine
3rd Department of Medicine
Metabolic Care and Gerontology
Medical Faculty – Charles University
Hradec Králové
Czech Republic

Ondřej Sobotka, MD, PhD

3rd Department of Medicine
Metabolic Care and Gerontology
Medical Faculty – Charles University
Hradec Králové
Czech Republic

Maarten R. Soeters, MD, PhD

Department of Endocrinology and Metabolism
University of Amsterdam
Academic Medical Center
Amsterdam
The Netherlands

P. B. Soeters, MD, PhD

Emeritus Professor of Surgery
Department of Surgery
University Hospital Maastricht
Maastricht
The Netherlands

Mattias Soop, MD, PhD

Consultant surgeon
Irving National Intestinal Failure Unit
Salford Royal Hospital
Reader Manchester University
United Kingdom

Zeno Stanga, MD, PhD

Professor in Internal Medicine and Clinical
Nutrition
Division of Endocrinology, Diabetes and
Clinical Nutrition
Division of General Internal Medicine
University Hospital
Bern
Switzerland

Rebecca Stratton, PhD, RD, RNutr

Institute of Human Nutrition
University of Southampton
Southampton General Hospital
Southampton
United Kingdom

Štěpán Svačina, MD, PhD

Professor of Medicine
Head of the 3rd Department of Internal Medicine
Medical Faculty 1
Charles University
Prague
Czech Republic

Bruno Szczygiel, MD, PhD

Professor of Surgery
Department of Human Nutrition
Medical University of Warsaw
Warsaw
Poland

Luc Tappy, MD

Professor of Physiology
Chairman, Department of Physiology
School of Biology and Medicine
Lausanne University
Lausanne
Switzerland

Vladimír Teplan, MD, PhD

Professor of Medicine
Institute for Postgraduate Education
Department of Nephrology
Institute for Clinical and Experimental Medicine
Prague
Czech Republic

Ronan Thibault, MD, PhD

Professor of Nutrition
NuMeCan Institute
CHU Rennes, Univ. Rennes, INSERM, INRA
Dept. Nutrition and Endocrinology
Referral Centre for Rare Digestive Diseases
Home Parenteral Nutrition Centre
Rennes
France

Christel Tran, MD

Consulting Physician
Division of Endocrinology Diabetes and
Metabolism
Lausanne University Hospital
Lausanne
Switzerland

Elena Y. Tyavokina, MD

Head of Somatopsychiatry Department
Saint-Petersburg I.I. Dzhanelidze Research
Institute of Emergency Medicine
Saint-Petersburg
Russian Federation

Nachum Vaisman, MD

Professor of Pediatrics
Head of Clinical Nutrition Unit
Tel Aviv Sourasky Medical Center
and Tel Aviv Sourasky Medical School
Tel Aviv
Israel

Maurits F. J. Vandewoude, MD, PhD

Professor of Medicine
Department of Geriatrics
Faculty of Medicine
University of Antwerp
Antwerp
Belgium

Andre Van Gossum, MD, PhD

Professor
Head of the Clinic of Intestinal Diseases and
Nutritional Support
Department of Gastroenterology
Hopital Erasme
Universite Libre de Bruxelles
Brussels
Belgium

Geert Wanten, MD, PhD, MSc

Gastroenterologist, Head Nutrition Support
Team
Intestinal failure Unit
Department of Gastroenterology and
Hepatology
Radboud University Nijmegen Medical Centre
Nijmegen
Nijmegen
The Netherlands

Jan Wernerman, MD, PhD

Professor in Anaesthesia
Department of Anaesthesia and Intensive Care
CLINTEC – Department of Clinical Science,
Intervention and Technology
Karolinska University Hospital Huddinge
Stockholm
Sweden

Klaas R Westerterp, PhD

Professor of Human Energetics
Department of Human Biology
Maastricht University
Maastricht
The Netherlands

Thomas Wild, MD

Departments of Dermatology, Venereology,
Allergology and Immunology
Dessau Medical Center
Dessau
Germany

Zdeněk Zadák, MD, PhD

Professor of Medicine
3rd Department of Medicine, Metabolic Care and
Gerontology
Medical Faculty – Charles University
Hradec Králové
Czech Republic

CONTENTS

1. BASIC CONCEPTS

IN NUTRITION	1
1.1. Energy and protein balance.	1
1.2. Body composition.	6
1.2.1. Measurement of body composition	6
1.2.1.1. Background	6
1.2.1.2. Densitometry.....	7
1.2.1.3. Hydrometry.....	7
1.2.1.4. Anthropometry.....	8
1.2.1.5. Electrical conductance.....	9
1.2.1.6. Body imaging	10
1.2.1.7. Discussion	10
1.2.2. Bioelectrical Impedance Analysis.....	12
1.2.2.1. Basic principle of the method	12
1.2.2.2. Factors which influence BIA	
measurement.....	14
1.2.2.3. BIA as marker of tissue health	15
1.2.2.4. BIA methods used in clinical	
practice.....	16
1.3. Diagnosis of malnutrition –	
Screening and Assessment.	18
1.3.1. Definition of Malnutrition.....	18
1.3.1.1 Malnutrition – Undernutrition.....	18
1.3.1.2. Interaction between undernutrition	
and inflammation.....	18
1.3.1.3. Malnutrition – Overnutrition.....	19
1.3.2. Screening for malnutrition	20
1.3.3. Nutritional Assessment	20
1.3.4. Techniques used in nutritional	
assessment	23
1.3.4.1. Anthropometry.....	23
1.3.4.2. Advanced measures of function.....	24
1.3.4.3. Laboratory Tests	24
1.4. The influence of malnutrition on	
function.	27
1.4.1. Cognitive function	28
1.4.2. Muscle function	28
1.4.3. Cardiovascular function	28
1.4.4. Renal function.....	28
1.4.5. Respiratory function	29
1.4.6. Gastrointestinal tract	29
1.4.7. Thermoregulation.....	29
1.4.8. Immune system.....	29
1.4.9. Wound healing	30
1.4.10. Quality of life.....	30
1.5. Overnutrition – functional and	
clinical consequences	31
1.5.1. Physiology of adipose tissue	31
1.5.2. Acute overfeeding.....	33
1.5.3. Chronic overfeeding – Obesity.....	33
1.5.3.1. Aetiology of obesity	33
1.5.3.2. Classification of obesity	35
1.5.3.3. Obesity and metabolic	
complications	35
1.5.3.4. Metabolic syndrome	36
1.5.4. Treatment of obesity	36
1.6. Prevalence of malnutrition	39
1.6.1. Malnutrition	39
1.6.2. Identifying malnutrition	40
1.6.3. Prevalence of malnutrition	41
1.6.3.1. Underweight and BMI in different	
countries and world regions	41
1.6.3.2. Prevalence of Malnutrition in	
a European Country (United	
Kingdom (UK)).....	43
1.6.3.3. Geographic location (geographic	
inequalities).....	45
1.6.3.4. Distribution of malnutrition according	
to individual characteristics	46
1.6.4. Causes of malnutrition (undernutrition)	
and evidence for treatment	46
1.7. Nutritional requirements for health	
at rest and upon exercise	48
1.7.1. Adult subjects	48
1.7.1.1. Macronutrients	48
1.7.1.2. Micronutrients	53

1.7.2. Nutritional needs of infants, children and adolescents	55	2.5.3. Influence of surgical stress, sepsis, and organ failure	99
1.7.2.1. Nutrient requirements for growth and development	55	2.6. Protein and amino acid metabolism	101
1.7.2.2. Nutrient requirements	57	2.6.1. Physiology	101
2. NUTRITIONAL PHYSIOLOGY AND BIOCHEMISTRY	69	2.6.2. Protein turnover	102
2.1. Appetite and its control	69	2.6.3. Metabolism of amino acids	104
2.1.1. Peripheral signals	70	2.6.4. Whole body protein synthesis and/or breakdown	104
2.1.2. Homeostatic control of feeding	71	2.6.5. Methods for measuring protein metabolism	108
2.1.3. Hedonic control of feeding	73	2.7. Water and electrolytes in health and disease	112
2.1.4. Loss of appetite during disease	73	2.7.1. Water and fluid compartments	112
2.1.5. Summary	73	2.7.2. Flux of fluid through the gastrointestinal tract	114
2.2. Digestion and absorption of nutrients	74	2.7.3. Role of the kidney	114
2.2.1. Principal sites of digestion and absorption	75	2.7.4. External fluid balance	116
2.2.2. The small intestine	76	2.7.5. Effects of starvation and injury	116
2.2.2.1. Carbohydrates	76	2.7.6. Electrolytes	117
2.2.2.2. Lipids	78	2.8. Physiological functions and deficiency states of trace elements and vitamins	123
2.2.2.3. Proteins	80	2.8.1. Trace elements	123
2.2.2.4. Vitamins	82	2.8.1.1. Zinc	123
2.2.2.5. Water, electrolytes, and trace elements	82	2.8.1.2. Copper	123
2.2.3. The absorptive functions of the colon	83	2.8.1.3. Iron	124
2.2.3.1. Water and electrolytes	83	2.8.1.4. Selenium	124
2.2.3.2. Metabolic and digestive functions	83	2.8.1.5. Chromium	125
2.3. Energy metabolism	85	2.8.1.6. Molybdenum	125
2.3.1. Calorimetry for the measurement of energy expenditure	85	2.8.1.7. Manganese	125
2.3.2. Components of energy expenditure, measurement, and determinants	87	2.8.2. Vitamins	127
2.3.3. Disease-related alterations in energy expenditure	88	2.8.2.1. Thiamine (vitamin B ₁)	127
2.4. Carbohydrate metabolism	90	2.8.2.2. Riboflavin (vitamin B ₂)	127
2.4.1. Carbohydrates in normal metabolism	90	2.8.2.3. Niacin (vitamin B ₃ or PP)	127
2.4.2. Regulation of glucose metabolism	91	2.8.2.4. Vitamin B ₆	128
2.4.3. Effects of stress on glucose metabolism	92	2.8.2.5. Folate	128
2.4.4. Metabolic responses to critical illness	94	2.8.2.6. Vitamin B ₁₂	128
2.5. Lipid metabolism	95	2.8.2.7. Biotin	129
2.5.1. Basic pathways in lipid metabolism	95	2.8.2.8. Vitamin C	129
2.5.2. Lipid metabolism in fasting conditions	98	2.8.2.9. Vitamin A	129
		2.8.2.10. Vitamin D	130
		2.8.2.11. Vitamin E	130
		2.8.2.12. Vitamin K	131
		2.8.2.13. Vitamins – Summary of influence of metabolic stress	131
		2.8.2.14. Assessment of vitamin status in clinical practice	131
		2.9. Antioxidants in health and disease	133

2.9.1. Oxidative stress	134	2.13.3. Metabolic response to injury, stress, and inflammation	172
2.9.2. Oxidation in vivo and neutralisation of RNOS	135	2.13.3.1. Stress response:	173
2.9.3. Dietary recommendations for antioxidants	136	2.13.3.2. Metabolic and biochemical response during the flow phase	173
2.10. Dietary fibre: metabolism and physiological effects	137	2.13.3.3. Convalescent or anabolic phase	176
2.10.1. Physicochemical properties and metabolism of fibre	137	2.13.3.4. Treatment	176
2.10.2. Physiological effects and clinical implications of fibre in the gut	140	2.14. Metabolic response to hypoxia	179
2.11. The role of gut bacteria in nutrition and metabolism	146	2.14.1. Transient response to anoxia or acute hypoxia	180
2.11.1. Recent innovations in gut microbiome research	146	2.14.2. Functional adaptation to hypoxia	181
2.11.2. Characteristics and regulation of the intestinal microbiome	147	2.14.3. Molecular adaptation to hypoxia	182
2.11.3. Physiological functions of the intestinal microbiome	149	2.14.4. Nutritional consequences of chronic hypoxia	183
2.11.4. The role of the intestinal microbiome in obesity and the metabolic syndrome	151	2.15. Nutritional aspects of chronic inflammatory disease	185
2.11.5. The role of the intestinal microbiome in malnutrition/undernutrition	152	2.15.1. Chronic inflammation	186
2.12. Simple and stress starvation	155	2.15.2. Characteristic disease processes or conditions	187
2.12.1. Energy stores	155	2.15.3. Interventions	188
2.12.2. Simple starvation	156	2.16. Pathophysiological consequences of intestinal failure	191
2.12.3. Stress starvation	157	2.16.1. Definition and classification of intestinal failure	191
2.12.4. Malnutrition and the response to injury	158	2.16.2. The process of digestion and absorption of food	192
2.13. Injury and sepsis	161	2.16.3. Mechanisms of intestinal failure in pathophysiological conditions	194
2.13.1. The effects of cytokines during injury and sepsis	161	2.17. Metabolic aspects of neurological disease	198
2.13.1.1. Reaction of the immune system	162	2.17.1. Denervation atrophy	198
2.13.1.2. Endocrine changes during the inflammatory response	163	2.17.2. Metabolic consequences of muscle denervation	199
2.13.1.3. The immune response exerts a high metabolic and nutritional cost upon the body	163	2.17.3. Hormonal and systemic consequences	200
2.13.1.4. Adverse effects of cytokines	165	2.17.4. Amyotrophic lateral sclerosis (ALS)	201
2.13.1.5. Antioxidant defenses are depleted by infection and trauma	165	3. INDICATIONS FOR NUTRITIONAL SUPPORT	205
2.13.1.6. Influence of phenotype on the cytokine response	166	3.1. Background	205
2.13.2. The neuroendocrine response	167	3.2. A clinical framework for considering the indications for nutritional support	205
2.13.2.1. Neural stimuli and the sympathetic nervous system	168	3.3. A practical framework for considering the indications for nutritional support	207
2.13.2.2. Endocrine effects on metabolism	169	3.3.1. Identify malnutrition or those at risk of malnutrition	207
2.13.2.3. Therapeutic implications	170		

3.3.2. Treat malnutrition or those at risk of malnutrition with the appropriate type of nutritional support	209	5.3.2.4. Dosage for intravenous lipid emulsions	247
3.4. Common indications for nutritional support according to healthcare setting and disease.	209	5.3.2.5. Monitoring intravenous lipid emulsions	247
4. ORGANIZATION AND LEGAL ASPECTS	213	5.4. Proteins and amino acids.	249
4.1. Organization of nutritional care . . .	213	5.4.1. Requirements of proteins and amino acids in humans	249
4.1.1. Policy, standards, protocols, and Nutrition Steering Groups (NSGs) . . .	214	5.4.2. Requirements of protein and essential amino acids in disease	250
4.1.2. Hospital food and catering	215	5.4.3. Sources and chemical nature.	250
4.1.3. Education and training	216	5.4.4. Assessment of the biological quality of proteins	251
4.1.4. Dietitians	216	5.4.5. Amino acids: the building blocks of protein	251
4.1.5. Nutritional Support Teams (NSTs) . . .	216	5.5. Water and electrolytes during nutritional support	254
4.1.6. Purchasing and equipment	218	5.5.1. Monitoring.	255
4.2. Ethical and legal aspects	219	5.5.2. Normal requirements.	255
4.2.1. Beneficence and Non-maleficence . . .	219	5.5.3. Abnormal requirements.	255
4.2.2. Autonomy	221	5.5.4. Oral rehydration solutions	256
4.2.3. Special situations.	222	5.5.5. Enteral nutrition	256
4.2.4. Justice	224	5.5.6. Subcutaneous fluids	256
5. SUBSTRATES USED IN PARENTERAL AND ENTERAL NUTRITION	229	5.5.7. Parenteral fluids	257
5.1. Energy	229	5.6. Trace elements and vitamins in parenteral and enteral nutrition . . .	258
5.1.1. Goals of nutritional support	229	5.6.1. Micronutrients and trace elements. . .	258
5.1.2. Energy intake during nutritional support	230	5.6.1.1. Individuals at risk of deficiency	258
5.1.3. Energy intake and acute disease stage	232	5.6.1.2. Clinical deficiency syndromes and subclinical deficiency states	259
5.2. Carbohydrates	234	5.6.1.3. Optimisation of provision of micronutrients	259
5.2.1. Carbohydrate metabolism and nutritional support	234	5.6.1.4. Legislation from the European Union and enteral nutrition (EN) . . .	260
5.2.2. Carbohydrates used in nutrition support	237	5.6.2. Trace elements in PN and EN.	261
5.2.3. Dosages of carbohydrates in parenteral and enteral nutrition	239	5.6.3. Vitamins in EN and PN	263
5.3. Lipids	244	5.7. Dietary fibre: definition and classification	265
5.3.1. Enteral nutrition	244	5.7.1. Definition.	265
5.3.2. Parenteral nutrition	245	5.7.2. Classifications	266
5.3.2.1. Different intravenous lipid emulsions for parenteral nutrition	245	5.7.3. Fibre and GUT microbiota	269
5.3.2.2. Reduction of lipid peroxidation	247	5.8. Special substrates.	271
5.3.2.3. Lipid clearance	247	5.8.1. Antioxidants and phytochemicals in nutrition	271
		5.8.1.1. What is an antioxidant?	271
		5.8.1.2. Damage associated with depletion of antioxidants.	271
		5.8.1.3. Who might benefit from antioxidant supplements: biomarkers of oxidative stress	272

5.8.1.4. Overview of antioxidant strategies . . .	272	6.1.2.6. Equipment for delivering enteral nutrition	301
5.8.1.5. Dietary antioxidants	273	6.1.3. Diets for enteral nutrition	303
5.8.1.6. Some remaining questions related to antioxidant therapy:	273	6.1.3.1. Homemade enteral (tube) nutrition – blenderised tube feeding	303
5.8.2. Nutrients that influence inflammation and immunity: omega-3 fatty acids . . .	274	6.1.3.2. Commercially prepared diets for enteral nutrition	307
5.8.2.1. Omega-3 (ω -3) fatty acids	274	6.1.4. Pharmaceutical aspects in enteral feeding and drugs	314
5.8.2.2. Dietary sources and typical intakes of ω -3 fatty acids	275	6.1.4.1. Basic principles and requirements . . .	315
5.8.2.3. Supplementation with long-chain ω -3 fatty acids alters the fatty-acid composition of plasma, cells, and tissues in humans	275	6.1.4.2. General approach to evaluate a drug-nutrient regimen in enteral tube feeding	315
5.8.2.4. Mechanisms of action of long-chain ω -3 fatty acids, with a focus on inflammation and immunity	276	6.1.4.3. Feeding tube	317
5.8.2.5. Experimental studies with long-chain ω -3 fatty acids	277	6.1.4.4. Nutrients	318
5.8.2.6. Fish oil in artificial nutrition support	277	6.1.4.5. Best practices for co-administration of drugs and enteral tube feeding	318
5.8.3. Nutrients that influence immunity: experimental and clinical data	280	6.1.5. Complications of Enteral Nutrition . .	319
5.8.3.1. Glutamine	280	6.1.5.1. Gastrointestinal complications	320
5.8.3.2. Arginine	282	6.1.5.2. Mechanical complications	321
5.8.3.3. Nucleotides	283	6.1.5.3. Metabolic complications	322
5.8.3.4. Polyunsaturated fatty acids (PUFAs) .	284	6.2. Parenteral nutrition	324
5.8.3.5. Micronutrients	284	6.2.1. Methods of delivering parenteral nutrition	324
6. TECHNIQUES OF NUTRITIONAL SUPPORT	287	6.2.1.1. Peripheral parenteral nutrition (PPN)	324
6.1. Enteral nutrition	287	6.2.1.2. Central parenteral nutrition	328
6.1.1. Indications and administration of nutrition	287	6.2.1.3. Complications associated with central venous catheter insertion and care	336
6.1.1.1. Indications for enteral nutrition	287	6.2.2. Different systems for parenteral nutrition (AIO vs. MB)	342
6.1.1.2. Contraindications to enteral nutrition	287	6.2.2.1. Multiple bottle system	342
6.1.1.3. Routes for enteral tube feeding	287	6.2.2.2. All-in-One (AIO) system	342
6.1.1.4. Choice of feeding solution	287	6.2.3. Pharmaceutical aspects of parenteral nutrition support	345
6.1.2. Methods of delivering enteral nutrition	289	6.2.3.1. How to prepare parenteral nutrition (PN) admixtures, and the role and function of the pharmacist	345
6.1.2.1. Oral nutritional supplements	289	6.2.3.2. Stability and compatibility of parenteral nutrition (PN) admixtures	354
6.1.2.2. Transnasal access	291	6.2.3.3. Drugs and nutritional admixtures . . .	362
6.1.2.3. Endoscopic access: PEG, PEG-J, and D-PEJ	292	6.2.4. Metabolic complications of parenteral nutrition	371
6.1.2.4. Surgical access: gastrostomy, needle catheter jejunostomy	298	6.2.4.1. Clinically relevant acute metabolic complications	371
6.1.2.5. Administration of enteral tube feeds .	300	6.2.4.2. Long-term metabolic complications	374

7. MONITORING OF

NUTRITIONAL SUPPORT	377
7.1. Clinical monitoring	377
7.1.1. Aims and objectives	377
7.1.2. Integrated nutrition	378
7.1.3. Parameters	378
7.2. Laboratory measures of response to nutrition	379
7.2.1. Nitrogen balance	379
7.2.2. Proteins as markers of nutritional status	380
7.3. Refeeding syndrome	383
7.3.1. Pathophysiological factors	384
7.3.2. Clinical manifestations	385
7.3.3. Recommendations for prevention and treatment of RFS in adult patients at risk	387

8. NUTRITIONAL SUPPORT IN DIFFERENT CLINICAL SITUATIONS

8.1. Nutritional support in severe malnutrition	391
8.1.1. Nutritional support	392
8.1.2. Oral nutritional support	392
8.1.3. Enteral nutrition	393
8.1.4. Parenteral nutrition	393
8.1.5. Monitoring	393
8.1.6. Rehabilitation	393
8.2. Perioperative nutrition	395
8.2.1. Preliminary remarks	395
8.2.2. Patients at low risk from nutrition-related complications	396
8.2.3. Malnourished patients	398
8.2.4. Complicated surgical patients	399
8.2.5. Prescription of feed	399
8.2.6. Integration	400
8.2.7. Implementation of evidence and adherence to guidelines	400
8.3. Nutritional support in critically ill and septic patients	402
8.3.1. Enteral versus parenteral nutrition	403
8.3.2. Energy supply	404
8.3.3. Glucose and carbohydrates	404
8.3.4. Lipids	406
8.3.5. Proteins and amino acids	406
8.3.6. Vitamins and trace elements	407

8.4. Nutritional support in inflammatory bowel disease	410
8.4.1. Effect of inflammatory bowel disease on nutritional status and metabolism	410
8.4.2. Indications for nutritional support	411
8.4.2.1. Treatment and prevention of malnutrition	411
8.4.2.2. Treatment of active phase	413
8.4.3. Preoperative nutrition	414
8.4.4. Relapse prevention	415
8.4.5. Pharmaconutrition in IBD	415
8.4.6. Symptomatic therapy	415
8.5. Nutrition support in liver disease ..	417
8.5.1. Oral diet	417
8.5.2. Dietary supplements	418
8.5.3. Enteral feeding	418
8.5.4. Parenteral nutrition	419
8.5.5. Conclusions for diagnosis related nutritional therapy	420
8.6. Nutritional support in renal disease	422
8.6.1. Pathophysiology	422
8.6.2. Nutritional therapy for patients with renal disease	423
8.6.2.1. Non-catabolic patients with stable chronic kidney disease (CKD)	423
8.6.2.2. Non-catabolic CKD patients on chronic RRT (with or without malnutrition)	424
8.6.2.3. Patients with AKI and HD/CAPD patients with acute catabolic disease	426
8.6.2.4. Solutions for nutritional support	429
8.6.2.5. Complications and monitoring of nutritional support	430
8.6.3. Nutritional management of renal transplantation (RTX)	430
8.7. Nutrition in pulmonary and cardiac disease	433
8.7.1. Epidemiology	433
8.7.2. Pathophysiology and consequences of malnutrition	434
8.7.2.1. Pulmonary disease	434
8.7.2.2. Cardiovascular disease	436
8.7.3. Nutritional support and intervention	437
8.7.3.1. Pulmonary disease	437
8.7.3.2. Cardiovascular disease	438

8.8. Nutritional support in acute and chronic pancreatitis	441
8.8.1. Acute pancreatitis	441
8.8.1.1. Outcome predictors	442
8.8.1.2. Physiology and pathophysiology with respect to nutrition and fluid resuscitation.	442
8.8.1.3. Treatment of acute pancreatitis	444
8.8.1.4. Nutritional support.	445
8.8.2. Chronic pancreatitis.	449
8.8.2.1. Nutritional treatment in chronic pancreatitis.	449
8.9. Nutritional support for GI fistulas	452
8.9.1. Definition and classifications	452
8.9.2. General principles of fistula treatment	453
8.9.3. Metabolic care and nutrition.	454
8.9.4. Nutritional preparation for elective surgery of the persistent fistula.	457
8.10. Nutritional support in extensive gut resection (short bowel syndrome)	459
8.10.1. Aetiology of short bowel syndrome	460
8.10.2. Pathophysiology	460
8.10.3. Complications of SBS.	461
8.10.4. Small bowel adaptation	463
8.10.5. Management of SBS	463
8.10.6. Dietary management of SBS	464
8.10.7. The role of the dietician and specialist nurse in SBS treatment	468
8.11. Nutritional support in the diabetic patient	470
8.11.1. Dietary management of diabetes mellitus.	471
8.11.2. Nutritional support of the diabetic.	471
8.11.3. Perioperative management	474
8.12. Nutritional support in burn patients	477
8.12.1. Pathophysiology	477
8.12.1.1. Fluid loss	477
8.12.1.2. Metabolic response.	477
8.12.2. Treatment	478
8.12.2.1. Fluid resuscitation	478
8.12.2.2. Energy and substrate requirements	479
8.12.2.3. Nutriceuticals in burns.	481
8.12.2.4. Route of nutritional administration.	482
8.12.2.5. Non-nutritional measures	483
8.12.2.6. Monitoring the response to nutritional therapy	483
8.13. Nutritional support in cancer patients	485
8.13.1. General features of the nutritional support.	486
8.13.2. Nutritional regimen	486
8.13.3. Indications.	488
8.13.4. Perioperative nutrition.	488
8.13.5. Non-surgical cancer patients.	490
8.14. Cancer cachexia	496
8.14.1. Definition and classification	496
8.14.2. Pathophysiology	497
8.14.3. Clinical impact of cachexia	501
8.15. Radiation enteropathy	503
8.15.1. Risk factors for RE	504
8.15.2. Clinical approach	504
8.15.3. Role of oral dietetic regimens and parenteral nutrition	505
8.15.4. Nutritional regimen	506
8.15.5. Outcome.	507
8.16. Nutritional support in AIDS.	509
8.16.1. History and pathophysiology	509
8.16.2. Metabolic and nutritional consequences of HIV infection.	510
8.16.3. Side effects of the drugs	510
8.16.4. Indications for and aims of nutritional support.	511
8.16.5. Dietary counselling.	513
8.17. Effect of anticachectic agents in cancer	514
8.17.1. Appetite-stimulating agents	514
8.17.2. Anticatabolic agents	516
8.17.3. Anabolic agents.	517
8.17.4. Other agents	517
8.18. Nutrition and wound healing	519
8.18.1. Phases of wound healing	519
8.18.2. Non-healing chronic wounds	521
8.18.3. Local wound management	522
8.18.4. Nutrition and wound healing	522
8.18.5. Special substrates and wound healing	523
8.19. Nutrition and pressure ulcers	525
8.19.1. Classification and aetiology of pressure ulcers.	525
8.19.2. Pathophysiology	526
8.19.3. Nutritional status and pressure ulcers.	526
8.19.4. Nutritional management is relevant to total PU care	527

8.19.5. Nutritional intervention and pressure ulcers – what is currently known	527	8.24.1. Pathophysiological considerations . . .	561
8.20. Nutritional therapy for neurological disorders	531	8.24.2. Practical consequences	562
8.20.1. Nutritional assessment.	531	8.25. Nutritional support during pregnancy and breastfeeding.	565
8.20.2. Nutritional requirements	532	8.25.1. Pathophysiology	565
8.20.3. Nutritional support	533	8.25.2. Indications for and aims of nutritional support	566
8.21. Eating disorders – Anorexia nervosa.	536	8.25.3. Parenteral nutrition in pregnancy and lactation.	567
8.21.1. Pathogenesis	537	8.26. Nutritional support in neonatology	569
8.21.2. Physiological changes.	537	8.26.1. Enteral or parenteral nutrition?	570
8.21.3. Clinical manifestations and complications	537	8.26.2. Goals of nutritional support	571
8.21.4. Complications	539	8.26.3. Early nutritional management	572
8.21.5. Nutritional assessment.	539	8.26.4. Parenteral nutrition	573
8.21.6. Nutritional treatment.	539	8.26.5. Complications of parenteral nutrition.	581
8.21.7. Long-term effects	540	8.26.6. Monitoring of Nutritional Status . . .	582
8.22. Nutrition support in obese patients	542	8.26.7. Enteral nutrition	583
8.22.1. The obesity paradox	542	8.27. Nutritional support in infants, children, and adolescents.	587
8.22.2. Sarcopenic obesity	543	8.27.1. Diagnostic approach.	587
8.22.3. Consequences of obesity in the hospital setting	543	8.27.2. Nutritional support.	589
8.22.4. Critical care obese patients	544	8.27.2.1. Enteral nutrition	590
8.22.5. Surgical obese patients.	545	8.27.2.2. Parenteral nutrition	601
8.22.6. Non-surgical obese patients	545	8.28. Nutrition in very old patients	611
8.22.7. Calories and Protein: how much?. . . .	546	8.28.1. Determinants of undernutrition in the elderly	612
8.22.8. Micronutrient deficiencies.	546	8.28.1.1. Changes in body composition and function	613
8.22.9. Drug avoidance to prevent obesity. . .	547	8.28.1.2. Appetite in the elderly	615
8.23. Nutritional consequences of bariatric and metabolic surgery	551	8.28.1.3 Small-bowel bacterial overgrowth . . .	617
8.23.1. Principal bariatric and metabolic modalities.	551	8.28.1.4. The ageing immune system	617
8.23.2. Perioperative nutritional management	551	8.28.2. Drug interactions in the elderly	618
8.23.3. Expected weight loss	553	8.28.3. Undernutrition in the elderly and outcomes	618
8.23.4. Early nutritional complications	554	8.28.4. Detection of undernutrition in the elderly	619
8.23.5. Long-term nutritional and metabolic complications	555	8.28.5. Changes in nutrient requirements . . .	621
8.23.6. Priorities in nutritional supplementation	556	8.28.6. Nutritional intervention	623
8.23.7. Recommendations for pregnancy . . .	558	8.28.7. Ethical considerations	626
8.23.8. Attention to children and adolescents	558	8.29. Home artificial nutrition	628
8.23.9. Refeeding the undernourished bariatric subject.	559	8.29.1. Home parenteral nutrition (HPN) . . .	628
8.24. Nutritional care of the polymorbid patient in medical wards	561	8.29.1.1. Indications for HPN.	629
		8.29.1.2. Methods for HPN application.	630
		8.29.1.3. Complications of HPN.	631
		8.29.2. Home enteral nutrition (HEN)	632
		8.29.2.1. Techniques of HEN	632

8.29.2.2. Complications of HEN.	633	8.30.2.4. Treatment of relative energy deficiency in sports.	643
8.29.3. How to begin home artificial nutrition.	633	8.30.3. Sport-specific nutrition: The endurance athlete	645
8.30. Nutrition in sports	635	8.30.3.1. Recommendation for daily nutrient intake for endurance athletes	645
8.30.1. Energy expenditure during physical activity	636	8.30.3.2. Nutritional preparation of an endurance athlete for competition	647
8.30.1.1. Aerobic and anaerobic energy metabolism	636	8.30.3.3 Recommendations for food and fluid intake during endurance competitions	647
8.30.2.2. Anaerobic and aerobic pathways for energy production	637	8.30.3.4. Nutrition for recovery from competition or exhausting training sessions	648
8.30.1.3. Exercise intensity and substrate utilisation	640	8.30.4. Sport-specific nutrition: Power and strength sports.	648
8.30.1.4. Adaptations in metabolic and physiological systems depend on the type of exercise	641	8.30.4.1. Carbohydrate intake for power and strength sports.	649
8.30.2. Relative energy deficiency syndrome	641	8.30.4.2. Protein intake for power and strength sports.	649
8.30.2.1. Pathogenesis	642	8.30.4.3. Fat intake	651
8.30.2.2. Clinical and performance relevance of relative energy deficiency in sports.	642	8.30.5. Nutritional supplements in sports	651
8.30.2.3. Diagnosis of relative energy deficiency in sports.	642
