THE BOLD LOOK
OF **KOHLER**®

Life without labor is guilt. Labor without art is brutality.

- John Ruskin

and closets that carry the Kohler mark are well designed and well made, to the last inner detail. If you use colored fixtures, Kohler colors are pure, uniform, harmonious. If you prefer white, Kohler white is as immaculate as freshly laundered linen. Kohler faucets and handles and

plumbing contractor. Actual estimates will show you that an all-Kohler installation costs surprisingly little. Meanwhile, write for Booklet A-5, which has color schemes, floor plans and various vital facts on good plumbing. . . . Kohler Co. Founded 1875, Kohler, Wisconsin. Branches in principal cities. Look for the Kohler mark on every fixture and fitting.

Kohler Sycamore sink with drainboard fitting, equipped with drainboard.

Kohler Waltham water-pipe mixing faucet with third water supply.

escrabeons are advanced in design—all the mechanical parts are sure, silent and safe. Those who work on Kohler products have the true tradition of craftsmanship. The beautiful village of Kohler is an inspiration to excellence. The men who do each intricate detail of manufacture work on rigid engineering requirements—and with the earnestness of high art.

An all-Kohler bathroom—at the same cost. Quality is not a matter of money—but of knowledge and vision. Even the small home must have the finest fixtures

ELEVEN IMPORTANT POINTS

- 1 Kohler designs are decorative, purposeful, correct.
- 2 Drainage fixed with an everlasting bond . . . smooth, glazing surface.
- 3 Fixtures clean—removed with a smooth, fast, lasting glass.
- 4 Kohler colors are soft, livable pastels. The white is a perfect white.
- 5 Metal fittings match the fixtures in style, character and quality.
- 6 Most of finest materials . . . show craftsmanship and care.
- 7 The cost of Kohler products are based on your own ideas in plumbing.
- 8 Kohler quality extends to kitchen and laundry, mirror, linen.
- 9 Kohler quality costs no more . . . and saves money later.
- 10 Handled and installed by qualified plumbers.
- 11 Backed by an entire community . . . beautiful Kohler Village.

KOHLER OF KOHLER

Historical Highlights

Form and function. We've been combining the two, never sacrificing one for the other, since 1873.

1904

The first KOHLER® toilets, made of enameled cast iron with a wooden tank, are advertised for sale.

1928

Cordova, the first KOHLER bidet, is introduced as a "convenient means of maintaining personal cleanliness."

1966

Our first Highline® toilets are manufactured with a seat height of 18 inches for chair-height comfort.

1927

Using new technology, Kohler is the only company to offer bathroom fixture collections – toilets, sinks and baths – in matching colors.

1936

The first design in what is to become an iconic line of Wellworth® toilets is released.

1974

A leader in water conservation, Kohler presents the Wellworth Water-Guard® toilet, reducing water use from 5 to 3.5 gallons per flush.

2004

Life gets quieter with non-slamming, easy-to-clean Cachet® Quiet-Close™ Quick-Release™ toilet seats.

2005

Purist Hatbox® toilet wins Industrial Design Excellence Award (IDEA).

2010

Wellworth® toilet celebrates 75 years with a new design and improved performance – making it the best Wellworth ever.

2004

Kohler introduces its first high-performance toilet, the Cimarron® two-piece toilet with Class Five® technology.

KOHLER, C³, Toilet Seats
Comfort. Cleanliness. Convenience.

- Water-based, hygienic cleaning for all users
- Choose from models with in-bowl or tank-mounted
- Elegant design fits any and all KOHLER toilets
- Comfort easily passed to personal preferences
- Quiet Close™ technology with Quick-Release™ functionality

2006

Kohler offers C³ toilet seats with integrated bidet functionality for comfort, convenience and cleanliness.

2011

Numi®, the most advanced KOHLER® toilet, combines toilet and bidet functionality and marks a new standard of excellence.

Incredible performance. Great design. With KOHLER®, you can count on both. Our toilets are serious performers that come in a surprising range of beautiful, water-saving designs. In addition, our offering includes advanced features for comfort and functionality, as well as a variety of seat and bidet options. We'll walk you through everything you need to know to choose the best toilet and seat combination for you and your home.

And, if you're looking for inspiring design ideas for your bathroom, be sure to visit [KOHLER.com/BathroomGallery](https://www.kohler.com/BathroomGallery).

Why KOHLER®?

For over 100 years, we've been an industry leader in the design and manufacture of toilets and seats, pioneering water-efficient designs and integrating innovative technologies. KOHLER toilets have been essential in shaping the style and functionality of the modern bathroom throughout the last century. Today, the advanced features and proven durability of our toilets and toilet seats are redefining ideas of personal comfort and cleanliness.

Saving Without Sacrificing

Achieving the best flushing performance with as little water as possible has been a focus of ours since the 1970s. So today, as local, state and national governments take action to reduce water usage, we're ready with solutions. Our high-efficiency toilets can help you save up to 16,500 gallons of water every year. Our commitment to water conservation has been recognized by the EPA WaterSense® program for five consecutive years; Kohler received the 2008, 2009 and 2012 WaterSense Partner of the Year Award and was a 2010 and 2011 WaterSense Excellence Award winner.

Bold. Performance.®

Powerful, clean and efficient – without fail. That's our definition of performance. Simple, like it should be. Because no matter the style or flushing technology, your toilet needs to deliver comfort and peace of mind – with unrivaled power, a clean bowl rinse and efficient water use.

Design Awards and Innovations

We've been bringing creative thinking and quality craftsmanship to toilet and toilet seat design for over a century – experimenting with color and shape, developing a wide spectrum of styles, innovating features that improve functionality and comfort, and measuring over 1,000 attributes with every new toilet we design to ensure it meets KOHLER quality standards.

Considered Collections

KOHLER collections are an easy, stylish answer to bathroom design. Our collections range from a full line of fixtures – coordinating toilets, sinks, and baths or shower bases – to a matching toilet and sink for the powder room. We make it simple for you to achieve a complete, tailored look.

Saving Without Sacrificing

Look for the WaterSense® Label

The WaterSense label is a great place to start when you’re looking for water-saving products that perform. Toilets bearing the WaterSense label use at least 20% less water than standard 1.6-gallon toilets while still meeting strict flushing performance standards. Kohler offers a wide array of WaterSense-labeled toilets that can save up to 16,500 gallons of water in just one year. Look for the WaterSense label in our product portfolio pages.

To learn more about the EPA’s WaterSense program, visit SaveWaterAmerica.com.

Gallons per flush (gpf)	Likely if your home was built ...	Savings in gallons per year (gpy)
5.0	before 1980	0
3.5	1980 to 1993	11,100 gpy from 5.0 gpf
1.6	1994 to the present	25,300 gpy from 5.0 gpf to 1.6 gpf 14,100 gpy from 3.5 gpf to 1.6 gpf
1.28	optional since 2006*	27,700 gpy from 5.0 gpf to 1.28 gpf 16,500 gpy from 3.5 gpf to 1.28 gpf
1.0	optional since 2005	29,800 gpy from 5.0 gpf to 1.0 gpf 18,600 gpy from 3.5 gpf to 1.0 gpf

Based on an average household of four, each flushing 5.1 times a day, 365 days a year.

*May be required by local plumbing codes.

Kohler Legacy

Working toward sustainability and supporting conservation initiatives is an ongoing journey for Kohler Co., and creating water-conserving products has been a key component since the 1970s. But to truly have an impact today requires something more – a willingness to take chances, a propensity for innovation and a commitment to making the world a better place. Fortunately, Kohler has a tradition of all three.

The seeds of sustainability were planted in 1913 when Walter Kohler worked with the Olmsted Brothers to develop the first of two 50-year plans for the green spaces of the Kohler Co. campus and the Village of Kohler, Wisconsin. Because of these early efforts, the Village of Kohler has been a registered botanical garden since 2004. Kohler has preserved hundreds of acres of wilderness and wetlands as well.

Having grown into a global company, our dedication to the environment now includes a global sustainability goal of net zero, as well as a strategy to reduce our environmental footprint every year until we reach that goal by 2035. We have a history of looking ahead and doing all we can to ensure the future of our community and our world. We honor that tradition by creating a better future.

Kohler's sustainability goal of a net-zero environmental footprint by 2035 requires committed action right now, so we're focusing our efforts in some key areas. In addition, we continue to foster conservation through educational programs, awareness campaigns and water-saving products.

Conservation Initiatives

Leadership

To truly have an impact on the global environment, we believe collaborating with organizations and other businesses working toward sustainability is essential. Kohler has taken a leadership role on water-efficiency issues in the industry, working with the United States Green Building Council, the Environmental Protection Agency and other organizations to help change the way we think about water use. Our commitment to water conservation has been recognized by the EPA WaterSense® program for five consecutive years: Kohler received the 2008, 2009 and 2012 WaterSense Partner of the Year Award as well as the 2010 and 2011 WaterSense Excellence Award.

Innovation

Our commitment to conservation is first and foremost a commitment to offering our customers water-saving options that perform beyond expectation. Kohler engineers work tirelessly to develop innovative technologies and designs that improve water-use efficiency. We strive to push the edge of what's possible and discover ideas that move conservation efforts forward.

Packaging

In 2007, Americans generated 78 million tons of container and packaging waste. We're committed to helping reduce that number by developing more environmentally friendly packaging solutions, eliminating PVC and reducing our net packaging materials. Kohler Co. redesigned its retail packaging in 2011 and saved over 3 million pounds total weight corrugate.

Net-Zero Progress

Water

With four out of ten people in the world affected by water scarcity, water conservation is crucial. Kohler already has saved millions of gallons of water annually by reclaiming and reusing rinse water at our faucet manufacturing facility and in our product testing labs. In 2011 alone, we saved more than 60 million gallons of water – about 90 Olympic-size swimming pools.

Energy

Kohler has been incorporating energy efficiency and reducing dependence on natural gas since the 1970s when we installed waste-heat recovery systems to capture and reuse pottery kiln exhaust. In 2010, we saved 200 terajoules of energy – equal to the energy delivered by 200 tanker trucks of diesel – and reduced greenhouse gas emissions by 19,000 metric tons carbon dioxide equivalents.

Green Building

As a growing global company, our renovation and new building projects are ongoing. Our sustainability goals include incorporating green building principles into all of our facilities. In November 2011, Kohler Co. took a historic step in its sustainability journey with the grand opening of its first Gold-level LEED-certified office building in Zibo, China.

Numi® Comfort Height® one-piece toilet with bidet functionality (K-3900-0) Page 44

Gabrielle™ Comfort Height one-piece toilet with French Curve® Quiet-Close™ toilet seat (K-3615-0) Page 45

Highline® Comfort Height two-piece toilet and Grip-Tight Cachet® Q3 toilet seat (K-3999-0, K-4636-0) Pages 50, 67

Archer® Comfort Height two-piece toilet and Grip-Tight Cachet Q3™ toilet seat (K-3551-0, K-4636-0) Pages 50, 67

Memoirs® Comfort Height two-piece toilet with Classic design and Grip-Tight Glenbury™ Q3 toilet seat (K-3816-0, K-4733-0) Pages 49, 66

Portrait® Comfort Height one-piece toilet with Grip-Tight Glenbury Q3 toilet seat (K-3506-0) Page 44

We offer multiple flushing technologies to satisfy the needs of a variety of home environments and personal preferences. Each toilet design is paired with the flushing technology that creates an efficient water flow – in terms of waste removal, bowl rinse, plug resistance and water use. Simply choose the toilet technology and design that make sense for you, and know that you can count on powerful, clean and efficient performance.

KOHLER® Flushing Technologies

Single-Flush Gravity

Tresham® Comfort Height® two-piece toilet (K-3950-0) and Gabrielle™ Comfort Height one-piece toilet (K-3615-0)

Why choose single-flush gravity?

- Widest range of design, shape, color and installation options
- 1.28-gallon models provide guaranteed water savings with every flush, saving up to \$99 on your water bill every year
- Most models feature Class Five® technology, Kohler's patented flush engine. No flappers. No leaks. No problem.

How does it work?

KOHLER gravity technology uses the force of gravity and a precision-engineered flush valve and bowl to create a strong siphon during the flush. The Class Five flush engine offers smarter power, ensuring virtually plug-free performance.

Featured on:

Archer®	Gabrielle	Memoirs®	Santa Rosa™
Bancroft®	Highline®	Portrait®	Tresham
Cimarron®	Kathryn®	Rialto®	Wellworth®
Devonshire®	Kelston®	San Raphael®	

Dual-Flush Gravity

Persuade® Curv Comfort Height® two-piece toilet (K-3723-0)

Assisted-Flush

San Raphael® Comfort Height Pressure Lite® one-piece toilet (K-3597-0)

Why choose dual-flush gravity?

- Two-button actuator offers the choice between a half flush and a full flush
- All KOHLER® dual-flush models feature skirted trapways that simplify cleaning
- Dual-flush toilets sport sleek curves and clean, contemporary designs

How does it work?

Dual-flush gravity-fed toilets rely on the force of gravity to achieve a powerful flush, much like single-flush gravity-fed toilets. Of all KOHLER toilets, those with dual-flush technology – with half flushes from 0.8 to 1.0 gallon – offer some of the best water savings.

Featured on:

Persuade	Rêve®
Persuade Circ	Saile®
Persuade Curv	Escale®

Why choose assisted-flush?

- Several models feature integrated bidet functionality
- Models with Pressure Lite technology deliver commercial-grade performance
- Selection includes several low-profile, compact designs
- Most models meet WaterSense® standards

How does it work?

- Power Lite® technology uses an electric pump to deliver water from the tank through the bowl and trapway. Requires an electrical outlet near the toilet.
- Pressure Lite technology uses the supply line to pressurize a specialized vessel in the tank, providing a strong and reliable flush.
- The Numi® toilet, with a sophisticated automatic flushing system, delivers unprecedented water savings at 0.6 or 1.28 gpf.

Inside Kohler Performance Testing

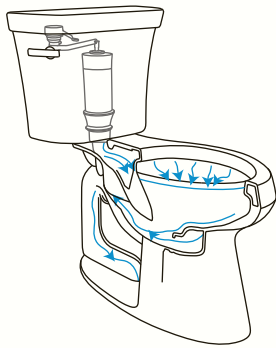

We design and test our toilets to provide you with all-around exceptional performance – that means great rinsing power and plug-resistant flushing, as well as high scores on MaP testing, for both our standard and WaterSense®-labeled toilets. We measure over 1,000 attributes for each toilet we design to ensure a balanced, complete flush. To give you a better understanding, we've highlighted some of our toilet and toilet seat performance testing.

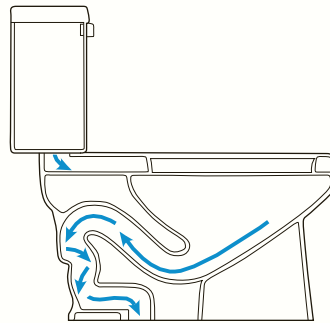

Plug Resistance

To help ensure our toilets have the power it takes to consistently flush well over what the average person needs and all the toilet tissue your kids can use, Kohler performs a number of highly stringent proprietary bulk-removal and plug-resistance tests. In addition, we participate in voluntary third-party testing for Maximum Performance (MaP).

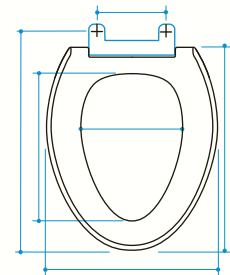

Complete Flush

As part of our balanced approach to performance, we test our toilets against ASME* industry standards and, more important, against our own strict standards for light waste removal. So you can rest assured with every flush.

Clean Bowl Rinse

We've gone beyond the ASME industry code of simply washing away a mark drawn beneath the rim and developed two far more rigorous proprietary tests to verify that our toilets thoroughly rinse the bowl with each flush.

Dynamic Flow Profile

In order to optimize water velocity and flushing power, we study the speed and force of water as it moves through the tank and bowl.

Fully Glazed Trapways

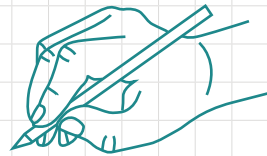

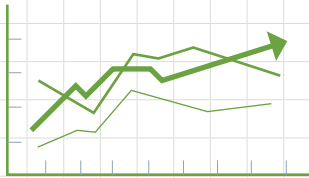

We apply glaze to the trapway – the passage-way inside the bowl – of all KOHLER® toilets, creating a smooth surface that ensures a strong, complete flush.

Seat Durability

Our seats go through a series of tests from stain-resistance to load-bearing and open/close cycle testing to ensure that they stand up to daily wear and tear.

Design Awards & Innovations

Research & Development

Concepts & Sketches

3-D Modeling & Prototyping

Research & Development

Research and development is where it all begins for us – understanding our customers' needs, studying wellness and design trends, drawing on technological advances in science and industry, and exploring new materials and technologies.

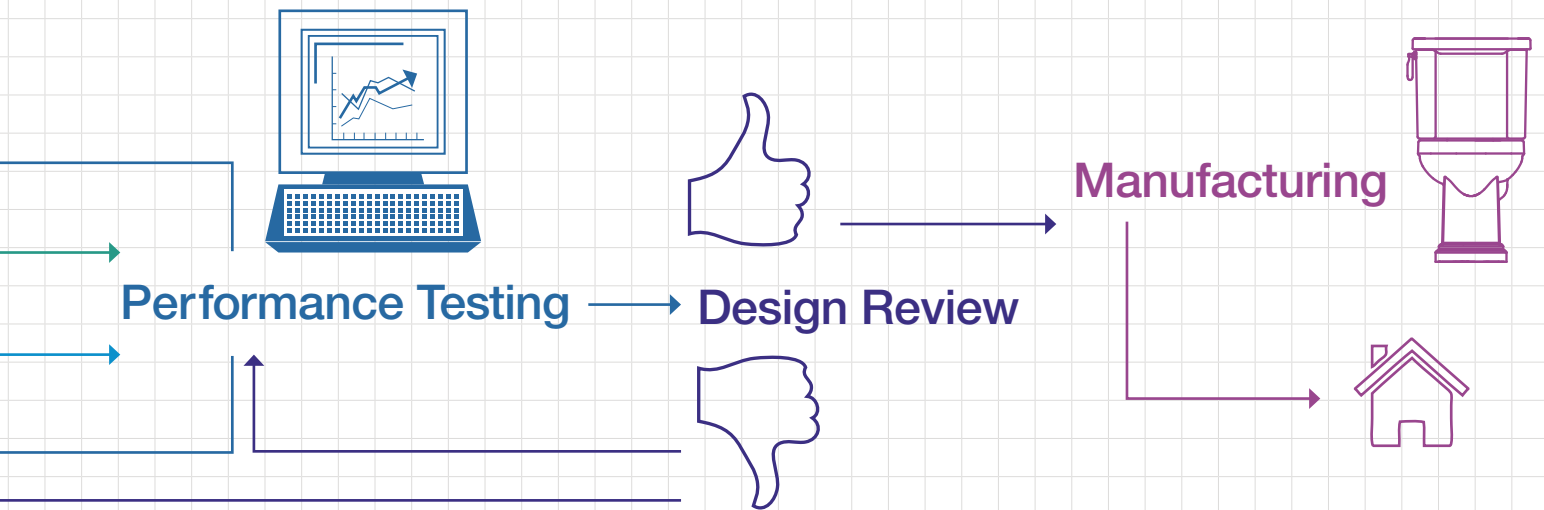

Concepts & Sketches

Armed with the latest research, our teams of international designers at design studios in Kohler, Paris and Shanghai begin sketching concepts that deliver new levels of comfort and convenience and push the envelope on design.

3-D Modeling & Prototyping

Using computer models and prototypes to precision-engineer the inner workings of each design, our engineers track dynamic flow profiles and measure over 1,000 attributes to ensure that the flush stays powerful no matter the style.

We believe your toilet and seat should combine incredible performance and great design, inside and out. To create toilets and seats that do just that, we bring together a team of our best industrial designers, engineers and ergonomic experts. Together, they ensure that our toilets are powerful, comfortable and stylish.

Performance Testing

Our domestic and international test labs perform hundreds of tests and measurements from cycle testing to stain-resistance testing. Third-party evaluations by IAPMO* help ensure that our labs are compliant with ISO** Guide 17025 for calibration and testing laboratories.

*International Association of Plumbing and Mechanical Officials

**International Organization for Standardization

Design Review

At various stages in the process, designs are reviewed by our executive team to ensure that each product represents the KOHLER® brand and stays on the leading edge of design and innovation.

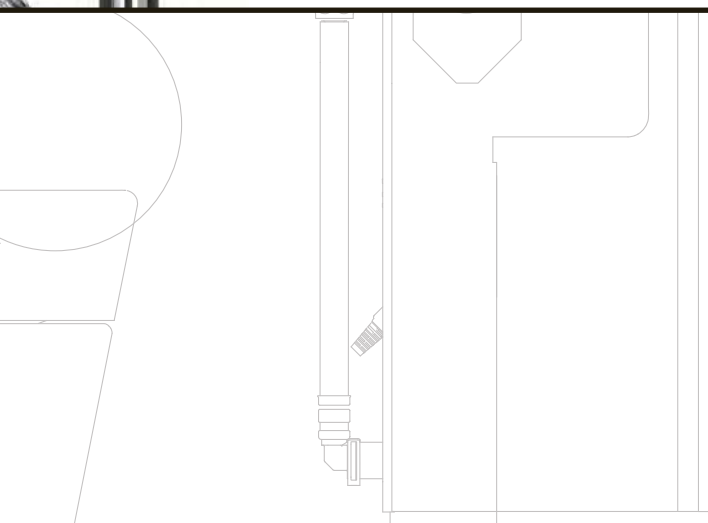

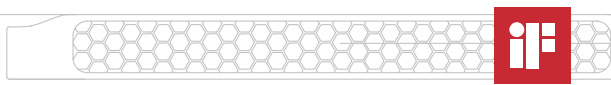

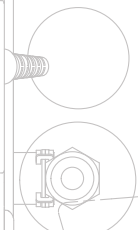

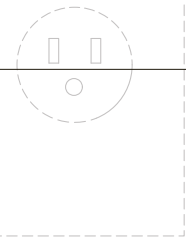

Manufacturing

We manufacture our fixtures and faucets in advanced facilities located in 16 countries. Kohler manages every step from concept to end product with the goal of creating award-winning products.

Design Awards & Highlights

Recognized for innovation and design excellence, KOHLER® kitchen and bath products have received industry and media awards as well as celebrated design awards. We've designed thousands of products and registered thousands of patents, and we remain committed to bringing beautiful, purposeful design to life.

Numi® Toilet – Take Comfort. Take Control.

The Numi toilet combines innovative design, technology and engineering to bring you the finest in personal comfort and cleansing. From its striking form and features to exceptional water efficiency, the Numi toilet marks a new standard of excellence in the bathroom.

Numi® Comfort Height® one-piece toilet with bidet functionality and touch-screen remote (K-3900-0) Page 44

Personalized Comfort

Sophisticated features enhance your environment. Finely tune the ambient lighting, heated seat, foot warmer and audio to transform your bathroom into a relaxing space that's truly yours.

Artful Articulation

Gracefully responsive, the Numi toilet reacts to your movements with an effortless, hands-free opening and closing of the lid and seat. Automatic articulation keeps the lid interior discreetly hidden from view.

Dynamic Cleansing

The Numi toilet offers remarkable personal cleansing. Its durable, stainless steel bidet wand provides precise positioning and exceptional control over spray pattern, pressure and temperature. The self-cleaning wand also features an efficient, integrated air dryer, while a deodorizing filter purifies air from within the bowl.

Numi® Toilet – Take Comfort. Take Control.

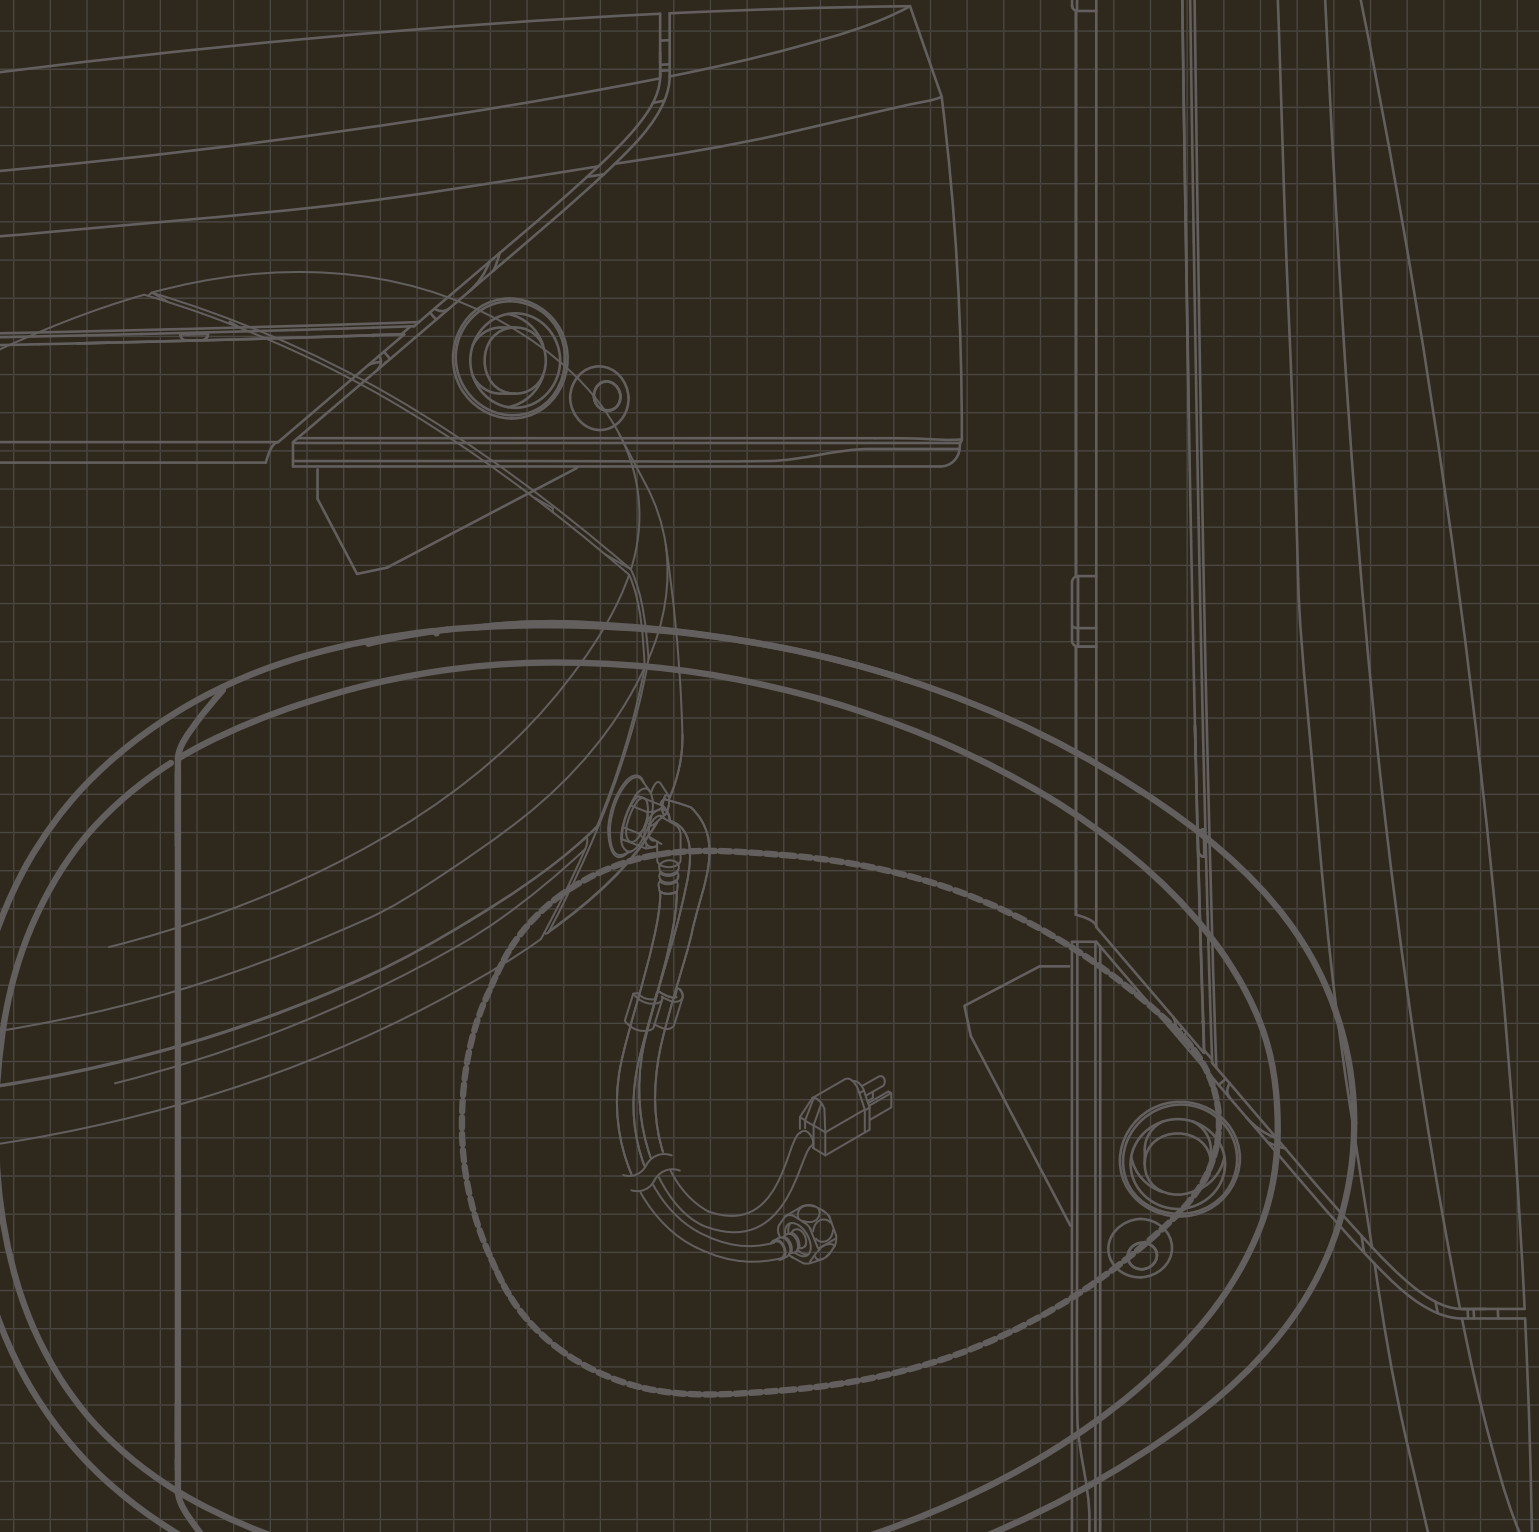

- toilet with bidet functionality
- automatic open, flush and close
- water-saving 0.6- or 1.28-gallon flush
- self-cleaning wand
- precision air dryer
- deodorizing filter
- ambient lighting
- integral speakers

- foot warmer

C³_®-200

C³ toilet seats with bidet functionality use the naturally soothing quality of water as a refreshing, hygienic alternative to toilet tissue to meet our evolving sense of clean.

C³-200 toilet seat and remote control (K-4709-0) Page 66

Cleanliness

Integrated bidet functionality redefines our idea of clean. An in-tank water heater warms the water, while dual wands give a soft, aerated wash in posterior and anterior positions. A touch of the keypad controls rate and temperature of water flow.

Comfort

Both C³-125 and C³-200 toilet seats offer benefits far beyond traditional plumbing, with heated seats and a selection of water temperature and flow settings. The C³-200 also has a deodorizer function, user presets and warm air drying at three speeds.

Convenience

Two attractive models of the C³ toilet seat allow users to achieve a new level of care. Features include a user sensor and energy-saving function, plus a night light and Quiet-Close™ lid. The C³-200 inline heater model offers a remote control option.

Considered Collections

Many of our toilets are designed to coordinate with a matching collection of fixtures and faucets, featuring either the classic detail of traditional design, the clean geometry of contemporary design or a casual balance of the two.

Rêve® one-piece toilet (K-3797-HW1) Page 44

Rêve pedestal sink (K-5149-1-HW1)

Purist toilet tissue holder (K-14444-BGD)

Design Solutions

Whether you're designing a bathroom for an eclectic urban loft, a refurbished Victorian or a thoroughly modern retreat, with KOHLER® you'll find toilet designs – as well as a range of coordinating components – that give you the look and feel that's right for your home.

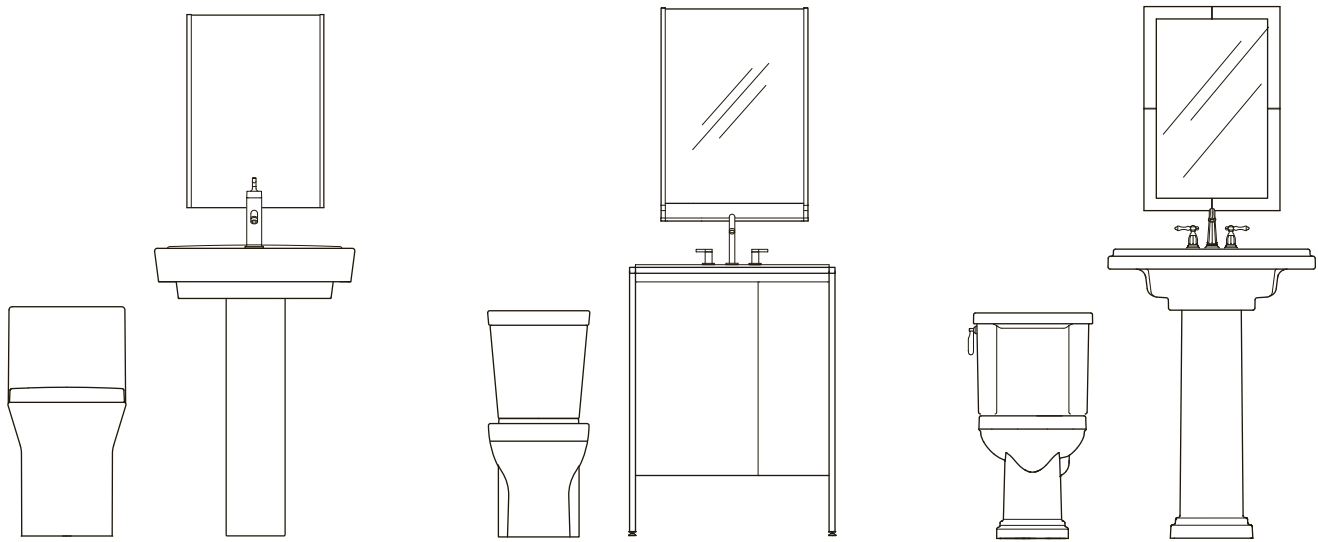

Portrait®

With a hint of French provincial charm, the Portrait collection is an ideal complement to traditional décor. Featuring a range of bathing hydrotherapies, bathroom sink designs, trip lever styles and bidet spray options, the Portrait collection invites you to design a bathroom well suited to your life and your home.

Memoirs®

The Memoirs collection echoes the stylized lines and rich detailing of classic furniture and architectural design. The Memoirs toilet and bidet combine enhanced comfort with sophisticated style, while offering high-efficiency technology options for your master bath.

Rêve®

While its lines may be simple, the Rêve collection makes an instant impact with its geometric confidence. A sculptural work of art, the Rêve collection features a WaterSense®-labeled, dual-flush toilet that brings modern functionality, simplicity and warmth to the contemporary bathroom.

Persuade®

The Persuade collection turns heads with its combination of sleek curves and clean design. A variety of Persuade designs – Persuade, Persuade Curv and Persuade Circ – invite you to explore the nuances of contemporary style. Each toilet features dual-flush technology with the choice between a full or water-saving half flush.

Tresham®

The elegant simplicity of Shaker-style furniture inspired the edgy, neo-traditional design of the Tresham collection. The Tresham Comfort Height® toilet is accented by elegant trim that recalls architectural molding and offers an eclectic twist on classic Americana traditions. Explore the collection at KOHLER.com/Tresham.

Toilets 101

As you shop for a new toilet, there are a few things you'll want to consider along with style. We've listed the main features and amenities here, but you can also refer to the glossary on pages 83-84 for additional definitions of terms.

One- Vs. Two-Piece

One-piece toilets integrate tank and bowl into a seamless, space-saving design that is easy to clean. Some low-profile models can be installed under a vanity extension when space is at a premium. Because of their special design details, most one-piece KOHLER® toilets ship with a Quiet-Close™ toilet seat with Quick-Release™ functionality.

Two-piece toilets feature the traditional design of a separate tank and bowl. Two- and three-bolt installation systems provide a sturdy, level connection between the tank and bowl, making installation easy.

Bowl Shape

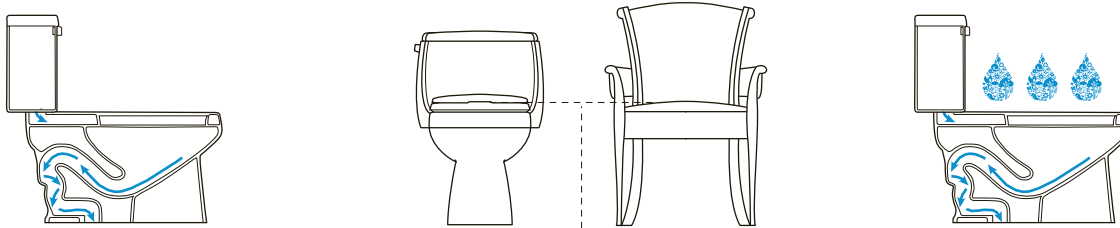

Round-front bowls require less space and are good for small children.

Elongated bowls provide added room and comfort for adults.

Compact elongated one-piece toilet designs enable an elongated bowl to fit in a round-front space.

Concealed & Skirted Trapways

Most toilets have an exposed trapway that's often hard to clean because of its location behind the bowl. Toilets with a concealed trapway feature a smooth surface at the back of the toilet where the trapway would normally be visible. Skirted trapways go a step further and offer a clean line from front to back. Both concealed and skirted trapways simplify cleaning.

Flushing Technology

We offer multiple flushing technologies to meet the needs of different homes and bathrooms – single-flush gravity, dual-flush gravity and assisted-flush. See pages 16-17 to learn more about the individual technologies. You can choose from any one of our flushing options and expect great performance.

Comfort Height®

Comfort Height toilets, approximately 2 inches taller than traditional toilets, make sitting down and standing up easier. Toilets that measure between 17 and 19 inches in height from the floor to the top of the seat are considered Comfort Height toilets, whereas traditional toilets measure below 17 inches in height.

Many Comfort Height toilets are also ADA-compliant when installed per the applicable guidelines. See pages 52 and 56 for a full listing of ADA-compliant toilets.

Gallons per Flush

From 0.6 to 1.6, the KOHLER® toilet offering features a range of gallons-per-flush options to meet your household's needs. If you're searching for a high-efficiency toilet to save water and reduce monthly water bills, we offer water-saving toilets in both gravity-fed and assisted-flush models.

One-Piece Toilets. Seamless Design.

One-piece toilets offer the exceptional functionality you expect from Kohler, but with a lower profile. You can transform even the smallest bathroom into a well-designed, comfortable space.

- Clean with ease thanks to a seamless tank and bowl design and, on some toilets, concealed or skirted trapways
- Shop with convenience: most KOHLER® one-piece toilets include a KOHLER toilet seat
- Make your bathroom feel more spacious with a lower tank profile, which fits under many bathroom countertops
- Choose your shape: some styles feature compact elongated bowls, which fit in the space of a round-front toilet
- Avoid virtually all plugs with a precision-engineered water delivery system

Trip Levers for One-Piece Toilets

We offer a range of trip lever finish options, so you can coordinate every detail of your bathroom from faucets and accessories to cabinet hardware and trip levers. While all KOHLER® toilets ship with a Polished Chrome trip lever, you may choose to place a separate order for a trip lever in a finish that matches your décor. Because trip levers themselves are designed to function with specific toilets and are not interchangeable, begin by finding the model number of your toilet along with the model number of the compatible trip lever in the chart to the right. For a simple visual reference of that trip lever, find the corresponding letter in the chart below. All available finish options are listed in the chart to the right.

Trip Levers for Two-Piece Toilets

We offer a range of trip lever finish options, so you can coordinate every detail of your bathroom from faucets and accessories to cabinet hardware and trip levers. While all KOHLER® toilets ship with a Polished Chrome trip lever, you may choose to place a separate order for a trip lever in a finish that matches your décor. Because trip levers themselves are designed to function with specific toilets and are not interchangeable, begin your order by finding the model number of your toilet along with the model number of the compatible trip lever in the charts at the bottom and to the right. For a simple visual reference of that trip lever, find the corresponding letter in the chart below. All available finish options are listed in the charts at the bottom and to the right.

Toilet Seats 101

To ensure that your new toilet seat matches the style of your toilet and meets your needs, there are a few things you'll want to consider. We've listed the main options here, but you may also find it helpful to refer to the chart on pages 70-71 to help you decide.

Seat Shape

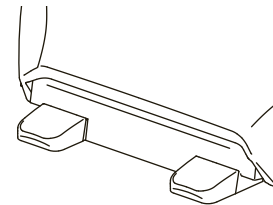

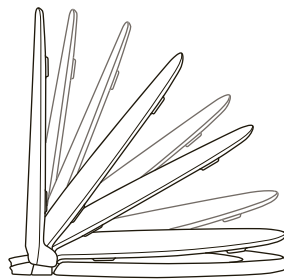

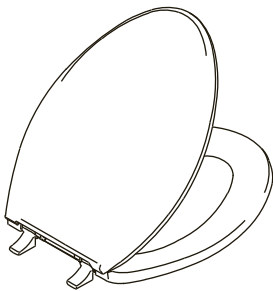

Toilets come in elongated, round-front and compact elongated shapes. You'll want to be certain your seat coordinates with the shape of your toilet.

Transitions® Seat

Our Grip-Tight Transitions Q3™ toilet seat features adult and child rings, eliminating the need to repeatedly attach and remove a child seat.

Bidet Seats

Toilet seats with bidet functionality feature naturally soothing water as a refreshing cleansing alternative to toilet tissue. To learn more, visit KOHLER.com/C3.

Q2™ & Grip-Tight Q3™

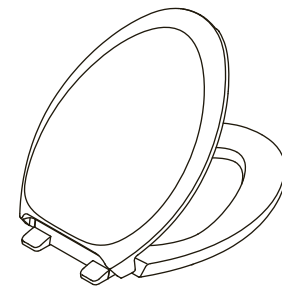

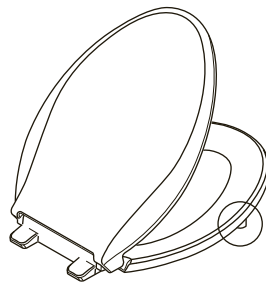

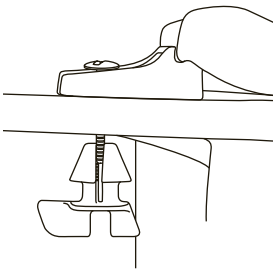

Q2 and Grip-Tight Q3 seats feature Quick-Attach® hardware and Quick-Release™ functionality for speedy installation and easy cleaning. Grip-Tight Q3 seats also feature Quiet-Close™ technology and rubber bumpers.

Quiet-Close Technology

Available on Grip-Tight Q3 and other select seats, Quiet-Close technology lets the lid close gently and keeps it from slamming.

Quick-Release Functionality

This smart feature allows you to remove the entire seat simply and quickly, making it easy to clean thoroughly. Available on Q2, Grip-Tight Q3 and other select seats.

Quick-Attach Hardware

Installation is fast and secure with Quick-Attach hardware, our innovative hardware that locks your seat into place and helps keep it from loosening over time. Available on Q2 and Grip-Tight Q3 seats.

Grip-Tight Bumpers

Located on the underside of the seat, Grip-Tight bumpers grip the bowl to add stability and prevent shifting. Available on Grip-Tight Q3 seats.

Material

KOHLER® toilet seats are available in wood, molded wood and plastic. Designed for moisture-rich environments, plastic seats won't chip, crack or peel. They're color-matched all the way through and allow more choices in seat contour and comfort.

More Comfort. More Convenience.

We are always working to make our products as user-friendly and efficient as possible. The same goes for our toilet seats. We've introduced four features that help ensure our seats won't slide or slam and are easy to clean and install. Choose from enhanced Grip-Tight Q3™ seats or Q2™ seats depending on your needs and preferences.

Grip-Tight Q3™ Toilet Seats

Quick-Release™ Functionality

Unique hinge design allows the seat to be removed for quick, easy cleaning.

Quick-Attach® Hardware

Innovative hardware speeds installation and provides a tighter, more secure fit.

Quiet-Close™ Technology

Special dampers inside the hinge prevent the seat from slamming. A light touch is all it takes to close the seat quietly.

Grip-Tight Bumpers

Located on the underside of the seat, Grip-Tight bumpers grip the bowl to add stability and prevent shifting.

Q2™ Toilet Seats

Quick-Release Functionality

Unique hinge design allows the seat to be removed for quick, easy cleaning.

Quick-Attach Hardware

Innovative hardware speeds installation and provides a tighter, more secure fit.

It has become far more common in American households to incorporate bidet functionality into the bathroom – in the form of a traditional fixture or an enhanced toilet seat. Offering soothing, hygienic warm-water cleansing, bidets have gained popularity. We invite you to browse the following product portfolio to help you decide if a bidet is the right choice for you.

Bidets

Bidets & Bidet Seats 101

As you determine whether or not a bidet is right for you, there are a few things you'll want to think about. We've listed the main considerations here, but you can also refer to the chart on pages 78-79 for more detailed information.

Convenient Cleansing

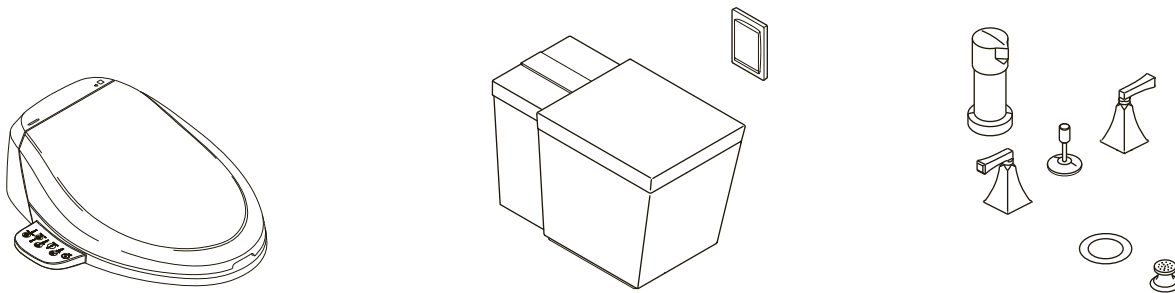

Bidets offer a quick, simple way to refresh and wash the body without taking a full bath or shower. The warm, gentle spray provides soothing, comfortable cleansing.

Vertical Spray

Bidets with vertical sprays feature water delivery through an integral fill on the bidet or a vertical spray stream in the center of the bowl.

Horizontal Spray

Water is delivered from a faucet mounted directly on the bidet with horizontal spray bidets. The choice between vertical and horizontal spray is simply based on user preference.

Bidet Seats

If you would like the soothing cleansing of a bidet, but don't have the room to add a fixture, C³ toilet seats with bidet functionality are the perfect alternative.

Toilets with Bidet Functionality

Integrated seamlessly into the toilet, bidet functionality offers enhanced comfort and convenience on toilets such as Numi and San Raphael.

Coordinating Faucets

Many of our faucet collections feature bidet faucets that coordinate with shower, bath and sink faucets as well as matching accessories.

Indexes

Glossary of Terms 82

Bathroom Colors & Finishes 85

Glossary of Terms

Actuator

The trip lever or button that activates the flushing mechanism in a toilet.

ADA-Compliant

A product designation that indicates the product will comply with the Americans with Disabilities Act when installed per the requirements of the accessibility guidelines of the 2010 ADA Standards for Accessible Design for the appropriate product or component category.

AquaPiston® Flush Engine

Kohler's patented flush engine with a 3 to 2 ratio between the inlet and outlet valves, which harnesses the force of gravity to send 360° of water rushing into the system – delivering maximum power.

Assisted-Flush

KOHLER® toilets that require an electric pump or a pressurized tank in addition to the force of gravity for actuation are considered assisted-flush toilets.

Bidet

A personal hygiene sanitary fixture that provides a gentle, cleansing spray.

Bidet Functionality

The cleansing spray of a bidet achieved through the use of a retractable, self-cleaning wand integrated into a toilet or toilet seat.

Canister Flush Valve

A flushing mechanism designed to deliver a more efficient flush and to last longer than the traditional flapper on single-flush, gravity-fed 1.28- and 1.6-gpf toilets.

Class Five® Technology

A KOHLER flushing technology that uses a canister flush valve to send water into the outlet valve all at once to deliver maximum power.

Comfort Height® Toilet

The height of a toilet bowl (with seat) that stands at the same height as a standard chair measuring between 17" and 19" high for maximum comfort and ease when sitting down or standing up.

Compact Elongated

A toilet design that provides the comfort of an elongated bowl but fits into a smaller round-front bowl space.

Concealed Trapway

A toilet design that features a smooth surface, concealing the trapway, at the back of the toilet base for improved aesthetics and cleanability.

DryLock™ Fast Install System

A simple system for connecting the tank and bowl of a two-piece toilet, eliminating bolt holes in the tank and requiring only a socket wrench.

Dual-Flush

A water-saving flushing technology that lets you choose either a half flush or full flush.

Elongated Bowl

A toilet bowl with dimensions of about 14" wide by 18½" long (from the center of the seat hinge holes to the front edge of the outside rim).

Flapper

On some toilets, the hinged flush valve that seals the water into the tank or allows water to exit the tank for a flush cycle.

Flush Valve

The valve located at the bottom of a gravity-operated toilet flush tank that opens when the trip lever is actuated and closes when the water in the tank has drained to the desired level.

Grip-Tight Bumpers

Rubber pieces located on the underside of a toilet seat to grip the bowl and prevent seat shifting.

Ingenium® Flushing System

A single-flush gravity technology that combines swirling water in the toilet's bowl and an efficient flush for a cleansing rinse.

One-Piece Toilet

A toilet with the tank and bowl manufactured as a single vitreous china fixture.

Q2™ Toilet Seat

A toilet seat that features Quick-Attach hardware and Quick-Release functionality.

GPF

An abbreviation for "gallons per flush," a term used when discussing water consumption for toilets.

Grip-Tight Q3™ Toilet Seat

A toilet seat that features Quick-Attach® hardware, Quick-Release™ functionality, Quiet-Close™ technology and Grip-Tight rubber bumpers.

Insuliner® Tank Liner

A factory-installed tank insulation that minimizes condensation on the outside of the tank in high-humidity conditions.

Power Lite® Technology

An assisted-flush technology that uses an electric pump to deliver water from the tank through the bowl and trapway. This technology requires an electrical outlet near the toilet.

Quick-Attach Hardware

Hardware that speeds installation of a toilet seat and provides a tighter, more secure fit.

Gravity-Fed Toilet

A toilet that relies on the natural downward pressure of water in a toilet tank to flush effectively.

High-Efficiency Toilet

A toilet that uses 1.28 gallons of water or less per flush.

MaP

An abbreviation for Maximum Performance. MaP testing scores represent the number of grams of solid waste a particular toilet can remove in a single flush.

Pressure Lite® Technology

An assisted-flush technology that uses the water pressure in its supply line to pressurize a specialized vessel in the tank.

Quick-Release Functionality

Functionality that allows you to unlatch the hinges of a toilet seat for easy seat removal.

Glossary of Terms

Quiet-Close™ Technology

A technology that allows a toilet seat to gently close instead of slamming.

Rim Jet

A gravity-fed flushing technology in which the jet is positioned at the front of the toilet bowl rim and forces water quickly into and through the toilet's fully glazed trapway.

Rough-In Dimensions

The distance from a finished wall to the center of the waste outlet on a toilet or bidet.

Round-Front Bowl

A toilet bowl with dimensions of about 14" wide by 16½" long (from the center of the seat hinge holes to the front edge of the outside rim).

Siphon

The suction or pulling effect that takes place in the trapway of a toilet as it is filled with outgoing water and waste.

Skirted Trapway

A trapway with a smooth, clean surface from the back to the front of the bowl, fully concealing the trapway for improved aesthetics and cleanability.

Tank

The reservoir in a toilet that holds water for flushing.

Transitions® Toilet Seat

A toilet seat that features integral adult and child rings.

Trapway

Also called "passageway," the channel in a toilet that connects the bowl to the waste outlet.

Trip Lever

A lever that activates the flushing mechanism in a toilet.

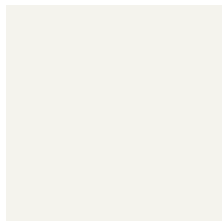

Two-Piece Toilet

A toilet that features the traditional design of a separate tank that mates with a bowl.

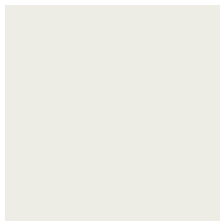

WaterSense® Program

A program of the Environmental Protection Agency. Toilets bearing the WaterSense label use at least 20% less water than standard 1.6-gallon toilets and meet strict flushing performance standards.
