

Before using Of ICT Infrastructure.

- Network system was unmanaged and improper.
- Digital Literacy was low
- Computer were low specification(Processor, RAM, Hard Disk and peripherals etc.)
- Maximum Use of Paper for official Work.
- Staff carried pen drive from one to another for data transfer.

After using Of ICT Infrastructure

- Internet Connection through optical fiber and Network infrastructure is well managed.
- Software-based Services.
- Service is Reliable and easy.
- Less Paper used for official Work.
- Hardware and software sharing through the Network.
- Information is for more peoples at the same time.
- Branded laptops and computers are used.

Ongoing Application software at Dhulikhel Municipality.

- Using Different types of Software's for E-governance.
 - Revenue Management information System(RMIS)
 - Integrated Property Tax (IPT)
 - Application Recording and Tracking System
 - Personal Management Information System(PMIS)
- Store Management System.
- - Vital Event Registration and social Security (VERSP) –MIS

Ongoing ICT Tools for implementing E-Governance at Dhulikhel Municipality.

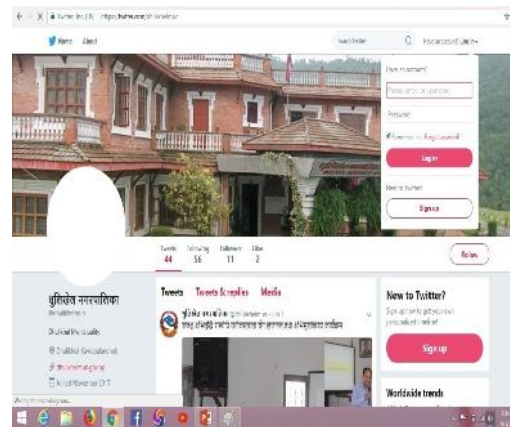

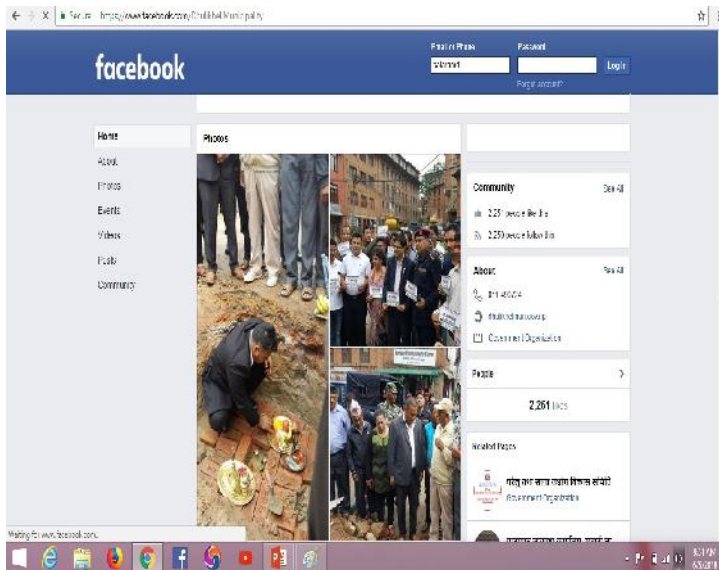

Official Web site- For Official and updated Notices, News, Decisions, Reports, Contact Details, and services.

TO BE
CONTD.....

Ongoing ICT Tools for implementing E-Government at Dhulikhel Municipality.

- **Social Networking (Official Facebook page & Twitter) –** For Information Providing to the General public.
- **Multimedia Display-** For more information about the services of Municipality

TO BE
CONTD.....

Ongoing ICT Tools for implementing E-Governance at Dhulikhel Municipality.

- Bio-metric attendance
- Group web SMS
 - For Increasing Productivity among Employees / Develop a Strong organization Culture.

- This system help to reach a person where they are.
- Text messaging is immediate.
- Text messaging doesn't require an Internet connection.

TO BE
CONTD.....

Ongoing ICT Tools for implementing E-Governance at Dhulikhel Municipality.

- CCTV

- Effective Tool for Supervision and Security.
- Effective tools for enhancing Governance by controlling Petty Corruption.

TO BE
CONTD.....

ICT Tool (s) and softwares to be implemented very soon:

- Tower Server system for Data management Security, reliability and Centralization.
- Building Permit System.
- Project Management System.
- Software to collect user charges for solid waste management etc.
- Implementation of Smart City

E- Procurement System

- Designed and controlled by public procurement monitoring office (Central Government Software).
- Municipalities use the system as a client.
- So far E-submission system is being implemented.
- Technically sound E-bidding (including evaluation, reporting, award etc.) is under consideration.

Way forward for Smart Sustainable City: what we have been doing:

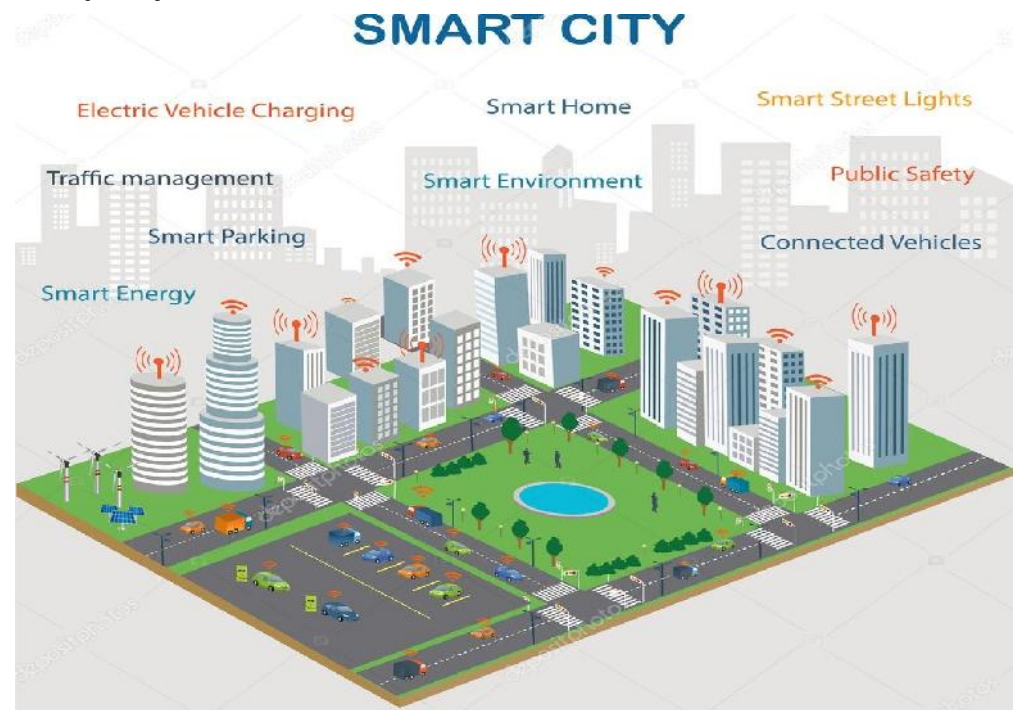

1. Within Office System

- Integrating all specific MIS with the office server
- Linking local tax system to the central Government Tax system
- Working to have to have ICT based internal control mechanism
- Developing application based early warning system and disaster management system
- Developing database of the citizens and link with vital registration system
- Establishing surveillance system for heritage protection
- Working to have to have public grievance platform and management mechanism

Way forward for Smart Sustainable City: what we have been doing:

2. Through the private sector, with the help of Municipality:

- Smart City solution through Telecommunication providers and ISPs
- Smart City solution through private banks
- Smart City solution through payment gateways such as digital wallet
- Smart City solution through supermarkets
- Smart City solution through online shopping portals

Way forward for Smart Sustainable City: what we have been doing:

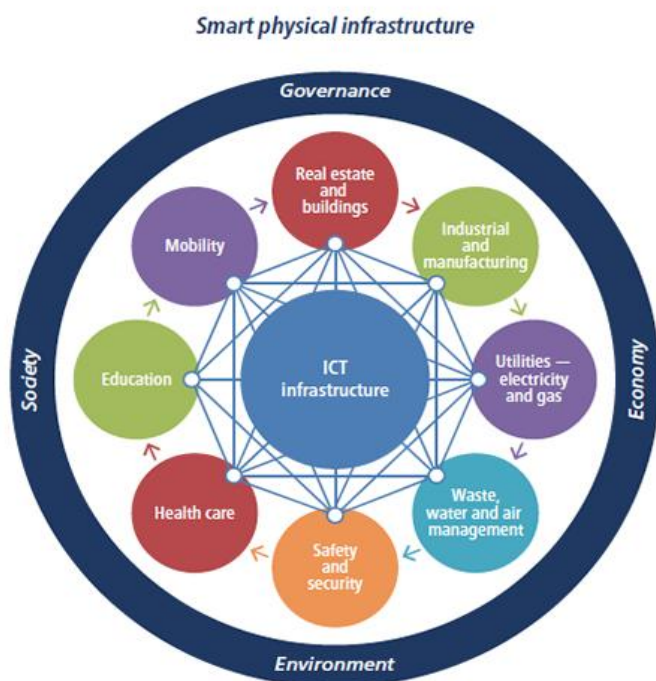

3. Municipality encouraging the private and service sector to go for ICT

- Encouraging public transport to go for smart technology
- Encouraging Hotel Association of Dhulikhel to go for smart booking system
- Encouraging Water Supply Board to go for smart distribution, billing and payment
- Encouraging private and public schools to go for ICT based school management system
- Encouraging all health facilities to go for ICT based system, information sharing
- Encouraging Cooperatives to go for ICT based services and records

Way forward for Smart Sustainable City: what we have been doing:

4. Partnership with Kathmandu University, Department of Engineering

- Kathmandu University, Department of Engineering and Dhulikhel - Municipality mutually agreed that University will help to develop Municipality App
- The Department will also help to enrich Municipality Webpage
- The University will also help the Planning and Urban Development Units of the Municipality

Challenges of implementing Smart Sustainable City:

- Population size is not big to go for huge database and services
- Large number of people are still out of smart communication devices.
- ICT based infrastructures are weak (both form Government and private side)
- Only city center is covered with 4G Service
- The internet and 4G service charge is high in-comparison to the income of people
- Investment of Municipality on ICT sector is still not a priority

Expectation with WeGO and Member Cities:

- Bridge the digital divide
- Learn from your experiences
- Using cloud resources
- Twinning on ICT sector
- Capacity development of the office and officials

Improved Delivery of Public Services

Transparency in Government Transactions

e-LGU

Public Access to Government Information

Source: Leticia O. Clemente –

Stages towards e-Government

Data Driven Transformation

EMERGING PRESENCE

Offering basic information on-line

ENHANCED PRESENCE

Developed sources of information, e-tools and e-services

TRANSACTIONAL PRESENCE

Access to two-way interactive applications for financial & non-financial transactions

CONNECTED PRESENCE

Better coherence, integration & coordination of processes & systems within & across government agencies

E-Governance

Government transforms itself into a connected entity

Challenges:

- 1. Lack of ICT experts within the Local Government Unit.*
- 2. Rapid pace of Technology Development requiring financing to sustain technological sustainability & development consistency*
- 3. Harmonization of e-Governance with the City Business Goal and overall Urban Development directions*
- 4. Horizontal & Vertical ICT Integration referring to harmonization of systems and basic services with the Private Sector and the National Government.*

Strategic Smart City Plan in Da Nang City

Mr. Tran Ngoc Thach

Vice Director, Department of Information and
Communications

Da Nang, Vietnam

STRATEGIC SMART CITY PLAN IN DA NANG CITY

CONTENTS

I

- Achievements from deployment of e-Government and pilot smart city projects

II

- Architecture framework of smart city in DaNang city

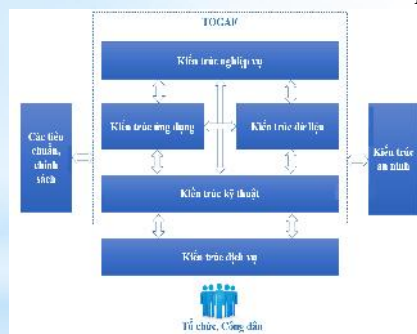

III

- Action plan

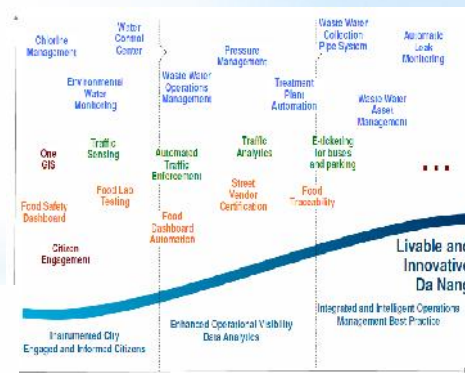

SUMMARY OF THE JOURNEY IN DEVELOPMENT OF E-GOVERNMENT AND SMART CITY IN DA NANG

- In 2003, issue of the resolution for promoting the application and development of IT in Da Nang city.
- In 2010, issue of ICT architecture framework of Da Nang
- From July 2014, Da Nang e-Government System put into operation
- In 2015, issue of Da Nang e-Government architecture framework for the period 2016-2020
- In 2014, roadmap of building smart city in Da Nang (advised by IBM Corporation)
- From 2014, deployment of pilot smart applications
- In 2018, issue of Da Nang smart city architecture framework

e-Government architecture framework

Pilot smart applications

DA NANG ICT INFRASTRUCTURE

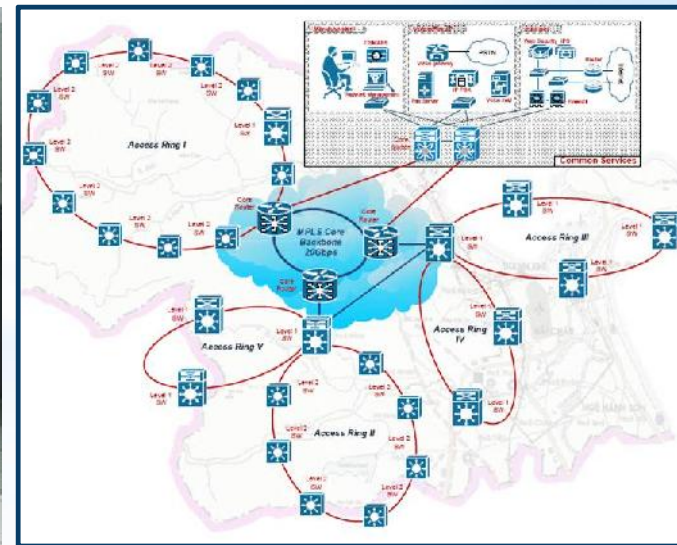

Da Nang Data Center

- ❖ **100TB** storage
- ❖ **TIER III**
- ❖ **ISO/IEC 27001:2013** information security management

MAN Network

- ❖ **5 Rings**
- ❖ **320km** underground cables
- ❖ **105** administrative agencies connected
- ❖ Intranet connection up to **20Gbps**
- ❖ Internet connection up to **4,5Gbps**

ICT INFRASTRUCTURE

Public Wifi System

430 access points

Cover all city center areas, administrative agencies, tourism points, shopping mall

Call Center

100 reception desks

IT Training Center

500 e-learning lectures

E-GOVERNMENT APPLICATIONS

One stop shop

Văn bản chưa xử lý (14)
Công việc chưa xử lý (2)

Document Management

Food safety management

ICT HUMAN RESOURCES

- ❖ **500** IT engineers working in local administrative agencies
- ❖ **700** IT companies
- ❖ **24.500** people working in ICT industry
- ❖ **38** universities, colleges and training centers
- ❖ Attracted human resources from other provinces in the Central of VietNam

**Human resource hub of
Central Vietnam**

Da Nang Uni

Duy Tan Uni

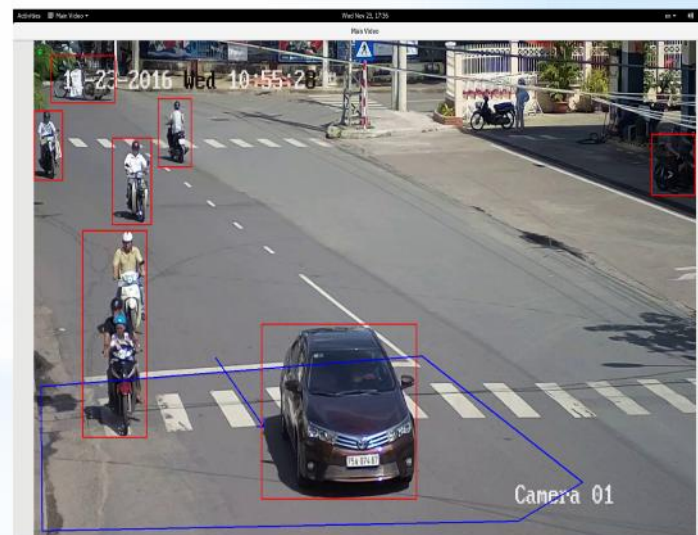

Hue Uni

PILOT SMART APPLICATIONS TRAFFIC MONITORING AND CONTROL

Center of traffic monitoring and control

- ❖ 72 monitoring cameras
- ❖ 6 speed measurement devices
- ❖ Sanction traffic violations through traffic monitoring cameras **from November 01, 2016**

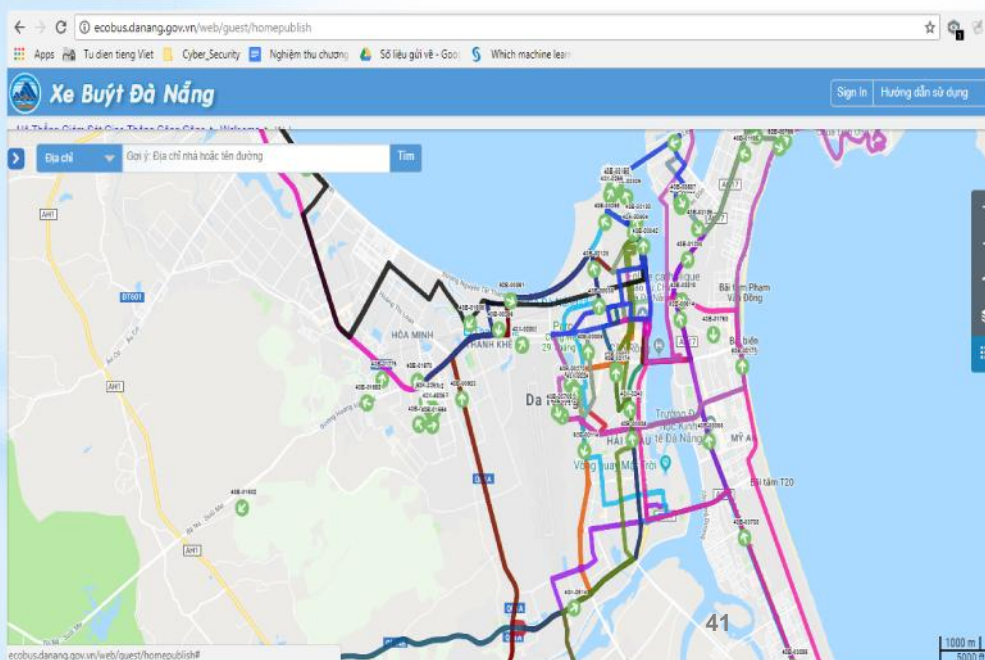

PILOT SMART APPLICATIONS

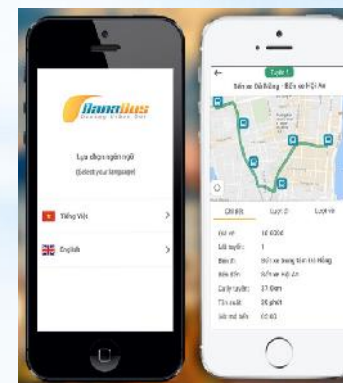

TRAFFIC MONITORING AND CONTROL

Bus management system with cruise control equipment

- ❖ Bus information collection (location, velocity, arrival time,..)
- ❖ Finding bus journey through website, mobile app, SMS,...

Danabus mobile app (Android and iOS)

PILOT SMART APPLICATIONS SECURITY MONITORING

System of security monitoring cameras

- ❖ **1.800** cameras invested by local governments
- ❖ **23.000** cameras invested by private organizations and citizens

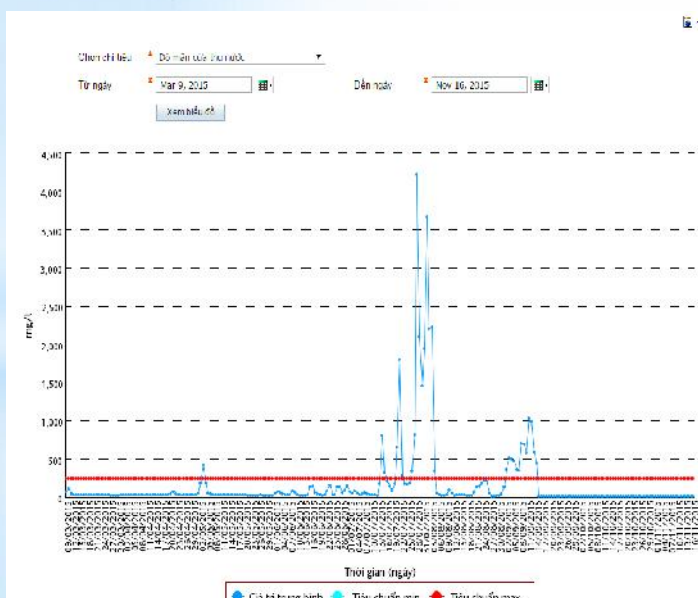

PILOT SMART APPLICATIONS

WATER MONITORING

SCADA System of clean water supply monitoring at Red Bridge WaterPlant

- ❖ Quality of water (turbidity, salinity, conductivity, pH and chlorine levels,...)
- ❖ Flow water (water level, speed, pressure) .

System of wastewater quality monitoring at 3 industrial zones

System of water quality monitoring at 9 lakes

PILOT SMART APPLICATIONS HEALTHCARE

Hospital management software

PILOT SMART APPLICATIONS CONTROL OF FOOD SAFETY AND HYGIENE

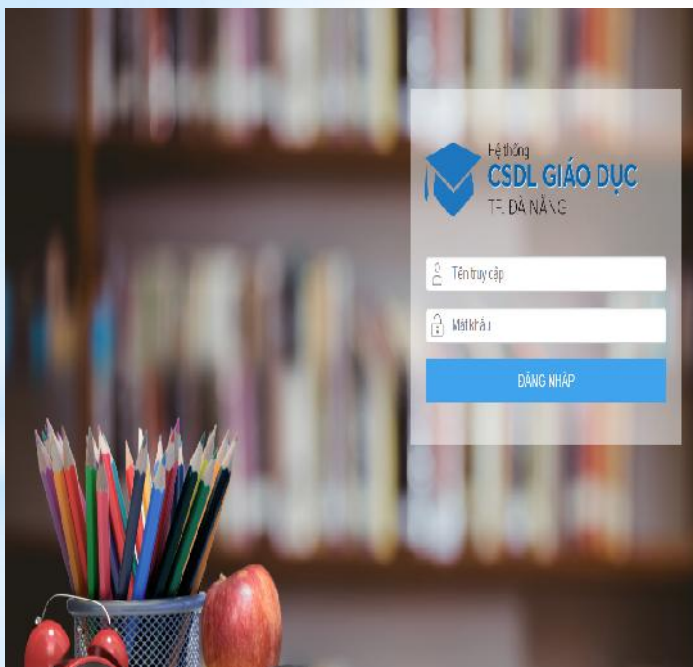

- ❖ Elaborate a database of certified restaurants and factories
- ❖ Searching information about certified factories, restaurants (via SMS, Zalo, 1022 call center)

PILOT SMART APPLICATIONS EDUCATION

Educational database portal

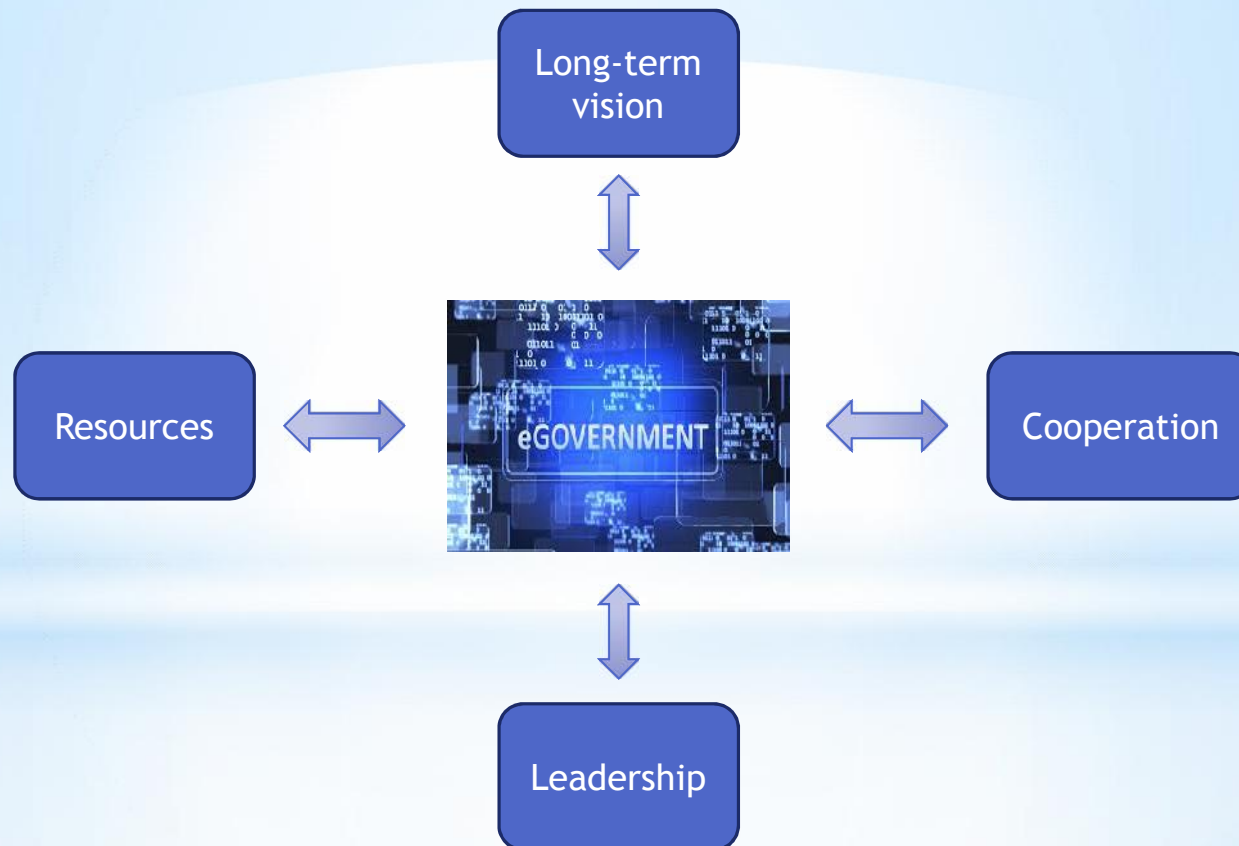

Enrollment software

EXPERIENCES FROM EGOVERNMENT DEPLOYMENT

OPPORTUNITIES AND CHALLENGES IN BUILDING SMART CITY

OPPORTUNITIES

- Commitment of local governments through mechanisms and policies
- Talented human resources
- Case-study and references of smart city in some developed cities (Barcelona, Singapore, Rio de Janeiro...)
- Moderate-scale city
- Good ICT basis

OPPORTUNITIES AND CHALLENGES IN BUILDING SMART CITY

CHALLENGES

- Many smart city solutions, many consultants, providers but not yet standards
- Many guidelines, policies about smart city
- Country with average incomes
- Present law and policies involving privacy, confidentiality
- Cyber security

STRATEGIC SMART CITY PLAN

- ❖ **Vision:** In 2030, Da Nang is the smart, livable and sustainable city with citizen – centric strategy, delivering high quality of life and sustainable environment for citizens while ensuring economy growth and competitiveness.
- ❖ **Overall goal:** Application of ICT and other means in all socio-economic fields in order to enhance city governance and address urban challenges, improve quality of life and ensure efficient use of resources and economy competitiveness.
- ❖ **Detail goal:**
 - 2019 – 2020: Ensure smart ICT-infrastructure and key databases
 - 2021 – 2025: Develop smart applications in 16 key domains
 - Towards 2030: Develop the innovative ecosystem
- ❖ **Priority:** Transport, Environment, Building and Construction, Food Safety, Public Security, Healthcare, Education, Tourism, Agriculture
