COLOURS
FROM 1957**

'BELCO' AUTOMOTIVE COLOUR SERVICE

This list shows the production colours used by British Car Manufacturers since Autumn 1956. It also shows colours for certain imported cars which are in popular use in the United Kingdom. Within each year the colours are arranged according to Car Manufacturer and Model and the 'Belco' reference number is shown against each. Reference numbers for Metallic Finishes are prefixed P031.

Many of the colours shown are in the 'Belco' Ready Mixed Range, which is adjusted from time to time to cover all popular colours. Details are given in frequent issues of the 'Belco' Ready Mixed Leaflet. These colours are matched to the Motor Manufacturers patterns and can be obtained immediately from stock. To match other colours, Basic Colours and Reduced Tinters should be used in the proportions given in the 'Belco' Mixing Scheme Handbook. Mixing formulae are also printed on the reverse of each 'Belco' colour chip.

Early each year, all Colours used by Manufacturers during the preceding twelve months are issued in the yearly edition of the 'Belco' Colour Fan of Motor Manufacturers' Production Colours. This Fan Book includes all colours introduced during the period, though individual chips for each new colour will have also been issued to refinishers at the time of release.
