Puller attachment

Lifting lever for roller and presser foot (32)
(Fig. 1)

Position A:

Roller and presser foot are lowered, are lying on the fabric and feeding it. Both are lifted with the knee lever.

Position B:

The roller is raised. Only the presser foot is lifted with the knee lever.

Adjusting the stitch length:

First set the desired stitch length with screw (33), then set the stitch length on the machine slightly smaller.

Check:

Adapt the stitch length on the machine so that the fabric is slightly stretched between roller and presser foot.

Roller pressure regulating screw (35)

(Fig. 2)

Roller pull:

If for special work you wish the roller to pull slightly to the left or right, this can be done as follows: Place lever (32) on A (roller lies on fabric). Turn screw (36) slightly and turn roller a little.

Removing the roller:

Loosen screw (33) and pull out to the back, place lever (32) on B, loosen screw (37) with 2.5 mm Imbus wrench and remove roller support downwards. The machine can now be used without the puller.
