

INTRODUCTION

This publication provides a historical summary of the changes made to BESTCOMSPi^{us} software.

Revision history information for product firmware and hardware is provided in the *Firmware/Hardware Revision History* document for each product.

This information is provided for confidential use with the mutual understanding that it will not be used in any manner detrimental to the interests of Basler Electric.

The revision history for BESTCOMSPi^{us} is provided as follows. Revisions are presented in reverse chronological order.

Software Version and Date	Change
4.03.00, Jan-21	DECS-150: <ul style="list-style-type: none"> Added Tracking Comms Loss alarm Corrected Time per Division range on Analysis view Improved Security screen views
4.02.00, Aug-20	DECS-450: <ul style="list-style-type: none"> Initial release
4.01.00, Dec-19	BE1-11 <i>d</i> : <ul style="list-style-type: none"> Corrected BESTCOMSPi^{us} DNP mapping for the 76 element binary points DGC-2020, DGC-2020ES, DGC-2020HD, IEM-2020: <ul style="list-style-type: none"> Corrected opening of sender curve files DGC-2020ES: <ul style="list-style-type: none"> Added support for firmware version 1.04.00
4.00.02, Oct-19	All Products: <ul style="list-style-type: none"> Corrected range check issue when opening settings files with computers using non-English, US numerical formatting DECS-250, DECS-250N, DECS-250E: <ul style="list-style-type: none"> Corrected an issue where the AVR and var Setpoints and Pre-Positions could get corrupted when opening a settings file
4.00.01, Oct-19	All Products: <ul style="list-style-type: none"> Changed validation to ignore settings that are not applicable for the selected device application version
4.00.00, Sep-19	All Products: <ul style="list-style-type: none"> Added settings validation view and improved functionality Removed support for Windows XP, Vista, 8.0, and 7 pre service pack 1
	DECS-150: <ul style="list-style-type: none"> Added support for firmware version 2.04.00
	DGC-2020: <ul style="list-style-type: none"> Added new metering pre-alarms for DEF Consumption Incorrect, DEF Quality Poor, DEF Tampering, Torque Limit, and Torque Limit Severe
3.21.01, Jul-19	BE1-11 <i>f</i> , BE1-11 <i>g</i> , BE1-11 <i>i</i> , BE1-11 <i>t</i> : <ul style="list-style-type: none"> Corrected an issue with uploading and downloading 27X and 59X settings
	BE1-11 <i>m</i> : <ul style="list-style-type: none"> Corrected an issue with uploading and downloading 59X settings
