

Bloomberg Government

# BGOV200 – Federal Industry Leaders 2020

# Turn Opportunities Into Action

Bloomberg Government is proud to present our tenth annual BGOV200 Federal Industry Leader rankings. The tenth anniversary edition is a testament to Bloomberg Government's continued commitment to deliver critical market intelligence that helps clients win more contracts. We are proud to see an ever-increasing number of our clients and partners on this distinguished list.

Our rankings reveal the top federal contractors based on fiscal 2020 data for prime, unclassified contracts awarded across all government agencies in the United States. Fiscal 2020 marks the fifth straight year of increased government contract spending as total contracting dollars increased by \$83 billion compared with the previous year. Fiscal 2020 was forecasted to be a record year before Covid-19 was a factor but soared to an unprecedented \$682 billion due to the pandemic. Following an emergency declaration, and with it the passage of \$2.3 trillion in stimulus measures, contractors sprang into action to assist with federal agency demands.

In fiscal 2020, most companies that improved their rankings relied on spending in certain categories. Some of the largest increases year over year are for markets such as medical, which increased by \$22 billion; research and development, which gained \$14 billion; information technology, which rose by \$7 billion; and professional services, which added \$6 billion.

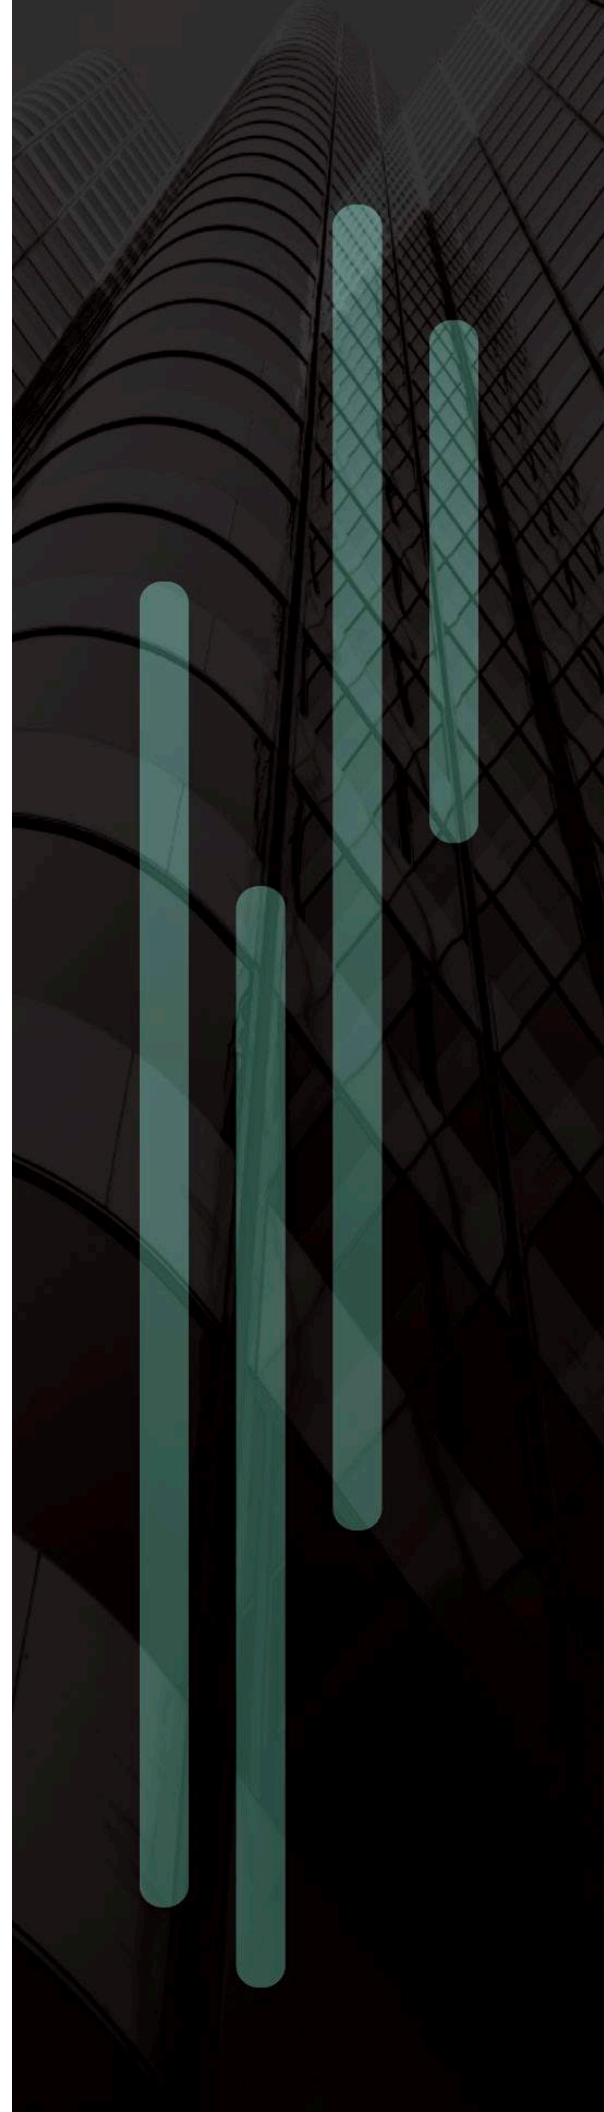

Congress passed a regular fiscal 2021 spending bill that totaled \$1.4 trillion in discretionary spending, signed into law Dec. 27, 2020. The bill replaced continuing resolutions, or stopgap spending bills, established at previous-year levels to fund government activities for October through December. The additional \$1.9 trillion stimulus package signed into law in February 2021 will likely have an impact on the BGOV200 report next year, but has little effect on the rankings this year.

Bloomberg Government provides contractors with a mix of human-driven and data-driven decision tools, news, and predictive analytics that are essential to growing your business. We make it easier to understand the competitive landscape and identify partners. At BGOV our core mission is always to help government contractors build bigger pipelines, make smarter business development investments, and win more federal contracts.

We hope you enjoy the tenth annual BGOV200 report. To learn more about our government contracting solution, visit [about.bgov.com/government-contracting](https://about.bgov.com/government-contracting).

Sincerely,  
Kevin Brancato  
Head of Product  
Bloomberg Government

# Methodology

## 2020 BGOV200 Methodology and Notes

The tenth annual BGOV200 Federal Industry Leaders 2020 study ranks contractors by the value of their prime, unclassified government contract obligations in fiscal 2020.

The information in this study is drawn from Bloomberg Government's proprietary federal procurement database. Our rankings cover unclassified work in fiscal 2020 at the 24 agencies and departments that report their contract obligations to the Federal Procurement Data System - Next Generation (FPDS-NG), the government source from which BGOV derives its data.

Rankings are also provided for each of the 19 top-level category management areas as defined by the General Services Administration's taxonomy.

This study covers only prime contracts - those in which companies have direct relationships with the government - and not subcontracts. The spending totals for the Defense Department comprise contracts at the Army, Air Force, Navy, and 20 other defense agencies. Spending at each of those components is also reflected in the Defense Department totals.

We also rank all nondefense cabinet departments and the four independent agencies that spent the most on procurement: the Environmental Protection Agency, the General Services Administration (GSA), the National Aeronautics and Space Administration, and the U.S. Agency for International Development. Rankings are for funding agencies, rather than contracting agencies. Nearly half of the contracts issued by the GSA and more than a quarter of those issued by the Interior Department are funded by other agencies.

Joint ventures are listed separately from their parent companies when they don't have a single majority parent company. For example, United Launch Alliance, LLC is a 50-50 joint venture of Lockheed Martin Corp. and Boeing Co. United Launch Alliance is listed as a separate company (No. 54). Joint ventures for which one parent company owns 51% or more are rolled up to the majority parent company.

Data is accurate as of May 2021. Federal procurement officials can retroactively update the government's contract data system for up to five years. Contract awards, or obligations, reported by the government for fiscal 2020 don't match contract revenue reported by companies to the Securities and Exchange Commission. This is because companies generally don't record contract awards as revenue until they are paid for their services and because corporate fiscal years often don't align with the federal fiscal year. Differences in how companies report revenue from subcontracts and joint ventures also affect the totals. Rankings are based on net contract obligations. Federal procurement officials report the funds they obligate, or reserve, when contracts are signed. Agencies pay contractors when they present bills for products and services.

Agencies sometimes deobligate unspent funds, which are recorded as negative dollar amounts. The contract totals in this analysis are the net sum of obligations and deobligations recorded for fiscal 2019. Deobligations recorded in fiscal 2020 can result in total spending that is lower than subordinate agency or category spending.

Rankings are based on federal unclassified spending obligations as reported to FPDS. Spending for state and local government and intelligence agencies, and subcontracts spending data, are not reported. Company assignments are based on mergers and acquisitions that have closed as of Sept. 30, 2020.

Prior year rankings and dollar totals referred to in this analysis are for fiscal 2019. Dollar amounts and their assignment to agencies and product/service categories are as reported in the FPDS-NG. Inconsistencies in FPDS-NG reporting can occur.

# FY20 Key Contracting Trends and Market Driving Forces

by Laura Criste, Federal Market Analyst, Bloomberg Government

This is the tenth edition of the BGOV200 - Bloomberg Government's annual summary of the top federal government contractors and critical market trends. In fiscal year 2020, federal spending reached a new record high of \$682 billion. Fiscal 2020 was the fifth straight fiscal year of spending growth, after five straight years of market decline. Spending to combat Covid-19 boosted fiscal 2020 obligations, pushing many companies into the BGOV200 for the first time.

The 10th annual BGOV200 Federal Industry Leaders Study ranks the top 200 vendors by value of prime, unclassified contracts awarded by U.S. agencies in fiscal 2020. It analyzes the top contracts at 92 agencies and departments, and in 20 different purchasing categories.

## BGOV200 Delivers Market Trends for 10 Years

This BGOV200 report focuses on companies and broad trends in the market and explores contract dynamics of the past year and performance of successful contractors. The study finds:

Fiscal 2020 total federal contract spending increased by 14 percent, from \$599 billion in fiscal 2019;

The share of total government obligations won by the top 200 contractors was 65 percent, about the same as in fiscal 2019;

98 companies improved their rankings, down from 120 in fiscal 2019, while 92 companies lost ground in the rankings, up from 69 the previous year;

The rankings of 10 companies, including four of the top 10, remain unchanged;

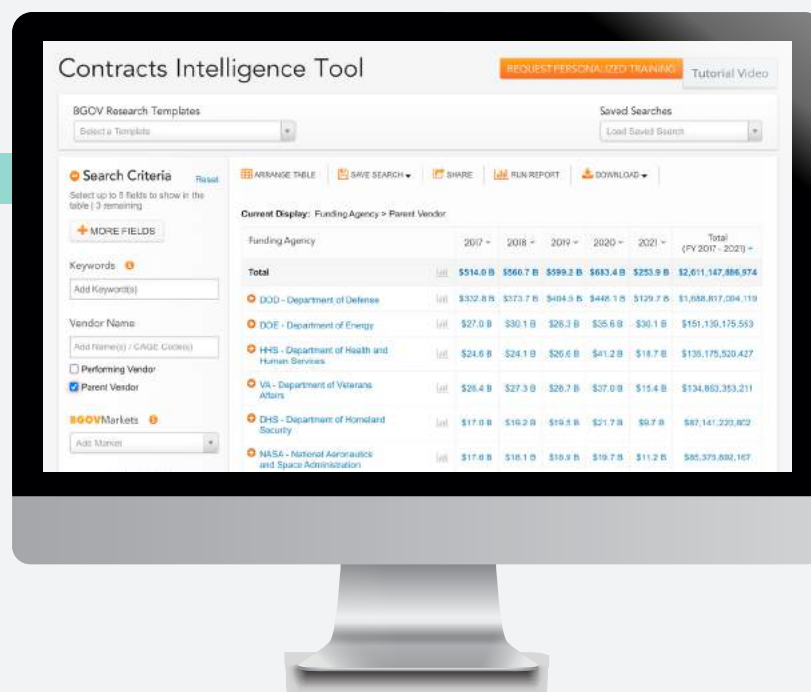

Combating Covid-19 pushed 45 companies into the BGOV200, an uptick from 37 new entrants in 2019.

## About This Report

The 10th annual BGOV200 report is the culmination of extensive data management for areas such as company hierarchy, contract title, and agency assignments. Data integrity makes this the premier source for government contract practitioners trying to make sense of shifts in the competitive landscape. The data is accessible anytime to BGOV subscribers.

Looking to analyze agencies and contracts that result in a company's increase or decrease in rankings? Visit the Contracts Intelligence Tool (CIT) for data-driven solutions identifying agencies, markets, or contracts that caused companies to gain or lose market share.

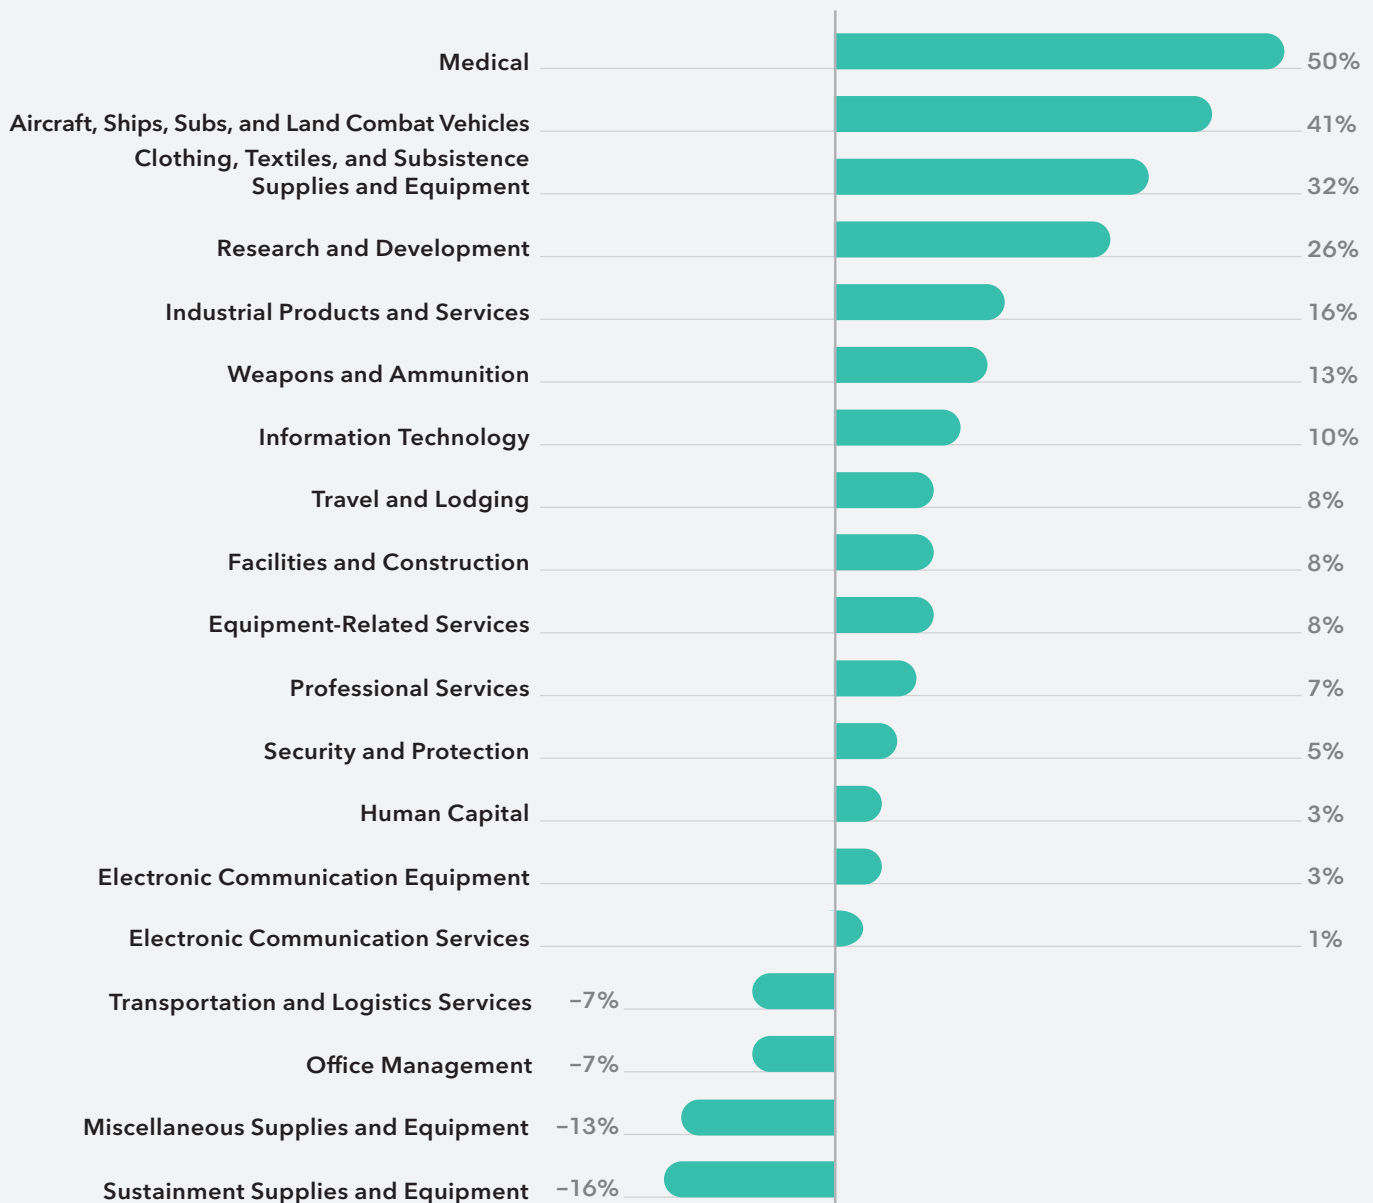

## Budget Changes

The federal government spent \$83 billion more on federal contractors in fiscal 2020 than it did in fiscal 2019. The money for contractors primarily came from the \$1.6 trillion in discretionary funding enacted for fiscal 2020 including \$714 billion for defense and \$914 billion for nondefense. However, the \$2.3 trillion Covid-19-related stimulus package signed into law in March 2020 provided a boost well beyond forecasts that had already predicted a historic peak.

Looking forward to next year's BGOV200, fiscal 2021 looks to be another year of exceptionally high federal contract spending. The additional \$1.9 trillion stimulus package signed into law in February 2021 supplements the regular fiscal 2021 spending bill that totaled \$1.4 trillion in discretionary spending, signed into law in December 2020. The total fiscal 2021 appropriations action met the terms of the two-year budget caps deal reached in August 2019. There is the potential for additional fiscal 2021 spending to be enacted before the end of the year on Sept. 30.

## Percentage Increase and Decrease Between Fiscal 2019 and 2020

## Market Movers

Most purchasing categories highlighted in the BGOV200 increased in fiscal 2020 spending. Of the 19 categories analyzed, 15 increased and four experienced decline. The top six markets all increased by at least \$6 billion compared with prior year amounts. Some of the largest increases year over year are for markets such as aircraft and ships, which grew by \$26.3 billion. The medical market increased by \$22.4 billion, research and development by \$14.1 billion, and facilities and construction grew by \$8.3 billion.

## Information Technology

Technology continued to be a massive contributor to federal market growth. It grew by \$6.8 billion year over year, which is the single largest growth year on record. IT is consistently among the markets with reliable growth rates each year, growing to \$76.2 billion in fiscal 2020 from \$57.3 billion in fiscal 2016. The market was on a growth trajectory before Covid-19 due to continued investment in IT modernization. Technology was bolstered beyond forecast amounts as agencies adopted remote work measures in fiscal 2020.

In fiscal 2020 technology services - which cut through most of the spending categories listed below - drove most IT growth and expanded by \$5.1 billion, to \$53.5 billion, as agencies continued investing in areas such as artificial intelligence, cloud platforms, and digital services. Hardware purchases rose to \$22.7 billion - an uptick of \$1.5 billion - as agencies updated equipment.

General Dynamics (\$3.8 billion), Leidos Holdings Inc. (\$3.2 billion), and L3Harris (\$2.6 billion) were the top companies in the IT sector. These companies maintained their dominance by relying on major single-award contracts in combination with a broad portfolio of multiple-award contracts.

Subcategory	FY 2019	FY 2020	FY 2021 (proj.)
Software (1.1)	\$9.2	\$10.5	\$11.8
Hardware (1.2)	\$14.1	\$14.9	\$15.4
Consulting (1.3)	\$1.6	\$1.6	\$1.6
Security (1.4)	\$0.8	\$1.1	\$1.2
Outsourcing (1.5)	\$40.4	\$43.6	\$46.8
Telecommunications (1.6)	\$3.3	\$4.3	\$4.9

**Note:** Dollars obligated in billions.

Small businesses accounted for \$26.7 billion of the overall \$76.2 billion in fiscal 2020 IT spending. The top small businesses include FCN Inc. (\$563 million), ThunderCat Technology LLC (\$488 million), and V3Gate LLC (\$475 million).

IT companies can rely on BGOV tools and analysis to monitor IT activity in the coming year. Among the six IT subcategories, IT outsourcing produced the highest increase in fiscal 2020 and is expected to continue in fiscal 2021.

## Professional Services

The professional services market, which covers expansive categories of spending such as engineering, financial services, and management consulting, exploded to \$90.3 billion in fiscal 2020, a \$6.2 billion increase from the prior year.

Booz Allen Hamilton Holding Corp. (\$2.7 billion), Science Applications International Corp. (\$2.2 billion), and Chemonics International Inc. (\$2.2 billion) were the top professional services companies in fiscal 2020.

Booz Allen and SAIC maintained market dominance primarily through an abundance of multiple-award contracts at defense and civilian agencies including the General Services Administration's One Acquisition Solution for Integrated Services (OASIS) and the Navy's SeaPort-e. Chemonics' spending obligations were derived mostly from a single-award contract from the State Department to provide supply chain services.

Subcategory	FY 2019	FY 2020	FY 2021 (proj.)
2.1: Business administration services	\$4.4	\$4.1	\$4.1
2.2: Legal services	\$1.7	\$1.9	\$2.0
2.3: Management advisory services	\$45.5	\$50.3	\$53.9
2.4: Marketing and distribution	\$0.9	\$1.6	\$2.0
2.5: Public relations and communications	\$1.5	\$1.0	\$0.9
2.6: Real estate services	\$0.2	\$0.1	\$0.1
2.7: Trade policy and services	\$0.001	\$0.002	\$0.003
2.8: Technical and engineering services	\$26.9	\$28.7	31.8
2.9: Financial services	\$1.4	\$1.5	\$1.5
2.10: Social services	\$1.7	\$1.2	\$1.1

**Note:** Dollars obligated in billions.

Small business accounted for \$29.6 billion of the \$90.3 billion spent on professional services in fiscal 2020. The top small businesses include RER Solutions (\$783 million), T-Rex Solutions LLC (\$524 million), and Arctic Slope Regional Corp. (\$502 million).

Companies can track professional services spending in fiscal 2021 and beyond using BGOV tools and analysis. Among 10 professional services subcategories, management advisory services account for over half the spending and will continue to comprise most of the spending disbursed in fiscal 2021.

## Agency Spending Trends

Defense contract spending rose to \$447 billion in fiscal 2020, a \$42 billion increase from the prior year. In total, Pentagon spending surged by \$140.6 billion between fiscal 2016 and 2020.

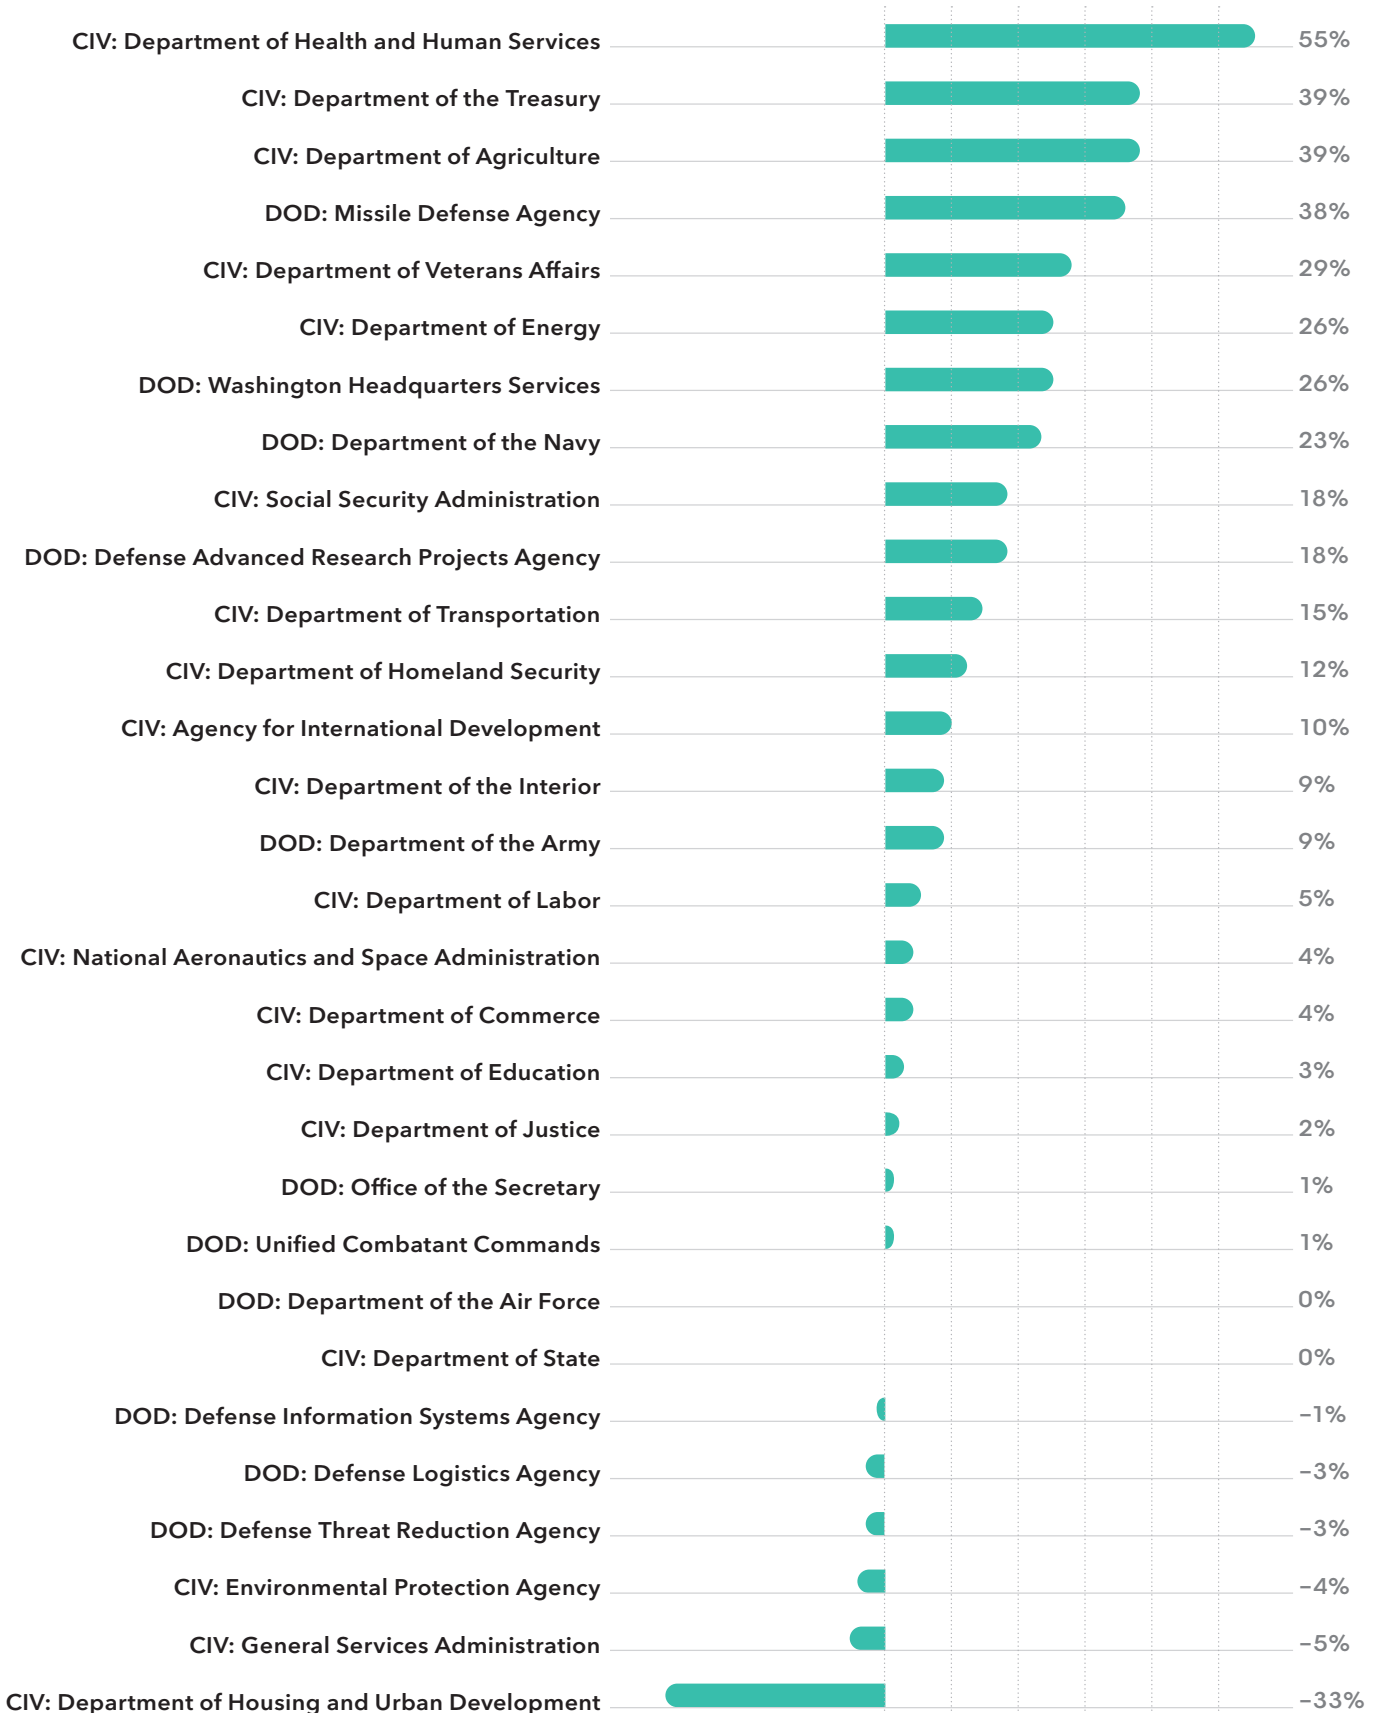

In fiscal 2020, both the Navy and the Army increased spending - the Navy by 23% and the Army by 9%. The Air Force remained flat. The Navy added \$29.1 billion and accounted for \$156.7 billion. The Army increased by \$9.4 billion and totaled \$115.9 billion. Air Force spend totaled \$83.5 billion.

Civilian agencies accounted for the remaining \$235.2 billion of the \$682.3 billion in fiscal 2020 contract obligations. Nearly all agencies had an uptick year over year. The pandemic put the Department of Health and Human Services (HHS) in overdrive. Its budget increased by \$14.6 billion to \$41.2 billion. The Department of Veterans Affairs increased by \$8.3 billion and ended the year with a total of \$37 billion in fiscal 2020. The Department of Energy also increased significantly to \$35.6 billion, from \$28.2 billion.

Agencies including the departments of Agriculture and Treasury also received major amounts of Covid-19 funding. Each had spending increases of about 40% from the prior year. The State Department was among the only major civilian agencies to not have a major increase, with spending remaining about flat at \$9.5 billion.

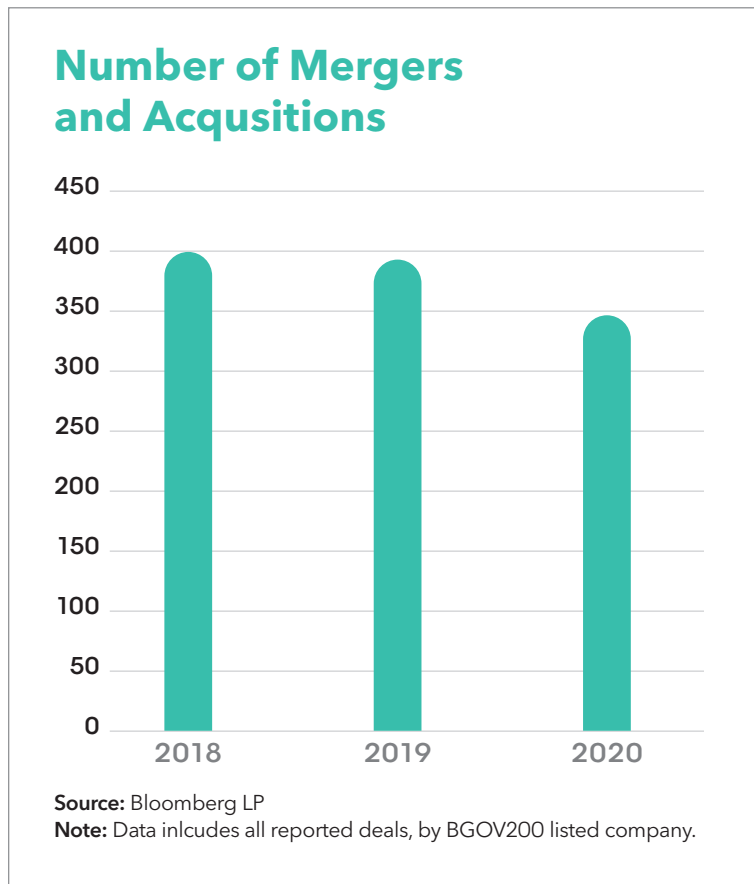

## Percent Increase and Decrease Between Fiscal 2019 and 2020

# Mergers and Acquisitions

Mergers and acquisitions continue to play a key role in shaping the rankings of top companies.

Bloomberg Government identified 344 transactions in fiscal 2020 that occurred among companies listed in the 10th annual BGOV200 report. That is down from 388 in fiscal 2019, and 401 reported in fiscal 2018.

Competition for federal IT services continues to rank highly among significant contributors to major mergers, acquisitions, and divestitures. Companies continue consolidating, buying, or restructuring to jockey for profitable margins in a transformative IT market. Likewise, professional services play a key role in many mergers and acquisitions that occurred in fiscal 2020, as companies reshape their portfolios of offerings to accommodate federal customers' evolving needs.

Some key deals that closed before Oct. 1 captured in the 10th annual BGOV200 include SAIC acquiring Unisys in March 2020, Leidos buying Dynetics in January 2020, and ICF securing Incentive Technology Group LLC in January 2020. Other deals that occurred after Oct. 1, or haven't closed yet, will be reflected in the next BGOV200 report. Those deals include the May 2021 planned merger of Peraton that combines Northrop Grumman IT Services and Perspecta Inc., Amentum's November 2020 purchase of DynCorp, KBR's purchase of Centauri in October 2020, and Jacobs' November 2020 purchase of Buffalo Group.

## Contracting Trends Affecting Government Spending

**Covid-19:** Beginning in March 2020, agency spending related to the pandemic was a massive contributor to fiscal 2020 contract spending growth. Covid-19 spending transactions totaled \$45 billion in fiscal 2020, according to BGOV data. Most Covid-19 spending, about \$25 billion of \$45 billion, is attributable to activities for vaccine research and development and medical equipment. Professional services for activities such as financial services totaled \$5 billion. Information technology supporting activities such as remote work totaled about \$3 billion.

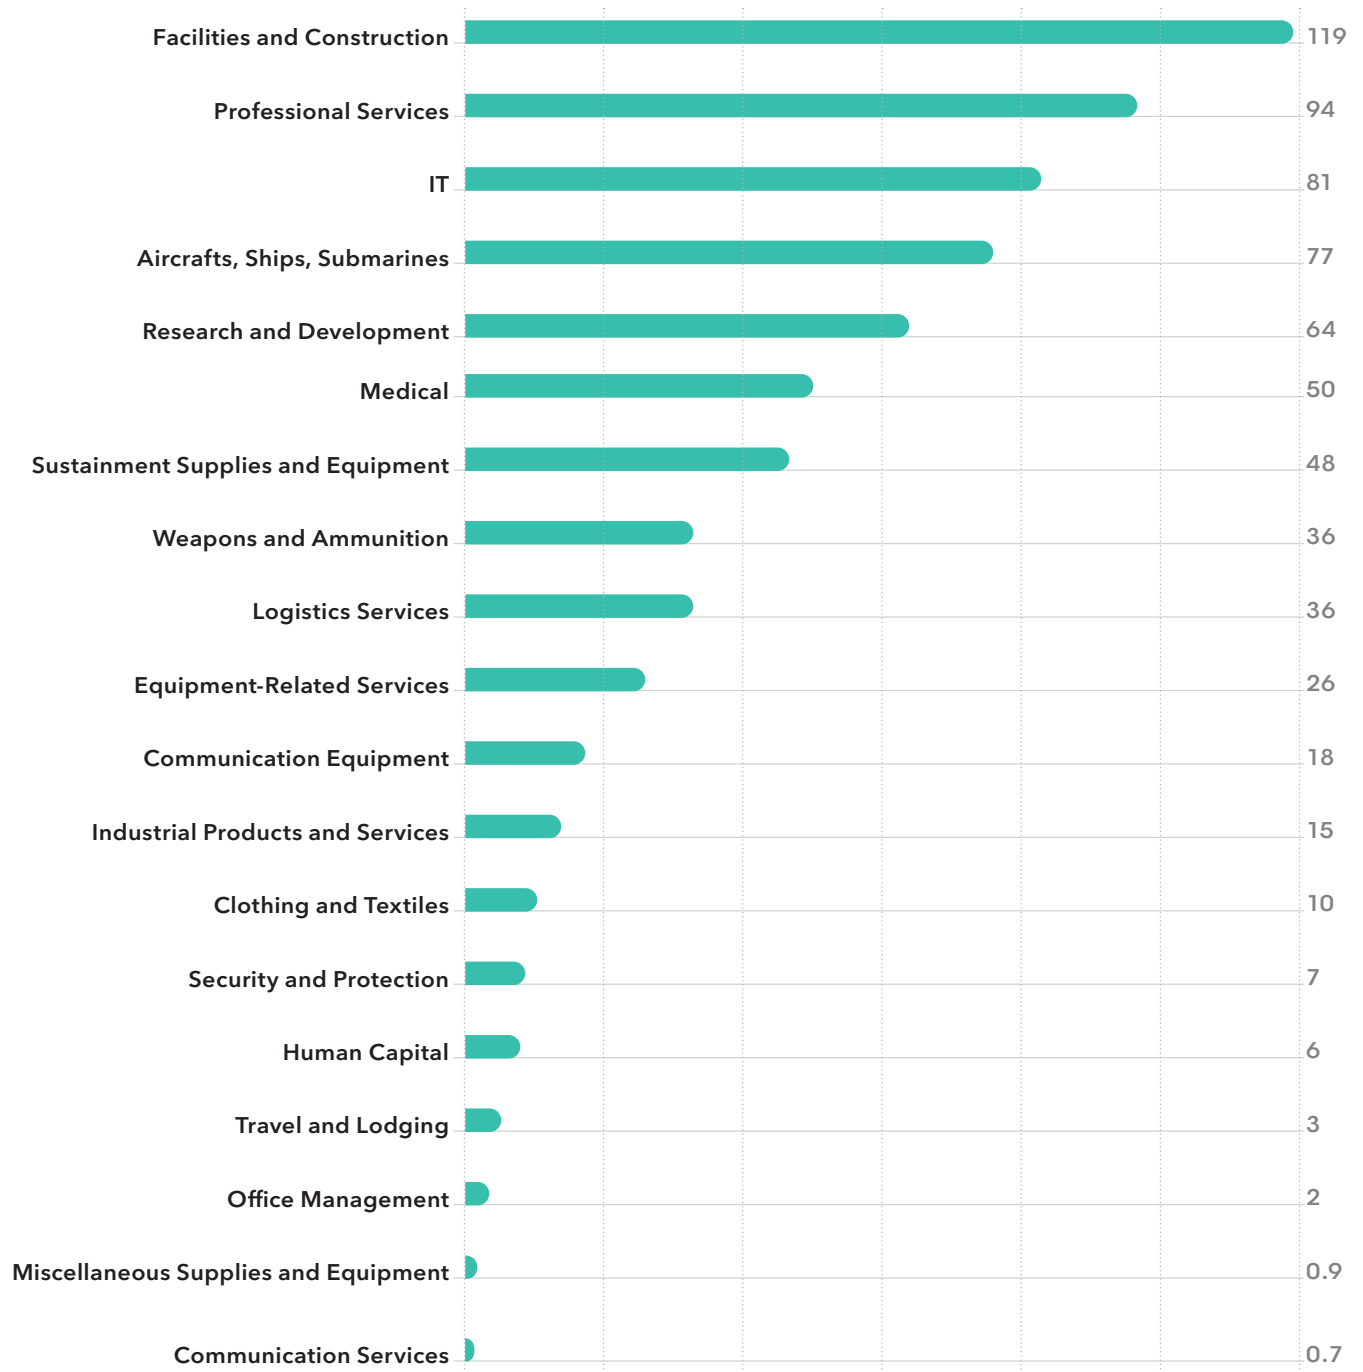

**Other Transaction Authority:** Acquisitions using the federal government's Other Transaction Authority (OTA) were intensifying even before Covid-19, but the pandemic created an unprecedented surge. OTA spending reached \$18 billion in fiscal 2020. Since federal agencies rely on OTAs to support activities for research and development and prototype growth, the acquisition method provided a favorable solution for agencies rushing to research and develop vaccines and medical equipment quickly.

**GWAC Spending:** Federal spending on governmentwide acquisition contracts, which are designated exclusively for information technology purchases, has continued to accelerate, reaching \$20.8 billion in fiscal 2020. The trend suggests agencies are relying more on GWACs each year to satisfy IT requirements to modernize systems.

## What's Ahead

Bloomberg Government forecasts fiscal 2021 spending obligations could range from \$600 billion to \$695 billion, once spending ends for the year in September 2021. Top markets likely to see continued growth in fiscal 2021 based on the BGOV forecast are facilities and construction (\$119 billion), professional services (\$94 billion), and information technology (\$80 billion).

## Projected Dollars in Billions for Fiscal Year 2021

Source: Bloomberg Government

Note: Forecasts based on compound annual growth.

President Biden's budget request, totaling \$1.5 trillion in fiscal year 2022, suggests federal spending will continue to flourish.

Defense agencies would receive \$753 billion under the request, \$12.3 billion more than the fiscal 2021 level. Civilian agencies would receive \$769.4 billion in discretionary spending under the fiscal 2022 proposal, a \$105.7 billion increase over the fiscal 2021 level.

As of May 2021, appropriators have received preliminary top-line spending figures. The fiscal 2022 budget will be the first in a decade in which defense and nondefense spending aren't constrained by budget caps, meaning Congress has an opening to shift money between defense and nondefense programs, or can increase funding without using contingency or emergency accounts.

The plan calls for major increases for the departments of Commerce, Education, and HHS, as well as the Environmental Protection Agency. Each would receive a boost of more than 20%. HHS is \$133.7 billion (up from \$108.6 billion enacted in 2021), Veterans Affairs is \$113.1 billion (up from \$104.6 billion enacted in 2021), Education is \$102.8 billion (up from \$73 billion enacted in 2021), and State and International Programs is \$63.5 billion (up from \$56.7 billion enacted in 2021).

Visit [bgov.com](https://www.bgov.com) to stay up to date on contracting analysis and opportunities as they develop throughout fiscal 2021 and beyond.
