

BHOPAL SMART CITY

**BHOPAL SMART CITY
DEVELOPMENT
CORPORATION LIMITED**

CEO - BSCDCL

Smart Cities Mission India

31 % of India's population resides in urban areas contributing 63 % of national GDP. It is expected that by the year 2030, 40 % of India's population will be living in urban areas and will contribute 75% of national GDP.*

Smart Cities Mission was launched to deal with rapid urbanization, drive economic growth and improve quality of life of people

Mission covers 100 cities over a duration of five years

Mission Purpose: The purpose of the Smart Cities Mission is to drive economic growth and improve the quality of life of people by enabling local area development and harnessing technology, especially technology that leads to Smart outcomes. One of the major aim is to make sure India is able to deal with huge influx of people.

Core Infrastructure would include: adequate water supply, assured electricity supply, sanitation including solid waste management, efficient urban mobility and public transport, affordable housing, especially for the poor, robust IT connectivity and digitalization, good governance, health, education, etc.

SCM creates reference and ripple effect for neighboring cities and rural surroundings

Urban Challenges to be Addressed by Smart Cities Mission

Mobility

- Inadequate public transport network
- Increased reliance on private transport, congestion

Power & Energy

- Reliance on hydrocarbons
- Incomplete access to 24/7 electricity

Water

- Insufficient access and adequacy
- Dependency on rain, distribution losses

Waste & Sanitation

- Open defecation & manual scavenging
- Lack of waste segregation & low collection efficiency

Governance

- Inadequate institutional capacity
- Limited autonomy, financial independence

Healthcare

- Low availability, unaffordable for many
- Little focus on preventive health/wellness

Education

- Insufficient quality of education, lack of infrastructure, research, retention

Built Environment

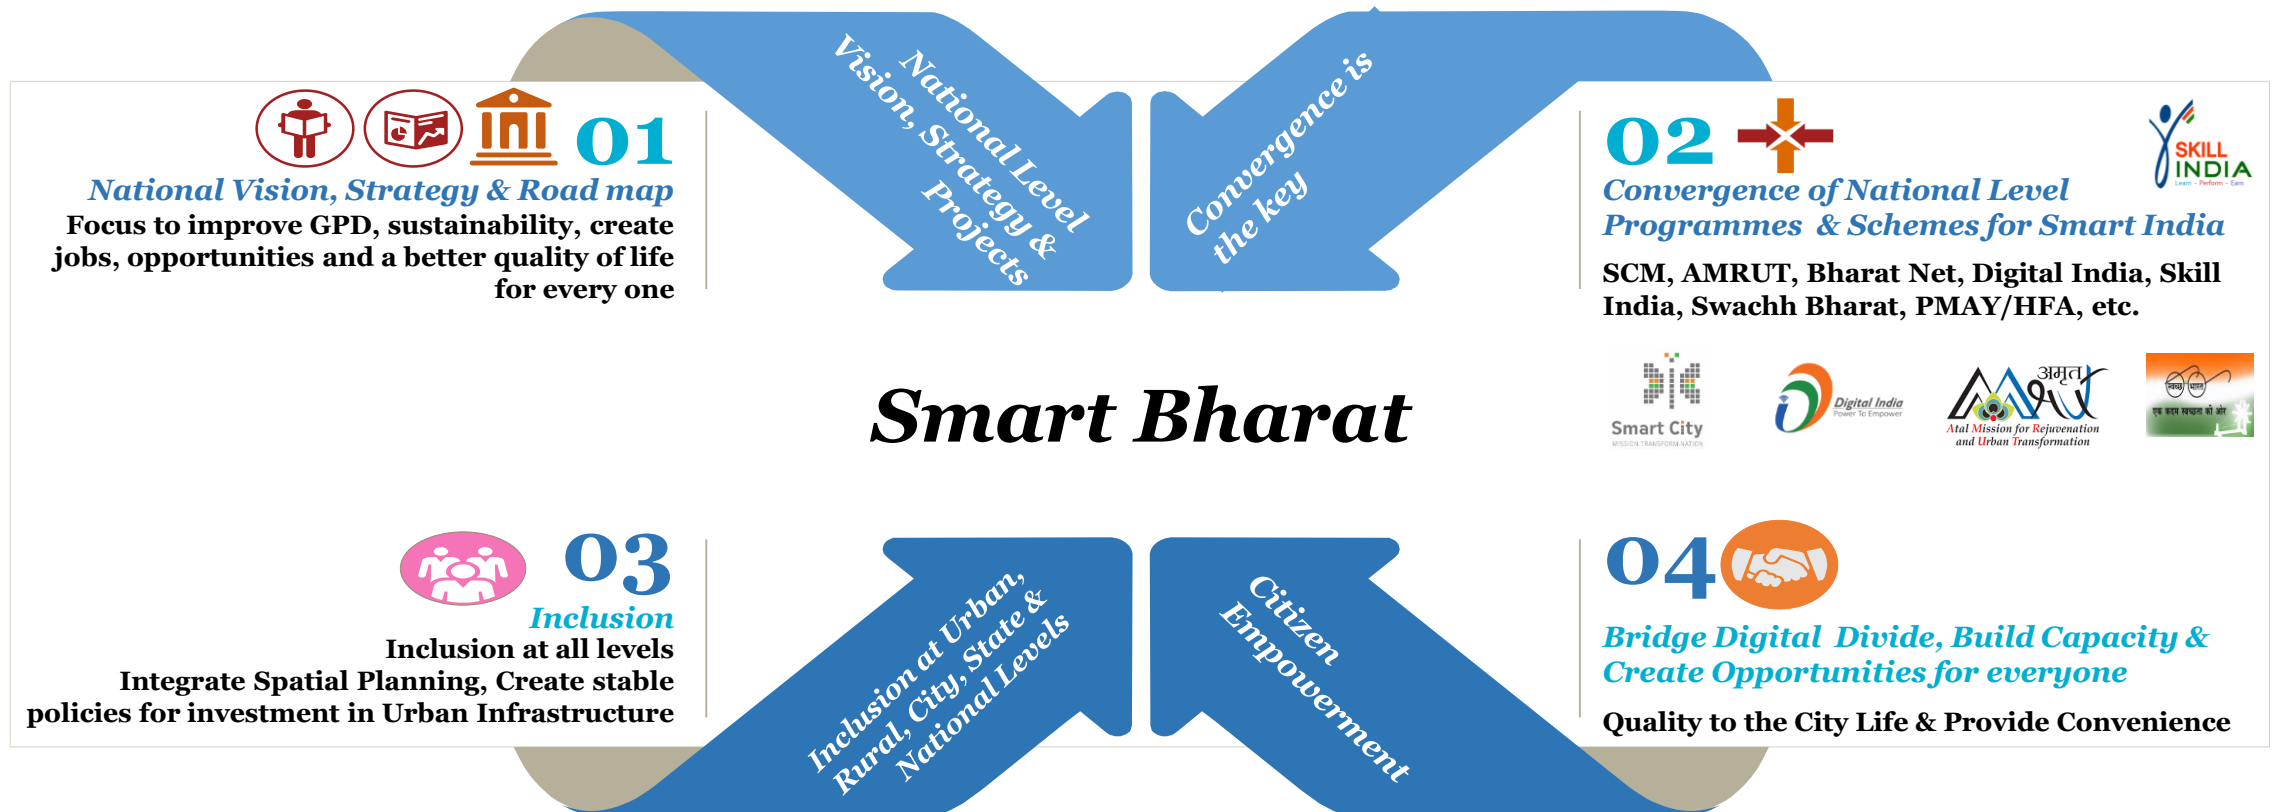

- Lack of affordable housing
- Informal dwellings, urban sprawl

**CHALLENGES
FOR A
CITY MANAGER**

India needs to view its economic and social challenges as opportunities for growth & renewal!

Convergence is the Key

Sector*	Smart Cities	AMRUT	Other Programs
Water	Yes	Yes	Yes (Housing For All, HRIDAY)
Waste & Sanitation	Yes	Yes	Yes (Clean India, Housing For All, HRIDAY)
Mobility	Yes	Yes	Yes (HRIDAY)
Energy	Yes	No	Yes (HRIDAY)
Social Infrastructure	Yes (Education, healthcare, Safety)	No	Yes (HRIDAY)

BHOPAL SMART CITY VISION

Transforming Bhopal, a City of Lakes, Tradition & Heritage into a leading destination for Smart, Connected and Eco Friendly Communities focused on Education, Research, Entrepreneurship and Tourism

BHOPAL – A LIGHTHOUSE CITY WITH DIFFERENCE

1. Only **Lighthouse** city that envisions **REDEVELOPMENT** driven urban overhaul by unlocking the value of sub optimally utilized land parcels.
2. Check urban sprawl
3. IOT to drive Citizen Centric innovations as pan city interventions

PAN CITY INITIATIVES

875 cr.

AREA BASED INTERVENTIONS

2565 cr.

Project Cost as per SCP – 3437 cr.

Bhopal is the only **Light House City** (Bhopal was selected in the **top 20 SCM challenge list**) which envisions **Redevelopment**

Under the **Swachh Survekshan 2018 & 2017**, Bhopal was the **2nd Cleanest city of the country and the Cleanest Capital City**

Bhopal has been ranked as the **No.1 Smart City** by MoHUA , in terms of the progress and execution of Smart Cities Projects in Bhopal as per the Smart Cities Mission Guidelines

The **Average Air Quality Index (PM 2.5)** of Bhopal is around **60** which is considered to be on a **very satisfactory level** .

Bhopal was ranked as the **10th most Liveable City amongst 111 cities of the country** as per the latest **Liveability Index Survey**

BHOPAL A PIONEER CITY

Pan City Initiatives

- Integrated Command & Control Centre (ICCC)
- Intelligent Traffic Management System (ITMS)
- Smart Poles & Intelligent Street Lights
- Bhopal Plus (One City One App)
- Mayor Express (Smart Handyman Service)
- Public Bike Sharing
- B-Nest (Incubation Center)
- Smart Map Bhopal (99 Layers of GIS)
- Smart Parking
- Heritage Conservation
- Water SCADA
- Digital Door Number
- Smart School
- Smart Park

ABD Initiatives

- Government Housing (2808 Units)
- Smart Road
- Solid Waste Management
- Boulevard Street
- Power Supply & Street Lights for ABD area
- Commercial Complex
- Haat Bazaar
- Dushhera Maidan

**MAJOR
PROJECTS
UNDERTAKEN
BY BSCDCL**

AREA BASED DEVELOPMENT

342 ACRE
T T NAGAR
REDEVELOPMENT

TOD BASED MASTER PLAN

PROPOSED LAND USE

- The Master plan of the ABD project area is developed on the principles of Madhya Pradesh Transit Oriented Development Policy (Draft)-2016.
- The TOD policy supports high density mixed used development. It envisages to create transition between higher and lower intensity development by stepping down building heights and densities with distance from Transit Station/ Corridors.
- The Govt. of India's Smart City Mission also envisages similar high density development for its selected cities.

INFRASTRUCTURE PROVISIONS

Parking – Optimal underground provision considering future projections

Accessibility – All mobility and connectivity infrastructure shall address accessibility by all

Solid Waste – Suction based Automated Evacuation of waste

Domestic Gas – Well distributed network

Utility Tunnel – Entire Utility & Service Supply System in the underground trenches

ICT – Digitally Connected City, IoT Infrastructure, Plug and Play

Water Supply – Dual piping, Drinking water from any tap

Sewage Treatment Facility – Water Recycle

Green Township/ Neighborhood – 80% buildings in the ABD area shall be green rated

Signage – Way finder and Impact signage as required

Power – Underground Compact Sub-stations, 24 X 7, Smart grid, Min. 10% power from Renewable Energy, 100% power back-up

AREA BASED DEVELOPMENT

EXISTING LAND USE

PROPOSED LAND USE

EXISTING LANDUSE

Existing Roads & Open Spaces - 23.4%

Proposed Roads & Open Spaces - 42%

PROPOSED INFRASTRUCTURE

Parking – Optimal underground provision considering future projections

Water Supply – Dual piping, Drinking water from any tap

Sewage Treatment Facility – Water Recycle

Domestic Gas – Well distributed network

Solid Waste – Suction based Automated Evacuation of waste

Power – Underground Compact Sub-stations, 24 X 7, Smart grid, Min. 10% power from Renewable Energy, 100% power back-up

District Cooling – Centralized cooling and heating system for commercial and retail spaces

ICT – Digitally Connected City, IoT Infrastructure, Plug and Play

Utility Tunnel – Entire Utility & Service Supply System in the underground trenches

Accessibility – All mobility and connectivity infrastructure shall address accessibility by all

Green Township/ Neighborhood – 80% buildings in the ABD area shall be green rated

Signage – Way finder and Impact signage as required

GOVERNMENT HOUSING

Project cost – 187 crs

Time – 24 months

Status - Awarded

OTHER DEVELOPMENTS

Land allotted by Government

Planning finalized and submitted to T&CP for land use change

TOR for Environmental Impact Assessment approved by MOEF, GOI

Proposal for approval of High Rise Building , Government housing submitted

Work of 352 G type and 328F type Houses awarded

Work of Boulevard Street (45 meter road) awarded.

PAN CITY INITIATIVES

BSCDCL Domains for Digital Initiatives

The digital initiatives of BSCDCL are based upon the digital strategy/roadmap for Bhopal city which is based on the following domains

01

Smart Government

- Promote data-driven approach for public service delivery and development of e-Governance services
- Infrastructure to support Government & Citizens

02

Smart People

- Enable people to interact with service providers and participate in civil society with ease and confidence

03

Smart Living

- Instil and enhance citizen's confidence and ability in transacting electronically with the public and private sector
- Support general citizen wellbeing
- Empower the elderly to age in their own communities

04

Smart Economy

- Improve and promote the overall business climate and industrialization and city effectiveness for start-ups and investors
- Attract leading talent and investments globally to increase

05

Smart Mobility

- Facilitates commuters choice of efficient and integrated multimodal transport, promote non-mechanized transport for short trips and maximize use of public transport
- Alleviate traffic congestion problems through effective planning

06

Smart Environment

- Promote a more sustainable environment for the people of Bhopal
- Optimize the use of city resources through "reduce, reuse and recycle"

Integrated Command Control Center @ BSCDCL

INTEGRATED CONTROL & COMMAND CENTER

UNIQUE MODEL

Cloud Based DC & DR

- On demand IT Infra for Smart City Applications
- IT Infra Aggregation
- Optimal utilization by sharing IT infra
- Standardization- Auto-scalability, Faster implementation
- Unified Administration
- Increase Reliability and Security

Integrated ICCC Platform for State

- Single source of truth
- City's emergency and disaster management platform
- Integrate multiple text, voice, data, video and smart sensors communication interfaces
- Support GIS based incidents visualization
- Modular, Open, Configurable architecture

State level Analytical Platform

- Platform with the ability to receive, intelligently correlate & share information to better predict outcomes
- Ability to integrate and correlate online and offline interactions

City level Command Control Center

- Centralized platform to access the entire city and generate appropriate commands
- Automatic alert generation and redressal for various city functions like- route deviation, schedule adherence system/trip miss system for buses, speed violation, city surveillance, security

IOT Sensing Landscape in Bhopal

Cloud Based Architecture for Common Smart City Software Platform

Technology Architecture, IOT Landscape in Bhopal

Components of Pan City Solution

Project 1: Smart Unified Governance

City Apps & MIS

- Ease of Business Applications
- Citizen Engagement Portal
- Citizen Grievance Redressal System
- City Application and dashboard
- Data Analytics and MIS
- City level GIS
- Mobile service delivery and transaction gateway
- Command Centre

Smart Waste Management

- Waste to Energy Conversion
- GPS based garbage vehicle tracking
- Asset management system
- RFID tagged garbage bins
- Operation management and monitoring
- Waste network simulation system
- Grievance management through crowd sourcing
- Geo-fencing of Assets

Centralized Command Centre

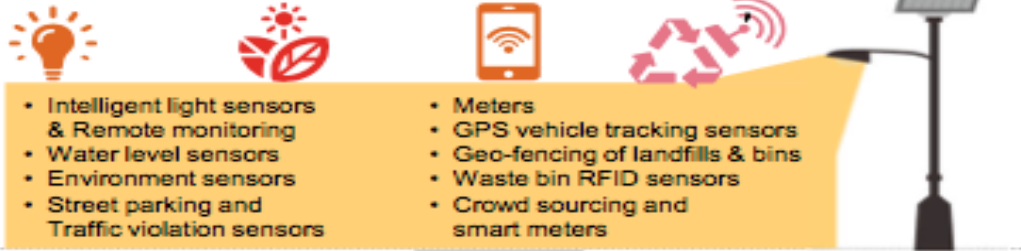

Project 2 : Intelligent Street Lighting

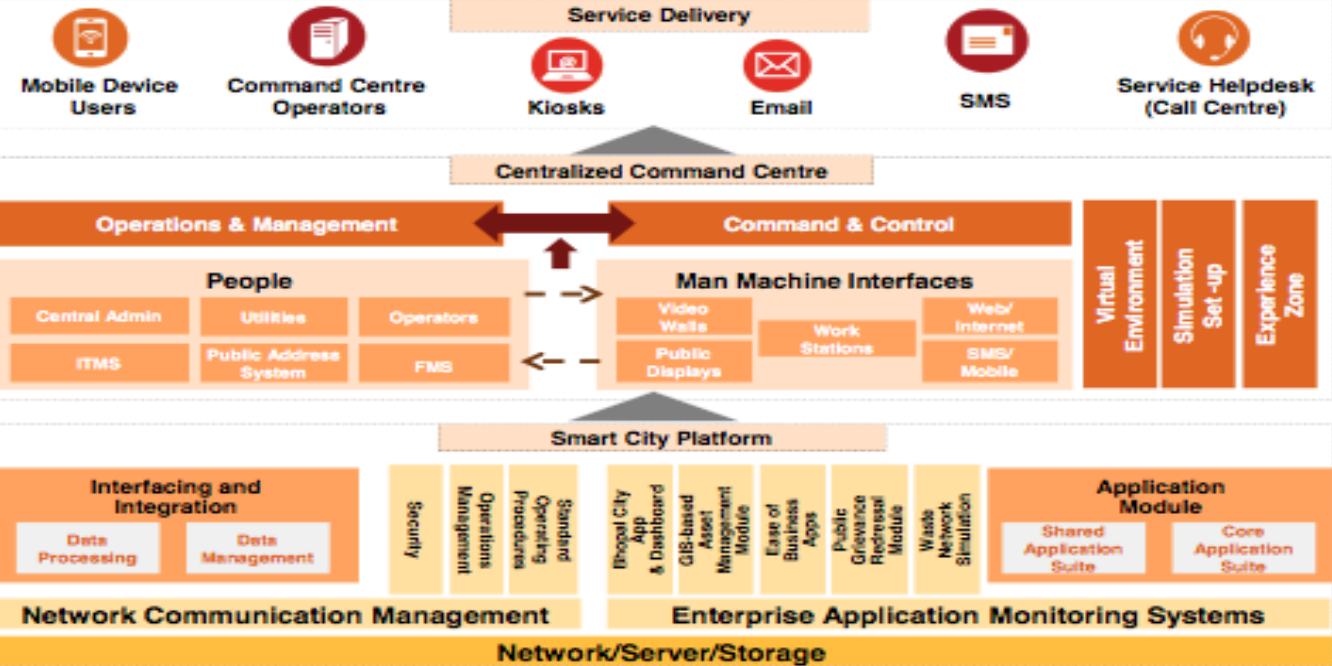

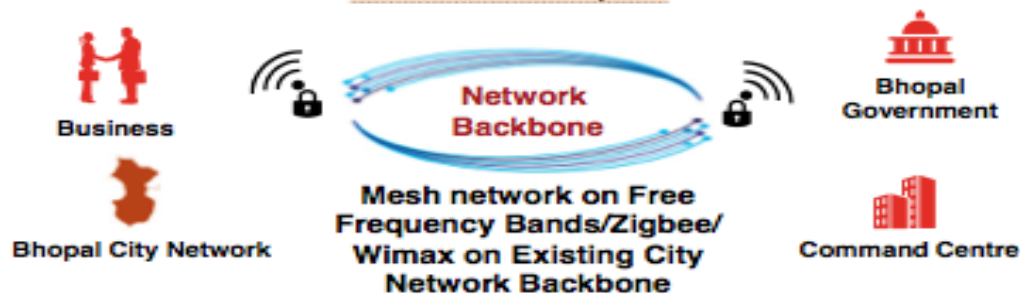

- Intelligent street light
- Remote scheduling and monitoring
- Zero Call drop Solution
- Interactive Digital Signage for traffic & business
- Ready Plug & Play Infrastructure
- Surveillance cameras
- SOS terminals
- Wi-Fi hotspots
- Environment sensors - Noise, air, radiation levels etc.
- Water level sensors
- Street parking sensors
- Smart Phone Detection
- Intelligent Shopping Apps

Sensing Layer

Communication Layer

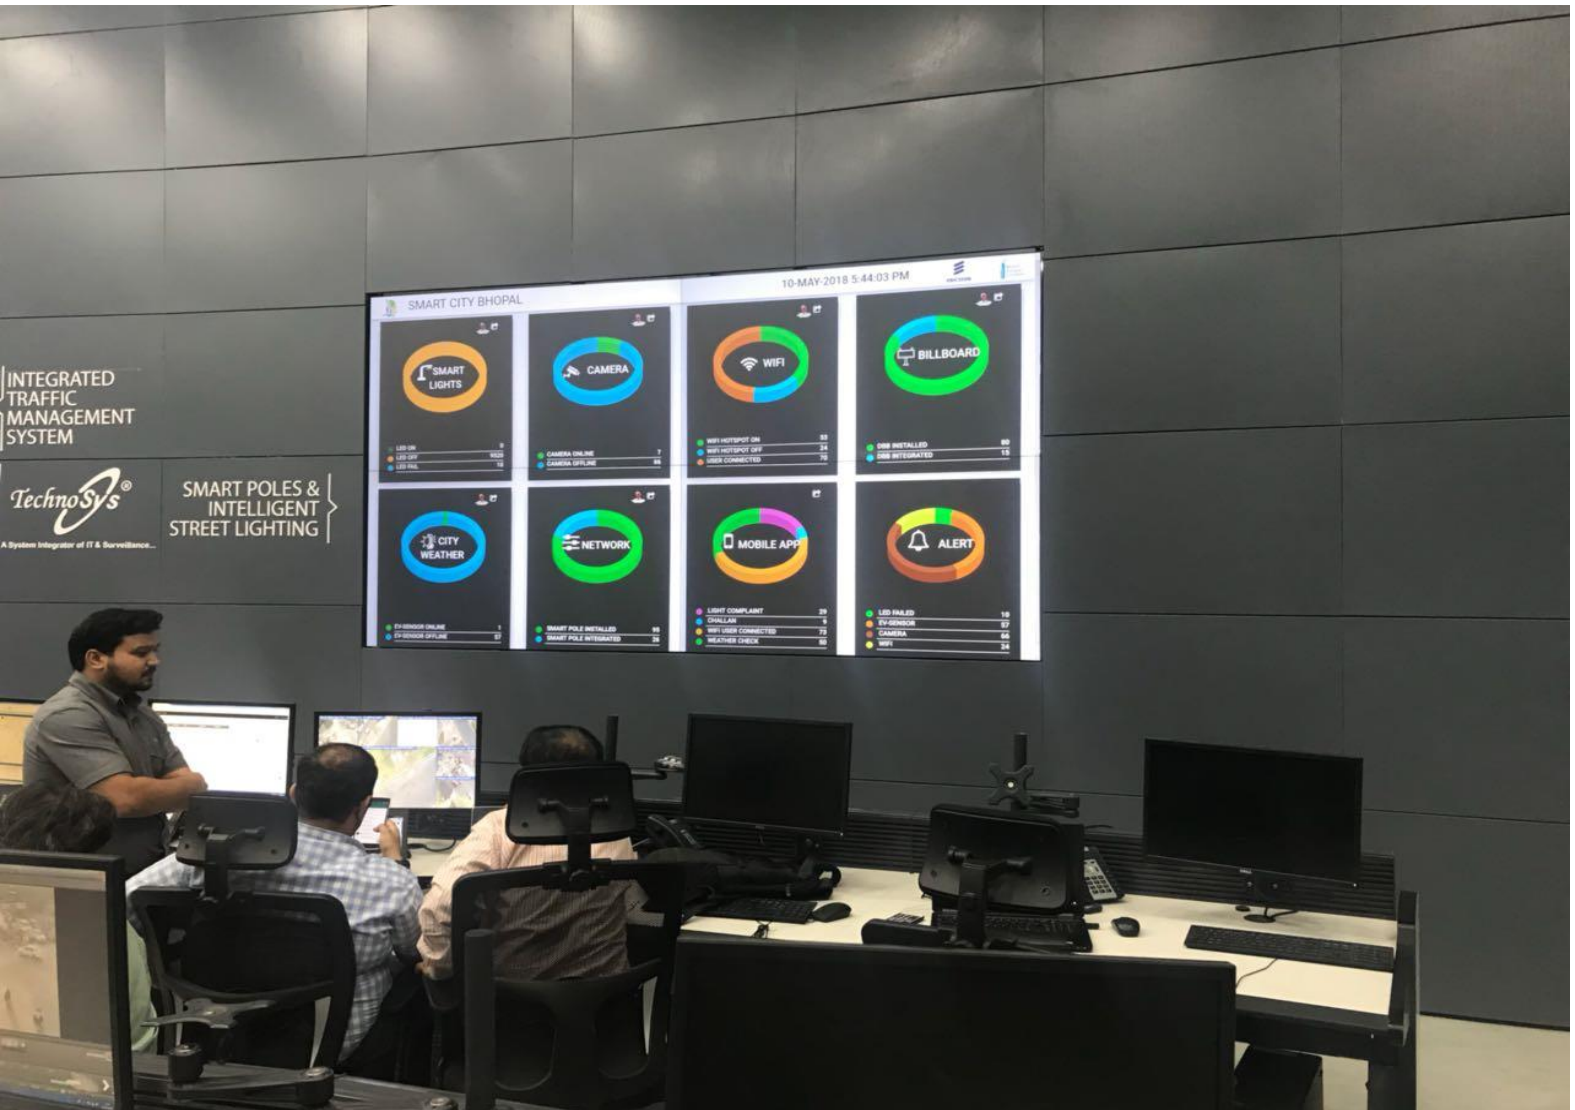

Smart Pole Command Control Center was inaugurated on 8th May 2018

SMART POLES

- Investment - 690 crs
- Zero Investment from City
- Revenue - Rs 47 cr.

PPP PROJECT

Smart Poles	400
Intelligent LED lights	20000
Surveillance camera	400

and Unified Governance**

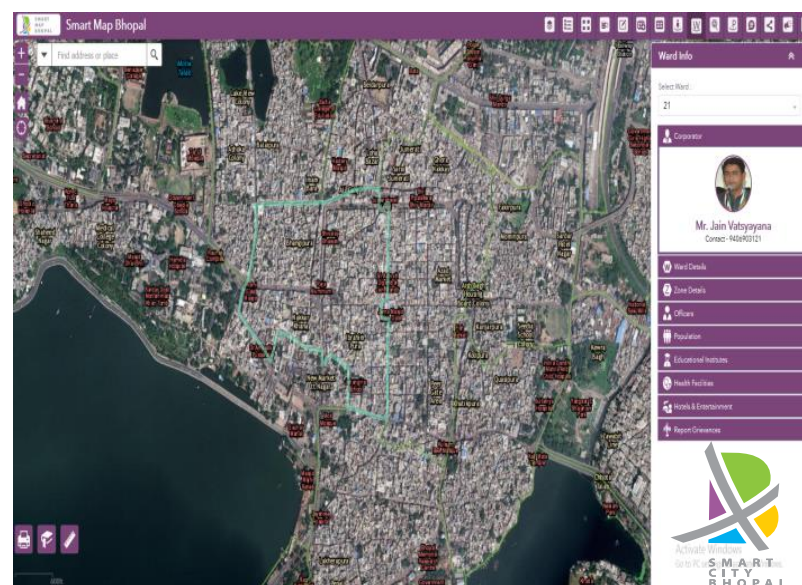

BHOPAL SMART MAP

99 layers of city GIS Platform cutting across departments.

SMART CITY BHOHAL

- * Search and locate facilities
- * Know your property details
- * Near Me Service
- * Location based feedback/ suggestions
- * Public participation on adding city events
- * Getting your ward level information]
- * Know your city heritage – story map

BHOPAL SMART CITY MOBILITY SOLUTIONS

a INTELLIGENT TRANSPORT SYSTEM (PIS/PAS/REAL TIME MONITORING)

Buses equipped with GPS based AVLS connected with Central Control and Command Centre. A 16 ft x 6 ft Video Wall comprising of 8 Nos. of High Resolution LED Panels tracks and monitors the movement in real time. Additionally, the Bus Stops are connected with Command Centre reflecting Expected Time of Arrival (ETA) on Passenger Information System (PIS)

All the buses are equipped with 4 Nos. of PIS in buses and passenger announcement system. Destination and next bus stop information, Public messages and announcement.

b AUTOMATIC FARE COLLECTION

Automatic Fare Collection System installed at the bus stops to automate the integrated ticketing system

BUS PRIORITY SYSTEM

Installed at the intersection to improve service, enhance safety and reduce delays

c INTELLIGENT STREET POLES

- Wi-Fi zoning through Wifi Hot Spots
- Safety of citizens
- Energy efficient Solar based LED Street lighting
- Environmental Sensors for quality, temperature, humidity
- Electronic Vehicle charging points

d E-RICKSHAW (LAST MILE CONNECTIVITY)

E-rickshaws with docking station facilities provides last mile connectivity in environmentally sustainable and cost effective manner.

e PUBLIC BICYCLE SHARING

500 Light weight modern Cycles at 50 fully Automated Bicycles in first phase The Cycle sharing system will also be integrated with the fare collection through the

f DEDICATED CYCLE LANE

Providing a safe and welcoming cycling environment with proper markings and biking surface

AUTOMATIC FARE COLLECTION & INTELLIGENT TRANSPORT SYSTEM

Flap Barriers

ATVM

- ATVM for Tickets and Smart Card recharge
- Flap barriers / gates for Commuter entry and exit

Barricade Sensor Gate

Sensors based bus stop

Different types of Smart Cards for types of Commuters

- All buses are equipped with GPS based Automatic Vehicle Location System (AVLS) connected with Central Control and Command Center for real time monitoring of bus operations.
- “Spot My Bus” service for citizens powered by Chalo app

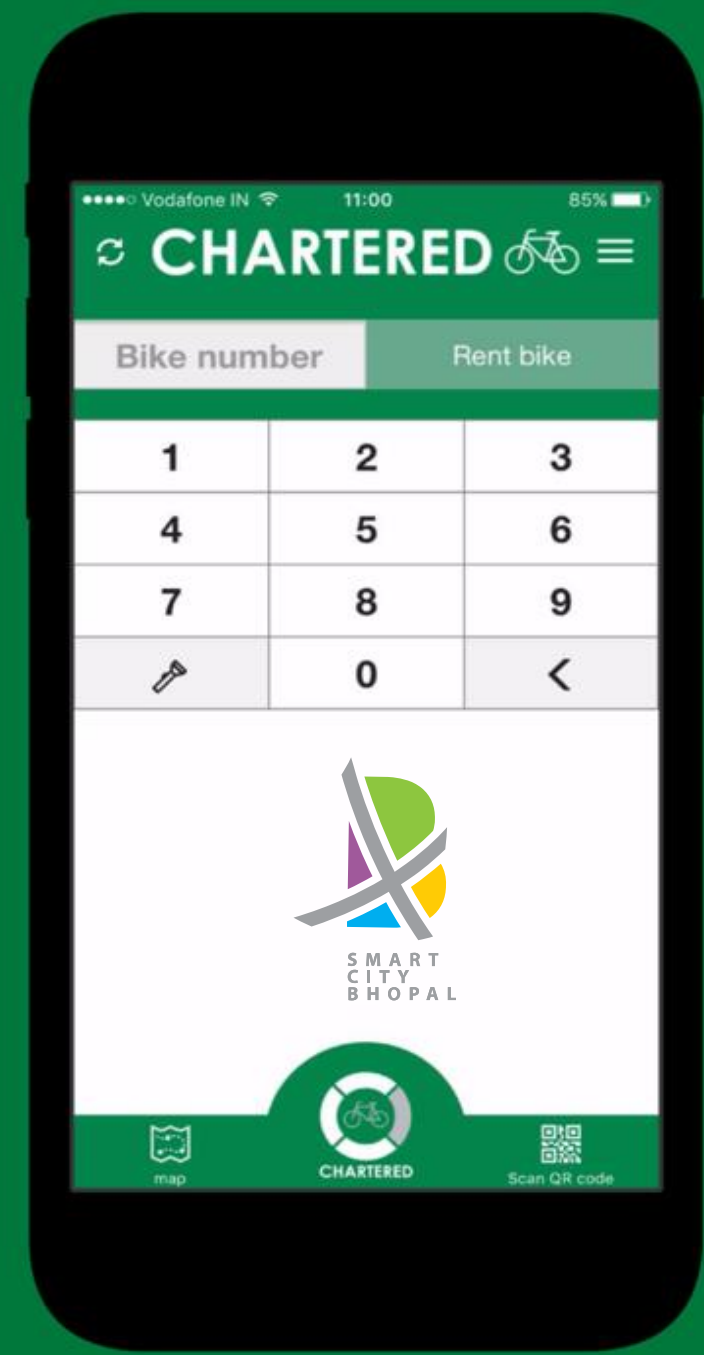

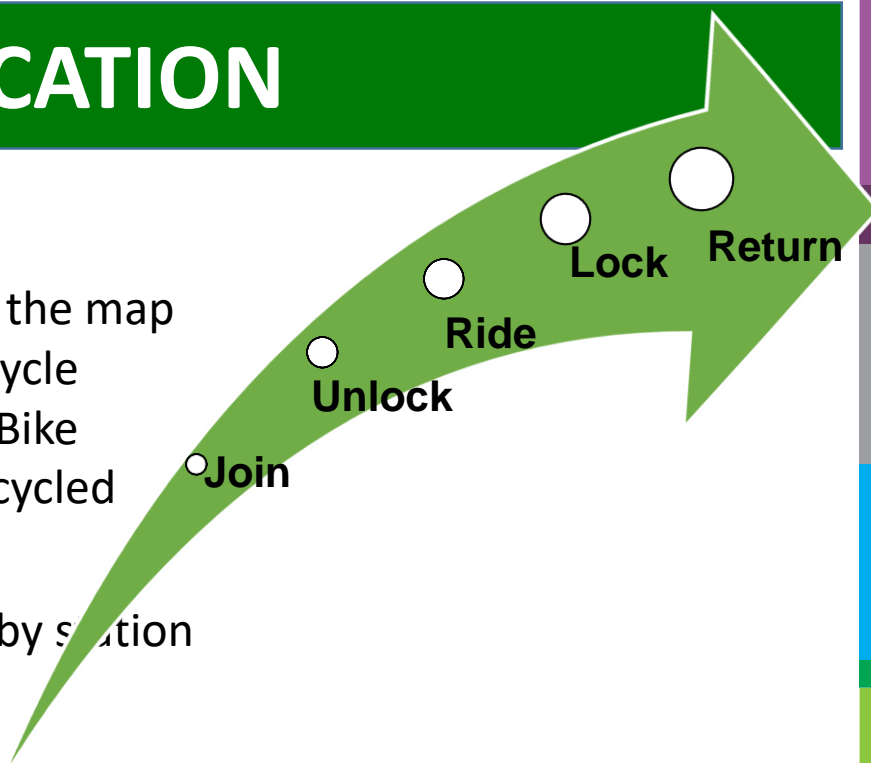

PUBLIC BICYCLE SHARING BHOPAL

- Fully automated
- unmanned
- Central control system
- Redistribution
- Cashless
- 500 Smart cycles
- 50 docking stations
- 24/7 Service Availability
- 32000 registered users

PBS MOBILE APPLICATION

- Easy to use interface
- Look for the nearest bicycle on the map
- Check real time availability of cycle
- Enter Bike Number and Rent a Bike
- Track your calories burnt, kms cycled
- Calculates CO2 emission
- Easy Return on station or near by station

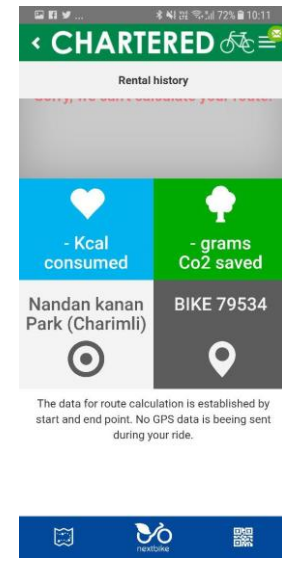

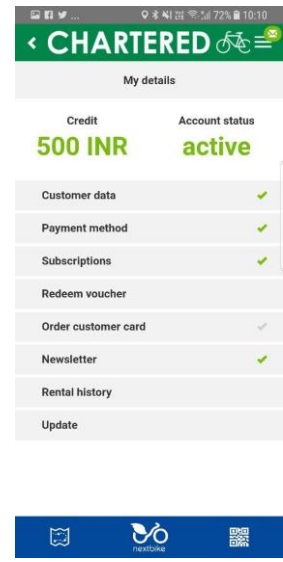

Rental via NFC or App

Rental with Smart Cards

PIN code entry

BICYCLE TRACK

5 METER WIDE
12 KM LONG
INTEGRATING
BRTS AND PUBLIC BIKE SHARE

INTEGRATED TRAFFIC MANAGEMENT SYSTEM

RLVD SYSTEM

- Red light Violation
- Capture license plate of vehicles violating traffic rule
- Traffic signal monitoring and raise alarm if signal doesn't change after assigned time
- Vehicle Stopping On Road
- Vehicle Moving Wrong Way

OVER SPEEDING

- Vehicle Over Speed Detection
- Speed violation detection with evidence
- Separate Speed Limits for 2 & 4 wheelers
- Camera Based System
- Camera+Radar Based System

NO HELMET

- Detection of No Helmet
- No Helmet of driver
- No Helmet of Companion
- Helmet Standard Training

STATISTICS

- Classify 4 wheelers, 2 wheeler, auto rickshaw, heavy vehicles
- Statistical analysis for each class
- Decision Support Tool
- Artificial Intelligence based framework

Others

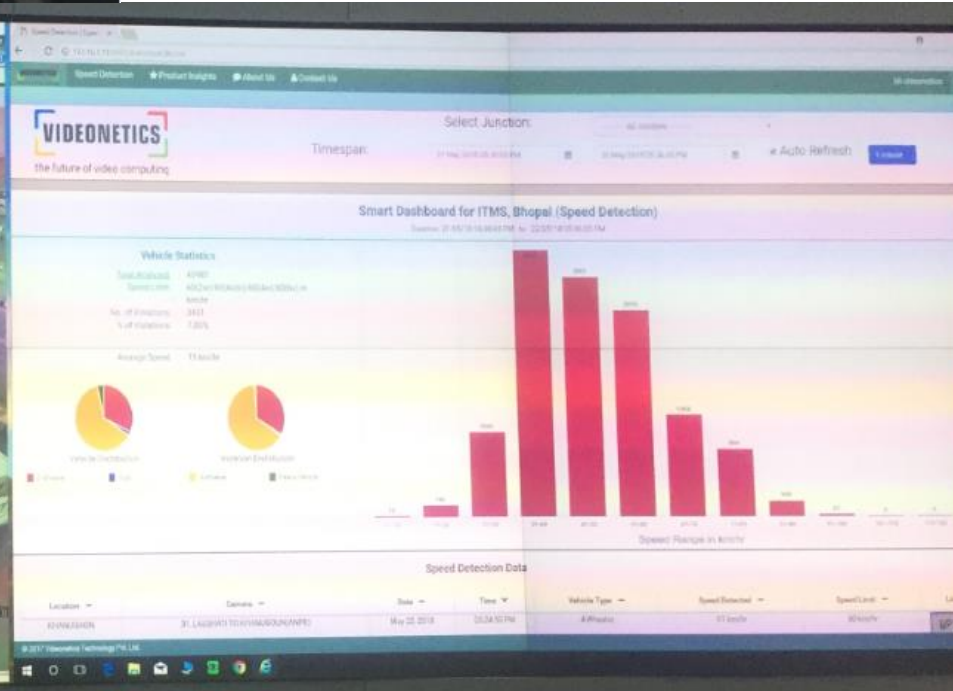

- Identify Automatic Traffic Violations & Generate e-Challans
- Automatically detect stolen vehicles, blacklisted vehicles & vehicles with duplicate numbers
- Automatic detection of traffic accidents, hit & run cases

DIGITAL DOOR NUMBERING SOLUTION FOR BHOPAL CITY

The objective of this project is to provide a Unique Smart Addressing Solution for Urban Properties / Establishments (USASUP) depicting an Alpha Numeric Sequential Smart Address code for each property/establishment within the municipal boundary of Bhopal with the information of main Property Attributes (Geo-coordinates of the access point, road, property area, and the floor)

***Scope of Work will include-** Creation of a digital base map including road network by leveraging the digital base map of GIS-PTIP project for the BMC area with all BMC/Govt. agency roads available within BMC limits using latest Satellite imagery to generate a Unique Smart Addressing Solution for Urban Properties/Dwellings and every property will be affixed with a USASUP plate/sticker.*

The properties shall be affixed with USASUP plate/sticker. There will be a dedicated web portal, mobile app, call center to locate any property, update property details or seek any kind of USASUP related support.

Standardized Sequential Property Address with property details, GPS Location of property access points, QR Code scanning based door to door garbage collection, integration with ICCC & emergency services for easier identification of properties, Single Attendance Metric for any service being provided at any property

Sample DDN - MPBHO-AKN-B12-800

Existing Address-

Paryatan Bhawan, Bhadbhada Road, Opposite NJA, Bhopal - 462 003. Madhya Pradesh, India

BHOPAL WATER UTILITY MANAGEMENT SYSTEM (WATER SCADA)

- ❖ The SCADA (Supervisory Control and Data Acquisition) system is an industrial computer-based control system which gathers and analyse the real-time data to track, monitor and control industrial equipment's across various industries
- ❖ SCADA system have applications in both water distribution network and waste water treatment. In these plants PC based workstation are located in a control room which allow operators to view and perform control actions
- ❖ Real time remote monitoring and control of Water Treatment Plants (12 Nos) upto Elevated Storage Reservoirs (175 Nos) in Bhopal City on the parameter of Flow, Pressure, Energy Consumption and Water Quality
- ❖ Real time assessment of water supply situation for efficient operation and predictive analysis
- ❖ Integrate with SCADA all the project components to operate and control, monitor and measure the same
- ❖ Asset and performance management will help department in minimizing the downtime

SMART EDUCATION FOR BHOPAL, SAGAR & SATNA

Modernizing 10 Municipal/Government Schools of Bhopal

Innovative Education Solutions

- Learning Management System
- Technology based Learning environments

SMART PARKING

SMART SOLUTION INFRASTRUCTURE

Smart Parking

To City municipal corporation /Managements Team/ Clients:

- Enhanced quality of life for the citizen.
- Improvement in their parking experience & satisfaction
- More efficient use of parking and increased revenue
- Reduces illegal parking
- Reduces revenue leakages
- Reduces Man power cost in operation.

Citizens:

- Reduces travel time and traffic congestion
- Easy & Faster to locate a slot, park and exit
- Multiple modes of payments with simple process
- Assured parking with pre booking facility
- Enhanced experience

Scope:

- 64 Parking Spots (Off street & On street)
- 3 Multilevel parking spaces with video surveillance, digital payment, etc.
