William Anthony Baum
1890- 1964

Today's Baumanometer® instruments still function on the immutable law of gravity and are the result of continued development over the years. Cases and housings are precision diecast or extruded metal. Mylar® clad cartridge tubes are fully recessed in metal scales. These calibrated tubes have a wide bore to prevent separation of the mercury column and are held securely in protective metal housings by spring tension. A stainless steel nozzle clip in the mercury reservoir keeps mercury in place during handling and transport.

These are just a few of the hundreds of improvements made since 1916 - many of them hidden from view but all contributing to the production of instruments of unsurpassed accuracy and dependability. Reliable measurement of blood pressure depends, as it always has, on correct technique, correct cuff size and an instrument of known accuracy. We have been providing instruments of known accuracy since 1916.

W.A. Baum Co. Inc.

Stethoscopes

The Baum Sprague Rappaport Type Stethoscope

2700

- Designed to meet a wide variety of auscultatory demands.
- Built to our unique specifications.

FEATURES:

- Chrome plated zinc chestpiece and rotatable chrome plated brass binaural.
- Modular adult and pediatric diaphragms, large, medium and small bell receivers provide an extended range of auscultatory frequencies in one versatile stethoscope.
- Thick walled non-latex tubing leads directly from the chestpiece to each ear to provide improved acoustic separation.
- Includes three types of eartips.
- Tubing color is black and includes a name tag/diaphragm replacement tool.

Packaged Dimensions: 10¼" L x 5¼" W x 1⅓" H **Packaged Weight:** 0.84 lbs.

SPRAGUE RAPPAPORT TYPE STETHOSCOPE ORDERING INFORMATION:

Cat. No.	Length	Tubing Color	Chestpiece
2700	30 inches	Black	Chrome Plated Zinc

The Baum Stainless Steel Dual Head Stethoscope

2720

- Designed for general healthcare applications.
- Built to our unique specifications.
- Offers outstanding acoustics.

FEATURES:

- Precision machined stainless steel dual head chestpiece, valve stem and binaural.
- A dual binaural spring is incorporated inside the tubing to reduce bulk and weight.
- Non-chill rings are fitted to the diaphragm and the bell receivers for added patient comfort.
- Soft eartips ensure a comfortable, correct fit.
- Single lumen black non-latex tubing.
- Extra eartips and a replacement diaphragm are included.

Packaged Dimensions: 10¼" L x 5¼" W x 1⅓" H **Packaged Weight:** 0.58 lbs.

DUAL HEAD STETHOSCOPE ORDERING INFORMATION:

Cat. No.	Length	Tubing Color	Chestpiece
2720	31 inches	Black	Stainless Steel

The Baum Stainless Steel Cardiology Stethoscope

2730

- Designed for cardiology.
- Built to our unique specifications.
- Delivers superior acoustic sensitivity.

FEATURES:

- Precision machined stainless steel dual head chestpiece, valve stem and binaural.
- A dual binaural spring is incorporated inside the tubing to reduce bulk and weight.
- Non-chill rings are fitted to the diaphragm and deep cone shaped bell receivers for patient comfort.
- Soft eartips ensure a comfortable, correct fit.
- Two separate channels in one piece of black non-latex tubing.
- Extra eartips and a replacement diaphragm are included.

Packaged Dimensions: 11¾" L x 6⅓" W x 1½" H **Packaged Weight:** 0.78 lbs.

CARDIOLOGY STETHOSCOPE ORDERING INFORMATION:

Cat. No.	Length	Tubing Color	Chestpiece
2730	27 inches	Black	Stainless Steel

Portable Instruments

Baumanometer® Desk Model

0320

FEATURES:

- 300 mmHg clinical sphygmomanometer for portable use.
- Meets the American National Standard ANSI/AAMI SP-10 for accuracy and performance.
- Available with Latex or **Non-Latex** components.
- Diecast case and cover made of lightweight aluminum alloy.
- **Mylar® Clad Calibrated Glass Cartridge Tube.**

ORDERING INFORMATION:

Includes: Calibrated® V-Lok® Inflation System and 25" of Straight Tubing.

Finish: Neutral Gray textured baked enamel

Instrument Dimensions: 13½" L x 4 ¼" W x 2" H

Packaged Dimensions: 15" L x 4½" W x 2¼" H

Cuff Color: Medium Blue

Instrument Weight: 2.69 lbs.

Packaged Weight: 3.10 lbs.

MYLAR® CLAD CALIBRATED GLASS CARTRIDGE TUBE

Safe: Several layers of clear Mylar® film have been applied to strengthen the tube and maintain its structural integrity even if the glass is broken.

Baum Desk Aneroid

FEATURES:

- Easy to read
- Convenient desk-top design
- Medical grade clinical manometer for precise blood pressure measurements
- Complies with ANSI/AAMI SP-10 for accuracy and performance (1% full scale + / - 3 mmHg)

ORDERING INFORMATION:

Includes: Calibrated® V-Lok® Inflation System, 25" of Straight Tubing and a Steel Stand.

Steel Stand Finish: Neutral Gray with non-skid base.

Packaged Dimensions: 10⅝" L x 7¼" W x 7½" D

Cuff Color: Medium Blue

Packaged Weight: 3.25 lbs.

Mobile Instruments

Baumanometer® Standby® Model

0250

FEATURES:

- 300 mmHg clinical sphygmomanometer for mobile use. (Calibrated at a 20° angle.)
- Meets the American National Standard ANSI/AAMI SP-10 for accuracy and performance.
- Available with Latex or **Non-Latex** components.
- Diecast aluminum body, diecast zinc oval base.
- Cast iron 4 wheel base w/ 2 1/2" diameter casters
- Integral cuff storage compartment.
- **Mylar® Clad** Calibrated Glass Cartridge Tube.

ORDERING INFORMATION:

Includes: Calibrated® V-Lok® Inflation System, 8 feet of Extendex® Tubing, Cast Iron 4 Wheel Base

Finish: Neutral Gray textured baked enamel

Packaged Dimensions: 28" L x 22" W x 5" H

MYLAR® CLAD CALIBRATED GLASS CARTRIDGE TUBE

Safe: Several layers of clear Mylar® film have been applied to strengthen the tube and maintain its structural integrity even if the glass is broken.

Effective: Large bore tube (5 mm) prevents separation of mercury and is 25% larger than required by Federal specifications.

Durable: Cartridge tube end faces are flame-glazed to prevent chipping; ceramic graduation marks are fused to the glass for permanence. The entire tube is carefully annealed to eliminate both longitudinal and ring strain.

Guaranteed: Free replacement of the cartridge tube if it is ever broken.

CALIBRATED® V-LOK® INFLATION SYSTEM

Accurate: The Calibrated® V-Lok® system clearly indicates whether or not the correct size cuff is being used. The center of the bladder is clearly marked on the inner and outer surfaces of the cuff for correct application on either the right or left limb.

Comfortable: Cuffs conform to the shape of the limb and have no hard, stiff edges.

Durable: Baum cuffs are made of tightly woven, heat set Dacron™ polyester fabric. They are double stitched at critical points for long wear and treated with an effective anti-microbial agent.

Non-Latex: Available for those who are hypersensitive to natural rubber latex.

Guaranteed: Latex and **Non-Latex** inflation bags, bulbs and tubing are guaranteed for five years.

Baum Roll-By® Mobile Aneroid

FEATURES:

- 300 mmHg clinical sphygmomanometer for mobile use.
- Meets the American National Standard ANSI/AAMI SP-10 for accuracy and performance.
- Available with Latex or **Non-Latex** components.
- Unique, low reflection, high contrast scale and red pointer to increase visibility and reduce parallax error.
- Diecast aluminum 5-wheel base (20" dia.) with 2" hooded casters and 2 lb. cast iron weight for increased stability.
- Manometer housing is mounted at a 20° angle for ease of viewing.
- Heavy gauge machined aluminum tubing.

ORDERING INFORMATION:

Includes: Calibrated® V-Lok® Inflation System, 8 feet of Extendex® Tubing, 5 Wheel Base and Large Circular Basket

Finish: Neutral White ABS plastic

Packaged Dimensions: 22" L x 21 1/2" W x 15 1/2" H

Wall Mounted Instruments

Baumanometer® Wall Unit 33

0850

FEATURES:

- 300 mmHg swivel-type (110° arc) clinical sphygmomanometer for wall mounting.
- Meets the American National Standard ANSI/AAMI SP-10 for accuracy and performance.
- Available with Latex or **Non-Latex** components.
- Extruded aluminum alloy manometer housing with diecast zinc top and base.
- 3 convenient cuff storage options available: large basket, small basket or stainless steel wall clip.
- **Mylar® Clad Calibrated Glass Cartridge Tube.**

ORDERING INFORMATION:

Baum Complete Inflation Systems

Baum Calibrated® V-Lok® Inflation System

Accurate: The Calibrated® V-Lok® system clearly indicates whether or not the correct size cuff is being used. The center of the bladder is clearly marked on the inner and outer surfaces of the cuff for correct application on either the right or left limb.

Comfortable: Cuffs conform to the shape of the limb and have no hard, stiff edges.

Durable: Baum cuffs are made of tightly woven, heat set Dacron™ polyester fabric. They are double stitched at critical points for long wear and treated with an effective anti-microbial agent.

Non-Latex: Available for those who are hypersensitive to natural rubber latex.

Guaranteed: Latex and Non-Latex inflation bags, bulbs and tubing are guaranteed for five years.

1830

The Baum Bariatric Inflation System

The Baum Bariatric Inflation System is curved, easy to apply and conforms naturally to a conical limb.

The result is correct application of the cuff and even compression of the artery.

Comprises a custom-made, curved Dacron® Polyester Cuff, natural rubber Latex or Non-Latex Inflation Bag,

Large size Latex or Non-Latex Bulb and Baum Air-Flo® Control Valve.

1800	1800NL	Hospital Set	Adult, Child/Small Adult, Infant, Newborn, Large Arm & Thigh
1801	1801NL	Clinical Set	Infant, Child/Small Adult, Large Arm
1803	1803NL	Pediatric Set	Newborn, Infant, Child/Small Adult

Note: Custom Sets can be made up for individual requirements. Order as Cat. No. 1805 or 1805NL specifying desired Inflation System Sizes.

Baum Inflation System Components

Baum Bulb and Air-Flo® Control Valve

This pressure source for all sphygmomanometers consists of the Baum Latex or **Non-Latex** Bulb and Air-Flo® Control Valve.

1890

The Baum Air-Flo® Control Valve

- Instantly responsive.
- Smooth operating and long wearing.
- Conical valve seat is integral with the valve body, it cannot loosen and cause leakage.
- Valve body is solid brass, first nickel then chrome plated.
- All key interior parts are stainless steel for corrosion-free, non-stick operation.

These are just some of the features which make the Baum Air-Flo® Control Valve the standard by which others are judged.

Baum Inflation System Components

Calibrated® V-Lok® Cuff

Accurate: The Calibrated® V-Lok® system clearly indicates whether or not the correct size cuff is being used. The center of the bladder is clearly marked on the inner and outer surfaces of the cuff for correct application on either the right or left limb. Hook and loop fasteners are used to provide the optimal number of open-close cycles.

Comfortable: Cuffs conform to the shape of the limb and have no hard, stiff edges.

Durable: Baum cuffs are made of tightly woven, heat set Dacron™ polyester fabric. They are double stitched at critical points for long wear and treated with an effective anti-microbial agent.

Non-Latex: Available for those who are hypersensitive to natural rubber latex.

Guaranteed: Latex and **Non-Latex** inflation bags, bulbs and tubing are guaranteed for five years.

Cuff sizes are made to fit dimensions of corresponding size inflation bags for limb circumference shown.

Cuff Color Options

Note: All Latex items are natural rubber Latex.

Baum Aneroid Inflation Systems/Components

Aneroid Calibrated® V-Lok® Inflation System

The Aneroid Calibrated® V-Lok® Inflation System consists of a Latex or **Non-Latex** bulb, Air-Flo® control valve, Latex or **Non-Latex** bag and Calibrated® V-Lok® Cuff.

Accurate: The Calibrated® V-Lok® system clearly indicates whether or not the correct size cuff is being used. The center of the bladder is clearly marked on the inner and outer surfaces of the cuff for correct application on either the right or left limb. Hook and loop fasteners are used to provide the optimal number of open-close cycles.

Comfortable: Cuffs conform to the shape of the limb and have no hard, stiff edges.

Durable: Baum cuffs are made of tightly woven, heat set Dacron™ polyester fabric. They are double stitched at critical points for long wear and treated with an effective anti-microbial agent.

Non-Latex: Available for those who are hypersensitive to natural rubber latex.

Guaranteed: Latex and **Non-Latex** inflation bags, bulbs and tubing are guaranteed for five years.

Aneroid cuffs available only in Medium Blue Dacron®. Cuff sizes are made to fit dimensions of corresponding size inflation bags for limb circumference shown. No connectors are included.

Note: All Latex items are natural rubber Latex.

2910	2910NL Extendex® tubing, with connector

Testing for Accuracy

TESTING INSTRUMENT ACCURACY

Your goal is to test instrument accuracy, not the process of blood pressure measurement. You will need a Baumanometer® instrument (mercury-gravity standard) and a "Y" connector with an inflation bulb and valve attached (see below for Test Kit ordering information). Connect one leg to the Baumanometer® instrument and the other to the blood pressure instrument to be tested.

Note: Cuffs and Bags are not used when conducting this test.

The Pressure Standard

A Baumanometer® instrument is functioning correctly and should be used as the pressure standard if:

1. The mercury meniscus is at zero with no pressure applied to the instrument.
2. The instrument is in a vertical position. **Note:** The Standby model is calibrated at a 20° angle
3. The instrument responds promptly to pressure changes.

Any two Baumanometer® instruments, regardless of age, will provide accurate linear pressure readings at every pressure level if they meet the stated criteria for a correctly functioning manometer.

Test Procedure

Check each instrument to be sure that it is at zero. Slowly inflate the instruments to 250 mmHg and compare the readings. They should be the same, however a deviation of +/- 3 mmHg is acceptable. Repeat this procedure at 200 mmHg, 150 mmHg, 100 mmHg, 50 mmHg and 0 mmHg. If the deviation is greater than +/- 3 mmHg at any of these points, the instrument being tested is inaccurate and needs adjustment or repair.

Diagram of a Wall Unit 33 connected to an aneroid with a "Y" Connector.
See below for Test Kit ordering information.

NOTES ON ANEROID DEVICES

"Remember, the mere fact that the needle points to zero on the dial of the aneroid manometer when the compression cuff is deflated does not necessarily mean that the instrument is accurate over the entire pressure range."

Primer Of Clinical Blood Pressure Measurement by George E. Burch, M.D. and Nicholas P. DePasquale, M.D.

"The readings on the dial at different pressures should check with those of a properly constructed and perfectly functioning mercury manometer. The fact that the pointer indicates zero may be no guarantee of accuracy over the whole pressure range."

American Heart Association, Recommendations for Human Blood Pressure Determinations by Sphygmomanometers.

Test Kit

Calibration "Y" connector (To use your Baumanometer® instrument as a standard for pressure measurement).

ORDERING INFORMATION:

Cat. No.	Non-Latex	Description
2940	2940NL	Calibration "Y" connector with 1 ft. #2911 or #2911NL tubing on each leg
2941	2941NL	Calibration "Y" connector with 1 ft. #2911 or #2911NL tubing on each leg with #1890 or #1890NL Bulb and Air-Flo® Control Valve

Note: When used with a "Y" connector, any Baumanometer® instrument can be used to check the accuracy of any other blood pressure device.

Lever Lock Insertion Instructions

PURPOSE

To prevent tampering with the cartridge tube release lever and accidental release of mercury.

PROCEDURE

Push lever 'A' forward (toward the chrome plated cap 'B') and insert lever lock 'C' as shown in diagram.

NOTE: Additional lever locks are available free of charge.

Guarantees

Baumanometer® Instruments

Every Baumanometer® instrument is a precisely calibrated true gravity manometer. It is guaranteed to be and remain scientifically accurate. The entire apparatus is guaranteed against defects in workmanship and material for a period of one year from date of purchase. This guarantee is invalid when other than genuine Baumanometer® parts are used.

Baum Aneroid Instruments

Every Baum Aneroid instrument is guaranteed against defects in workmanship and material for a period of one year from date of purchase. This guarantee is invalid when other than genuine W.A. Baum parts are used.

We recommend that every aneroid instrument be checked for accuracy periodically by following our "Testing Instrument Accuracy" procedure to determine if it needs adjustment. Adjustments will be made to Baum Aneroid instruments without charge when returned, postage prepaid, unless the instrument has been damaged in shipment, tampered with or abused.

Baum Stethoscopes

Baum Stethoscopes are guaranteed against defects in workmanship and material for a period of five years from date of purchase. During the guarantee period, stethoscope repair or replacement will be made without charge when returned, postage prepaid, unless it has been damaged in shipment, tampered with or abused.

Mylar® Clad Calibrated Cartridge Tube

We guarantee the free replacement of the Calibrated Cartridge Tube if it is ever broken.

Bags, Bulbs & Tubing

Latex and **Non-Latex** inflation bags, bulbs and tubing are guaranteed for five years.
