

# MONTHLY NEWSLETTER OF THE BLUE MOUNTAINS UFO RESEARCH CLUB.

Vol. 4 Issue No 12

**DECEMBER, 2013.**

## **INSIDE:**

**LLOYD PYE**

**UFO REPORTS GLEANED FROM THE INTERNET.**

**Blue Mountains UFO Research Club News.** *Our meetings are held on the third Saturday of the month, at the Gilroy residence, 12 Kamillaroi Road, South Katoomba, from 1pm onwards.*

We are situated on the corner of Kamillaroi Road and Ficus Street, and as we always say, park in Ficus Street where there is safer parking.

**PLEASE NO SMOKING ON THE PREMISES.**

**ALSO, NO LARGE BAGS IN THE CINEMA OR THE HOUSE.**

**PLEASE NOTE.** Please contact us prior to bringing along any new friends interested in UFOlogy and the mysteries generally. Anyone with any personal experiences involving UFOs or the ‘unexplained’ are invited to share them with us all.

Contact Information: Phone: 02 4782 3441, Email: [randhgilroy44@bigpond.com](mailto:randhgilroy44@bigpond.com) [or catch our website on [rexgilroy.com](http://rexgilroy.com) or [mysterioustralia.com](http://mysterioustralia.com)]. Also see us at ‘Rex and Heather Gilroys Blue Mountains UFO Research Club’ on Facebook.

**A plate of food to share for afternoon tea is appreciated.**

## **PROGRAM FOR 21<sup>ST</sup> DECEMBER.** [This is our Christmas get-together].

- This month the meeting begins at 1pm with a get-together in the house. If the weather is good we will conduct a ‘round table’ discussion in the backyard on UFO matters.
- As usual anyone who has seen a UFO lately or has similar information to share, please do so as we all want to hear about it. At previous meetings these discussions proved quite popular, this is now a regular part of the program.
- In the cinema there will be a special presentation of a DVD documentary on Underground Bases which although American says just about everything that the Gilroys have been saying for years on the Australian underground complexes, especially that beneath Burratorang Valley. This documentary is a ‘must’.
- For those able to remain after the meeting, once darkness falls and provided the weather remains good there will be a Skywatch down on Kings Tableland Road at a clifftop which provides an excellent view of the Jamieson, Kedumba and Burratorang Valleys and where the Gilroys recently saw UFO activity in the Burratorang. Don’t forget - **warm clothing** is a **MUST** as it can still get quite **cool** at night] and bring a torch and binoculars. No BBQ is planned out there at this stage as the weather and the bush is too dry.
- Also for those who stay later, there will be a film show of science fiction ‘oldies’.
- We look forward to seeing everyone on Saturday 21<sup>st</sup> December, 2013.

### **A MERRY CHRISTMAS AND A HAPPY NEW YEAR TO ALL!**

- If any member has information or an article to place in either “Mysterious Australia” or “The Blue Mountains UFO Research Club” newsletters please feel free to forward it to us by the second Saturday of the month. [OR if anyone has material/DVD or a report to present at our meetings please bring it along as you are welcome to present it].
- Also our guest speaker program has been a welcome addition to our meetings and we are already planning more for 2014. Meanwhile we have received enquiries from prospective new members. 2014 looks like being a big year for the Club!

**To assist with the costs involved in producing the newsletters a gold coin donation is requested.**

## VALE.

**IT IS WITH SADNESS THAT WE HAVE LEARNT OF THE PASSING OF LLOYD PYE ON 9<sup>TH</sup> DECEMBER. LLOYD WAS A NOTED AMERICAN RESEARCHER AND AUTHOR WHO HAD SPENT MORE THAN 30 YEARS INVESTIGATING ALL ASPECTS OF EVOLUTION, WHICH CONVINCED HIM THAT HUMANS DID NOT EVOLVE ON EARTH, OR AT LEAST WERE THE PRODUCT OF EXTRA-TERRESTRIAL INTERVENTION.**

Lloyd was diagnosed on July 17<sup>th</sup> with "aggressive B-cell lymphoma". Following a stint at the Klinik Marinus in Brannenburg, Germany for three weeks of intensive therapy, followed by several weeks back in London doing "aftercare" treatments the general feeling was that the outcome was positive. However, the tumour rebounded and on Dec 9<sup>th</sup> 2013 Lloyd Pye passed away. His work on the

Starchild project is continuing as he had passed over the reins to a team which will continue the work that Lloyd has begun.

He was the author of "Everything You Know is Wrong". In February 1999 a couple in west Texas contacted him about a peculiar artefact they owned. It was a genuine bone skull that weighted half as much as a normal human skull and looked nothing like one. it dated 900 years old and has become known as the Star Child skull.

Heather and I were supposed to meet Lloyd at a UFO Conference organised by UFORNSW and UFOESA, at Lidcombe Catholic Club on Saturday 2<sup>nd</sup> October, 2004. A few days prior to this event, while on archaeological research on the NSW far south coast at Dalmeny near Narooma as we were about to drive home, I suffered a heart attack which saw me put in Moruya and later Canberra Hospitals for a few days.

This meant that I would miss the conference. Heather notified organiser Peter Khoury who informed the gathering.

**Lloyd Pye with Rex Gilroy in 2004.**

Lloyd Pye, who had heard of my ground-breaking researches in America and who had corresponded with me, wanted to meet me, so just after I was discharged from hospital and arrived home, Peter Khoury kindly drove Lloyd [and also Russian Dr. Valery Uvarov, who had spoken on Russian UFO material released by his government] up to our home at Katoomba to meet me.

**Dr Valery Uvarov**

Lloyd had wanted to see some of my fossil hominin skull collection, but was taken back somewhat by the fact that they were so old they had become mineralised. Having forgotten my heart attack I

gave Lloyd Pye a lecture of my own on Australian mineralisation processes which turn bone to stone, and by the time everyone had to return to Sydney I had convinced him that modern humans had evolved in Australia from Homo erectus long before this event occurred in Africa!

Lloyd and Valery were also intensely interested in our work on the vast 'top secret' American/Australian underground advanced space travel research base beneath the Burratorang Valley which extends over a vast area beneath the Blue mountains.

Both these great UFOlogists recognised us as Australia's leading husband and wife researchers in the field of UFOlogy among our other researches. This was indeed gratifying for us, and myself in particular, having spent a lifetime of dedicated field investigations, in the course of which I have gathered my massive natural science collection. Lloyd and Valery both said that the Gilroys are known overseas as foremost Australian UFO authorities.

We treasure photos taken with Lloyd and Valery in our backyard and the three large laminated colour ads for the conference with their autographs, and of course they got ours!

Farewell Lloyd as you are 'beamed up' to other worlds in an eternal universe beyond our dimension!

-0-

## **SOME UFO REPORTS GLEANED FROM THE INTERNET.**

*NB. These reports are presented for your perusal, information and enjoyment and whilst all care is taken with their presentation no responsibility for their authenticity is taken by the editor. Please exercise your own judgement.*

**These following reports have been used with the kind permission of –  
Filer's Files**

*George A. Filer III New Jersey State Director*

*MUFON Eastern Region Director*

**[www.nationalUFOcenter.com](http://www.nationalUFOcenter.com)**

**FROM FILERS FILES.** #49 – 2013 - December 4<sup>th</sup>; #50 – 2013 - December 11<sup>th</sup>, 2013; #51 – 2013 - December 18<sup>th</sup> 2013.

There are many theories as to what 'UFOs' are and where they come from. The theories include, but are not limited to, Misidentification (including aircraft, Mars and Venus); Extraterrestrial Craft; Beings from Other Dimensions; The Hollow Earth; Underground Bases; Natural Phenomena including Ball Lightning, Earth Lights and Lenticular Clouds; Psychological Effects; Earth Effects; Time Travel; UFO/Fire Balloons (Chinese/sky lanterns); and Hoaxes.

## **Worldwide Trouble Brewing**

The news in the US is controlled by six companies that choose to limit your knowledge of world events and often provide information favorable to them and often harmful to you. A series of unfavorable situations that should be revealed are occurring. There is strong evidence our weather is being manipulated or GeoEngineered. Weather modification is

resulting in the extreme conditions that we are witnessing with unusual early cold and snow in December and the worst drought in 50 years. It appears to be designed to physically harm the US, Canada and Western European Nations.

Jet streams are fast flowing, narrow air currents on Earth that are westerly winds (flowing west to east). Jet streams are caused by a combination of a planet's rotation on its axis and atmospheric heating by solar radiation. They form near boundaries of adjacent air masses with significant differences in temperature.

Meteorologists use the location of some of the jet streams as an aid in weather forecasting. The main commercial relevance of the jet streams is in air travel, as flight time can be dramatically affected by either flying with the flow or against the flow of a jet stream.

The HAARP ionosphere heater installations around the globe appear to be routinely manipulating the jet stream. Dr. Nick Begich writes, *“AARP will zap the upper atmosphere with a focused and steerable electromagnetic beam. It is an advanced model of an “ionospheric heater.” The ionosphere is the electrically-charged sphere surrounding Earth's upper atmosphere. It ranges between 40 to 60 miles above the surface of the Earth.*

*Put simply, the apparatus for HAARP is a reversal of a radio telescope; antenna send out signals instead of receiving. HAARP is the test run for a super-powerful radiowave-beaming technology that lifts areas of the ionosphere by focusing a beam and heating those areas.*

*“Weather modification is possible by, for example, altering upper atmosphere wind patterns by constructing one or more plumes of atmospheric particles which will act as a lens or focusing device.” From Angels Don't Play this HAARP: <http://haarp.net/>*

The US has a HAARP site in Alaska but it is doubtful it alone is effective or motivated to harm the US. The jet stream was involved in hundreds of severe tornados and flooding in the US this year.

Jet stream analysis maps attempt to highlight the location and strength of the jet streams. This map shows the pattern of winds in blue in the upper troposphere, on the 300 millibar pressure surface which corresponds roughly to an altitude of around 32,000 feet where I generally flew for some 5,000 hours and often used it to gain speed of my aircraft on about a 100 mph.

Russia has more HAARP ionosphere heater installations than any other country and could be manipulating the jet stream that flows around the world. Pushing the jet stream near Moscow, Central Russia and the Kamchatka Peninsula could cause the jet stream to undulate north to Alaska and pick up the cold air and bring it south into the US.

China has admitted to causing it to snow in various places in its country. Much of the Eastern US was hit by 10 to 12 inches of wet snow and temperatures 20 to 30 degrees below normal. The UK is having the worst coastal tidal surge in over 60 years.

There is a mountain of data including already conducted experiments, satellite imagery, lab tests of snow, observations on the ground, and multiple existing patents, all of which point solidly to the conclusion that snow storms are being engineered with well-established weather modification processes. Heavy tornados recorded in the last couple years are also affected by the jet streams.

## **Weather Modification**

Two known patents for the process of “artificial ice nucleation for weather modification” exist. The Chinese government has openly admitted they are creating “artificial snow storms” but later backtracked after causing a billion dollars of damage to Beijing. If the Chinese government can routinely create snow storms out of what should have been a rain event, how much more advanced must our government be at this same process?

## **Radioactive Debris the Size of Texas Impacting West Coast**

Initial Fukushima radiation release is more than 100 times larger than Chernobyl. Another obvious sign is the recent mass migration of radioactive debris the size of Texas moving across the Pacific Ocean and a marine radionuclide plume. BBC News in the U.K. reported last year that literally millions of tons of radioactive debris had begun traveling across the Pacific Ocean, and that some of it had already impacted Hawaii, Alaska, and even the West Coast.

There has also been a series of strange animal deaths recently, including masses of sea lions, salmon and other sea creatures washing up on the shore. Many of the polar bears, seals and walruses observed along the Alaska coastline have also been found to have major fur loss and open sores, both of which are indicative of radiation poisoning.

Then we have the scientific reports that claim radioactive water will continue to impact the U.S. West Coast for many years to come, potentially doubling in strength over the next five or six years. Plankton, bluefin tuna and other sea life collected between Hawaii and California are already testing high for radiation, and these levels are expected to continue increasing.

*“Look at what’s going on now: They’re dumping huge amounts of radioactivity into the ocean — no one expected that in 2011,”* stated Daniel Hirsch, a nuclear policy lecturer at the University of California recently to Global Security Newswire. *“We could have large numbers of cancer from ingestion of fish.”*

## **Congress Holds Hearing on “Aliens”**

*Artist’s Rendition of “Earth-Like” Planet Kepler-69c.*

The House science committee carved out two hours of time on December 4, 2013 to discuss the search for extraterrestrial life. The hearing got Republican-led, scientifically challenged committee to seriously discuss an important field of research — and the funding needed to keep it going. It is not a call for the Obama administration to release the contents of the X-Files, which totally exist. It’s titled “Astrobiology: The Search for Biosignatures in our Solar System and Beyond.” *It features testimony from astrobiologists from NASA, and MIT. The committee is chaired by Rep. Lamar Smith, a Texan who, among other things, is a climate change skeptic: “*

Astrobiology includes the search for earth-like exoplanets beyond our solar system, and the identification of possible biosignatures on other worlds including Mars. It's produced a series of exciting discoveries such as the Kepler spacecraft planet-hunting mission that indicates there are billions of earth-like planets in the Milky Way alone. NASA announced that the Hubble telescope has found water in the atmospheres of five different planets. But the research leading to these discoveries are exactly the sorts of programs that the agency might cut if the sequestration is still around in early 2014. Those cuts would likely kill the still-active Cassini mission to learn about nearby planets.

Rep. Chris Stewart, a Republican, asked the scientists *"Let's assume that we find life? What do we do then? How does that change things with us in the way we view ourselves?"* Rep. Bill Posey, also a Republican, noted, *"You've pretty much indicated life on other planets is inevitable. It's just a matter of time and funding."* Rep. Ralph Hall, the former chair of the committee, said, *"These questions are not customarily seen in Congress because planetary research gets everyone excited."*

**With adequate resources and funding, witness Sara Seager told the committee that scientists could find signs of life beyond earth in a generation. The-Wire** – <http://www.thewire.com/> **Thanks to William Puckett, Director** [Http://www.UFOsnw.com](http://www.UFOsnw.com)\*

## **Australia Video Captured**

**Narrabeen, New South Wales** – On November 19, 2013, there were two high-altitude jets that passed by just before and after the sighting. Following the event there was a single low flying helicopter with an extremely bright spotlight shining around that was likely conducting military training exercises in my town. The soldiers are very present in the town. I believe I witnessed something very similar to last night in Hervey Bay. This sighting was bright and luminous last night. Nor did previous sightings have the orange color to them. Thanks to [www.ufoinfo.com](http://www.ufoinfo.com)

**Melbourne** -- The video shows four lights slowly moving in the same direction at different speeds on December 3, 2013. Then one fades out and two seem to remain still while another that was previously still moves off in a different direction all below the clouds. The video ends before they all fade out.

The local newspaper, the Herald Sun, asked the president of the nearby Mt. Burnett Observatory, Perry Vlahos, what he thought of the video.

He told them, *"It's really very difficult to say from looking at this footage, without seeing first-hand."* However he assured them, *"One thing I can guarantee is they were not little green men from Mars. They could be lanterns, satellites, or police helicopters."* Vlahos' *"Best guess was that they were Chinese paper lanterns that have a candle inside that heat carries up and move in the wind."*

## **Mars Living Organisms**

NASA's robotic rover on Mars has found signs that a vast and hospitable lake once spread over the now-desolate Martian surface, providing a potential home to past life for centuries or longer.

The shallow water body was roughly the size of one of New York's Finger Lakes. Its waters boasted low salinity, just the right acidity and all the chemicals needed to support living

organisms. Other than on Earth, the lake was the most life-friendly place in the solar system, according to a study published in the journal Science and announced Monday at American Geophysical Union conference in San Francisco.

NASA soil mineralogist Douglas Ming, who took part in the new research reports, "*Is this a smoking gun that this was a habitable environment? There's pretty good evidence for that. We have an environment that is very much like on Earth*"

## Australia Circle

**Glen WAVERLEY**-- I was outside my house on December 15, 2013, when I noticed in the clear the night sky I saw a bright shooting star ascending from the ground to the stars at rapid pace. It was moving very fast leaving a trail behind and then just vanished into the dark sky. I was truly amazed at its speed and there was no sound. My first thought was "*Do shooting stars fly in that direction?*" I wanted to inform you to find in someone else saw it. I really feel as though I may have witnessed something truly amazing. I do have the greatest skyline view from my house and this is the first time I've seen anything like this! Rob. Thanks to MUFON CMS

## Comet Ison Passes near the Sun

It appears that the comet broke apart and disintegrated mostly into dust, gas and is a ghost of its original size. However, one part of the nucleus remains. It survived the close approach to the sun, but is too dim to become readily viewable in the sky. Hubble will have a look for the remnant once it moves far enough from the Sun for Hubble to safely point at it, in mid-December.

NASA now says the comet's nucleus — or a part of it — survived its brush with the sun and is continuing on its journey. It certainly appears as if there is an object there that is emitting material but probably won't be visible with the naked eye. Thanks to Frank Chille

## China Will Land on the Moon

China is in the final stages of preparing its robotic to launch atop a Long March 3B rocket, slated for liftoff in early December. The ambitious mission is built to first orbit the moon, then propel down to a landing site, after which a small, solar-powered lunar rover will be unleashed. Already on duty orbiting the moon is NASA's Lunar Atmosphere and Dust Environment Explorer (LADEE). The probe's science instrument commissioning is now underway, after which the spacecraft will drop down to the lower lunar science orbit and start the full science phase of the mission.

*"The arrival of the Chang'e 3 spacecraft into lunar orbit and then its*

*descent to the surface will result in a significant contamination of the lunar exosphere by the propellant,"* said Jeff Plescia, who chairs NASA's Lunar Exploration Analysis Group (LEAG), chartered to assist the space agency in planning the scientific exploration of the moon.

While Chang'e 3's mission will create some problems for LADEE — in that the US spacecraft would measure not only the native exosphere, but also the Chinese spacecraft's propellant and how it becomes distributed into the lunar exosphere.

LADEE will also measure the dust lofted above the lunar surface by the Chang'e 3 touchdown. Thanks to [space.com](http://space.com)

## **Australia Orbs**

***Ingham, Queensland*** – I was in my front yard on November 11, 2013, when a bright gently pulsing orange orb appeared heading southwest at 9 PM, It was significantly brighter than the brightest stars; I ran inside and called my father out who also witnessed the event. The orange orb gently passed through the sky silently at around 9:15 PM. It was not like any normal aircraft and we both agreed it was a very strange thing to be occurring. The orb changed directions as if it was conducting a turn and stopped twice very briefly before continue its journey toward the southwest until eventually it gently faded away into thin air in clear night skies. The moon was also present at the time so the object was very luminous.

***Narrabeen*** – On November 19th, 2013, at 8.30 PM, two witnesses saw a round red object. They did not feel it could be a Chinese lantern. . A red round ball was slowly moving in the sky. I was driving, pulled around the corner, and then it was gone! Thanks to [www.ufoinfo.com](http://www.ufoinfo.com)

## **New Zealand Disc**

***Invercargill, Southland*** -- I was sitting in my lounge when something caught my eye that was moving north and was heading to fly over my house on November 16, 2013, at 3.45 PM. I rushed outside by this time it had passed my house and was travelling north. I watched it until it disappeared in 20 seconds. There was no noise, and it flew faster than any airplane. It was like a dinner plate facing up and a dinner plate on top facing down in a dark blue in color. Thanks to [www.ufoinfo.com](http://www.ufoinfo.com)

***A Merry Christmas and a Happy  
New Year to ALL***

**Please Note:**

**THE NEXT MEETING WILL BE HELD ON 18<sup>TH</sup> JANUARY, 2014.**

same time, same place – 12 Kamillaro Road, Katoomba.

*Our previous meeting was a huge success with a number of new people and we look forward to seeing you at our next one.*

*There should be some good Skywatches ahead of us up here at Katoomba weather permitting.*

*Meanwhile, there is a lot happening 'up there' at present so -*

*Until our next meeting –*

***Watch the Skies!***

*Rex and Heather*
