**Second Announcement  
&  
Scientific Programme**

---

Dear Colleagues,

BRS 2015 (Tuesday 30th June – Thursday 2nd July) is fast approaching and will bring together the members of the multidisciplinary team at the University of Leeds. We hope that you and your unit will be supporting the event by attending as a team. The theme for this year is ‘Patient-centred care for young and old’. There are high quality sessions on meeting the challenges of treating an aging population, a central consideration for those involved in kidney care. Two in-depth Workshops will be repeated throughout the conference: “Empathetic Communication for Renal Care” and “Working towards a dementia friendly community: becoming a dementia friend”. At the other end of the age range is the Renal Association sponsored session: Transition from Paediatric to Adult Care.

There is a lot more besides including sessions on AKI, Patient Safety and Quality Improvement. Three CPD sessions are on offer over the course of the conference on topics including:

- Renal rehabilitation
- Challenges of multimorbidity
- Communicating with the young

There are numerous invited lectures as well as 44 oral and 133 poster presentations. Do come and join us for the symposia programme on Tuesday afternoon for some excellent industry sponsored sessions on diabetic kidney disease and ADPKD - two of our most commonly encountered forms of chronic kidney disease.

We will then be joined by Professor Harold Thimbleby for conference opening, who will talk on ‘Designing technology to make healthcare safer’. He gives a highly relevant perspective of how we can improve care delivery. So much of kidney care involves technology that I think this will give a real stimulus to the way that we think about patient safety and quality improvement.

We also thank those industry partners joining us in Leeds. So far we have:

Amgen – [www.amgen.co.uk](http://www.amgen.co.uk)

**Summary of 14th Round BRS Grant Awards (2014)**  
*These grants have been awarded by the BRS working in collaboration with  
the British Kidney Patient Association*

Recipient	Hospital	Title of Grant Project	Brief Description of the Project	Amount of Award
Dr Kate McCarthy	University Hospitals Coventry & Warwickshire NHS Trust	Renal Patient Education: Does the reality of treatment live up to the education rhetoric?	<p>The proposed study will build on the success of a doctoral research programme, which developed and delivered a self-efficacy theory-based pre-dialysis education intervention for patients.</p> <p>The main aims of the study are:</p> <p><b>Aim 1:</b> To identify if pre-dialysis education sufficiently prepared individuals for treatment decision-making and if not why not? <b>Aim 2:</b> To identify the impact of treatment on quality of life and importantly how individuals' levels of self-efficacy impacted on their treatment choice, their capacity to cope and factors influencing self-efficacy behaviours. Findings will inform the evidence base for the tailored delivery of educational components.</p> <p>Multidisciplinary and service user collaboration has been central to the proposed research design and topic development. The group includes: 9 service users, 2 carers, 3 nephrology consultants, health scientist, dietitian, social worker, psychologist, advanced nurse practitioner and patient information librarian. Members represent the local Kidney Patients Association and local Renal Patient Forum groups.</p>	£18,296.00
Dr Luke Hodgson	Western Sussex Hospitals NHS Foundation Trust	Assessing the acceptability and barriers to implementation of a novel intervention for hospital in-patients at risk of Acute Kidney Injury.	<p>The primary aims of the research are: Aim 1) to assess whether a complex intervention (a 'care package' - comprising the <b>APS</b>, an <b>electronic alert</b> to relevant health professionals who have undergone an appropriate <b>educational programme</b> and <b>checklist</b> for patient management) is acceptable by hospital staff and explore the factors that might hinder and/or facilitate its implementation; and Aim 2) to retrospectively test whether introducing this complex intervention can identify patients on admission to hospital who are <b>at risk</b> of developing AKI and reduce AKI associated harm.</p>	£22,028.00

Recipient	Hospital	Title of Grant Project	Brief Description of the Project	Amount of Award
Ms Helena Jackson	St Georges Hospital, London	A multi-centre study to assess the validity of a novel renal-specific inpatient nutrition screening tool (iNUT)	<p>Chronic kidney disease (CKD) is characterised by a high prevalence of malnutrition which is associated with increased morbidity and mortality. The risk and severity of malnutrition is exacerbated by hospitalisation. A detailed nutritional assessment for all inpatient admissions requires specialist expertise and is time consuming and impractical. Therefore, hospital patients should be routinely screened for risk of malnutrition on admission. However, screening tools designed for the general population such as the Malnutrition Universal Screening Tool (MUST) may lack the sensitivity to identify malnutrition in approximately 50% of renal inpatients affected. An inpatient nutrition screening tool (iNUT) was developed for use on the dedicated renal ward and a pilot study (n=41) showed improved sensitivity in identifying malnutrition and those in need of dietetic intervention compared with MUST.</p> <p>The aim of the present study is to assess the validity and reliability of the iNUT in a multicentre study with a view to further dissemination to renal units nationally.</p> <p>The study will evaluate the potential of iNUT to be used more widely to improve the detection of malnutrition in renal inpatients.</p>	£18,488.00
Mr Nicholas Inston	Queen Elizabeth Hospital, Birmingham	Improving Outcomes in Vascular Access: The IMPROVA study	<p>The IMPROVA Study is designed to identify novel predictors of vascular access success or failure.</p> <p>The aim of the study is to perform enhanced assessments of arterial health preoperatively and correlate these measurements with early AVF outcome. We also aim to assess whether patient reported symptoms of hand function can predict AVF outcome. These non-invasive measurements will provide a more accurate picture of overall vascular health prior to AVF formation with the ultimate intention of informing the clinician as to the likelihood of success or failure.</p>	£22,930.00

Recipient	Hospital	Title of Grant Project	Brief Description of the Project	Amount of Award
Dr Sivakumar Sridharan	Lister Hospital, Stevenage	Development and Validation of a Physical Activity Questionnaire for Subjects with Chronic Kidney Disease (CKD-PAQ)	<p>This study will be undertaken in four phases. We have previously completed a series of studies exploring different aspects of physical activity in chronic kidney disease and dialysis patients. All these studies assessed physical activity using the Recent Physical Activity Questionnaire (RPAQ). In Phase 1, the response profile of previous study participants for each individual item in RPAQ will be examined. The format of the questionnaire items and the breadth of activities covered by the novel questionnaire will be guided by this data. Phase 2 will involve semi-structured interviews with subjects with chronic kidney disease with the aim of refining the questionnaire with regards to the clarity and readability of the individual items to the chronic kidney disease patient. In Phase 3, the novel questionnaire will be validated in a cohort of 120 subjects with chronic kidney disease using measured activity from a wrist-worn accelerometer. Finally, Phase 4 will involve administering the questionnaire to a cohort of 400 participants with chronic kidney disease with the aim of determining the relationship of demographic and clinical factors to the output of the questionnaire and of performing factor analysis to establish its validity and reliability. In Phases 2-4, participant cohorts will include pre-dialysis patients, those on haemodialysis and peritoneal dialysis and transplant patients to ensure the questionnaire will be useful for activity assessment across various groups of subjects with chronic kidney disease.</p>	£9,869.00
Dr Enric Vilar	East & North Herts NHS Trust	Evaluation of patient and staff acceptability of alternate-day haemodialysis	<p>This proposed study is a preliminary step aimed to provide data that would guide the design of such a study by exploring patient and staff views on alternate day dialysis. The aims are</p> <ul style="list-style-type: none"> <li>• To provide data on the views of patients regarding alternate day dialysis regimens to guide design of a future large research study</li> <li>• To determine the acceptability of alternate day dialysis in a moderate sample size of UK dialysis patients</li> <li>• To determine the factors that might determine acceptability of alternate day dialysis to patients on dialysis</li> <li>• To determine barriers to alternate day dialysis that would need to be overcome in design of a future trial of thrice weekly versus alternate day dialysis</li> <li>• To determine the factors patients consider most important in decision making if they were offered a choice between alternate day and thrice weekly dialysis.</li> </ul>	£14,935.00
<b>Total of Grants Awarded</b>				<b>£106,546.00</b>

## Satellite Sessions

Tuesday 30th June 2015

12.45-14.45	<b>New Advances in ADPKD</b> Sponsored by Otsuka Pharmaceuticals (UK) Ltd
15.00 – 17.30	<b>How can my team use the multiple guidelines to enhance treatment of CKD in the context of diabetes?</b> Sponsored by Janssen

## CPD Sessions

Wednesday 1st July 2015

9.00 – 10.30 <b>CPD Session:</b> <b>Communicating with the young</b> <b>Facilitators:</b> Paul Harden, Paula Ormandy	14.30 – 16.00 <b>CPD Session:</b> <b>Challenges of multimorbidity</b> <b>Facilitators:</b> Louise Wells and Helen Hurst The aims of the session are: Through a case study exemplar demonstrate: 1. The problems of multiple morbidity in elderly patients with specific red flags from the MDT highlighting a problem 2. Understand multiprofessional relationships and referral pathways for the management of elderly patients with multiple morbidity 3. Planning ahead the use of ACP's and dispelling the myths <b>Speakers:</b> <b>Eileen Burns</b> , <i>President-Elect, British Geriatric Society; Consultant Geriatrician, Leeds Teaching Hospitals</i> <b>Lynne Russon</b> , <i>Consultant in Palliative Medicine, Leeds Teaching Hospitals NHS Trust</i> <b>Kathrine Parker</b> , <i>Specialist Renal Pharmacist, Central Manchester Foundation Trust</i> <b>Ann Murdoch</b> , <i>Senior Renal Social Worker, Royal Infirmary Edinburgh</i> <b>Johanna Mackenzie</b> , <i>Conservative Care Management Nurse, Royal Infirmary Edinburgh</i>

# CPD Session

## Thursday 2nd July 2015

14.30 – 16.00

**CPD Session:**

**BRS Renal Rehab Network Session**

**Intended learning outcomes**

**Facilitators:** Sharlene Greenwood and Nicola Thomas

The aims of the session are:

1. How to assess older people with CKD
2. Using case studies to describe approaches to exercise across CKD trajectory
3. Develop awareness of resources to facilitate rehabilitation
4. Understand factors involved in maintaining motivation in exercise

**Speakers:**

**Miles Witham**, *Consultant Geriatrician & Clinical Reader in Ageing & Health, University of Dundee*

**Pelagia Koufaki**, *Research Fellow in Rehabilitation Sciences, Queen Mary University, Edinburgh*

**Sharlene Greenwood**, *Consultant Physiotherapist in Renal and Exercise Rehabilitation, King's College Hospital, London*

**Ellen O'Connor**, *Physiotherapist, Kings College Hospital, London*

**Abstracts are available on the programme pages and the poster pages on the BRS website: [www.britishrenal.org](http://www.britishrenal.org)**

# BRS ANNUAL CONFERENCE 2015

*Patient-centred care for young and old*

**Co-Chairs:** Edwina Brown & Paula Ormandy

**Programme Planning Committee:** Simon Ball, Richard Fielding, Sharlene Greenwood, Helen Hurst, Lina Johansson, Kate McCarthy, Enric Vilar

*Authors will be present by their poster for the duration of their moderated session and during lunch on both days*

## Poster Abstracts by Moderated Group

**AKI** (Thursday 2nd July 13.20 – 14.20) *moderated by Nick Selby*

**P43 ACUTE KIDNEY INJURY (AKI) EDUCATION TO NURSING AND ASSISTANT HEALTH CARE STAFF-AN IMPORTANT ASPECT IN THE OVERALL DELIVERY OF CARE PROVIDED TO PATIENT WITH AKI**

Tracey Harrison and Mansoor N Ali

Bradford Royal Infirmary, Bradford Teaching Hospitals NHS Foundation Trust

**P44 MICRONUTRIENT LOSS IN RENAL REPLACEMENT THERAPY FOR ACUTE KIDNEY INJURY**

Weng C Oh<sup>1,4</sup>, Mark Rigby<sup>1</sup>, Bruno Mafri<sup>1</sup>, Andrew Sharman<sup>4</sup>, Daniel Harvey<sup>4</sup>, Simon Welham<sup>3</sup>, Ravi Mahajan<sup>4</sup>, David Gardner<sup>2</sup>, Mark A J Devonald<sup>1</sup>Renal and Transplant Unit, Nottingham University Hospitals NHS Trust<sup>1</sup>, School of Veterinary Medicine and Science<sup>2</sup> and School of Biosciences<sup>3</sup>, Academic Anaesthesia, School of Medicine, University of Nottingham<sup>4</sup>

**P45 INVESTIGATING AND MANAGING ACUTE KIDNEY INJURY – ARE WE GETTING IT RIGHT?**

Dr Dev Katarey<sup>1</sup>, Kaenat Mulla<sup>2</sup>, Adebusola Shonubi<sup>2</sup>

<sup>1</sup>Department of Acute Medicine, Kingston Hospital, Kingston

<sup>2</sup>St George's University of London, London

**P46 HOSPITAL ACQUIRED AKI – ELECTRONIC ALERTS ALONE MAY NOT BE ENOUGH**

Whiteley S<sup>1</sup>, Ghalli F<sup>2</sup>, Meran S<sup>2</sup>, Roberts G<sup>1 2</sup>

<sup>1</sup>Royal Gwent Hospital, Newport, <sup>2</sup>University Hospital of Wales, Cardiff

**P47 CONCURRENT USE OF A LOCAL AND THE NATIONAL ALGORITHMS TO DETECT ACUTE KIDNEY INJURY**

Subbegowda PH, Royston R, Waring D, Challiner R, Heatley S, Henney R, Vincent M Butterworth C, Hutchison AJ, Ebah L.

Manchester Acute Kidney Injury Strategy (MAKIS), Central Manchester University Hospitals NHS Foundation Trust

**P48 A 5 YEAR FOLLOW UP OF ANCA ASSOCIATED VASCULITIS TREATED WITHC RITUXIMAB AS INDUCTION AGENT**

N Naz<sup>1</sup>, T Roberts<sup>2</sup>, M Hiremath<sup>3</sup>, K Abdulnabi<sup>4</sup>,A Banerjee ,Yaser S

Wirral University Teaching Hospital

**P49 ACUTE KIDNEY INJURY CLINIC – OUR EXPERIENCE**

Brincat S, Wang J, Albuquerque J, Asgari E

St George's Hospital NHS Trust, London

**P50 DEVELOPMENT AND OUTCOMES OF AN ACUTE KIDNEY INJURY OUTREACH SERVICE AT A LARGE UNIVERSITY TEACHING HOSPITAL**

Bisset L, Van Baalen C, Weston G, Bebb C, Hall M, Ferraro A, Porter C, Juurlink I, Devonald M Nottingham Renal & Transplant Unit, City Campus, Nottingham University Hospitals NHS Trust, Nottingham, UK

**ANAEMIA** (Wednesday 1st July 13.20 -14.20) *moderated by Vicki Hipkiss*

**P162 THE PIVOTAL TRIAL: REFLECTIONS FROM A RESEARCH NURSE 1 YEAR ON**

Emmanuel Mangahis<sup>1</sup>, Claire White<sup>1</sup>, Iain C Macdougall<sup>1</sup>

<sup>1</sup>Renal Unit, King's College Hospital, London

**P163 SWITCHING FROM A LOW DOSE INTRAVENOUS IRON PREPARATION TO A HIGH DOSE PREPARATION: WHAT IS THE IMPACT ON THE SERVICE?**

Johnson, J, Dring, B, O'Donnell, D, Taylor, K

Renal and Transplant Department, Nottingham University Hospitals NHS Trust

**P164 IS ERYTHROPOIETIN STIMULATING AGENTS GIVEN AS PRESCRIBED WHEN PATIENTS GET ADMITTED TO HOSPITAL?**

O'Donnell, D, Johnson, J, Dring, B, Taylor, K

Renal and Transplant Department, Nottingham University Hospitals NHS Trust

**P165 EXPLORING DIFFERENCES ACROSS THE UK IN THE SET-UP TIMES OF A LARGE MULTICENTRE CLINICAL TRIAL: THE "PIVOTAL" STUDY**

Claire White, Iain C Macdougall

Renal Unit, King's College Hospital, London

**P166 NURSING INVOLVEMENT IN AN EARLY PHASE STUDY ON THE EFFECTS OF A NOVEL TREATMENT FOR EPO-RESISTANT ANAEMIA IN HAEMODIALYSIS PATIENTS**

Leela Goldstein, Jake Cinco, Adam Rumjon, Iain C Macdougall

Renal Unit, King's College Hospital, London

**P167 IS LOW VITAMIN D LEVEL AN INFLAMMATORY MEDIATOR OF ANAEMIA IN KIDNEY TRANSPLANTATION?**

Winnie Chan<sup>1,2</sup>, Douglas Ward<sup>2</sup>, Chris Tselepis<sup>2</sup>, Jos Bosch<sup>2,3</sup>, David Jones<sup>4</sup>, Okdeep Kaur<sup>1</sup>, Phillip McTernan<sup>5</sup>, Anna Phillips<sup>2</sup>, Richard Borrows<sup>1,2</sup>

<sup>1</sup>Queen Elizabeth Hospital Birmingham, UK; <sup>2</sup>University of Birmingham, UK; <sup>3</sup>University of Amsterdam, Netherlands; <sup>4</sup>Manchester Metropolitan University, UK; <sup>5</sup>University of Warwick, UK.

**P168 A COMPARATIVE AUDIT OF THE EFFICACY OF VENOFRER AND DIAFER IN HAEMODIALYSIS PATIENTS AT A SATELLITE KIDNEY UNIT**

Jones, D, Timmins, S

Department of Renal Medicine, Royal Devon and Exeter Foundation Trust

**CARDIOVASCULAR DISEASE & FITNESS** (Thursday 2nd July 13.20 – 14.20) *moderated by Sharlene Greenwood*

**P67 ACE/ARB USE IN PATIENTS WITH SEVERE KIDNEY DISEASE AND HEART FAILURE**

Balasubramaniam G<sup>1</sup>, Vandermolen S<sup>1</sup>, Roberts J<sup>1</sup>, Mapplebeck S<sup>2</sup>, Mackenzie P<sup>2</sup>, Almond M<sup>1</sup>

<sup>1</sup>Department of Nephrology, Southend Hospital, Prittlewell Chase, Essex

<sup>2</sup>Department of Biochemistry, Southend Hospital, Prittlewell Chase, Essex

**P68 RISK PREDICTION BASED ON CARDIAC AUTONOMIC MODULATION AND REPOLARISATION INDICES FROM INTRADIALYTIC COMPUTERIZED ELECTROCARDIOGRAPHY**

Dimitrios Poulidakos<sup>1,2</sup>, Marek Malik<sup>3</sup>, Debasish Banerjee<sup>2\*</sup>

<sup>1</sup>Salford Royal NHS Foundation Trust t, <sup>2</sup>Cardiovascular Sciences Research Centre, St. George's, University of London, <sup>3</sup>Imperial College, \* Equal contributions as last author

**P69 ASSOCIATION OF RECTUS FEMORIS CROSS SECTIONAL AREA AND MEASURES OF PHYSICAL FUNCTION IN PATIENTS WITH CKD**

Gould, DW<sup>1</sup>, Watson, EL<sup>1</sup>, Clarke, AL<sup>1</sup>, Xenophonos, S<sup>1</sup>, Viana J<sup>1,2</sup>, Smith, AC<sup>1,3</sup>

<sup>1</sup>Leicester Kidney Exercise Team, Department of Infection, Immunity and Inflammation, University of Leicester UK, <sup>2</sup>Research Center in Sports Sciences, Health and Human Development, University Institute of Maia, Portugal, <sup>3</sup>JohnWalls Renal Unit, Leicester General Hospital, UK

**P70 HAEMODIALYSIS STAFF TRAINING REQUIREMENTS IN RELATION TO INTRADIALYTIC EXERCISE: A QUALITATIVE STUDY**

Hannah ML Young<sup>1</sup>, Amy L Clarke<sup>1</sup>, Maurice Dungey<sup>1,2</sup>, Nicky Hudson<sup>3</sup>, James O Burton<sup>1</sup>, Alice C Smith<sup>1</sup>  
<sup>1</sup>Leicester Kidney Exercise Team, Dept of Infection, Immunity and Inflammation and John Walls Renal Unit, Leicester General Hospital, <sup>2</sup>School of Sport, Exercise and Health Sciences, Loughborough University, <sup>3</sup>School of Applied Social Sciences, DeMontfort University

**P71 'PERFECTLY CAPABLE': CREATING A DIALYSIS GAMES**

Pursey VA, Rowan, H, Betts, MA  
York Hospitals NHS Foundation Trust

**P72 BODY COMPOSITION, QUALITY OF LIFE AND PHYSICAL FUNCTION IN RENAL TRANSPLANT RECIPIENTS**

Richler-Potts D<sup>1</sup>, Neale J<sup>1,2</sup>, Gould DW<sup>1</sup>, Churchward DR<sup>1</sup>, Clarke AL<sup>1</sup>, Smith AC<sup>1,2</sup>  
<sup>1</sup>Leicester Kidney Exercise Team, Department of Infection, Immunity and Inflammation, University of Leicester <sup>2</sup>John Walls Renal Unit, Leicester General Hospital

**P73 A 12 MONTH INTRADIALYTIC CYCLING SERVICE EVALUATION: IMPACT ON ANXIETY AND DEPRESSION, AND REASONS FOR WITHDRAWAL**

Darren R Churchward<sup>1,2</sup>, Hannah ML Young<sup>1,2</sup>, Maurice Dungey<sup>1,2</sup>, James O Burton<sup>1,2</sup>, Alice C Smith<sup>1,2</sup>.  
<sup>1</sup>Leicester Kidney Exercise Team, Department of Infection, Immunity and Inflammation, University of Leicester, <sup>2</sup>John Walls Renal Unit, Leicester General Hospital

**CKD** (Wednesday 1st July 13.20 -14.20) *moderated by Robert Lewis*

**P35 MULTI-CENTRE RANDOMISED CONTROLLED TRIAL OF ANGIOTENSIN CONVERTING ENZYME INHIBITOR (ACEI) / ANGIOTENSIN RECEPTOR BLOCKER (ARB) WITHDRAWAL IN ADVANCED RENAL DISEASE; THE STOP-ACEI TRIAL**

Valente, M<sup>1</sup>, Brettell, EA<sup>1</sup>, Ives, N<sup>1</sup>, Topham, PS<sup>2</sup>, El-Nahas, M<sup>3</sup>, Khwaja, A<sup>3</sup>, Cockwell, P<sup>4</sup>, Cleland, JG<sup>5</sup>, Bhandari, S<sup>6</sup>

**P36 PATTERNS OF RENAL DISEASE IN 2 NORTH-WEST COUNTIES OF THE UK – CHESHIRE AND WIRRAL**

Noshaba Naz, Mrityunjay Hiremath, N Nicholas, T Rollinson, Kevin A Banerjee  
Wirral University Teaching Hospital

**P37 CELEBRATING TEN YEARS OF AN ESTABLISHED PRE-DIALYSIS SERVICE**

Thomas N, Aggett J, Pugh J, Goodland A, Prichard A  
Nephrology and Transplant Directorate, University Hospital of Wales, Cardiff

**P38 ANALYSIS OF NEPHROLOGY AND LOW CLEARANCE CLINIC REFERRAL PATTERNS ACCORDING TO PATIENT AGE**

Wendy Brown, Michelle Willicombe  
Imperial College Healthcare Trust

**P39 AUTOMATIC CLASSIFICATION OF LONG-TERM KIDNEY FUNCTION FOR CKD PATIENTS USING MACHINE LEARNING TECHNIQUES: CLASSIFYING EGFR TRENDS**

Norman Poh<sup>1</sup>, Santosh Tirunagari<sup>1,2</sup>, Simon de Lusignan<sup>3</sup>Farmer Christopher<sup>4</sup>

**P40 DOES CO-EXISTING CHRONIC KIDNEY DISEASE INFLUENCE HAEMORRHAGIC STROKE OUTCOMES?**

Philip Thomas<sup>1</sup>; Peter Carr<sup>2</sup>; David Sandler<sup>2</sup> & Jyoti Baharani<sup>3</sup>  
<sup>1</sup>Department of Elderly Care Medicine, Good Hope Hospital, <sup>2</sup>Department of Stroke Medicine, Birmingham Heartlands Hospital, <sup>3</sup>Department of Nephrology, Birmingham Heartlands Hospital

**P41 PROGRESSIVE *versus* NON-PROGRESSIVE IDIOPATHIC MEMBRANOUS GLOMERULONEPHRITIS OVER 39 YEARS: A CATEGORICAL APPROACH TO SAFE AND EFFECTIVE THERAPY**

J M Bone, K Abdelnabi, N.Naz, P S Williams, A V Crowe, T.Ledson, J L Alexander, R.Brown  
Royal Liverpool and Broadgreen University Hospital, Prescott Street, Liverpool, and Arrows Park Hospital, Upton, Wirral

**P42 ASSOCIATION BETWEEN DIABETIC FOOT ULCERS, ACUTE KIDNEY INJURY AND CHRONIC KIDNEY DISEASE**

H. Mahmoud<sup>1,3</sup>, MW. Taal<sup>1,3</sup>, FL. Game<sup>2,3</sup>, H.Sherriff<sup>1</sup>, L.Proctor<sup>1</sup>, H. Baig<sup>1</sup>, C.Peter<sup>1</sup>, E.Lincoln<sup>1</sup>, F.Asma<sup>1</sup>, NM. Selby<sup>1,3</sup>  
Departments of Renal Medicine<sup>1</sup> and Diabetes<sup>2</sup>, Royal Derby Hospital, Derby, Division of Medical Sciences and Graduate Entry Medicine<sup>3</sup>, University of Nottingham

**DIETARY FACTORS AND INTERVENTIONS** (Thursday 2nd July 13.20 – 14.20)

*moderated by Helen MacLaughlin*

**P108 INVESTIGATION OF THE VARIATION IN PHOSPHATE CONTENT OF WINES**

Elizabeth Lindley<sup>1,2,6</sup>, John Agar<sup>4</sup>, Mike Bosomworth<sup>3</sup>, Seán Costelloe<sup>3</sup>, Julienne Freeman<sup>3</sup>, David Keane<sup>1,2,6</sup>, Tony Shadbolt<sup>5</sup>, Douglas Thompson<sup>3</sup> and Tracey Ying<sup>4</sup>

**P109 SEVERE HYPERPHOSPHATAEMIA AND SHORT BOWEL SYNDROME IN A HAEMODIALYSIS PATIENT**

Alford, H., Farrington, K., Vilar, E.  
Department of Renal Medicine, Lister Hospital Stevenage

**P110 DIETARY FRUCTOSE: A NEW PARADIGM IN PREDICTING METABOLIC PROFILE IN KIDNEY TRANSPLANT RECIPIENTS**

Winnie Chan<sup>1,2</sup>, Jos Bosch<sup>2,3</sup>, David Jones<sup>4</sup>, Okdeep Kaur<sup>1</sup>, Phillip McTernan<sup>5</sup>, Anna Phillips<sup>2</sup>, Richard Borrows<sup>1,2</sup>  
<sup>1</sup>Queen Elizabeth Hospital Birmingham, UK; <sup>2</sup>University of Birmingham, UK; <sup>3</sup>University of Amsterdam, Netherlands; <sup>4</sup>Manchester Metropolitan University, UK; <sup>5</sup>University of Warwick, UK

**P111 AN EXPLORATORY INVESTIGATION TO DETERMINE WHETHER CHANGES IN MODIFIABLE CARDIAC RISK FACTORS OCCUR IN THE FIRST YEAR POST KIDNEY TRANSPLANT**

Williams, H<sup>1</sup>, Russell, S<sup>2</sup>, White, H<sup>3</sup>, Alderdice, J<sup>1</sup>, Morton, M<sup>2</sup>  
<sup>1</sup>Department of Nutrition and Dietetics, Manchester Royal Infirmary, <sup>2</sup>Department of Renal Surgery, Manchester Royal Infirmary, <sup>3</sup>Department of Nutrition and Dietetics, Leeds Beckett University

**P112 DEVELOPING RENAL DIETETIC OUTCOME MEASURES, THE BEGINNING OF THE JOURNEY . . .**

Renal Nutrition Group (RNG): Outcomes working party  
Gallimore. C, Alderdice. J, Barrett. J, El-Sherbini. N, Flint. J, Gardiner. C, Harman. A, Perry, S, Tarm, L

**P113 IS THE NEW RENAL DIETETIC OUTCOMES AUDIT TOOL FIT FOR PURPOSE?**

Renal Nutrition Group (RNG): Outcomes Working Group  
Perry S, Alderdice J, Barrett J, El-Sherbini, N, Gallimore C, Gardiner C, Flint J, Harman A, Tarm, L

**P114 WHAT INFLUENCES ACHIEVEMENT OF DIETETIC OUTCOMES IN RENAL PATIENTS?**

El-Sherbini, N Alderdice J, Barrett J, Flint J, Gallimore C, Gardiner C, Harman A, Perry S, Tarm L  
BDA RNG Outcomes Working Group, British Dietetic Association, 148/9 Great Charles Street, Queensway, Birmingham

**P115 CAN GUIDELINES FOR USE IN IDENTIFYING REFEEDING RISK BE APPLIED TO RENAL PATIENTS?**

Green, A<sup>1</sup>, Mafri, B<sup>1</sup>, Livesey, L<sup>1</sup>, Peacock, V<sup>1</sup>, McGlinchey, N<sup>1</sup>, Roe, S<sup>2</sup>  
<sup>1</sup> Renal Dietitian, Dietetic and Nutrition Department, Therapy Services, Nottingham University Hospital NHS Trust, <sup>2</sup> Consultant Nephrologist, Renal and Transplant Unit, Nottingham University Hospital NHS Trust

**P116 FLUID AND SALT DIETARY INTAKE AUDIT IN PATIENTS RECEIVING HAEMODIALYSIS TREATMENT**

G Ramlan and L Chandrasekharan

Department of Nutrition and Dietetics, Southend University Hospital NHS Foundation Trust

**HAEMODIALYSIS COMPLICATIONS** (Wednesday 1st July 13.20 -14.20) *moderated by Enric Vilar*

**P145 CARBAPENEM RESISTANT ORGANISMS IN HAEMODIALYSIS PATIENTS WHO HAVE HAD DIALYSIS TREATMENT ABROAD: A SINGLE CENTRE EXPERIENCE**

MPM Graham-Brown, R Bell, Sarah Taylor, Tracey Cox, Flora Luscombe, Coral Wimbury, Heather Chamberlain, G Warwick

John Walls Renal Unit, University Hospitals of Leicester NHS Trust

**P146 COMPARISON OF THE TURBIDIMETRIC AND CHROMOGENIC KINETIC LIMULUS AMOEBOCYTE LYSATE (LAL) ASSAY FOR BLOOD ENDOTOXIN DETECTION IN END-STAGE KIDNEY DISEASE**

Jonathan Wong<sup>1,2</sup>, Enric Vilar<sup>1,2</sup>, Nathan Davies<sup>3</sup> and Ken Farrington<sup>1,2</sup>

<sup>1</sup> Department of Nephrology, Lister Hospital, Stevenage, <sup>2</sup> University of Hertfordshire, Hatfield, <sup>3</sup>UCL Institute for Liver and Digestive Health

**P147 RELATIONSHIP OF DEPRESSIVE SYMPTOMS WITH PROLONGED POST-DIALYSIS RECOVERY TIMES**

Guirguis, A.<sup>1,2</sup>, Friedli, K.<sup>2</sup>, Fineberg, N.A.,<sup>2,3</sup>, Day, C.<sup>4</sup>, Almond, M.<sup>5</sup>, Davenport, A.<sup>5</sup>, Da Silva-Gane, M.<sup>2</sup>, Chilcot, J.<sup>7</sup>, Wellsted, D.<sup>2</sup>, Farrington, K.<sup>1,2</sup>

**P148 CORRELATION OF ABDOMINAL AORTIC CALCIFICATION WITH CARDIAC HYPERTROPHY, PULSE PRESSURE AND MINERAL AND BONE DISEASE BIOCHEMISTRIES IN HEMODIALYSIS PATIENTS**

Dimitra Bacharaki<sup>1</sup>, Ioannis Griveas<sup>2</sup>, Kiriaki Stamatelou<sup>3</sup>, Panagiotis Sitaras<sup>2</sup>

<sup>1</sup>Attikon University Hospital, Nephrology, CHAIDARI, GREECE, <sup>2</sup>Nefroiatriki, Nephrology, Athens, GREECE, <sup>3</sup>Kianous Stavros, Nephrology, Athens, GREECE

**P149 DO NURSE LED FOOT CHECKS RESULT IN IMPROVED REPORTED FOOT SELF-CARE BEHAVIOUR IN HAEMODIALYSIS PATIENTS WITH DIABETES?**

Brand, S.<sup>1</sup>, Lincoln, N.<sup>2</sup>, Musgrove, A.<sup>3</sup>

<sup>1</sup>Renal and Transplant Unit, Nottingham University Hospitals Trust, <sup>2</sup>Faculty of Medicine and Health Sciences, University of Nottingham, <sup>3</sup>Department of Diabetes, Nottingham University Hospitals Trust

**P150 DEVELOPMENT AND IMPLEMENTATION OF NEW GUIDANCE FOR PRESCRIBING AND MONITORING VANCOMYCIN FOR HAEMODIALYSIS PATIENTS**

Helen Thomas<sup>1</sup>, Robert Bradley<sup>1</sup>, Gareth Roberts<sup>2</sup> and Abdulfattah Alejmi<sup>3</sup>

<sup>1</sup>Renal Pharmacist, University Hospital of Wales, Cardiff; <sup>2</sup>Consultant Nephrologist, University Hospital of Wales, Cardiff; <sup>3</sup>Consultant Nephrologist, Ysbyty Gwynedd, Bangor

**P151 NON ADHERENCE TO HAEMODIALYSIS PRESCRIPTION**

Kelly White, Carol Rhodes, Catherine Johnson, Dr Richard Fluck

Department of Renal Medicine, Royal Derby Hospital

**P152 SAMPLE CONTAMINATION AND ACCURACY OF INR MONITORING IN HAEMODIALYSIS PATIENTS**

Poynton, M<sup>1</sup>, Ashby, D<sup>2</sup>

<sup>1</sup>Imperial College London, London, <sup>2</sup>Hammersmith Hospital, London

**HAEMODIALYSIS TREATMENT** (Thursday 2nd July 13.20 – 14.20) moderated by **Damien Ashby**

**P153 PREDICTION OF RESIDUAL KIDNEY FUNCTION IN HAEMODIALYSIS USING BETA-TRACE PROTEIN AND BETA-2 MICROGLOBULIN**

Jonathan Wong<sup>1,2</sup>, Sivakumar Sridharan<sup>1,2</sup>, Enric Vilar<sup>1,2</sup> & Ken Farrington<sup>1,2</sup>  
<sup>1</sup>Lister Hospital, Stevenage, Hertfordshire, <sup>2</sup>University of Hertfordshire, Hatfield

**P154 OCTENILIN WOUND IRRIGATION SOLUTION AS AN ALTERNATIVE TO CHLORHEXIDINE IN THE HAEMODIALYSIS SETTING**

Debling, P  
Kent and Canterbury Hospital

**P155 MONITORING OF ANTI XA ACTIVITY IN PATIENTS UNDERGOING HIGH VOLUME HAEMODIAFILTRATION (HDF) USING TINZAPARIN FOR ANTICOAGULATION**

Raza H.<sup>1</sup>, Large S.<sup>2</sup>, Odgers E.<sup>2</sup>, Schulz M.<sup>1</sup>  
<sup>1</sup>Renal Unit Royal Liverpool University Hospital, <sup>2</sup>St Helens & Knowsley Dialysis Unit

**P156 THE IMPLEMENTATION OF A COMPREHENSIVE SHARED CARE INITIATIVE IN A LARGE HAEMODIALYSIS UNIT**

Cabada, J.<sup>1</sup>, Rhodes, C.<sup>1</sup>, Mckinnell, J.C.<sup>1</sup>, Fluck, R.J.<sup>1</sup>  
Department of Renal Medicine, <sup>1</sup>Royal Derby Hospital, Derby

**P157 SOLUBLE UROKINASE PLASMINOGEN RECEPTOR (SUPAR): A FUTURE RISK MARKER FOR HAEMODIALYSIS PATIENTS?**

Griveas, I, Andriopoulos, C, Sitaras, P, Aktsiali, M  
'Nefroiatriki' Private Renal Unit, Chalandri, Athens, Greece

**P158 IS DIABETIC CARE FOR HAEMODIALYSIS PATIENTS OPTIMUM? ROOM FOR IMPROVEMENT**

Forbes S H, Redington K, Olaitan A, Kumaralingam P, Yaqoob M M  
Department of Renal Medicine and Transplantation, Royal London Hospital, Whitechapel

**P159 DOES SET POINT SODIUM CHANGE AFTER INITIATING HAEMODIALYSIS?**

Vilar, E.<sup>1,2</sup>, Spinhakis, N.<sup>1</sup>, Farrington, K.<sup>1,2</sup>  
<sup>1</sup>Lister Renal Unit, Stevenage, <sup>2</sup>Department of Postgraduate Medicine, University of Hertfordshire

**P160 TWICE-WEEKLY INCREMENTAL DIALYSIS DOES NOT COMPROMISE SURVIVAL**

Enric Vilar, Humza Chandna, Laura Mawer, Ken Farrington  
Lister Renal Unit

**P161 COULD SHARED HAEMODIALYSIS CARE INCREASE THE UPTAKE OF HOME HAEMODIALYSIS?**

Claire Reid, Martin Wilkie & Paul Laboi  
Yorkshire and Humber Renal Network Shared Haemodialysis Care Programme

**MEDICINES MANAGEMENT & MINERAL BONE DISORDER** (Thursday 2nd July 13.20 – 14.20) moderated by **Lucy Galloway**

**P91 LANTHANUM CARBONATE: SAFETY DATA AFTER 10 YEARS**

Marc E De Broe, <sup>1</sup>Rosamund J Wilson, <sup>2</sup>Svetlana Garafola, <sup>3</sup>J Brian Copley<sup>4</sup>  
<sup>1</sup>Department of Nephrology, Antwerp University, Antwerp, Belgium; <sup>2</sup>Spica Consultants, Marlborough, UK; <sup>3</sup>Shire, Lexington, MA, USA; <sup>4</sup>Shire, Wayne, PA, USA

**P92 ELEMENTAL CALCIUM INTAKE, TABLET BURDEN, AND DOSE-RELATIVITY OF CALCIUM ACETATE/CARBONATE VERSUS LANTHANUM CARBONATE IN THE TREATMENT OF HYPERPHOSPHATAEMIA**

Rosamund J Wilson, <sup>1</sup>Peter Preston, <sup>2</sup>J Brian Copley<sup>2</sup>  
<sup>1</sup>Spica Consultants, Marlborough, UK, <sup>2</sup>Shire, Wayne, PA, USA

- P93 HYPOCALCAEMIA MANAGEMENT POST PARATHYROIDECTOMY IN RENAL PATIENTS-A SINGLE CENTRE REVIEW**  
Rajkumar Chinnadurai<sup>1</sup>, Constantina Chrysochou<sup>1</sup>, Helen Doran<sup>2</sup>, Smeeta Sinha<sup>1</sup>  
<sup>1</sup>Department of Renal Medicine, Salford Royal NHS Foundation Trust, Salford, <sup>2</sup>Department of Endocrine Surgery, Salford Royal NHS Foundation Trust, Salford

### Communication Skills and Dementia Workshops

These workshops are being repeated several times on

**Wednesday 1st and Thursday 2nd July**

**Communications Skills Workshop run by James Hutchinson, Communications Trainer**

Sponsored by

#### Empathic communication for renal care

- *the importance of communication*
- *what is empathy?*
- *examples of good and bad communication*
- *examples of empathic communication in practice*

*This workshop will feature role play, interactive discussion and feedback*

#### **Workshop: Working towards a dementia friendly community: becoming a Dementia Friend**

##### **Facilitators: Elizabeth Collier & Natalie Yates Bolton**

*The Dementia Friends information workshop is an initiative of the Alzheimer's society to create dementia friendly communities (<https://www.dementiafriends.org.uk/>)*

*On completion of this workshop, participants will receive a badge and information card and be able to state that they are a Dementia Friend.*

*The workshop will:*

1. *Introduce the concept of dementia friendly communities*
2. *Work through interactive exercises aimed at developing participant's knowledge of what it is like to live with dementia*
3. *Ask participants to identify one action they could take to help improve the lives of people living with dementia*
4. *It will also provide opportunity for delegates to discuss their understanding of dementia and share good practices in the context of their work*

# BRS Virtual Membership

*Added Value for your delegate registration fee*

Joining the BRS Virtual Membership entitles you to freely access slides and recordings of the invited lectures presented at BRS conferences. You will also be sent regular BRS updates.

All 2015 conference delegates will automatically be enrolled unless you opt out.

## IMPORTANT FUND-RAISING NEWS!!!!

### IF YOU USE eBAY- THINK OF THE BRITISH RENAL SOCIETY

There is an option for you to donate a percentage of your final sale price to the British Renal Society.

When you place your item on eBay to be auctioned, just select the British Renal Society from the Charity drop-down menu.

There are currently over 7,000 charities listed on eBay, so search by keyword.

Key in British Renal Society into the **search by keyword** box, – hit GO and BRS will then be your choice of Charity to donate to.

First time donors will be asked by eBay to verify the method of payment, which is usually PayPal, and whether or not they intend to tick Gift Aid for that transaction or future ones.

**Select the percentage you wish to donate** – Please note, the minimum donation is 10% or £1.00

Also please note, if you choose to auction a car, the minimum donation will be 5% of the final sale price

When the item is sold, eBay will send your donation directly to the British Renal Society.

If you tick the Gift Aid box, your donation will have an additional 25% added.

BRS will become your chosen Charity to donate to, in future eBay sales, if you wish.

### PLEASE THINK OF THE BRITISH RENAL SOCIETY WHEN YOU USE EBAY

[eBay.co.uk](http://eBay.co.uk)

*All funds raised will go to the BRS Research for Renal Fund, promoting patient-centred clinical research to improve the lives of people with kidney disease, their families and carers*

# Public transport to the University of Leeds

## BY TRAIN:

Leeds Train Station links regularly to all major UK cities. You can get from the station to the campus on foot, by taxi or by bus. A taxi ride will take about 10 minutes and it will cost approximately £5.

## FROM TRAIN STATION BY BUS:

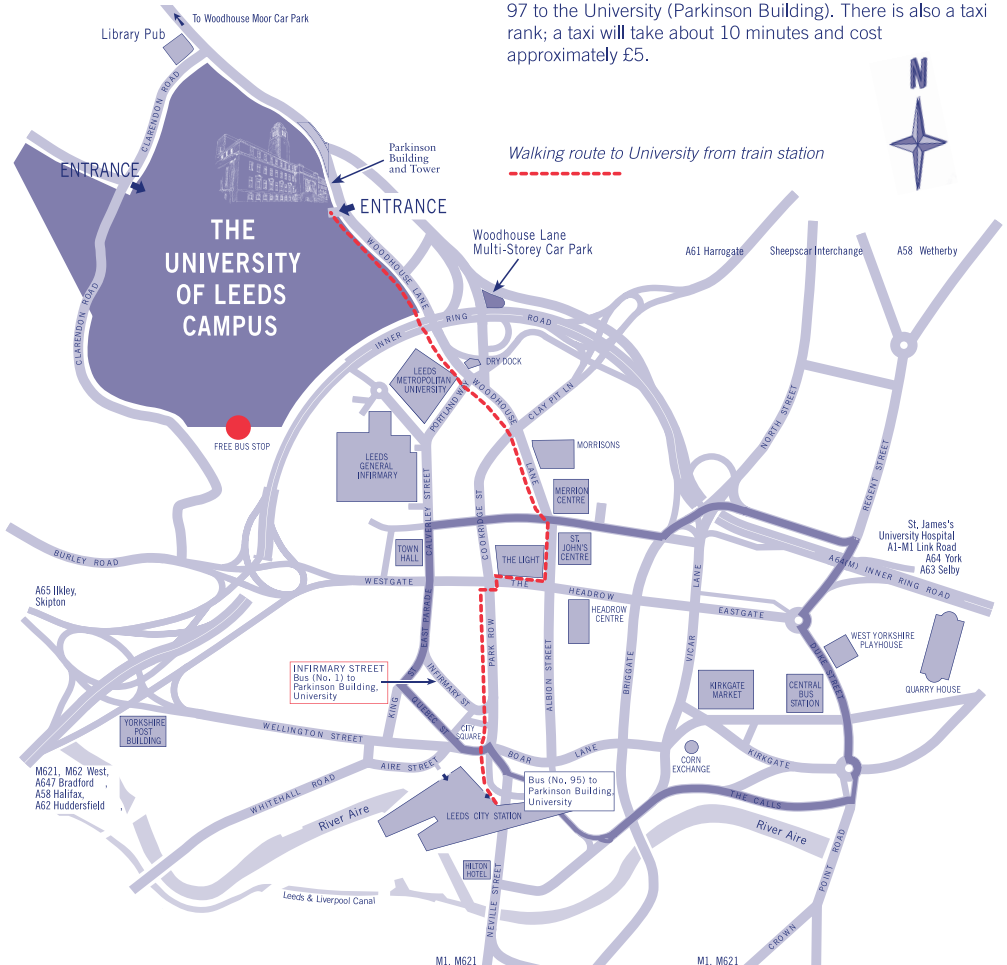

We advise you to take bus number 95 which departs from directly outside the train station. The bus runs approximately every 10 minutes and the journey takes 10 minutes. You should get off the bus just outside the Parkinson Building. (There is also a free city bus which takes you from the train station to the lower end of campus but the journey time is much longer)

## FROM TRAIN STATION ON FOOT:

The University campus is a 20 minute walk from the train station. The map below will help you find your way. Leave the station through the exit facing the main concourse. Turn left past the bus stops and walk down towards City Square. Keeping City Square on your left, walk straight up Park Row. At the top of the road turn right onto The Headrow, passing The Light shopping centre on your left. After The Light turn left onto Woodhouse Lane to continue uphill. Keep going, passing Morrisons, Leeds Metropolitan and the Dry Dock boat pub heading for the large white clock tower. This is the Parkinson building.

## BY COACH:

If you arrive by coach you can catch bus numbers 6,28 or 97 to the University (Parkinson Building). There is also a taxi rank; a taxi will take about 10 minutes and cost approximately £5.

# Driving directions to the University of Leeds

## **FROM THE NORTH via A1**
