**RE: Environmental Review
Bronx-GPO/Carriers Station
558 Grand Concourse
Bronx, NY 10451
FINSUB #: 350929-G01**

Dear Mr. Lackey:

Aton, LLC is pleased to provide the results of our Environmental Review of the United States Postal Service (USPS) property located at 558 Grand Concourse in Bronx, Bronx County, NY (hereinafter referred to as the "Subject Property"). This review was performed in accordance with USPS policies set forth in the Facilities Handbook RE-6 for site disposal and developmental projects.

Scope of Work

The scope of work included a site assessment, a review of USPS-provided documentation and on-site records, an interview of site personnel, and the completion of a draft RE-6 Exhibit 4-7.3, Real Estate Disposal Survey - Hazardous Waste, Floodplain and Wetland Characteristics (see Appendix A) and USPS Form 7498D, Facilities Environmental Checklist (see Appendix B). Site photographs are provided in Appendix C.

Additional environmental records were requested from the USPS and reviewed when available. Aton, LLC also reviewed Environmental Data Resources (EDR) Radius Map with Geocheck and NepaCheck reports to evaluate environmental conditions including federal, state, and local regulatory listings for the subject property (see Appendix E).

Site Reconnaissance

The site reconnaissance was performed on November 28, 2012 by ATON representative, Ms. Shini Paul. ATON was escorted through the site by Mr. Kevin Bauzo, USPS Maintenance Personnel. Mr. Bauzo has been affiliated with the site on and off for approximately ten (10) years.

Access or Visual Limitations

No access or visual limitations were encountered during the site reconnaissance.

Interviews

Mr. Bauzo was interviewed during the site reconnaissance. He assisted with completion of the Real Estate Disposal Survey attached as Appendix A.

Previous Reports or Site Documentation

No previous reports or other site documentation other than a Property Detail Report were provided to ATON.

Property Description

The USPS Grand Concourse Main Office address is 558 Grand Concourse and is situated in an area characterized by various commercial and retail businesses, a community college, and railroad/subway depot/repair facility in Bronx, New York. The subject property occupies an entire city block between Grand Concourse to the west, AJ Griffin Place to the east, East 150th Street to the north, and East 149th Street to the south. The review of the New York City Building Department website (<http://nyc.gov>) indicates the subject property is referred to as Block 2443, Lot 400. See Appendix D for a map showing the site location.

The subject property is a rectangular-shaped, 1.23-acre parcel of land. The subject property contains one, three-story, rectangular-shaped structure comprising approximately 159,000 square feet (sf) of space and containing a basement and sub-basement level. The sub-basement level of the building contains the mechanical areas including the boiler room and the basement level contains a parking garage. The first floor of the building contains various offices, the lobby with the main customer area, and the sorting area for the mail. The second floor is essentially vacant, but was previously used to sort the mail. There is a half-level located between the second floor of the building. The third floor of the building is used as administrative offices and contains a cafeteria/breakroom/lunchroom. Much of the third floor is also vacant.

Access between the upper and lower levels of the building is supplied by various stairwells and four traction elevators. The facility is currently serving as an operating post office.

The remaining areas of the site are comprised of concrete pedestrian sidewalks, and a handicapped accessible ramp. The west side of the building contains large steps and the handicapped access ramp to the interior portions of the structure. A large terrace with pavers surrounds the front portions of the side of the building. AJ Griffin Place, a public roadway, provides access to the loading dock and garage, which is located along the eastern (rear) portion of the subject property.

Hazardous Materials and Petroleum Products Used or Stored at the Site

No hazardous materials or significant quantities of petroleum products (other than a 20,000-gallon #2 fuel oil aboveground storage tank located in the basement) were observed during the site reconnaissance.

Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks

A 20,000-gallon #2 fuel oil aboveground storage tank is located in a vault in the sub-basement level of the building. No signs of leaks or spills were observed.

Vent Piping, Fill Piping, or Access Ways to Fill Piping

Vent pipes were observed on the wall adjacent to the entrance to the garage. Maintenance personnel at the property believe that a UST was located in the entrance drive to the garage. The tank was reportedly removed more than 20 years ago.

Drums and Containers of Hazardous or Unidentified Substances and Petroleum Products

No drums or containers of hazardous or unidentified substances and petroleum products were observed during the site visit.

Evidence of Releases

No evidence of releases was indicated during the site visit.

Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were observed during the site visit.

Pools of Liquid

No pools of liquid were observed during the site visit.

Stressed Vegetation

No stressed vegetation was observed during the site visit.

Polychlorinated Biphenyls (PCBs)

No evidence of PCBs was observed during the site visit.

Drains, Sumps, Oil Water Separators or Clarifiers

No drains, sumps, oil water separators or clarifiers were observed during the site visit.

On-site Solid Waste Disposal or Unknown Fill

No on-site solid waste disposal activities or unknown fill activities were observed during the site visit.

Pits, Ponds and Lagoons

No pits, ponds, or lagoons were observed during the site visit.

Wells

No wells were observed during the site visit.

Asbestos-Containing Materials (ACMs)

Suspect asbestos pipe insulation and acoustical ceiling tiles were observed throughout the property. Other suspect materials included wallboard assemblies and resilient floor finishes. The suspect materials were generally observed to be in good condition. USPS records likely include some degree of asbestos survey data, which is available upon request.

Lead-Based Paint (LBP)

Based on the date of construction, lead based paint may be present at the subject property. Peeling and flaking painted surfaces were noted throughout the building. USPS records likely include some degree of lead-based paint survey data, which is available upon request.

Urea Formaldehyde Foam Insulation (UFFI)

No evidence exists indicating that UFFI was used at the property.

Evidence of Historical Environmental Contamination

No evidence exists indicating historical environmental contamination associated with the subject property.

Additional Potential Environmental Hazards

No additional potential environmental hazards were observed during the site visit.

Adjoining Properties

East 149th Street is located to the south of the subject property, beyond which is Hostos Community College. AJ Griffin Place abuts the property to the east beyond which is a maintenance and repair facility for the Metropolitan Transit Authority (MTA). The property is bound to the north by East 150th Street, beyond which is a commercial office building with a billiard center on the ground floor (590 Grand Concourse). Grand Concourse is located on the western adjoining property beyond which are various commercial retail facilities including numerous restaurants.

Environmental Database Review

ATON reviewed information from various environmental databases gathered by EDR. The information provided by EDR from various governmental databases is reported as ATON received it. ATON did not verify the accuracy or completeness of the information contained in the databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence.

The subject property is identified in the UST regulatory database with two 2,500-gallon unleaded gasoline tanks. The tanks are identified as being closed in place on April 1, 2001. The tanks are identified as being located in a vault without access (per NYSDEC guidelines on USTs).

The subject property is identified as a conditionally-exempt small quantity generator (CESQG) of spend solvent waste. No violations were found.

A 20,000-gallon aboveground storage tank is located in a vault in the sub-basement level of the building. No sign of leaks or spills was observed.

NEPA Database Review

ATON reviewed an EDR NEPAScreen™ report gathered from various federal and state databases and addressed those items specifically pertaining to the USPS scope of work.

NEPA Record Source	Database Description	Search Distance	Within Search	# Sites Identified within 1/8 Mile
1.1307a (1) Officially Designated Wilderness Area	US Federal Lands	1.00	No	No

FCC & FAA Sites	Power Lines	1.00	Yes	---

Wetlands, Adjacent Streams or Lakes

No wetlands, adjacent streams, or lakes were observed during the site visit.

100-Year Floodplain

The Harlem River is located approximately 1/4-mile to the west of the subject property. The 100-year floodplain does not extend to the subject property.

Coastal Zone Management Area

No coastal zone management areas are associated with the subject property.

Critical Habitat or Rare or Endangered Species

The Indiana Bat is identified on the EPA Endangered Species Protection Program Database for Bronx County, New York. No bat habitat is specifically designated at the subject property.

Historic, Cultural or Archaeological Resources

The subject property is listed on the National Register of Historic Resources as the Bronx Central Annex - U.S. Post Office. USPS Law Department will review final purchase and sale agreement terms to address the use of protective covenants.

Prime, Unique or Important Farmland

The subject property is not located in or near prime, unique, or important farmland.

Drinking Water Supply

No drinking water supply wells are located on the subject property.

Human Health and Safety

No human health and safety issues were identified during the site visit.

Traffic

No adverse impacts to traffic is expected as a result of the undertaking.

Additional Resources

No other resources or adverse impacts to the subject property were observed.

Summary of Findings

Based on the site reconnaissance and environmental review, ATON found the following environmental issues regarding the subject property:

- The subject property is identified in the UST regulatory database with two 2,500-gallon unleaded gasoline tanks. The tanks are identified as being closed in place on April 1, 2001. The tanks are identified as being located in a vault without access (per NYSDEC guidelines on USTs);
- A 20,000-gallon #2 fuel oil aboveground storage tank is located in a vault in the sub-basement level of the building. No sign of leaks or spills was observed;
- Suspect asbestos pipe insulation and acoustical ceiling tiles were observed throughout the property. Other suspect materials included wallboard assemblies and resilient floor finishes. The suspect materials were generally observed to be in good condition. USPS records likely include some degree of asbestos survey data, which is available upon request;
- Based on the date of construction, lead based paint may be present at the subject property. Peeling and flaking painted surfaces were noted throughout the building. USPS records likely include some degree of lead-based paint survey data, which is available upon request;
- The subject property is listed on the National Register of Historic Resources as the Bronx Central Annex - U.S. Post Office. USPS Law Department will review final purchase and sale agreement terms to address the use of protective covenants.

Signatures

ATON has prepared this report on behalf of the USPS. We appreciate the opportunity to provide you with environmental services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Ron Carroll at (314) 602-2495.

Best Regards,

Exhibit 4-7.3 (p. 1)

Real Estate Disposal Survey - Hazardous Waste, Floodplain, and Wetland Site Characteristics

Project:	United States Postal Service – Bronx-GPO/Carriers Station			
Address:	558 Grand Concourse, Bronx, New York, 10451			
PART I Field Investigation (To Be Completed by Installation Head Based on Visual Observation of Property)				
	<i>(Check One)</i>	Yes	No	Unk
1. Does the property have any aboveground or underground storage tanks or lifts?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If yes, a. If tanks are present, are there any signs of spills or leaks?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. If tanks are present, has a tank tightness test been performed on the tanks?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Does the property have any vent pipes; fill pipes, or access ways indicating a fill pipe protruding from the ground? ¹	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Is there evidence of stressed vegetation on the property? ²	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Is there evidence of surface soil stains on the property? ³	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Are there abandoned drums or other containers on the property?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Are there PCB electric transformers on the property? ⁴	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Is there any evidence there was ever a PCB leak, spill, or other contamination affecting the site?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Is there any evidence of any flooring, drains, or walls stained by substances other than water?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Does the building contain asbestos? ⁵	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
a. If yes, is there any evidence the asbestos is friable?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Does the building contain urea formaldehyde? ⁶	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
11. Is there any evidence of lead-based paint?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12. Are there wetlands on the property?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
13. Are there floodplains on the property?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
14. Is there any evidence that any hazardous substances or petroleum products, or any other waste materials, have been dumped above grade, buried, and/or burned on the property? ⁵	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If the answer to any of the above questions was yes, provide additional information here:				
1 and 2. A 20,000-gallon #2 fuel oil aboveground storage tank is located in a vault in the sub-basement level of the building (no signs of leaks or spill). Vent pipes were observed on the wall adjacent to the entrance to the garage. Maintenance personnel at the property believe that a UST was located in the entrance drive to the garage. The tank was reportedly removed more than 20 years ago. The subject property is identified in the UST regulatory database with two 2,500-gallon unleaded gasoline tanks. The tanks are identified as being closed in place on April 1, 2001. The tanks are identified as being located in a vault without access (per NYSDEC guidelines on USTs).				
9. Suspect friable asbestos pipe insulation and acoustical ceiling tiles were observed throughout the property. Other suspect materials included wallboard assemblies and resilient floor finishes. The suspect materials were generally observed to be in good condition. USPS records likely include some degree of asbestos survey data – available upon request.				
11. Based on the date of construction, lead-based paint may be present at the subject property. Peeling and flaking painted was noted throughout. USPS records likely include some degree of lead-based paint survey data – available upon request.				
6. Utility owned electrical transformers are located in transformer vaults in the sidewalks fronting the building.

Exhibit 4-7.3 (p. 2)

Real Estate Disposal Survey - Hazardous Waste, Floodplain, and Wetland Site Characteristics

PART II Records Review (To Be Completed by RES Based on Review of Internal Postal Service Facility Files)

	(Check One)	Yes	No	Unk
1. Has the property been previously evaluated for contamination? ¹		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. Has the building been previously evaluated for presence of asbestos? ¹		<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Does the building contain urea formaldehyde? ²		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
4. Does the building contain PCB electric transformers?		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
5. Have aboveground or underground storage tanks ever been located on the property?		<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
a. If yes, has a tank tightness test been performed on the underground storage tanks?		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
6. Does the property contain any wetlands?		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7. Does the property contain any floodplains?		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
8. Are there any records or evidence of the past release or disposal of hazardous substances or petroleum products on the property?		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9. Are there any records or evidence of past existence of environmental contamination on the property?		<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

If the answer to any of the above questions was yes, provide additional information here:

2. USPS records likely include some degree of asbestos survey data – available upon request.

5. The active 20,000-gallon #2 fuel oil AST does not require tightness testing.

Appendix B

Completed Form 7498D (Facilities Environmental Checklist)

Facilities Environmental Checklist

Project:
United States Postal Service – Bronx-GPO/Carriers Station (DISPOSAL)

Address (No., Street, City, State, Zip +4):
558 Grand Concourse, Bronx, New York, 10451

Site Size: 1.23 acres

Building Size: 159,000 square feet

Assessment Items

Yes No Unknown

Will the action affect site or is site on or near the following: (Check one)

1. Wetlands, adjacent streams, or lakes.		X	
2. 100-year floodplain.		X	
3. Coastal Zone Management Area.		X	
4. Critical habitat or rare/endangered species.		X	
5. EPA or State Superfund, or priority cleanup site.		X	
6. Historic, cultural, or archaeological resources.	X		
7. Prime, unique, or important farmland.		X	
8. Park lands, or wild or scenic river.		X	
9. Drinking water supply.		X	
10. Human health and safety.		X	
11. Traffic (e.g., site access constraints, congestion).		X	

Will the action result in the following:

12. Changes in land uses on or near site (e.g., zoning).		X	
13. Changes to topography (slopes over 15%, grading, fill, soil erosion).		X	
14. New air pollution sources (impacts on air conformity).		X	
15. Modification of public utilities.		X	
16. Reduction in force involving more than 1,000 employees.		X	
17. Relocation of 300 or more employees more than 50 miles.		X	
18. Excessive noise (presence of sensitive receptors).		X	

(Check one)

Is the proposed action listed as a Categorical Exclusion in 39 CFR, Part 775? ** Yes No

If the action is Categorically Excluded, are there any extraordinary circumstances identified in the checklist which may cause it to have a significant environmental effect? Yes No

If yes, please describe below.

Facilities Environmental Checklist

Action Required (*Check One*)

- The checklist contains no "Yes" answers, to the best of my knowledge; therefore no further NEPA review is necessary. Place this checklist in the project file.
- The Checklist contains one or more "Yes" or "Unknown" answers, to the best of my knowledge. The Facilities environmental specialist will determine the need for further environmental studies.

NOTE: Completion of Form 7498-D does not preclude, exempt, or fulfill due diligence process requirements. The Due Diligence Process must also be completed.

NOTES/COMMENTS:

6. The subject property is listed on the National Register of Historic Resources as the Bronx Central Annex - U.S. Post Office. USPS Law Department will review final purchase and sale agreement terms to address the use of protective covenants.

EDR NEPACheck® DESCRIPTION

The National Environmental Policy Act of 1969 (NEPA) requires that Federal agencies include in their decision-making processes appropriate and careful consideration of all environmental effects and actions, analyze potential environmental effects of proposed actions and their alternatives for public understanding and scrutiny, avoid or minimize adverse effects of proposed actions, and restore and enhance environmental quality as much as possible.

The EDR NEPACheck provides information which may be used, in conjunction with additional research, to determine whether a proposed site or action will have significant environmental effect.

The report provides maps and data for the following items (where available). Search results are provided in the Map Findings Summary on page 2 of this report.

WETLANDS CLASSIFICATION SYSTEM

National Wetland Inventory Maps are produced by the U.S. Fish and Wildlife Service, a sub-department of the U.S. Department of the Interior. In 1974, the U.S. Fish and Wildlife Service developed a criteria for wetland classification with four long range objectives:

- to describe ecological units that have certain homogeneous natural attributes,
- to arrange these units in a system that will aid decisions about resource management,
- to furnish units for inventory and mapping, and
- to provide uniformity in concepts and terminology throughout the U.S.

High altitude infrared photographs, soil maps, topographic maps and site visits are the methods used to gather data for the productions of these maps. In the infrared photos, wetlands appear as different colors and these wetlands are then classified by type. Using a hierarchical classification, the maps identify wetland and deepwater habitats according to:

- system
- subsystem
- class
- subclass
- modifiers

(as defined by Cowardin, et al. U.S. Fish and Wildlife Service FWS/OBS 79/31. 1979.)

The classification system consists of five systems:

1. marine
2. estuarine
3. riverine
4. lacustrine
5. palustrine

The marine system consists of deep water tidal habitats and adjacent tidal wetlands. The riverine system consists of all wetlands contained within a channel. The lacustrine systems includes all nontidal wetlands related to swamps, bogs & marshes. The estuarine system consists of deepwater tidal habitats and where ocean water is diluted by fresh water. The palustrine system includes nontidal wetlands dominated by trees and shrubs and where salinity is below .5% in tidal areas. All of these systems are divided in subsystems and then further divided into class.

National Wetland Inventory Maps are produced by transferring gathered data on a standard 7.5 minute U.S.G.S. topographic map. Approximately 52 square miles are covered on a National Wetland Inventory map at a scale of 1:24,000. Electronic data is compiled by digitizing these National Wetland Inventory Maps.

KEY CONTACTS & GOVERNMENT RECORDS SEARCHED

Various Federal laws and executive orders address specific environmental concerns. NEPA requires the responsible offices to integrate to the greatest practical extent the applicable procedures required by these laws and executive orders. EDR provides key contacts at agencies charged with implementing these laws and executive orders to supplement the information contained in this report.

LANDMARKS, HISTORICAL, AND ARCHEOLOGICAL SITES

Historic Places

Government Records Searched in This Report

National Register of Historic Places:

The National Register of Historic Places is the official federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, engineering, and culture. These contribute to an understanding of the historical and cultural foundations of the nation.

The National Register includes:

- All prehistoric and historic units of the National Park System;
- National Historic Landmarks, which are properties recognized by the Secretary of the Interior as possessing national significance; and
- Properties significant in American, state, or local prehistory and history that have been nominated by State Historic Preservation Officers, federal agencies, and others, and have been approved for listing by the National Park Service.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/15/2012 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PROW BUILDING	560 EXTERIOR ST	WNW 1/8 - 1/4 (0.196 mi.)	P83	394

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 6 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 10/03/2012 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

Class Code: Significant threat to the public health or environment - action required.

VAPOR REOPENED: "Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

A review of the VAPOR REOPENED list, as provided by EDR, and dated 05/01/2012 has revealed that there is 1 VAPOR REOPENED site within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 10/10/2012 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 38 HIST LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/20/2012 has revealed that there are 12 NY Spills sites within approximately 0.125 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there

EXECUTIVE SUMMARY

are 8 NY Hist Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 22 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: 4/28/06- DEC Piper spoke w. Bruce Beck of NATIONAL. aS per conversation he has completed a phase II on an E designated site. VOC asn ,metal contamination in GW. LEft message for Bruce requesting copy of report fro review. Afterwards a meeting can be held.05/18/06 - Reviewed Site Investigation Report. NYCDEP is dealing with the contaminated soil under the Hazardous Materials "E" Designation provision. The highest TVOCs in GW is 1.5 ppm. NYCDEP has required vapor barrier and sub-slab venting system to be installed beneath the proposed new building. The residual GW contaminations do not pose any immediate risk to the environment and should biodegrade over time. This spill is inactivated. - KST

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: Sangesland left a voice message with Leon Battiste to call back with more information on the problem with the oil fill port at the building.***Site visit may be required***08/13/08-HRAHMED-DEC Ahmed responded to the site on 08/12/08. Niticed oil stain around the fill port on sidewalk. Met with building cleaner James. Ahmed told James that they need to clean the oil stain around the fill port. He asked Ahmed to call the building Management at 718 548 8800. Ahmed called that number and spoke to Meben and told about the requirements to clean the fill port. She told that she would email her boss to arrange cleanup. After cleanup she would call DEC Ahmed to report the cleanup. When Ahmed was leaving the site, he saw James trying to cleanup the stain with a shovel. Ahmed took some pictures and uploaded to eDocs. Since its only a minor stain, as per field observation, this case is closed.

Remarks: ongoing near fillport:

DEC Memo: Report in edocs.09/24/10-Farrell-Report review requested by S. Rahman.Spill closure request for Spill #09-12104 by (Kleinfelder East, Inc.-Joel Adrian/Alex Wirth-(845)-567-6530) June 18, 2010SAR prepared by (Groundwater & Environmental Service, Inc.-Kelly McBride/Kevin Bradley-(866)-839-5195) March 22, 2010 for ExxonMobil Environmental Services Company, Fairfax, VA.Location of interest:ExxonMobil Station No.12971 (17-KTA)611 Grand ConcourseBronx, NYGES (listed above) evaluated recognized environmental conditions (REC) conducted in 12/08 by Kleinfelder East, Inc. Property consists of a retail petroleum filling station. Grand Concourse followed further by commercial buildings and Cardinal Hayes High School (east), 151st Street with a McDonalds beyond (south), multi-family residential housing (west), & railroad tracks followed by a New York City Park (north). Ground surface elevation is about 101' above sea level, groundwater found at depths of 11.72-38.90'bgs, northeast flow determined. Four (4) tank field observation wells are monitoring points at the corners of the tank field. KEI (above) reported no public water-supply wells on the property or adjoining properties & no private potable within 1,000 ft of the property. REC's include (5) current 4,000 gal gasoline USTs with piping and dispensing units. The property was also found to be potentially down gradient of other known spills. Three (3) previous spill cases: NYSDEC #8902680 (contamination found during UST excavation) - opened 6/5/89 - closed 3/21/91 (400 cu yds of soil removed), NYSDEC #8902416 (presence of stockpiled soil; no contamination found) - opened 6/8/89 - closed 6/8/89, NYSDEC #9209173 (indication of leaks at all probe sites from UST alarm system) - opened 11/6/92 - closed 3/22/95. GES began Phase II ESA on 12/2/09 with site-wide GPR survey. Three (3) monitoring wells were installed; soil & groundwater samples were taken and analyzed. Results of soil sample analysis included: SVOC detect above NYSDEC TAGM: Benzo(a)pyrene - in MW-1 (.165ppm), in MW-3 (.106ppm), & in MW-4 (.0706ppm)Lead & Chromium detectOn 1/4/2010 groundwater samples were collected and analyzed, no free-phase product was observed. Three of four field tank observation wells (TF-1 - TF-3) were gauged on 1/4/2010. The wells were dry with no presence of LPH. Results of groundwater sample analysis included:VOC detect in MW-4: Benzene(23.1ppb)VOC detect in MW-1: MTBE (44.5ppb)SVOC detect in MW-1: Benzo(b)fluoranthene (4.0ppb)11/03/10 Residual contamination slightly above the limit.Case can be closed.(sr)

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY" FUEL OIL UST WAS CLOSED IN PLACE BY TYREE, LATER THEY DID 4 CLOSURE BORINGS, 3 TO 10 FEET (REFUSAL), 1 TO GROUNDWATER AT 16 FEET. BORING TO GW FOUND SOIL CONTAM. AND GW CONTAM, INCLUDING FLOATING PRODUCT. KOLLEENY ASKED TYREE TO FORWARD CLOSURE RPT. WHEN AVAILABLE; ALSO CONTACTED LIRO-KASSNER, DDC'S CONSTRUCTION MGR. FOR SITE, AND REQUESTED EXPEDITED INVEST. OF SITE AND INCLUSION OF HEATING OIL TANK.8-22-2005 Reviewed a Monitoring Report dated July 29, 2005. The report presented remedial system performance and groundwater monitoring data. In the report LiRo proposed to modify the current groundwater sampling schedule. Also, LiRo recommended completing proposed soil borings LBR-9 and LBR-10 with shallow screens to allow them to serve as pressure monitoring points in order to better evaluate system performance. The Department concurred with these proposals. AZ7/5/2006 Reviewed a Monitoring Report for the remedial system dated April 21, 2006. The site was formerly managed by Jonathan Kolleeny (NYSDEC). The report presents remedial system performance monitoring data. Groundwater samples were collected from monitoring wells MW-2, MW-6 and MW-10 on March 1, 2006. TVOCs in MW-6 is 139 ppb which is the highest number observed in this well. The numbers are on the clear upward trend in this well. MW-10 - TVOCs - 91 ppb, MW- 2 - TVOCs - 91 ppb - upward trend. AZ11-20-2006 AZ reviewed a Monitoring Report for the remedial system dated August 9, 2006. URS proposed to advance a confirmation soil boring SB-5 near MW-04, LBR-02 and PM-01. DEC concurred with proposal. In a conversation with Jane Staten (URS) on 11/8/2006 I discussed the necessity of additional of the fuel oil spill. URS will send their people and will try to locate the source of this spill. AZ12-18-2006 Reviewed a Monitoring Report for the remedial system dated August 10, 2006. MPE is operated at the site. The vacuum measurements ranged from 0 (MW-07) to 3.1 The closest extraction well to MW-07 has been shut off. Total VOCs and naphthalene ranged from 1 ppb to 56 ppb in

S104284721

MW-02. Low volumes of gw were extracted and treated during this monitoring period. URS has instructed Franklin to adjust the drop tubes in an effort to extract more groundwater. AZ1-9-2007 Reviewed a Monitoring Report July through October 2006 for the remedial system dated November 14, 2006. MPE is operated at the site. Flowmeter broke at the end of September. It was not fixed; therefore, the total amount of gallons treated is unknown. Vacuum readings in MW-14 is 0 on 3 occasions. GW results - 65 ppb of total VOC in MW-02.

AZ1/23/2007 At the meeting with DDC/URS on January 10, 2007, the site was discussed. The firm, ATC Associates, will be taking over operation of Manhattan West 9. DEC requested that URS will analyze and improve performance of MW-14. AZ7-6-2007 Reviewed a Monitoring Report for the remedial system for the period of November 2006 through January 2007 and dated February 15, 2007. MPE is operated at the site. The MPE flowmeter continues to malfunction and requires replacement, but ATC will replace the flowmeter at this time. According to the report, only monitoring well MW-02 is exhibiting contaminant concentrations above DEC GW Quality Criteria. The minor exceedances in MW-02 are too low for remedial treatment. On December 2007 URS advanced two soil borings. The analytical results showed VOC exceedances of TAGM #4046 in each soil sample. Total VOCs ranged from 403,400 to 446,260 ppb. Based on the latest sampling results URS will operate MPE system using only extraction well EW-09. Also, drop tubes will be raised to 5' above GWT to focus on vadose zone contamination. If MPE modifications are not effective, URS will excavate any remaining vadose zone soil contamination. AZ11-30-2007 11/30/2007 I have reviewed System Performance Monitoring Report for the period April through August 2007. An e-mail was sent to DDC/URS/V. Brevdo: "...URS will sample all monitoring wells during the next quarterly groundwater event. Also, URS will advance a soil boring near the location of boring SB-05. URS requested NYSDEC permission to shut down the MPE system while samples are collected. This recommendation is rejected. Neither soil sampling results of the previous sampling round nor a figure with estimated extent of soil contamination were included in the report. Soil sampling data should be included in proposals for future borings and/or proposals for the system shutdown. Soil sampling performed in December 2006 showed total VOC contamination in a range of 400, 000 ppb. These high levels of soil contamination justify continuing operation of the MPE system."

AZ6-5-2008 An e-mail was sent to DDC/URS/V.B.: "There is a spill #9910856 which was issued for this location and associated with the #2 fuel oil tank. This tank should be identified and the spill addressed." AZ6/9/08. Address was corrected from 99 East 149 to 125 East 149th to match PBS registration. JMK.6-11--2008 I updated Jane Staten on the DEC Spill Records. According to the spill records h#2 fuel oil tank was closed in place and closure borings confirmed soil and groundwater contamination. DEC requested investigation/remediation of the heating oil tank. Information regarding investigation/remediation of the heating oil tank has yet to be submitted to DEC. According to Jane Staten (URS), the tank information and the site plan do not match 125 East 149th Street address. They will investigate and report their findings to DEC.

AZ9-12-2008 Reviewed URS report dated June 12, 2008. The report summarized existing information regarding spill #9910856 associated with the #2 fuel oil tank. In investigation Summary and Remedial Plan (ISRP) Addendum 2, dated May 2, 2008, LiRo addressed the issue of the 2,000-gallon heating oil tank closed in-place in December 1999.

Remarks: Closure soil samples were collected on December 13, 1999. LiRo considered the closure data during the design of the MPE system and placed extraction well EW-03 adjacent to TB-02, the only contaminated tank closure sample. The analytical data for LBR-03 was clean, which demonstrated that the soil in the area had been remediated. Since this spill was addressed by the MPE remediation system URS recommended that spill #9910856 be closed. I concurred with this proposal and based on the above information closed this spill. An e-mail was sent to DDC/URS/V. Brevdo. AZ called in for site assessment on closed tanks and found contaminated soil and groundwater, poss sewer.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

EPA Region: 02
Land type: Federal
Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Remarks: Flush facility. Double washed and rinse with 760 bio-gen solution. Cable ends were sealed.17-SEP-2004 10:00 hrs.Incident being re-opened due to re-leak of sealed cable ends.U/G Supervisor G. Meiers 14850 reports sealed ends have re-leaked and 1/2 pt. of dielectric fluid has leaked onto recently cleaned MH concrete floor. Cable ends have been re-sealed with larger sealing boot preventing further cable end dielectric fluid leakage. Crew is starting cleanup as of 10:30hrs.17-SEP-2004 11:47 hrsU/G Supervisor G. Meiers 14850 reports cleanup completed. Affected area of concrete manhole floor was spot cleaned. Area was double washed using 760 biogen soap and absorbants. 1/2 gallon spilled.poor seal on end of cable caused the spill.no smoke,fire,sewers,or waterways affected.the 1/2 pint was discovered at 9:30 this morning.they recapped it to stop the leak

 DEC Memo: 159570. 05-Jul-2005 05:15 hrs. Flush Mechanic, Jonh Maloney (05863) while preparing to flush MH-4506 located at SWC e149 St & Gerard Ave, Bronx, NY, reports finding ~ 6 oz of unknown oil in the dirt of a dry manhole. No fire/smoke is/was involved. No sewers, waterways or private property were affected. No injuries were reported at this time. Crew hung environmental tag # 40794 in structure. Crew took 2 samples for PCB & OIL ID on chain of custody (dd-09490). Clean up pending sample results. L Fischer 5578405-July-2005 09:20 hrs. At 09:15 hrs. Bx/West Underground OS. D. Scarimbolo # 87659 reported that the oil in the manhole is leaking from a primary joint on the floor of the manhole and will require a feeder outage to make repairs. This incident has been changed to a reportable spill due to this and that the cleanup will no longer meet the 24 hr. deminimis time criteria. CIG. Rep. T. Parker # 87739 notified. R. Browne # 21646 Not reported
 Remarks: coming off 24 hour due to a default in manhole: coned # 159570: no to 5 questions;

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

LTANKS:

Site ID: 397682
Spill No: 0801696
Spill Date: 5/9/2008
Spill Cause: Tank Test Failure
Spill Source: Commercial/Industrial
Spill Class: Known release with minimal potential for fire or hazard. DEC Response. Willing Responsible Party. Corrective action taken.
Spill Closed Dt: 9/13/2010
Facility Addr2: Not reported
Cleanup Ceased: Not reported
Cleanup Meets Standard: False
SWIS: 0301
Investigator: bkfalvey
Referred To: Not reported
Reported to Dept: 5/13/2008
CID: 404
Water Affected: Not reported
Spill Notifier: Other
Last Inspection: Not reported
Recommended Penalty: False
UST Involvement: False

DEC Memo: 6/18/08 bf: Sent ttf letter to:Ross SposatoChairmasters, Inc.200 East 146th St.Bronx, NY 104516/30/08 Received letter from Ross Sposato of Chairmasters. Tank tested on 5/9/08 and failed. Tank was excavated and they are in the process of isolating lines. Also received message from him on 6/26/08 stating the same. (718)292-0600 x-205. bf7/29/08 On 7/14/08, received letter from Ross Sposato of Chairmasters. Advanced Tank retested tank and tank passed. Piping will be replaced. After he receives test results, he will send test results and PBS Application. Called Ross S. (718)292-0600 x-205. Returning his call. Left message that there is no fee for tank test processing. Also, noted that a reply to my letter for tank test failure is required to be prepared by third party and needs to explain contamination and repairs made. bf8/25/08 Received passing tank test report. on 7/31/08. Reviewed and found it not acceptable because technician did not sign the report. Sent tt return letter to Ross Sposato at address above and included request for tank test failure letter response. bf9/5/08 Yesterday, received message from Ross of Chairmasters. Info was mailed yesterday. bf9/13/10 Received call from Ross of Chairmasters. He wanted the status of his tightness test report. I told him I have not received the report nor did I receive a response to the ttf letter. He said that he will fax letter and report to me. bf9/13/10 This afternoon received fax from ATS that the piping was replaced and there was no spill. Tank tightness test report is still needed to close this case. bf9/13/10 later this afternoon, received passing tank test report by fax. NFA. bf9/20/10 Received call from Ross Sposato requesting letter for closure. Faxed amnd mailed it to him. Fax:(718)292-0613. bf
Remarks: PBS No: 2-085464lines in the petromiter failed

Construction Authority). Old abandoned school. Vandels have taken copper wires and pipes out of the building. "Some" oil contamination in a 2 ft x 2 ft pit in the basement floor. Tank was still intact with oil in the tank. Consultant hired by School Construction Fund will drain the tank, clean the basement floor (power wash) and will dig out the pit location, do end point samples. Unknown if the city will renovate the building or knock it down and rebuild. 10/2/07- DEC piper left message for mike req callback and info. 1/28/07- Piper reviewed closure report. As per report, spill was due to vandalism. Contractor cleaned floor and excavated area of concern. Endpoints revealed low level svoc's in one location. All others below TAGM or clean. This spill is closed. see e-docs if warranted.

Remarks:

CONTRACTORS NOTICED THAT SCAVENGERS STRIPPED THE COPPER OUT OF BUILDING AND THE CONTENTS WENT ON THE FLOOR: THERE IS A 2X2 HOLE IN FLOOR AND IT ALSO WENT DOWN THERE

Contact Phone: (914) 448-2266
DEC Memo: CSL prepared and sent to Consultant:Woodard and CurranAttn: MICHAEL VANDERHEIJDEN709 Westchester AveWhite Plains, NY 1060404/24/08-Vought-Called Michael VanDerheijden (Ph:914-448-2266 Fax:914-448-0147) and left message to return call to DEC. Owners contact as per PBS (Frank Virone 718-518-4476). Vought sent and faxed CSL with one month due date to mail address as per PBS #2-452319:Mr. Frank VironeHostos Community College500 Grand ConcourseBronx, NY 10451DEC requires: 1)delineation of soil and groundwater contamination 2)collection of endpoint soil samples if excavation is performed 3)possible PBS update.04/25/08-Vought-Received call from and spoke to Vanderheijden and data has not been received and product was present. Groundwater very shallow and some free product on groundwater. Depth to groundwater is one foot below grade. Sump five feet away and water in sump has been clean. Further action pending receipt of analyticals. Spill located in basement of building and spatial constraints may restrict excavation. Tank has been cleaned and filled with cement. Spill may be associated with an prior overfill. Tank that was abandoned was technically as UST in a vault in a two teir basement and only access to tank is via manholes. PBS will be changed from temporarily out of service to permanently closed and PBS registration was submitted as per Vanderheijden. Possible action may include additional borings once analyticals are received. Report will be received within two months and deadline extended till June 27, 2008.05/02/08-Vought-Received call from and spoke to Vanderheijden and he received letter with one month due date and requested letter extending till 6/27/08. Vought sent email to Vanderheijden with above notes from 4/25/08 extending deadline.05/29/08-Vought-Received fax from Woodward and Curran (Van Der Heijden) dated 5/29/08. 10,000-gallon #6 fuel oil UST located in a "very confined area surrounded by electrical and boiler equipment that services the entire building". UST was closed including removal of product and filling with concrete slurry to close in place on 3/25/08. Soil and groundwater samples collected adjacent to the tank and "droplets of oil were observed floating on top of the water". Groundwater analyticals showed no detections of VOCs or SVOCs. Proposal to install three additional borings and redrilling of original sample locations in floor and performance of a bail down test to examine product recharge into borings. "Once all reasonably recoverable petroleum product has been removed, CUNY will cease recovery backfill holes and notify the DEC".DEC requires: 1)site plan 2)backfill holes only upon approval from DEC and absence of free product as opposed to reasnably recovered.Vought called Van der

Heijden and explained above requirements and requested site plan before approval can be provided. 10/03/08-Vought-Received emailed site plan from Van Der Heijden on 6/11/08. Vought called Van Der Hiejden to clarify "pumps" adjacent to UST location on site plan. Site plan also has two proposed sampling locations instead of three location as per 5/29/08 proposal. Vought left message to return call. Vought received callback from and spoke to Van der Heijden and pumps adjacent to UST on site plan are sump pumps that have had no history of product detection however two sampling locations farther away from two sumps had prior history of free product in borings. Van Der Heijden will install three to four additional borings to confirm the presence/absence of product and collect groundwater samples in locations of prior borings and assumed downgradient locations. Vought sent letter approving of 5/29/08 proposal with cc to Van Der Heijden. 07/27/09-Vought-Received call from John Virgie (Obrien and Gere-732-225-7380) and they will be replacing Woodward and Curran (former consultant) and they will be implementing scope dated 5/29/08 but only difference will be wells be installed instead of borings. DEC will receive report by 11/15/09. 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A.6/14/10 - Raphael Ketani. On 8/6/09, a letter was received from O'Brien & Gere confirming discussions between Mr. Vought and Mr. Virgie regarding the proposed subsurface investigation. On 8/10/09, a letter was received from O'Brien & Gere which had the same content as the 8/4/09 letter, but with the addition of an LSIR submission date and a remediation report submission date. Mr. Vought had received the 11/6/2009 Limited Subsurface Investigation Report (LSIR) on 11/9/09. I reviewed the report today. The three groundwater samples were all non-detect for SVOCs and VOCs. The seven soil samples were non-detect for VOCs and almost entirely non-detect for SVOCs. The soil sample from MW-3 at 4 to 6 feet had a series of very low SVOC hits (some of which were exceedences for the benzo group of analytes), but the concentrations are not typical of oil contamination. I tried to contact John Virgie of O'Brien & Gere (732) 225-7380 regarding the report and the need to do a boring at each end of the tank, but I could only leave a phone message. 6/15/10 - Raphael Ketani. I tried to contact Mr. Virgie on his cell (609) 306-0509 regarding the site investigation, but could only leave a message. 6/17/10 - Raphael Ketani. I tried to contact Mr. Virgie regarding the site investigation, but could only leave a message. Mark Randazzo of O'Brien & Gere (781) 883-6432 called in response to my attempt to contact Mr. Virgie. He said that he started the project and usually works on the CUNY site. He said that he is familiar with the project. I asked him why borings were not done at the ends of the tank as there seemed to be enough room to get some equipment to these locations. Mr. Randazzo said that he wasn't sure why. However, he said, the borings and wells that were installed were in an area that was lower than the tank and downgradient. Mr. Randazzo said that he will look at the project again and get back to me. 6/18/10 - Raphael Ketani. Mr. Randazzo called me back. We discussed the site and the presence of droplets of oil in the 2008 groundwater samples. He stated that O'Brien & Gere will bring the matter to the attention of staff at Hostos Community College regarding attempting to install two temporary wells (one at each end of the tank). The most contaminated soil sample would be taken from each boring and a groundwater sample. 6/23/10 - Raphael Ketani. Mr. Randazzo sent me the following e-mail today: O'Brien & Gere

HOSTOS COMMUNITY COLLEGE - TRAILER #5 (Continued)

1009312355

respectfully requests that you reconsider your request for additional soil borings and temporary wells in the area of the UST, based on the following: - wells were installed hydraulically downgradient from the UST and no oil was found; - No. 6 oil is characteristically not very mobile; - when the building is taken down, any limited LNAPL present in the area of the tank will be removed; - the sub-basement sump near the UST was found to be free of No. 6 oil; and - according to Hostos personnel, utility drawings in direct vicinity of the tank, electrical equipment, and pump area are not available. Based on this information we ask that you reconsider this request and close the spill number. 6/24/10 - Raphael Ketani. As the product lost is #6 oil which has a low concentration of volatile components, if any, and as no oil has been seen in the groundwater during 2009, and as there are no plans to show where the electrical lines are next to the tank - which poses a safety concern for drilling through the floor in the tank room, I am closing the spill case.

Remarks: DOING SOIL BORINGS CAME UPON CONTAMINATED SOIL

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

S104278682

Mobil) which indicated elevated BTEX existed in both groundwater and soil, but no free product was found. Upon transfer of property(8/90), the new owner began to install new USTs. During tank replacement, 875 tons of contaminated soil was removed and disposed of. During construction, two upgradient wells were destroyed. Three downgradient wells remained intact. The two wells which were destroyed showed ND for BTEX during sampling. In May 1991, there was an apparent vapor problem in the kiosk at the now active Amoco station. Amoco installed a venting system to alleviate the problem. Based on this, Mobil installed two borings and one well in the vicinity of the kiosk. The report indicated that the soils surrounding the kiosk did not contain very high levels of BTEX in soil. The monitoring well installed contained 0.01' of product. This well is upgradient of all former Mobil tank areas. Additional construction at the site for a car wash has destroyed three downgradient wells. Thus, only one well remains on the property. However, upon completion of the construction, up to ten additional wells shall be installed at the site. Wells will be installed after construction is completed. 11/91 Eleven monitoring wells and a sparge point were installed.12/9/91 MW-11 had 0.84' of product.1/22/92 MW-11 had 0.21' of product.2/20/92 MW-11 had 7.16' of product. A vac truck has been scheduled on a biweekly basis to extract LNAPL from MW-11.3/92 LNAPL was detected in MW-11 (0.07-3.02'). Approx 70gal was extracted from MW-11 on 3/4, 3/13, 3/16 using vac truck. Trace amounts of LNAPL were hand-bailed from MW-11 on 3/18 & 3/27. Water sample from car wash well was collected by Tyree, analyzed by Method 602, and returned ND.4/92 MW-11 had 0.08-0.18' of LNAPL and approx 2.5gal LNAPL bailed.6/8/92 An EZY Skimmer was installed in MW-11.7/92-6/93 No LNAPL was detected in any wells.1/94-3/94 MW-10 had 0.28' product. MW-11 had 0.01' product. 5/94 MW-11 had trace amount of product.7/11/94 SVE started. DTW 16' bgs. 6 combination SVE/AS points. Will sample all MWs before sparge system started.2/8/95 0.01' product in BD-1. BTEX from ND(MW-1) to 30,000ppb(MW-5).10/27/99 Cross Deegan Realty notified by station operator of possible inventory loss. Alvin Petroleum exposed portions of system over next two weeks. No system leaks were detected.11/9/99 Alvin Petro. requests a tightness test be performed. Crompco detected a leak in one of the four tanks and reported the failure.11/10/99 Alvin Petro. exposed and removed remote fill box on the tank that failed test. A coupling that connects the piping to the overflow box was found cracked. The coupling was replaced and system retested tight.11/16/99 Crompco retested system with FDNY and passed.11/22/99 Impact Environmental performed a limited subsurface investigation of soil adjacent to coupling and concluded that gasoline had impacted soil/GW. Report states that current owner only intends on addressing contamination from 10/99 spill and not the 1992 spill.10/31/00 Three wells sampled and gauged. SVE system removed from service. ORC socks in wells MW-1 and MW-5. BTEX from 15ppb(MW-12) to 868ppb(MW-1). MTBE from 31ppb(MW-11) to 49,000ppb(MW-1).2/5/01 Seven wells sampled. BTEX from ND(MW-12) to 240ppb(MW-1). MTBE from <1ppb(MW-12) to 64,000ppb(MW-7).4/26/01 Seven wells sampled. MTBE has increased in monitoring wells hydraulically downgradient from the current dispenser island and USTs. MTBE ranged from 14ppb(MW-11) to 920,000ppb(MW-10). BTEX ranged from 12.8ppb(MW-11) to 6,080ppb(MW-10).10/23/01 Eight wells sampled. BTEX from 14ppb(MW-6) to 4,750ppb(MW-10). MTBE from 18ppb(MW-11) to 270,000ppb(MW-10).1/17/02 Eight wells sampled. BTEX from ND(MW-5) to 1,794ppb(MW-10). MTBE from 29(MW-5) to 65,000ppb(MW-7).4/30/02 Six

wells sampled. BTEX from ND(MW-5 & MW-6) to 1173ppb (MW-10). MTBE from 7.6ppb(MW-1) to 24,000ppb(MW-5).5/15/02 Sensitive Receptor survey identified PS 31 approx 850' to the southeast. There are residential and commercial buildings with basements immediately adjacent to the site to the north. A subway tunnel is located beneath E 149th St.

-----03/
17/03 REASSIGNED FROM ROMMEL TO VOUGHT.11/18/03 Received CAP/Remediation Plan, 3rd Quarter 2003 monitoring report, and tank test results(pass).12/10/03 Reassigned from Vought to Foley. See closed spills #0307681, 9208906.Review of Remediation Plan:A SVE/AS system was installed by Handex and operated on the property to address spill #9208906. The system is comprised of four soil vapor extraction wells and six air sparge points. At this time, the system is not operational. A monitoring program is being performed.11/9/99 Tank system tightness test performed by Crompco indicated a leak near the remote fill box. The leak was repaired. Soil staining and petroleum odor was noted below the fill box. Spill 9909670 was reported.11/22/99 Impact Environmental started subsurface investigation. Groundwater results exceeded standards.7/7, 7/25, 10/23/00 Enhanced fluid recovery performed on MW-2 as an IRM.Impact Environmental proposes 1) monthly EFR on hottest wells for 6 months, 2) replacement/upgrade of air sparge equipment installed to address #9208906, 3) SVES to be modified to include MW-2.9/3/03 Impact Environmental sampling data (for Amoco): BTEX levels range from ND(MW-5, 11, 12) to 1606ppb(MW-6). MTBE ranges from ND(MW-12) to 650,070ppb(MW-6).10/6/03 GSC sampling data (for Mobil): BTEX ranged from ND(MW-2) to 3800ppb(MW-6). MTBE ranges from 9.8ppb(MW-11) to 1,240,000ppb(MW-6).11/26/03 Impact Environmental data from 4Q2003 report shows MW-6 and MW-2 to be hot spots. BTEX ranges from ND(MW-12) to 6923ppb(MW-6). MTBE ranges from ND(MW-12) to 869,600ppb(MW-6).2/2/04 Faxed stip to Mr. Hank Alpert, Cross Deegan Realty. Due back 2/23/04. (FAX 516-365-1606)2/11/04 STIP returned. Cover letter states that a previous CAP for spill #9909670 was already approved by DEC and was authorized to develop CAP for spill #0307681 (dated 11/13/03).2/13/04 STIP fully executed.3/4/04 Letter received from DDC(Bruce Rottner) to J. Semelmacher. Requests Amoco's participation in DOT reconstruction project instead of reimbursement of cleanup costs.3/15/04 Called B. Rottner. He explained that he recieved a phonecall from the owners attorney who stated that contamination was from a Dept of Sanitation garage. However, monitoring well on that property was installed and was clean. Spartan will be sending another letter to DDC at which time B. Rottner will forward a copy to me. 3/10/04 Received 1Q04 monitoring report. Need to delineate around MW-6 and MW-2.6/18/04 Received 2Q2004 monitoring report.6/30/04 Met with Spartan Petroleum (H. Alpert) and Impact Env. Received hand-delivered letter dated 6/28/04. Site is located on 149th St between Gerard and River Avenues. The site was impacted by a release detected in 1992 while under lease to Mobil Oil. Mobil installed an SVE/AS system. A new release was confirmed and Spartan released Mobil from contractual obligations. As an IRM, EFR was performed on MW-2. Approx 1075gal GW was extracted. An enhanced SVE/AS was run from July 12, 2001 to the present. During the period from 11/9/99 to 3/3/03, there was a steady decline in contaminant concentrations. In May 2003, BTEX concentrations began to increase unexpectedly. A system test was performed and all lines and tanks tested tight. An off-site source was suspected. Identified a NYCDOS

S104278682

truck terminal upgradient. Also found many monitoring wells on the NYSDOS site. Thru a FOIL request, review of the NYSDEC files indicate that the NYCDOS site is impacting 99 E 149th St. Request closure.10/4/04 Received 3Q04 monitoring report.11/19/04 Met with K. Kleaka and K. Scroope, Impact Env. NYCDOS property on eastside of Gerard Avenue (DOS Manhattan West 9). See spill #s 9513870, 9910856.11/23/04 Email from J. Kolleeny- City's consultant, LiRo, had been performing EFR on wells with free product for several years until last year when a multi-phase extraction system went on line. A MW along E 149th St has had product in it which LiRo identified as weathered #2FO. Although they have been willing to vac out this well, and the remedial system now has extraction wells near it, LiRo has argued that the product in the well was likely coming from off-site because they claimed there was no DOS tanks at that end of their site. However, the PBS list an old 2000gal heating oil tank and a new (4/03) tank at the site. Asked LiRo to locate these tanks. Will keep me updated.4/13/05 Spoke to K. Kleaka, Impact Env. Will be proposing to shutdown system soon as recovery is decreasing. Still concerned about DOS site having impacts on property. Proposal will include confirmatory soil sampling.5/6/05 1Q05- GW sample collected on 3/14/05 from MW-8 did not detect any VOCs. Samples from MW-1 and MW-5 detected concentrations of VOCs but not above GWQS. MW-12 was paved over. Several detected concentrations from MW-2,6,7,9,10 & 11 exceeded GWQS. These concentrations are within ROI of system. Told H. Benjamin that it was not necessary to reinstall MW-12.5/23/05 Sent email to K. Kleaka, Impact Env. After reviewing the July 2004-Sept 2004 and Jan 2005-March 2005 quarterly reports for Manhattan West 9 (operated by NYCDOS at 125 East 149th St, Bronx), it is not clear that the contamination detected at MW-2 is due to impacts from the NYCDOS facility. Historical data for 99 E 149th St shows a significant spike of MTBE at MW-6(869.6ppm) and at MW-2(191.2ppm). The historical data for the NYCDOS facility, dating back to 2000(with some data gaps), does not indicate that the facility is acting as a source of off-site contamination. The only MTBE detection in the NYCDOS wells was in the NW corner of the property(170ppb in 1/00). NYSDOS has been operating a MPE system since 11/12/03.11/8/05 3Q05 report - Total of 537.84lbs of hydrocarbons removed. Approx 9lbs recovered in last 22 day period. Groundwater concentrations highest in MW-2 at 1420ppb total BTEX and 1500ppb MTBE. MW-6 at 100ppb BTEX and 53ppb MTBE. MW-7 at 10ppb BTEX and 56ppb MTBE. 1/11/06 Met with K. Kleaka and H. Benjamin, Impact. To submit 4Q05 report. Redeveloped sparge points to try and increase efficiency of system which continues to operate.2/17/06 4Q05 report submitted. SVE continues to operate. Lab analysis from 11/28/05 did not detect VOCs in MW-8. Wells MW-5 and MW-11 had concentrations which did not exceed GWQS. Samples from MW-1,2,6,9,and 10 did exceed GWQS.3/30/06 1Q06 report submitted. BTEX from ND(MW-1,5,6,8,9,11) to 970ppb(MW-2). MTBE from ND(MW-5,6,8) to 980ppb(MW-2). SVE continues to operate. Total estimated hydrocarbons recovered is 538lbs.6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM11/27/06 Reviewed 2nd and 3rd Qtr 2006 Monitoring Reports. Groundwater contamination persists in the area of monitoring well MW-2 (~4000ppb). H. Benjamin of Impact Env. proposed performing a pulse test on the system to see if rebound will occur since the system appears to have reached asymptotic conditions. I sent an email to Mr. Benjamin requesting a map showing the radius of influence for each air sparge and SVE point and that GW contamination at MW-2 must be addressed. I also asked if

AMOCO (Continued)

S104278682

there was soil contamination at the site. If so, has the SVE system effectively treated it? Must prove by confirmatory soil sampling. Email is in the file. - JAM02/13/07 Reviewed a letter submitted by Impact Env. and dated January 17, 2007. The letter proposes:1. All monitoring wells will be redeveloped utilizing a surge block and vacuum truck.2. Monthly Enhanced Fluid Recovery (EFR) events will be performed on MW-2 to reduce the contaminant concentrations in the surrounding area. Said events will be performed utilizing a 2X4 inch diameter K-Packer on a 2-inch diameter drop pipe to maximize liquid and vapor capture.3. Groundwater sampling will continue on a quarterly schedule.4. SVE & Sparge operations will continue with the existing system. I sent an email approving these proposals. Groundwater sampling data and recommendations will be submitted in the next quarterly report. A hard copy of the email will be in the file. - JAM3/29/07 Reviewed 4th Qtr 2006 Monitoring Report submitted by Impact Env. and dated March 6, 2007. All wells were sampled on November 29, 2006. Results were non-detect for total VOCs except for MW-2, which shows persistent levels of VOCs (2,675ppb Total VOCs). The SVE/AS system continues to operate at the site. According to the report, monthly EFR events on MW-2 should have begun in February 2007 and results will be included in the next Monitoring Report. - JAM6/21/07 Reviewed 1st Qtr 2007 Monitoring Report submitted by Impact Env and dated May 30, 2007. On February 28, 2007, all wells were redeveloped and EFR events commenced on MW-2 All wells were then sampled on March 1, 2007. Wells MW-1, MW-6, and MW-9 showed non-detect results for total VOCs. Wells MW-5, MW-7, MW-8, MW-10 and MW-11 had slight exceedences for Napthalene (ranging from 68ppb to 100ppb). MW-2 showed a decrease of total VOCs from last monitoring round to 1,936ppb. The SVE/AS system continues to operate. - JAM12/04/07 Reviewed 2nd Qtr 2007 Monitoring Report submitted by Impact Env and dated Sept 18, 2007. All wells were sampled on June 14, 2007 and monthly EFR events continue on MW-2. Wells MW-1, MW-2, MW-9, MW-10 and MW-11 showed exceedences for total VOCs. Wells MW-5, MW-6 were not sampled because they were dry. MW-2 still has the highest level of VOCs, however, it showed a decrease from the last monitoring round to 857ppb from 1,936ppb. The SVE/AS system continues to operate. - JAMReviewed 3rd Qtr 2007 Monitoring Report submitted by Impact Env and dated Oct 30, 2007. All wells were sampled on Sept 6, 2007 and monthly EFR events continue on MW-2. Results from wells MW-1, MW-2, MW-5, MW-6, MW-7, MW-8 and MW-9 showed non-detect levels for total VOCs. Wells MW-10, MW-11 showed minor exceedences for MTBE (44ppb and 50ppb respectively). Based on the latest result, monthly EFR events appear to have effectively reduced contaminants in MW-2. The SVE/AS system continues to operate. - JAM4/14/08 Received a call from Hal Benjamin about the Exposure Assessment submitted in March 2008 by Impact Env. They are requesting spill closure and I will get back to him after I review the report. - JAM5/1/08 Reviewed Exposure Assessment Report. Based on the Exposure Assessment, Impact Env. concludes that the source of contamination has been effectively mitigated and small levels of residual groundwater contamination pose no threat to human health. Impact requests spill closure. I requested a summary of historic soil data associated with this spill. -JAM6/11/08 Spoke to Hal Benjamin, Impact. An on-site well provides the operating car wash with water. I requested that this well be sampled and results reported in a letter. Spill closure will be reevaluated when results are available. - JAM8/8/08 Reviewed letter from Spartan dated July 16, 2008. The on-site well that services the

Remarks: carwash was sampled and all analytes were found non-detect. I called Hal and asked the depth at which the car wash well pulls water from and if there are any sampling requirements for that well. He will get back to me. - JAM11/13/08 Since the on-site car wash supply well did not detect and VOCs and only minor levels of MTBE were detected in two on-site wells, this site poses no threat to human health or the environment. This spill case was closed and an NFA letter was issued to:Henry AlpertCross Deegan Realty, Corp.3333 New Hyde Park Rd, Suite 201New Hyde Park, NY 11042NFA letter uploaded to eDocs. - JAM WILL REPAIR AND RE-TEST AS OF TOMMOROW'S DATE 11-10-99

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "K FOLEY"3/04/2003 - Closed Due To The Nature / Extent Of The Spill Report1/2/03 Reassigned From Sigona To Foley. Investigation Being Performed By Spartan Amoco Under Spill #9909670. Open Mobil #9208906.3/3/04 As Per The Closure Request Report Submitted For Mobil By Gsc, Spill #8905353 Initiated A Subsurface Investigation Conducted From 12/11/89-1/10/90 Which Included Installation Of 5 Mws (Mw-1A Thru Mw-5A). Vocs Were Above Groundwater Standards. This Was Summarized In The February 1990 Roux Subsurface Evaluation Report. Mw-1A Through Mw-5A Were Destroyed (4/90-11/91) Due To Construction Activities Conducted By Amoco. Five 4000Gal Gas Usts, One 550Gal Waste Oil Ust, And One 550Gal Fuel Oil Ust And Piping Were Removed From Site.A Subsurface Investigation Conducted In April 1991 Included Installation Of Two Soil Borings And One Monitoring Well(Mw-6). Results Were Summarized In 6/91 Roux Supplemental Subsurface Investigation Report.A Subsurface Investigation Conducted In November 1991 Included Installation Of 11 Monitoring Wells (Mw-1 Through Mw-5 And Mw-7 Through Mw-12) And One Air Sparge Well (Sp-1). Results Were Summarized In A Gti Report.Spill #9208906 Was Issued To The Site On 11/2/92 As A Result Of Contaminated Soil Observed During Amoco Site Construction Activities.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "K FOLEY"10/10/95: This is additional information about material spilled from the translation of the old spill file: CONTAM. SOIL G/W.12/10/03 Reassigned from Sigona to Foley. 1/28/04 Spoke to Brian Melancon of GSC (845-561-9890), Mobil's consultant. Mobil wants to close out spills. They divested property in March 1990 but have been active in remediating their spill. Cross Deegan Realty only plans on addressing their spill #9909670 (by restoring to pre-spill conditions). I requested that GSC send in a formal closure request with data justifying closure of Mobil spills.3/1/04 GSC submitted closure request report.7/94-10/00 ExxonMobil operated an SVE/AS system removing approx 8861 lbs of VOCs. Four air sparge/vapor extraction wells and one air sparge well were installed. In October 2000, the system was shut down due to asymptotic recovery rates. DEC was notified of system deactivation in March 2001 Handex Site Status Report.Spill #9708729 was issued to the site on 10/25/97 in response to dumping of oil into sewer system.Spill #9909670 was issued to the site on 11/9/99 for petrotite failure on 4000gal gas UST.4/6/04 NFA letter to be hand delivered at Albany meeting 4/7. Reviewed GSC's closure request report(3/1/04). Concentrations were decreasing to ND prior to Spartan's tank test failure.See Spartan files (spill #9909670)
Remarks: FROM PRIOR TO MAR 90 CONTAM. SOIL EXISTS-OLD MONITORING WELLS(3)DESTROYED DURING CONSTRUCTION EXCAV.-CONTAM.SOIL EXCAV.OR TO BE EXCAV & STOCKPILED ON POLY-TEST

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018

Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name:

A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D016
Waste name: 2,4-D

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 03/19/07-Vought-Off hours repsonder. Vought and spoke called Kedari Reddy and site was acquired through condemnation. 14 (250-gallon)waste oil tanks located onsite registered on PBS. Oil and water on concrete in some areas of basement. Contractors performed soil borings and results will be in in two weeks. Reddy will perform site visit and if tanks are leaking they will be emptied immediately. Current operations include car wash and car lube. Letter should be sent to:current operator is:Cutlass Enterprises, Inc.Candlewood Auto Mall676 Grand ConcourseBronx, NY 10451Ari Yemini **site leasee**Ph. (516) 539-1212Kedari ReddyNYC Department of Transportation40 Worth StreetRoom 1015New York NY 10013PH. (212) 442-7721Fax (212) 442-7072email: kreddy@dot.nyc.govReddy requested two month deadline. Reddy requested copy of PBS registration.DEC requires: 1)updated registration 2)delineation of soil contamination. Vought sent letter with requirements and two month due date.05/04/07-Vought-Received call from Kedari and subsurface investigation will be submitted, preliminary results show slight contamination. Kedari performed site visit and operator cleaned floor. Kedari said no signs of staining however signs of tank overfill in tank area and some connections between USTs may be clogged resulting in numerous spills on concrete however soil borings show only slight contamination. Records being collected for submittal of PBS registration and operator being contacted for registration. Extension for another two months granted

to 7/19/07 as contamination is slight and DEC will be notified if soil analyticals show excessive contamination. PBS unit in DEC Albany has been contacted and registration will be submitted ASAP.07/12/07-Vought-Received call from Robert Pantony (Action 516-781-3000 fax:516-781-3085). As per Pantony some tanks hold clean oil and some are for waste oil and PBS registration will be submitted. Four of the tanks will be removed as per the repair shop request. Floor will be drained and speedy dry will be removed. DEC requires before and after photos of cleanup and also statement of condition of concrete and disposal manifests. Delineation of soil contamination not required to date pending submission of report and description of concrete.8/3/07 - Austin - Transferred from Vought to Patel for further review and action - end08/17/07-Hiralkumar Patel. this case includes two sites:1. 670 Grand Concourse2. 676 Grand Concourse: alt. addresses: 671-677 Concourse Village west, 175 E 153rd Street. from propertyshark, site found as either a gas station or garage.found PBS record on 676 Grand concourse site. PBS #: 2-601491. according to PBS record, site has six active 275 gal ASTs (on legs/saddles). four ASTs for Lube oil and two for waste oil. also site had six 250 gal ASTs (on legs/saddles), which were removed in July, 2007.received subsurface investigation report dated May 2007. abstract:- completed subsurface investigation for the properties located at 670 and 676 Grand Concourse, Bronx.- total 14 borings were advanced- boring B-1 to B-6 were completed at 20 ft bg, boring B-7 and B-8 were completed at 14 ft due to refusal, boring B-9 through B-11 were completed at 30 ft bg, boring B-12 and B-13 were completed at 5 ft and boring B-14 was completed at 3 ft due to refusal- one surface soil sample was collected from each boring as a composite of the 0 to 5 ft depth (0-3 ft for B-14). additional soil samples were collected at deeper depths from each boring based on field observations (except from boring B-12 to B-14)- geophysical survey did not identify any subsurface anomalies indicative of USTs beneath or outside of the former plastic operation at 676 Grand Concourse- a subsurface anomaly consistent with a possible 275 or 500 gal UST was identified beneath the sidewalk adjacent to the south wall of 670 Grand Concourse, immediately north of E. 153rd Street- subject property is approx. 70 ft above mean sea level- based on topographic map, groundwater is expected to be located approx. 40 ft bg. - regional groundwater flow in the vicinity of the site is expected to be to the SOUTHWEST towards the Harlem River <----- from 14 samples, found heavy SVOC contamination in sample from boring B-11 at depth of 10-15 ft bg.- boring B-11 is crossgradient sample from suspected anamoly, based on expected groundwater flow direction (which is southwest direction)-----B-11-----limit (10-15 ft bg)Naphthalene-----44,200-----13,000Benzo(a)anthracene-----17,500-----224Chrysene-----17,600-----400Benzo(b)flouranthene-----14,000-----1,100Benzo(k)flouranthene-----8,000-----1,100Benzo(a)pyrene-----15,300-----61Phenanthrene-----87,200-----50,000- boring log shows brown to light tan, fine to medium sand at depth of 10 to 15 ft bg at boring B-11. <-----found heavy SVOC contamination at 10-15 ft in boring B-11, but no VOCs. next close crossgradient sample from

S106867443

suspected anomaly was from boring B-9, which had same kind of soil at 10-15 ft depth, but no contamination found. 08/28/07-Hiralkumar Patel. left message for Ms. Reddy at NYC DOT. received call from Ms. Reddy. construction will start next year and that will be surface construction, no deep excavation has planned. Ms. Reddy mentioned that they can do further investigation during construction activity next year. investigation shows only SVOC contamination (including Naphthalene) at 10-15 ft and from soil boring logs, no PID readings found higher than PID reading at 10-15 ft depth. and no groundwater encountered in any borings, which concludes that contamination is currently contained inside soil and groundwater is not affected. <-----01/08/08-Hiralkumar Patel. received call from John Santos (212-513-0130) from DOT from environmental compliance unit. he asked for no further action letter for site 676 Grand Concourse. asked him to finish delineation and remediation around previous boring B-11 as that site (670 Grand Concourse) also owned by same owner as 676 Grand Concourse. John will call back with schedule for demolition and excavation at 670 Grand Concourse. 01/09/08-Hiralkumar Patel. discussed with DEC Austin. he asked for complete delineation and remediation around previous boring B-11 and suspected tank, before issuing no further action letter. he mentioned that initial report was made including both parcels (670 & 676) and case will be closed once necessary work done at both parcels. 01/10/08-Hiralkumar Patel. DEC Vought gave report prepared by Action Remediation. this report contains cleanup activities in basement at parcel # 676. spill happened from overfilling of four 275 gal ASTs. after cleanup, found floor in good condition and no floor drains. Action remediation requested no further action letter based on this report. received call from Ralph Pantony (516-781-3000) Action Remediation. explained him that as initial case and soil investigation done including both parcels, the department can't issue no further action letter for one parcel only. asked him to investigate around previous boring B-11 and suspected tank under sidewalk. 01/11/08-Hiralkumar Patel. spoke with Ms. Reddy. she asked for letter from the department confirming that no contamination observed at 676 Grand Concourse. 01/14/08-Hiralkumar Patel. discussed with DEC Austin. spoke with Ms. Reddy. asked her about owner and operator of 670 Grand Concourse. she mentioned that currently NYC DOT is property owner for site at 760 Grand Concourse. sent letter to Ms. Reddy and owner of Cutlass Enterprises, Inc. stating that submitted documents states no contamination at 676 Grand Concourse. also mentioned to delineate and remediate soil contamination at 670 Grand Concourse. sent copy of letter to Ms. Reddy and Mr. Pantony (Fax: 516-781-3085) at Action remediation. 01/24/08-Hiralkumar Patel. met Ms. Reddy, Adnan Zaheer (212-487-7812, azaheer@dot.nyc.gov) and John Kurre (212-788-2083, jkurre@dot.nyc.gov) from NYC DOT. as per Mr. Zaheer, construction engineer, they will excavate to depth of 4 ft only below street level and will backfill basement at 670 Grand Concourse. due to access problem, they haven't done any investigation at 670 Grand Concourse and had only sidewall samples. Mr. Kurre mentioned that Phase I done at site. asked to submit Phase I for parcel # 670. asked Ms. Reddy to contact person who did GPR to find out approximate depth of anomaly under sidewalk, if possible. and if anomaly is shallow, then they will open sidewalk to confirm whether it is tank or not. and if tank, will remove it, if possible. if anomaly is deeper then asked them to do soil borings around tank to depth of at least 20 ft below street level. also asked to inspect basement at parcel # 670 for any

storage for oil or other chemicals. there is an elevator company at site at 670 Grand Concourse. asked Ms. Reddy to submit contact info for operator at elevator company. asked Ms. Reddy to complete soil investigation prior to construction starts, so if any remediation required, it could be done before any construction.01/28/08-Hiralkumar Patel. received contact info for operator at 670 Grand Concourse.Brink Elevator Corp. **operator at 670 Grand Concourse**D/B/A Herk Elevator Co., Inc.Donnie P. MorrelliPh. (718) 993-0600Fax (718) 993-7583email: brinkelevator@aol.comBob Gottlieb **attorney for Brink elevator**Ph. (212) 422-4000 Ext. 18tried number for Brink elevator, but no response. sent email to Ms. REddy to check numbers again.left message for Mr. Gottlieb.01/29/08-Hiralkumar Patel. visited site. met employee (who refused to give their names) at Brink elevator. found one tank enclosed in concrete vault, inside basement. gauge was not working. no oil stains found around tank or boiler. basement floor found in good condition, inside tank room area as well as in storage area. no other tanks found at site at 670 Grand Concourse. visited site at 676 Grand Concourse also. found total of 14- 275 gal tanks. six were disconnected and eight tanks were in-use. no oil stain found on floor. car wash operation has been ceased.spoke with Donnie Morrelli at Brink elevator. he is tenant at building and NYC HPD was owner prior to NYC DOT. as per Mr. Morrelli, city was maintaining building and ordering oil for tank system. as per MR. Morrelli, it is 1000 gal tank.spoke with Ms. REddy. asked her to find whether city was operating and maintaining tank system, as required tank system test.02/04/08-Hiralkumar Patel. received reports from NYC DOT. abstract of Phase I report for 676 Grand Concourse:- phase I done in May 2005- subject property is built full with a partial two story plus basement structure- Cutlass Enterprises, inc. currently occupies the western portion of the site and operates a car wash and vehicle maintenance operation- western portion of subject property includes a second floor that is occupied by a church and office space- majority of eastern portion of the subject property along concourse village west is currently not in use and, according to current owner, was once occupied by a plastics manufacturing operation- suspect vent pipes and possible fill port were observed attached to the exterior northeast wall of the former plastic area- two additional suspect vent pipes are located along the exterior eastern wall of the former plastic manufacturing area between the two bay doors along concourse village west.- petroleum or chemical like staining was apparent at some areas of the walls and floors- a pipe trench system exists in the floor of this area that was observed to contain water and a petroleum like sheen- EPM conducted soil and groundwater sampling in 2000 in the Metro-North railroad storage yard adjacent to east of the subject property; relatively low concentrations of SVOCs were detected in some of soil samples; no significant groundwater contamination was detected <----- URS corp. conducted soil and groundwater sampling in 2001 at a former Metro-North property located at 3001 Concourse Village East (northeast of subject property) on behalf of the NYC School construction authority; groundwater found contaminated at this school site (spill reported as found groundwater contaminated. spill #: 0105833. spoke with Srinivas Kanaparthi 718-472-8620 at NYC school construction authority. he mentioned that site is under Brownfield cleanup program. C203030) <-----as per Phase I for 670 Grand Concourse, only recognized condition found was 1080 gal #2 tank in basement.02/13/08-Hiralkumar Patel. spoke with Ms.

Reddy. they are currently working to hire contractor for soil investigation and tank test at 670 Grand Concourse. mentioned to Ms. Reddy about suspect vent and fill box at former plastic factory area in 676 Grand Concourse. the department may require soil investigation at former plastic factory area also.03/25/08-Hiralkumar Patel. left message for Ms. Reddy. received call from Ms. Reddy. contractor did soil delineation inside and outside of 676 Grand Concourse. will submit report by end of April, 2008.05/16/08-Hiralkumar Patel. received investigation report from EPM. abstract:- three soil borings (B-15, B-16 and B-17) advanced at 670 Grand Concourse (nearby previous boring B-11 and suspect anomaly)- boring B-15 advanced to four ft below concrete sub-basement floor at 670 Grand Concourse in the vicinity of AST- boring B-15 was completed at 25 ft bg and was located east of previous boring B-11, mid-way between B-11 and a previously suspected UST- boring B-17 was completed to 25 ft bg and was located immediately south of suspect UST- later determined that the suspect UST anomaly identified under sidewalk by GPR was due to underground piping entering the building at 670 Grand Concourse- one composite sample was collected from B-15 and three composite samples were collected from each of boring B-16 and B-17- groundwater is expected to be located at least 50 ft bg <----- no contamination found in any samplesdiscussed with DEC Vought. he suggested for Sensitive Receptor Survey as school is located across (and possibly down gradient from) Grand Concourse.05/20/08-Hiralkumar Patel. spoke with Ms. Reddy. asked her to perform sensitive receptor survey. also asked her to submit tank test result. sent letter to Ms. Reddy requiring submission of exposure assessment. letter emailed to Ms. Reddy along with requirement of tank test for tank located at 670 Grand Concourse.06/19/08-Hiralkumar Patel. received call from Ms. Reddy. they will submit exposure assessment report with tank test by 07/10/08.07/02/08-Hiralkumar Patel. received exposure assessment report from DOT.based on all available reports, case closed.

Remarks: NY CITY DEPT. OF TRANSPORTATION ACQUIRED ABOVE PROPERTY AND UPON INSPECTION ON 3/12/07 THERE WERE SEVERAL ABOVE GROUND STORAGE TANKS, (14) 4 OF WHICH WERE BEING USED: CONTAINING WASTE OIL. THERE APPEARS TO BE SOME MATERIAL ON GROUND BENEATH THE TANKS, AND IN THE AREAS SURROUNDING THE TANKS. ALSO ON FLOOR OF BASEMENT: CONDUCTING PHASE TWO TO INVESTIGATE IMPACTS AND WILL INSPECT TANKS TO INSURE NO LEAKS, ALSO PLAN TO CLEAN UP AREA:

Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

complete. 775 Gallons of NON-PCB oil and water was removed from the vault by tanker and 1200 pounds of non-hazardous solids were removed by the flush truck. The liquid waste will be transported to Astoria WWTP and the solids will be transported to Hellgate Flush pit. The tanker removed 90 gallons of oil from the unit. The capacity of the unit is 205 gallons, making the spill 115 gallons. The addition spill volume was report to ERT W. Capune 85485 at 15:39. Vault was double washed and rinsed. Cleanup complete. As noted above the sump was sealed with concrete, the discrepancy was 65 gallons and was mis-estimated during the initial report recovered from the vault.21-OCT-2002 15:53CIG T. Marcinek 87549 notified of update 15:49Update 1/14/04Transformer removal confirmed as per 10/23/03 entry in e2mis report.

Remarks: PROBLEM WITH FEEDER. CONTAINED IN MANHOLE. 50 GALS ON 400 GALS OF WATER. CON ED 144758. CLEAN UP PENDING. UNK PCB 50-499 PPM.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"1/5/04 BPAmoco in operation and taking responsibility for southern half of property. Reference spill #0111974.(KMF).11/26/2003 Reassigned from O'Dowd to Sun.01/29/2004-Sun-File Update by Sun: Sun sent a Stipulation Agreement to Hess requiring the complete delineation of the contamination, including the restoration of MW-1 and MW-8, and submittal of the Operation, Maintenance and Monitoring Plan. The Department approves the remedial action plan prepared by EnviroTrac, dated July, 2001. The Department set a deadline of 2/20/04 for the Respondent to return the signed Stipulation Agreement. (WJS)03/26/04- The Stipulation Agreement was signed by Hess on 03/10/04 and executed by the Department on 03/24/04. (WJS)08/11/04-File Update by Sun: On 08/11/04 Sun approves the Investigation Plan submitted July 8, 2004 by Michael Matri, Project Manager for Hess Corp.The two soil borings/monitoring wells proposed

in the Investigation Plan will be used to replace well MW-8 and will be located east and west of the former MW-8 location. The approved letter was mailed to Hess on 08/11/04. (WJS)05/09/05-File Update by Sun: On 05/05/05, the Department held a project review meeting with Hess' Project Manager (Mike Matri) and his consultant (EnviroTrac). Per Mike Matri, EnviroTrac has contacted Metropolitan Transportation Authority (MTA) in order to obtain access to delineate along the eastern (up-gradient) portion of the site adjacent to the MTA New York City Transit subway. Currently, Hess drilling contractor, Submitt Drilling Co., Inc., is obtaining the necessary Railroad Protective Liability Policy to satisfy MTA's insurance requirements. The delineation will be conducted once the work is approved by the MTA. (WJS)10/27/05: Site reassigned from Sun to Andersen. 10/27/05: Reviewed the second quarterly 2005 update report dated 8/19/05. Additional delineation is still in progress. 12/6/05: Reviewed quarterly report dated 11/22/05. Six monitoring wells sampled on October 6, 2005. Max BTEX 3,309.4 ppb (MW13) and max MTBE 1,250ppb (MW13). Additional delineation delayed while waiting for MTA permit. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and ET. Additional delineation is currently awaiting an MTA permit. 3/29/06: Received email from Thomas Bosshard of EnviroTrac: The two (2) up-gradient monitoring wells at the referenced site have been successfully installed. The new monitoring wells will be incorporated into the site's quarterly groundwater monitoring schedule with the second quarter 2006 sampling event scheduled for April 2006. The monitoring well installations and April 2006 groundwater monitoring event will be summarized in the site's next quarterly Update Report. 6/12/06: Reviewed the first quarterly 2006 update report. Groundwater samples collected on January 19, 2006. Max BTEX 6,032 ppb (MW12), max MTBE 2,830 ppb (MW12). Upgradient on-site wells installed in March. Installation of a well downgradient of MW12 and a RAP required by September 12, 2006. 6/30/06: Meeting on 6/28/06 with Hess, NYSDEC, Quantum, EnviroTrac and GSC. Hess will ask for access to the adjacent RR yard to delineate. ORC may be utilized as a remedial method. 7/12/06: Reviewed second quarterly 2006 report. ORM socks in MW12 and 13. ORC socks will be installed in MW15 and MW16. Groundwater samples collected on 4/4/06. Max BTEX 13,571 ppb (MW15). Max MTBE 964 ppb (MW12). 8/23/06: Received email from Erin Goelz of ET. Delineation not possible in the metronorth area east of the site. Delineation possible on Park Avenue, but this is far from the site. Three wells on Park Avenue were proposed. Wells not required by the Department because they are far from the site. RAP due 9/12/06. 8/29/06: Spoke with Ed Russo. A request for an extension for RAP submission will be required because pilot testing will be conducted on site. Local treatment is not feasible due to subsurface piping on site and the subway nearby. An email request for an extension will be submitted. Power supply at the site may be problematic, ConEdison will be contacted. This site is currently a BP gasoline station. 9/8/06: Received email from Ed Russo. Requested extension until November 30 to submit RAP in order to complete SVE pilot testing for MW's 12 and 13. SVE test tentatively scheduled for October 15. ORC socks will be installed in MW 15 and 16 ASAP. Extension approved. 10/5/06: Received update report dated 9/27/06. Wells sampled on 7/13/06. Fluctuating concentrations. Max BTEX 81,251ppb (MW15), max MTBE 1,650 ppb (MW12). ORM socks installed in MW 15 and 16. Contamination may be in the bedrock. RAP due 11/30/06. 12/7/06: RAP conditionally approved. SVE will be used in six

U001839205

wells, STRE in MW 15 and 16 because could not trench in this area, ORC socks in six wells. Conditions of approval: 1) more aggressive groundwater remedial strategy for MW MW 12, 15, 16, and 2) treatment method air effluent. 12/28/06: Reviewed update report dated 12/20/06. Fluctuating gw concentrations. Max BTEX 39,412 ppb (MW15), max MTBE 718 ppb (MW12). 1/17/07: Meeting on 1/16/07. This is the only Hess site not being transferred to Delta. A RAP addendum will be submitted addressing gw contamination. 3/13/07: Reviewed update report. Wells sampled on 1/11/07. Max BTEX 31,608 ppb (MW15), max MTBE 1,140 ppb (MW12). Fluctuating groundwater concentrations. ORM socks installed in MW9, and MW12-MW16. SVE system not installed yet. Emailed Hess, EnviroTrac regarding the SVE implementation schedule, and for details on the existing Well Stripper system on site. 3/15/07: Received email from Ed Russo: "I sent you an email on 2/23 summarizing the well stripper, how it works, etc. Please confirm that you received that email. If not, I will resend it. If you did receive it and have further questions or comments, let me know and I will provide you with any additional information you may need. As for the schedule, we are currently working with BP (who currently operates the site) in an effort to connect our system to the BP station's existing electrical system. This would obviously save a great deal of time since CONED has been very slow to provide us new power drops for some of our other recent systems. We are also working with BP on an access agreement to install the system. Once these issues have been resolved, the system will be installed. Due to the fact that most of the subsurface work is already done, the system install will be very quick once the access and electrical issues are finalized." 3/16/07: Received email from Ed Russo: "attached are a picture of the well stripper and a pdf document summarizing how the well stripper works. As you discussed with Dawn Coughlin of Hess at your recent meeting, we are proposing to install permanent well strippers in MW-12 and MW-13 and bring a portable well stripper to the site for periodic full day remediation events (permanent well strippers cannot be installed in MW-15 or MW-16 since these wells are not connected to the remediation system). The permanent well strippers within MW-12 and MW-13 will be sampled (influent and effluent) on a monthly basis during system O&M events and the portable well stripper will be sampled for influent and effluent during the periodic remediation events. Note that we are in the process of working with BP to get access to the site to install the system. In order to expedite the install once access is obtained, we will be ordering the equipment so that we can prepare the shed to be delivered to the site once access is granted." 7/31/07: Received email from Ed Russo: "GW sampling was conducted on the site about 2 weeks ago. We should get data from the lab this week and will prepare an update report for submittal to you right away. As far as the system goes, we have received approval from BP (the current owner/operator of the site) to install the system. Our electrician is working on getting power from CONED. We have ordered all equipment and are working on building the shed in house so that once electrical power is available, we can deliver the system to the site and connect it/start it up. Once we get closer to a start date, I will be in contact with you to schedule start-up so you can be onsite if you'd like." 9/5/07: Reviewed quarterly report. Fluctuating groundwater concentrations. Wells sampled on 7/20/07. Max BTEX 47,580 ppb (MW15). Max MTBE 681 ppb (MW12). ORM socks replaced in MW9 and MW12 - MW16. SVE system and well strippers not installed yet. Short term remediation events planned for MW15 and MW16. Emailed Ed Russo to

followup on system startup date and initiation of short term remediation events.10/9/07: Received email from Ed Russo:"we have scheduled an on-site meeting with representatives of BP, Delta Consultants (BP's consultant), and EnviroTrac for Monday October15th. BP and Delta wanted to be fully aware of our proposed work before agreeing to let us proceed. We expect to get the approval to proceed with the sitework at that meeting.The shed for the remediation system and the control panel have been completed in our shop and can be mobilized to the site once we obtain the access. Our electrician is ready to go and can get to the site within about a week once we obtain access and CONED involvement will be minimal since we will be connecting to BP's station electric for our system electrical requirements.In addition, since the majority of the subsurface work was done a few years ago during the construction of the BP station, only minimal site work is required, so we expect to be able to start the system and short-term remediation events within 4-6 weeks of access approval. I will send you an update of our progress following the October 15thmeeting.Edward E. RussoSenior Project ManagerEnviroTrac Ltd.5 Old Dock RoadYaphank, NY 11980P: 631.924.3001F: 631.924.5001<http://www.envirotrac.com>"2/14/08: Received email from Ed Russo:"We wanted to let you know that the SVE/WellStripper system was activated at the referenced site on January 29,2008. Preliminary data indicates that the system is effectively removingBTEX and MTBE from onsite wells. The initial start-up period will lastanother week or so and then system O&M will continue on a monthly basis thereafter. A full round of groundwater sampling will be conducted thismonth and a report summarizing that data and all system data collectedto date will be submitted to you before April 30, 2008. If you wouldlike to visit the site to see the system or if you have any questions orcomments, please give me a call at (631) 924-3001"3/12/08: Reviewed Fourth Quarterly 2007 update report dated November 27,2007. Wells sampled on 10/16/07. Max BTEX 16,839 ppb (MW15), max MTBE 727 ppb (MW12). System startup data will be submitted in next report.4/15/08: Reviewed update report dated April 8th, 2008. SVE and well strippers (WS) in operation, and short term remediation events and WS being conducted in MW-15 and MW-16. Maximum BTEX concentration 3,779 ppb (MW16), maximum MTBE concentration 325 ppb (MW12). General downward trend in contamination.8/7/08 - Carlson: Reviewed July 2008 Hydrogeologic Status Report. Wells sampled on 6/30/08. Maximum BTEX concentration 54,315 ppb (MW15). SVE/WS system in operation. Fluctuating concentrations. 10/22/08 - Carlson: Meeting with Hess, Envirotrac, and NYSDEC.11/17/08 - Carlson: Reviewed October 2008 Update Report. Wells sampled on 8/26/08. Fluctuating concentrations in some wells. Maximum BTEX concentration 1,068 ppb (MW12). System in operation.2/20/09 - Carlson: Reviewed January 2009 Update Report. SVE and WS in operation. High effluent concentrations in MW15. Effluent concentrations were not measured from MW12,13. Wells sampled on 11/24/08. Hot well MW12 was not sampled (why?).3/18/09 - Carlson: Meeting with Hess and Envirotrac. Not enough water to sample WS effluent in some cases.5/7/09 - Carlson: Reviewed April 2009 Update Report. SVE/WS in operation, and monthly STRE from MW15. Wells sampled on 2/27/09. Maximum BTEX concentration 390 ppb (MW15). Strong decreasing trends. 5/28/09 - Carlson: Received email from Ed Russo:" while out at the site this week conducting routine GW sampling, our technician noted product (0.18') in MW-15. This well, and the entire site, has cleaned up dramatically since the system was

U001839205

activated and short term remediation events commenced a couple of years ago. As you can see from the attached photo, the product appears to be fresh gasoline. Our technician has taken a sample of the product and the GW within the well. We will analyze the GW for BTEX/MTBE as well as ethanol and conduct a fingerprint analysis on the product to try to confirm that it is a new release since this site is an active BP station. The technician did not note any indication of a surface spill and the well seal and manhole have been reported to be in good condition. Once we get results of the ethanol analysis and fingerprint analysis, we will let you know. If it appears that this may be a new release, we would need to notify BP."8/7/09 - Carlson: Reviewed July 2009 update report. SVE/WWS in operation. STRE on MW15 but high concentrations - effluent should be monitored. MW15 fingerprinting results not included.8/17/09 - Carlson: Reviewed fingerprinting results of product identified in MW15. Product was found to be weathered gasoline from the old release.8/19/09 - Carlson: Meeting with Hess. System in operation.11/17/09 - Carlson: Reviewed October 2009 Update Report. Large decrease in concentration in MW15. System in operation.1/27/2010 - Carlson: Meeting with Hess. Well stripper wells are often dry. 2/5/2010 - Carlson: Reviewed update report. Low dissolved concentrations.5/20/2010 - Carlson: Meeting with Hess. 5/27/2010 - Carlson: Reviewed update report. SVE to be shut down due to low recovery.8/13/2010 - Carlson: Reviewed July 2010 Update Report. Spike in concentration in MW15. SVE shut down due to low recovery. STRE/well stripper on MW15 monthly.8/30/2011 - Obligado - Hess is still doing well stripper STRE on wells MW-12 and MW-15 monthly. 10/21/11 - Obligado - This spill is reassigned to Carlson as directed by Brevdo.11/14/11 - Carlson: Reviewed October 2011 update report. STRE/well stripper on MW15 and MW12 in June and July. Monthly EFR planned instead of well stripper events from now on.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

information was ignored, J. Grathwol visited the site on 2/16/06. Talked with employees of Pride Furniture. They stated they had no knowledge of the spill. Asked me to call back and discuss with owner. Called several times with no success, Pride Furniture staff stated the owner would call me directly, but it did not happen. Pride Furniture is heated by "salamanders", torpedo-shaped heaters - no oil heat. Spill #8709462 is 3 tank failures with gross leaks and was closed because of the multiple spills at the same address. Pride Furniture phone number: 718-585-1400. Recommend this project as potential PIN project. (Grathwol)9/11/06 assigned to bf9/11/06 sent ttf old spill letter. bfUndated notes from telephone conference with Schretzmayer in the hard file, entered here 4/22/10:J. Urda case4/30/09 report - no delineation done yet, wants site visitPhase II investigation Sept. '03 not in file (e-docs).Proposal is to delineate soil and groundwater determination.Will plan be approved by DEC?J. Schretzmayer wants site visit for boring locations.Last page - will send investigation report.-----9/23/03 cont. soil letter senttf001 & 002 closed removed 10/18/03 (not processed)003 closed in placed 9/17/03send cont soil letter?+++++NOTE: Report referred to above is not in the file. bf8/7/12 bf: On 8/2/12 received call from Stephanie Davis of FPM Group (631)737-6200 ext.228. She is preparing a proposal for either investigation or remediation. She called back on8/6/12. She wanted to know where this case is as far as investigation and remediation. I told her that I needed to review the file and called her back on 8/7/12. Very little documentation found in e-docs. Found reports dated 10/1/03 (soil sampling), 12/3/03 (tank closure), and 4/30/09 (work plan) in OGC file. Ms. Davis requested copies of any reports regarding the investigation. Documents were e-mailed to her today . She sent the following e-mail:Brian - As per our discussion, please provide a copy of the available technical reports for the above-referenced spill such that we may develop an appropriate scope of work for further investigation and/or remediation, as needed. If you have any questions, please contact me via email or the phone number below. Thanks again for your help in this matter. Stephanie O. Davis, CPGHydrogeology Department ManagerFPM Group909 Marconi AvenueRonkonkoma, NY 11779 (631) 737-6200, ext. 228Fax (631) 737-2410-----end-----

DEC Memo: 4/29/08 Received letter from Stuart Schwartz, of SNS Energy Distribution Corp., on 4/28/08. Tank was excavated and isolated and retested. Isolation revealed leak was at vent line. No contaminated soil associated with this spill. Tank retested on 4/25/08 and passed. They are waiting for authorization from owner to replace all piping and will retest. bf5/1/08 bf: sent ttf letter to:Urbanization Maria Lopez Housing580 White Plains Road, 6th FloorTarrytown, NY 10591Sent copy to:Stuart N. Schwartz, Chief Executive officerSNS Energy Corporation221 Broadway, Suite 205Amityville, NY 117016/4/08 On 6/3/08, received fax of letter dated 5/23/08 from Stuart Schwartz of SNS Energy. All oil distribution piping at the site was replaced even though only the vent line failed. Tightness test was done 5/22/08 and passed. I called Mr. Schwartz (631)691-1700 and left message with secretary to call me back. When he calls back I will request another letter regarding contamination, if any, and the tank test is deficient because of gw determination. bf6/10/08 On 6/9/08, received revised tank test report. Report is satisfactory. Need letter regarding contamination. Called him at (631)926-2196 and left message requesting letter. bf6/11/08 Yesterday, received fax from S. Schwartz stating no oil contamination found and piping was replaced due to its age. NFA. bf

DEC Region: 2
DER Facility ID: 296383
DEC Memo: 7/26/05 - Sangesland spoke to Doug Harm of Brinkerhoff Envir.He said they are developing a vacant site and they found a buried 550 gal UST.Tank was pulled and approx. 300 cubic yards of contaminated soil was stockpiled waiting for disposal. They will take end point samples and compare them to TAGM limits and send it in. ***Consultant knew what to do - No Contaminated Soil Letter was sent***10/26/05 - Austin - Project reassigned from Krimgold to Rahman - end02/27/06 Sharif Rahman- I spoke with Doug Harm,(732)223-2225 and he would send DEC the final closure report in 5/6 weeks.05/08/06 Sharif Rahman- I spoke with Doug again, he would send me the summary of investigation for review first, then the final report.10/04/06 Rahman- Nine UST were discovered ranging from 275 gallons to 2,000 gallons in size.Tanks showed evidence of discharge.Brinkerhoff excavated and properly disposed approx. 465 tons of petroleum-impacted soil.Analyticals results showed elevated levels of PAH compounds that had historically been over the NYS DEC TAGM's soil clean up objectives as a result of historic fill material.Five end point samples were collected.VOCs were non detectable in all samples. Several SVOC PAHs were reported over DEC SCO, but these PAHs are the same PAHs that were identified in the historic fill found throughout the site.Placement of a impermeable cap comprised of concrete is projected to be completed in October 2006.

 Site Description:

**Actual:
 52 ft.**

Site Location: The Site (BCP Area) encompasses approx. 0.9 acre of the approx. 7-acre Mott Haven School Campus (MHSC). The Site is located at 730 Concourse Village West, Block 2443, part of Lot 78 in Bronx, New York. The portion of the MHSC adjoining the BCP Area which is located on Block 2443, part of Lot 78 is referred to as the Non-BCP Area A. The adjacent approx. 7.7-acre property which houses Primary School No. 156 and Intermediate School No. 151 is located on Block 2443, Lots 79 and 190. The area beneath the platforms that support PS 156 and IS 151 is referred to as the Non-BCP Area B. Current Use: The current use of the site in the BCP area is a high school. The adjacent properties, besides Primary School No. 156 and Intermediate School No. 151 to the north, include the New York and Harlem Railroad to the east, the New York and Harlem Railroad and Cardinal Hayes High School to the south, and apartment buildings, Herk Elevators, parking lots, Live Poultry and Nationwide Warehouse to the west. Site Features: The Site is located in a topographic depression. The properties to the north and west are approximately 30 feet higher than the Site. To the north, Primary School No. 156, Intermediate School No. 151, and two apartment buildings are constructed on 30-foot-high concrete columns. The properties to the west are separated from the Site by a 30-foot-high retaining wall. The properties to the south are at approximately the same elevation as the Site. To the east of the Site, the ground again rises to approximately 20 feet above the Site. Historical Use: The Site had been a railyard since 1891, with a machine shop, paint area, carpenter shop, and electrical warehouse located to the west of the property. All of these buildings were demolished between 1951 and 1977. The Site remained undeveloped until 2007 when construction of the Mott Haven School Campus was initiated.

Env Problem:

Remedy on the site is now completed, and the project is in Site Management phase. The contaminants of concern in soil were benzene, toluene, ethylbenzene, and xylenes (BTEX), naphthalene, 2-methylnaphthalene, and the polynuclear aromatic hydrocarbon (PAHs) benzo(a)anthracene. The most significant contamination identified in soil and groundwater was confined to the northwestern portion of the Site (BCP area). The contaminants of concern in groundwater were

MAP FINDINGS

Health Problem: dissolved phase VOC and naphthalene contamination. It is unlikely that people will come in contact with residual soil contamination remaining at depth as the site is covered by buildings, asphalt, concrete and other covered surfaces, i.e., synthetic turf or rubber surfaces. Inhalation of contaminants via soil vapor intrusion has been prevented through the installation of a vapor barrier and continuous operation of an active mitigation system in the new on-site school buildings. Exposure to contaminants in drinking water is not expected since the area is served by public drinking water.

The contaminants of concern in groundwater were dissolved phase VOC and naphthalene contamination.

Health Problem: It is unlikely that people will come in contact with residual soil contamination remaining at depth as the site is covered by buildings, asphalt, concrete and other covered surfaces, i.e., synthetic turf or rubber surfaces. Inhalation of contaminants via soil vapor intrusion has been prevented through the installation of a vapor barrier and continuous operation of an active mitigation system in the new on-site school buildings. Exposure to contaminants in drinking water is not expected since the area is served by public drinking water.

Site Code: 335960
Site Description: Site

Location:

The Site (?BCP Area?) encompasses approx. 0.9 ? acre of the approx. 7 -acre Mott Haven School Campus (?MHSC?). The Site is located at 730 Concourse Village West, Block 2443, part of Lot 78 in Bronx, New York. The portion of the MHSC adjoining the BCP Area which is located on Block 2443, part of Lot 78 is referred to as the ?Non-BCP Area A?. The adjacent approx. 7.7-acre property which houses Primary School No. 156 and Intermediate School No. 151 is located on Block 2443, Lots 79 and 190. The area beneath the platforms that support PS 156 and IS 151 is referred to as the ?Non-BCP Area B?.

Current Use: The current use of the site in the BCP area is a high school. The adjacent properties, besides Primary School No. 156 and Intermediate School No. 151 to the north, include the New York and Harlem Railroad to the east, the New York and Harlem Railroad and Cardinal Hayes High School to the south, and apartment buildings, Herk Elevators, parking lots, Live Poultry and Nationwide Warehouse to the west.

Site Features: The Site is located in a topographic depression. The properties to the north and west are approximately 30 feet higher than the Site. To the north, Primary School No. 156, Intermediate School No. 151, and two apartment buildings are constructed on 30-foot-high concrete columns. The properties to the west are separated from the Site by a 30-foot-high retaining wall. The properties to the south are at approximately the same elevation as the Site. To the east of the Site, the ground again rises to approximately 20 feet above the Site.

Historical Use: The Site had been a railyard since 1891, with a machine shop, paint area, carpenter shop, and electrical warehouse located to the west of the property. All of these buildings were demolished between 1951 and 1977. The Site remained undeveloped

until 2007 when construction of the Mott Haven School Campus was initiated.

Env Problem: Remedy on the site is now completed, and the project is in Site Management phase. The contaminants of concern in soil were benzene, toluene, ethylbenzene, and xylenes (BTEX), naphthalene, 2-methylnaphthalene, and the polynuclear aromatic hydrocarbon (PAHs) benzo(a)anthracene. The most significant contamination identified in soil and groundwater was confined to the northwestern portion of the Site (BCP area). The contaminants of concern in groundwater were dissolved phase VOC and naphthalene contamination.

Health Problem: It is unlikely that people will come in contact with residual soil contamination remaining at depth as the site is covered by buildings, asphalt, concrete and other covered surfaces, i.e., synthetic turf or rubber surfaces. Inhalation of contaminants via soil vapor intrusion has been prevented through the installation of a vapor barrier and continuous operation of an active mitigation system in the new on-site school buildings. Exposure to contaminants in drinking water is not expected since the area is served by public drinking water.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"DEC Sigona sent a notice regarding the tank test failure on 10/24/2002.BP PRODUCTS NORTH AMERICA, INC.SUITE 410, 1 WEST PENNSYLVANIA AVENUE TOWSON, MD 21204ATTN: PAULA SKRYJAsee also spill 940810410/24/02 Tightness test on tanks/lines and leak detectors - Two regular USTs and two super USTs failed on ullage bubbles. Stage II was not tested because of ullage problems on the tanks. Dispenser #8 taken out of service because it pumps gas into vapor line when pump handle is off.Reviewed 11/20/02 tank re-test results (received 1/8/03). Retested two regular unleaded and two premium unleaded USTs. All passed. Stage II was not tested because piping system needs to be reconfigured.12/15/03 Left Paula Skryja voicemail message inquiring about status of site. PBS information shows five unleaded gas USTs were removed.12/15/03 Spoke with Paula Skryja. Site was taken over from Gaseteria in August 2002. Some repairs were made to risers, no tank problems. Station was temporarily shut down until raze and rebuild. Gaseteria removed tanks 1.5 weeks ago. BP was on-site to oversee tank removal. Station to be back in service March 2004. Paula

to forward information regarding initial TTF. (KMF)12/26/03 Received information from Paula Skryja, BP regulatory assurance specialist. Tanks retested and passed on 11/20/02. Details of UST removal should be obtained from Gaseteria. (KMF)9/19/05 - Spill transferred from Vought to Obligado12/5/05 - Obligado - File Review:Baseline Assessment Report, submitted by Delta, 12/2/05. At time of assessment, site was an active GAseteria service station with 4 4000 gallon gasoline USTs and 1 4000 gallon diesel USTs, 3 pump islands. Surrounding landuse is commercial. Sensitive receptor show Harlem River 500 ft soughwest of site. Closest school is 1400 ft northeast of site. Bedrock located at 8 to 12 ft below ground surface. Water is located in bedrock fractures between 8 and 15 ft bgs. Gw flows to southwest. Five soil borings conducted on Dec. 20, 2001. Only soil exceedences in one soil boring SB-3 (9-10.2) with 5880 ppb xylenes and 16,100 ppb naphthalene. Total VOCs 81,402 ppb. Three temporary wells installed. Notable ground water results in ppb:(2/6 and 4/19/02)MW1 - benzene 233, ethylbenzene 539, MTBE 3070MW2 - benzene 52.3, toluene 48, ethylbenzene 575, xylenes 1810, MTBE 122MW3 - MTBE 50.2(8/15/02)MW1 - benzene 205, ethlybenzene 435, MTBE 11000MW2 - benzene 168, ethlybenzene 203, xylene 84.8MW3 - MTBE 294UST Closure Report, submitted by AGS, 12/03. On 11/20/03, 5 4000 gallon tanks excavated, Pump islands, piping, vent lines removed. 5 endpoint soil samples collected. IMpacts in only one soil sample, UST - SW Bottom, showing 5200 ppb xylenes. SVOC exceedences as well. One gw sample collected from pit water, showing 6.8 ppb benzene, 27 ppb ethylbenzene, 181 ppb xyelens, 89 ppb toluene. Excavated soil was reused as backfill. Recommends peparation of a Subsurface Investigation Work Plan to investigate and delineate the detected contaminates. UST Closure Report Addendum, submitted by AGS, 12/03. Letter report documents collection of seven samples below former seven dispensers and collection of 5 samples at various pipin glocations. VOCs impacts were not detected. SVOCs were detected mostly PAHs. UST Closure Report Addendum No. 2, submitted by AGS, 9/04. Details discovery and abandonment of 3 unregistered and abandoned 550 gallon USTS. PBS registration number 2-191361 assigned on 9/3/04. 425 gallons of non DOT regulated waste liquid was removed from the two tanks. 3 soil samples were collected around the UST. USTs abandoned by filling with concrete slurry. No VOC exceedences detected from soil samples, minor PAH exceedences. "Upon completion of the rebuilding activities AGS will prepare a Subsurface Investigation Work Plan to investigate and delineate athe detected contaminants." 12/7/05 - Meeting with ASR, Gaseteria, DEC. This site is scheduled for investigation in summmer 2006.9/12/06 - Obligado - Emailed multi-site stipulation agreement to Gaseteria on 9/8/06. Sent original on 9/12/06. Due date for workplan is 4/1/06.6/1/07 - Obligado - Phone conversation with Steve Muller to discuss schedule. New due date for workplan is 8/1/07.9/25/07 - Obligado - Spoke to Steve Muller about this site. He requested proposing a workplan to collect samples from tank mat wells to determine if there is ground water contamination. I told him I would not accept this work plan and he must submit a workplan for well installation. He said he would submit the workplan today.9/26/07 - Obligado - Received the Investigation Work Plan.10/26/07 - Obligado - Reviewed the Subsurface Investigation Workplan. It proposes installation of 4 monitoring wells, collection of soil and ground water samples for 8260/8270 , well survey, and submission of summary report within 60 days. Sent approval email to Steve Muller.1/30/08 - Obigado - Reviewed

Subsurface Investigation Report. 3 monitoring wells were installed. Tank mat wells MWNW and MWSE were also sampled. Soil borings performed above bedrock and samples collected. MWs were installed into bedrock. No VOC impacts in soil above bedrock was above standards, minor SVOC impacts which may be attributable to fill. Ground water impacts in 2 of 5 wells. Tank mat wells MWNW and MWSE were also sampled. Max BTEX is 579 at MW3, 247 at MWSE. The report recommends monitoring for 2 more quarters. I approved the report but required monitoring for 4 quarters at minimum. 5/20/08 - Obligado - Review 1Q08 monitoring report. BTEX from ND to 272 ug/L. MTBE from ND to 9 ug/L. Will continue monitoring. 12/15/08 - Obligado - Meeting with Gaseteria/ASR/DEC. Gaseteria will submit Closure Petition. 2/2/09 - Obligado - Closure petition submitted. 9/14/09 - Obligado - Sent letter rejecting closure petition. Required soil borings in the vicinity of the tanks to document complete removal of contaminated soil, continued sampling of ground water for at least 2 more quarters. 3/12/10 - Obligado - JCB submitted a work plan to install 2 borings and collect soil and ground water samples in the vicinity of the eUSTs to document contaminated soil removal. I sent an approval letter to JCB via email. I report will be submitted within 90 days. 4/7/11 - Obligado - I reviewed the RIR report. Soil contamination found in soil boring SB4 adjacent to MWSE. GW samples were collected and BTEX in SB4 was 287 ug/l. During the most recent monitoring event, elevated ground water concentrations detected in MWSE. BTEX was detected at 1591 ug/L in MWSE, including 560 ug/L Benzene. Concentrations in this well have been steadily increasing throughout 2010. I emailed Steve Muller to request the most recent data.

Remarks: PIPING PROBLEM - RECOMMEND UNCOVER ISOLATE AND RETEST

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Updated By: JHOCONNE

Site Description: Location: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in the borough of Manhattan, City and State of New York. Site Features: The site is approximately 1.58 acres, and is nearly entirely occupied by a building. The building is comprised of three connected sections: a two-story section along Fifth Avenue, a three-story section in the center, and a one-story section to the west. See Figure 1 for the site location and Figure 2 for the site plan. Surrounding the site are high-rise residential buildings to the west, south, and southeast of the site. The Harlem River Drive is to the east/northeast, and a National Guard Armory occupies the block immediately to the north. Current Zoning/Use: The site is owned by 2350 Fifth Avenue Corporation and is currently occupied by a self storage facility and art studio space. It is zoned for light manufacturing (M1-1). The Harlem River is located approximately 200 to 300 feet east of the site. Historical Use: Based on historical Sanborn fire insurance maps, the site and the surrounding area were in the process of being filled in between 1860 and 1893, and as of 1909 it was mostly vacant or occupied by a contractors yard. The existing building was originally constructed as a Borden Company ice cream factory: the three-story section in 1923; the two-story section in 1932; and the one-story section in 1950. The floor slab in the one-story (western) section included layers of insulating materials for refrigeration. The area surrounding the site was mostly occupied by garages, auto repair shops, and light manufacturing in the 1930s through the 1950s, with the exception of the block directly north of the site, where the Fifth Avenue Armory was constructed between 1921 and 1933. The residential development, which occupies the area to the south and west of the site, was constructed between 1957 and 1959. From 1970 to 1994 the site was occupied by an industrial laundry and dry cleaning operation which utilized tetrachloroethylene (PCE or perc) as a cleaning solvent. The dry cleaning operation utilized both first-generation and second-generation dry-cleaning machines. The majority of PCE released was associated with the first generation machine use, which involved more handling of PCE than the later machines. The dry cleaning facility operated as registered hazardous waste handler with U.S. Environmental Protection Agency (EPA) ID number NYD071026173. Between 1995 and 1996, most of the ground floor of the building, with the exception of the far western portion, was renovated for use as a New York City public school. The central and eastern portions of the building were occupied by P.S. 141 for a period in the fall of 1997, and were later used by a church for services, offices, and classes. The church vacated the building in December 2004. The remainder of the central and western portion of the building was renovated in 2001 for use as a self storage facility, and in 2006 the self storage facility expanded into the former school portion of the building.

Currently the site is use for self storage facility and for art studio space. Site Geology and Hydrogeology:Groundwater in the vicinity of the site is divided into two apparently semi-confined aquifers. The presence of a clay layer acts as an aquitard/aquiclude separating the aquifer into a shallow aquifer above the clay and deeper aquifer below the clay. The groundwater surface in the shallow aquifer is irregular and approximately six to ten feet below grade. Measurements of groundwater elevation indicated varying horizontal flow directions: generally northward towards West 142nd Street and eastward along 142nd Street towards the Harlem River.

Env Problem: Nature and Extent of Contamination:This section summarizes the assessment of existing and potential future environmental impacts presented by the site. In general, environmental impacts may include existing and potential future exposure pathways to fish and wildlife receptors, wetlands, groundwater resources, and surface water. An evaluation of exposure pathways did not identify any current or potential impacts to ecological resources. Site related contamination is impacting groundwater; however, groundwater sampling has indicated that the groundwater plume is limited in extent and has not traveled a significant distance (and not to the Harlem River). The groundwater in Manhattan is not used as a source of potable water. Protection of the groundwater resource will be addressed in the remedy selection process. In addressing the groundwater resource, the Department will consider the current and reasonably anticipated future use of the groundwater in the area and technical practicability of achieving the SCGs. Surface water resources near the site include the Harlem River, which is located 200 to 300 feet to the east of the site. The Harlem River is a Class I saline waterbody, suitable for secondary contact recreation, fishing, fish propagation and survival, but not suitable for swimming. No current or potential site-related surface water impacts have been identified. Neither the River nor groundwater are used as a source of potable water and no non-potable water supply wells or intakes are known to be located in the immediate area.Significant Threat:The site presents a significant environmental threat due to the releases of contaminants from source areas into groundwater. As a result of identified hazardous waste disposal, the Department listed the site as a Class 2 site in the Registry of Inactive Hazardous Waste Disposal Sites in New York in July 1998. A Class 2 site is a site where hazardous waste presents a significant threat to the public health or the environment and action is required. The site remedial program is being performed by 2350 Fifth Avenue Corporation as a Potential Responsible Party (PRP).

Health Problem: People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by the site. Direct contact with contaminated soil is unlikely since it is located under pavement and the on-site building.Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Site-related contaminants have been found in the indoor air of the on-site building at concentrations exceeding NYSDOH's air guidelines. Sampling indicates that this may be a result of soil vapor intrusion and/or the off-gassing and intrusion of contaminants from insulating materials that are present under one part of the building's foundation. To minimize the potential for the inhalation of

site-related contaminants, a system that ventilates/removes contaminated air was installed beneath the portion of the on-site building with the insulation. Subsequent testing indicated that this system has been successful at reducing the levels of contaminants in the indoor air and that the installation of a similar system beneath the remaining portion of the building would help to maintain the levels to within background ranges. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"see also 04-01607. Product discovered in the discharge sump for diesel tank #1. Primary line leak. Secondary and sump passed testing on 07/20/04, so there was no release to the environment. The flex connector was replaced and relocated inside the sump. The discharge primary and secondary were retested and passed.
Remarks: LEAKED FROM #1 TANK INTO THE SUMP CONTAINMENT, STILL INVESTIGATING CAUSE, EVERYTHING CLEANED UP

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

BROWNFIELDS:

Program: BCP
 Site Code: 467866

**Actual:
 23 ft.**

Site Description: Location: The 810 River Avenue site is located in an urban area at the SE corner of River Avenue and East 158th Street, directly across from where the old Yankee Stadium had been. Site Features: The property consists of a 2-story vacant commercial building with partial basement. The building covers the entire lot. Current Zoning/Uses: The building is currently vacant but the property is zoned C6-3D, commercial/mixed use (including residential). Historic Uses: Business operations ceased at the site in 2011. The existing building last housed a bowling alley (since approx. 1960), sports bar and grill, and a screen printing business. From approximately 1927 through 1956, an auto repair garage was located in the building and included wash-pits and dispensers associated with 2 gasoline underground storage tanks (USTs); there is no documentation of the tanks being removed. Site Geology and Hydrogeology: Bedrock geology at the site and immediate vicinity consists of Inwood Marble of Lower Ordovician to Lower Cambrian age with steep westerly dip of its upper surface. Depth to bedrock is anticipated at approx. 20 to 30 ft. below land surface. The bedrock is overlain by an unconsolidated

overburden of an unsorted heterogenous mix of Pleistocene and Recent glacial material including clay, silt, sands, gravel, cobbles, and boulders. Based on local topography, groundwater is assumed to flow in a generally westerly direction toward the Harlem River. However, actual groundwater flow direction at the site can be affected by many factors including past filling activities, local dewatering projects, underground utilities and geologic heterogeneities.

Env Problem: Nature and extent of contamination: Prior to being redeveloped in to a 50-lane bowling alley circa 1960, the building had been an automotive repair facility from 1927 to 1956. The facility had two underground gasoline storage tanks. There is no documentation of the tanks being removed. Below is a summary of the data available are from a phase II investigation. From five soil sampling points, the total VOC concentrations range from 1.36 ug/kg to 4.83 ug/kg. No VOCs were detected at concentrations exceeding their respective unrestricted soil cleanup objectives (USCOs). Total SVOC concentrations in on-site soil range from 384 ug/kg to 836 ug/kg. None of the SVOCs detected at concentrations exceeding their respective USCOs. One temporary groundwater sampling point was sampled. In that sampling point, VOCs tetrachloroethene (37.8 ug/L), trichloroethene (17.2 ug/L) and cis-1,2-dichloroethene (38.4 ug/L) were detected at the stated concentrations. No SVOCs were detected in the groundwater sample at concentrations exceeding their respective MDLs. There are no soil vapor data. The consultant states, However, it appears that the chlorinated solvents are most likely related to an off-site source since based upon the historical research of this investigation, the historical usage of the site did not involve chlorinated solvents.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/07/2012	Source: EPA

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012
Date Made Active in Reports: 05/15/2012

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/15/2012
Date Data Arrived at EDR: 04/04/2012
Date Made Active in Reports: 05/15/2012

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/18/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/24/2012	Telephone: 703-603-0695
Date Made Active in Reports: 11/05/2012	Last EDR Contact: 11/05/2012
Number of Days to Update: 104	Next Scheduled EDR Contact: 12/24/2012
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/18/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/24/2012	Telephone: 703-603-0695

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 11/15/2012
Number of Days to Update: 31	Next Scheduled EDR Contact: 03/04/2013
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/02/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 04/03/2012	Telephone: 202-267-2180
Date Made Active in Reports: 06/14/2012	Last EDR Contact: 10/02/2012
Number of Days to Update: 72	Next Scheduled EDR Contact: 01/14/2013
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 10/03/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 10/04/2012	Telephone: 518-402-9622
Date Made Active in Reports: 11/09/2012	Last EDR Contact: 11/20/2012
Number of Days to Update: 36	Next Scheduled EDR Contact: 03/04/2013
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 05/01/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/23/2012	Telephone: 518-402-9814
Date Made Active in Reports: 07/03/2012	Last EDR Contact: 08/24/2012
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/03/2012
	Data Release Frequency: Varies

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 10/10/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 10/11/2012	Telephone: 518-457-2051
Date Made Active in Reports: 11/09/2012	Last EDR Contact: 10/04/2012

	Data Release Frequency: Semi-Annually

State and tribal leaking storage tank lists

LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 08/20/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 08/23/2012	Telephone: 518-402-9549
Date Made Active in Reports: 10/05/2012	Last EDR Contact: 11/20/2012
Number of Days to Update: 43	Next Scheduled EDR Contact: 03/04/2013
	Data Release Frequency: Varies

HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/08/2005	Telephone: 518-402-9549
Date Made Active in Reports: 07/14/2005	Last EDR Contact: 07/07/2005

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	49 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-G8 CENTRAL PARK, NY NJ
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: A review of the RCRA-LQG list, as provided by EDR, and dated 03/15/2012 has revealed that

EXECUTIVE SUMMARY

there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BRONX-GPO/CARRIERS STATION
558 GRAND CONCOURSE
BRONX, NY 10451

TARGET PROPERTY COORDINATES

Latitude (North):	40.819 - 40° 49' 8.40"
Longitude (West):	73.927 - 73° 55' 37.20"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	590490.6
UTM Y (Meters):	4519007.0
Elevation:	49 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-G8 CENTRAL PARK, NY NJ
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Personnel Qualifications

ATON

RONALD A. CARROLL, CHMM
Managing Principal/Senior Scientist

Education: University of Findlay – B.S., Environmental and Hazardous
Materials Management, 1992
University of Findlay – B.A., Biology, 1991

Registration(s): Certified Hazardous Materials Manager
ASTM E2018-08 Property Condition Assessment (PCA) Training
OSHA 40-Hour HAZWOPER Training
OSHA 8-Hour HAZWOPER Supervisor
OSHA 16-Hour Permit Required Confined Spaces Training
OSHA 10-Hour Construction Safety & Health Training
Incident Command System (ICS) – Federal Disaster Training

Years of Experience: 20

Summary of Professional Experience

Mr. Carroll is an environmental scientist with over twenty years of experience. The major elements of his experience include Phase I and II environmental site assessments (ESAs), regulatory compliance, industrial hygiene, and hazardous materials management. Other project experience includes remediation projects and environmental audits.

He has performed and managed hundreds of Phase I ESAs for commercial and industrial properties throughout the United States. Additional experience includes Property Condition Assessments (PCAs), State Historic Preservation Office (SHPO) and Section 106 compliance, as well as National Environmental Policy Act (NEPA) assessments.

As a Project Manager under contract with the U.S. Environmental Protection Agency (USEPA) Region 5 Superfund Technical Assessment and Response Team (START) contract, Mr. Carroll performed oversight of numerous site investigation and removal actions involving environmental media contaminated with industrial waste byproducts. In addition to emergency response activities, he played an integral role in the overall project management, scheduling, costing, and budgeting.

Mr. Carroll has acted as Project Manager for site investigation and remediation projects at numerous industrial facilities, including steel mills, metal processing and smelting operations, and chemical plants. Project duties included conducting site inspections, records searches and reviews, multi-media sampling, remediation, coordination and negotiation with regulatory agencies, and preparation of associated reports.

Mr. Carroll has served as National Services Manager for a North American due diligence and real estate assessment company responsible for overseeing the real estate due diligence operation consisting of environmental, building sciences, and valuation services.

Years of Experience: 26

Education/Registration/Training/Affiliations:

Ph.D. 1990 in Hydrogeology, University of Hawaii at Manoa.

M.S. 1984, B.S 1981 in Geology, University of Iowa.

Professional Geologist Registrations: California (1992), Missouri (2006), Indiana (2006), Kansas (2011)

40-Hour OSHA Hazardous Waste Operations Training

Dr. Underwood has split his career between three facets of hydrogeology: (1) evaluation of groundwater resource availability; (2) evaluation of environmental sites including investigation and cleanup of contaminated sites; and (3) evaluation and management of properties and their environmental liabilities.

Dr. Underwood has evaluated groundwater systems through designed programs and field testing to establish potable groundwater resources and the availability of fresh groundwater; he managed projects that identified groundwater resources through collecting basic field data (i.e. through drilling wells and test pumping) followed by analysis of data and development of sophisticated groundwater models to identify sustainable yield for aquifer development. Dr. Underwood has been a consultant with a number of international, national, and regional environmental consulting companies where he has managed a wide variety of environmental projects utilizing a range of basic-to-sophisticated methods to identify the nature and extent of groundwater contamination while developing remediation strategies for the design and implementation of remediation. He has firsthand experience in many types of contamination problems and identification of solutions, as well as familiarity with the various Federal and State programs that promulgate their activities. Dr. Underwood has managed environmental liabilities and served as the technical lead for small-to-very large environmental sites in moving these sites toward the end-point of closure or No Further Action in order to remove environmental liabilities and redevelop the property.

Dr. Underwood's project-specific experience is summarized below.

Skills and Expertise

- Facilitation and negotiation of scope of work, work plans, and costs for delivery of work with stakeholders, responsible parties, and Regulatory Agencies.
- Simulation of aquifer responses to groundwater withdrawal and establishment of optimal yields for well fields.
- Design and performance of field testing to establish aquifer properties and identify groundwater resources.
- Management of solutions for environmental issues related to diverse projects from pulling underground storage tanks to design and remediation of solvent in groundwater.
- Development and management of site characterization and remedial testing programs for feasibility studies, design, and implementation under applicable federal, state, and local regulations.
- Development and implementation of risk management plans, including aspects of public communications.
- Expertise in groundwater flow, solute transport, and remedial design for groundwater cleanup.
