## Accounting Policies

---

### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with South African Statements of Generally Recognised Accounting Practice (GRAP) issued by the Accounting Standards Board in accordance with the Municipal Finance Management Act (Act 56 of 2003). These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below.

These accounting policies are consistent with the previous period.

#### 1.1 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value except for furniture and fittings, which are depreciated using the diminishing balance method.

The useful lives of items of property, plant and equipment have been assessed as follows:

<b>Item</b>	<b>Average useful life</b>
Land	
• Landfill sites	1-50 years
Buildings	20-30 years
Plant and machinery	3-20 yrs
Motor vehicles	4-20 years
Office equipment	3-5 years
Electricity	5-60 years
Community	
• Buildings	20-30 years
• Recreation	20 years
Other properties	20-30 years
Roads	5-100 years

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Accounting Policies

---

### 1.1 Property, plant and equipment (continued)

Wastewater network	15-80 years
Water network	10-150 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

Residual values have been determined for all movable assets based on a percentage of the cost or fair value as follows:

10%	Office furniture and Equipment
20%-30%	Trucks and specialised vehicles
35%	Other vehicles
40%	Buses
40%	Fire engines

### 1.2 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

An intangible asset acquired at no or nominal cost, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, other	3 years

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Accounting Policies

---

### 1.3 Financial instruments

#### Classification

The municipality classifies financial assets and financial liabilities into the following categories:

- Loans and receivables
- Available-for-sale financial assets
- Financial liabilities measured at amortised cost

Classification depends on the purpose for which the financial instruments were obtained / incurred and takes place at initial recognition. Classification is re-assessed on an annual basis, except for derivatives and financial assets designated as at fair value through surplus or deficit, which shall not be classified out of the fair value through surplus or deficit category.

#### Initial recognition and measurement

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value, except for equity investments for which a fair value is not determinable, which are measured at cost and are classified as available-for-sale financial assets.

For financial instruments which are not at fair value through surplus or deficit, transaction costs are included in the initial measurement of the instrument.

#### Fair value determination

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the municipality establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, and option pricing models making maximum use of market inputs and relying as little as possible on entity-specific inputs.

#### Financial instruments designated as available-for-sale

Available for sale financial assets (AFS) are financial assets that are not classified as:

- LAR financial assets;
- HTM investments, or
- FVTP financial assets.

AFS financial assets must be measured at fair value. Gains or losses on an AFS financial asset must be recognised directly in equity.

#### Trade and other receivables

Trade receivables are measured at initial recognition at fair value, and are subsequently measured at amortised cost using the effective interest rate method. Appropriate allowances for estimated irrecoverable amounts are recognised in surplus or deficit when there is objective evidence that the asset is impaired. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The allowance recognised is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the deficit is recognised in surplus or deficit within operating expenses. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against operating expenses in surplus or deficit.

Trade and other receivables are classified as loans and receivables.

#### Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Accounting Policies

---

### 1.3 Financial instruments (continued)

#### Bank overdraft and borrowings

Bank overdrafts and borrowings are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

#### Financial liabilities

Financial liabilities are classified according to the substance of contractual agreements entered into. Trade and other payables are stated at their nominal value.

### 1.4 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease or the incremental borrowing rate.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

### 1.5 Inventories

Inventories are initially measured at cost except where inventories are acquired at no cost, or for nominal consideration, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

# **BUFFALO CITY MUNICIPALITY**

Annual Financial Statements for the year ended 30 June 2010

## **Accounting Policies**

---

### **1.5 Inventories (continued)**

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

### **1.6 Impairment of cash-generating assets**

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

At each reporting date a review is carried out to determine whether there are any indications that any assets or cash generating units may be impaired. If such indications exist, the recoverable amounts of the affected assets are determined.

Where the recoverable amount of an asset or cash-generating unit is lower than its carrying amount, an impairment loss is recognised in profit for the period in respect of assets carried at historic cost, and against revaluation surpluses in respect of assets carried at revalued amounts.

### **1.7 Employee benefits**

#### **Short-term employee benefits**

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

#### **Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Accounting Policies

---

### 1.7 Employee benefits (continued)

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

#### Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the municipality is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

### 1.8 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Accounting Policies

---

### 1.8 Provisions and contingencies (continued)

provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of a activity/operating unit concerned;
  - the principal locations affected;
  - the location, function, and approximate number of employees who will be compensated for services being terminated;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding agreement.

After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 61.

### 1.9 Borrowing costs

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.10 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

#### Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note.

#### Fair value estimation

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using quoted forward exchange rates at the end of the reporting period.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

#### Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. In addition, goodwill is tested on an annual basis for impairment. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have

# **BUFFALO CITY MUNICIPALITY**

Annual Financial Statements for the year ended 30 June 2010

## **Accounting Policies**

---

### **1.10 Significant judgements and sources of estimation uncertainty (continued)**

occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time.

#### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 19 - Provisions.

#### **Useful lives of waste and water network and other assets**

The municipality's management determines the estimated useful lives and related depreciation charges for the waste water and water networks. This estimate is based on industry norm. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

#### **Post retirement benefits**

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 22.

#### **Effective interest rate**

The municipality used the prime interest rate to discount future cash flows.

#### **Allowance for doubtful debts**

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

### **1.11 Investment property**

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, and only when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the enterprise, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired at no cost or for a nominal cost, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### **Fair value**

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

# **BUFFALO CITY MUNICIPALITY**

Annual Financial Statements for the year ended 30 June 2010

## **Accounting Policies**

---

### **1.11 Investment property (continued)**

If the fair value of investment property under construction is not determinable, it is measured at cost until the earlier of the date it becomes determinable or construction is complete.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

When classification is difficult, the criteria used to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of business, are as follows:

### **1.12 Investment in associate**

An associate is an entity over which Buffalo City Municipality is in a position to exercise significant influence, through participation in the financial and operating policy decisions of the investee.

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting.

The carrying value of the investment in associates is adjusted for Buffalo City Municipality's share of operating surpluses/ (deficits) less any dividends received.

Where Buffalo City Municipality or its Entities transact with an associate, unrealised gains and losses are eliminated to the extent of the Municipality's or its Municipal Entities' interest in the relevant associate, except where unrealised losses provide evidence of an impairment of the asset transferred.

Where Buffalo City Municipality is no longer able to exercise significant influence over the associate, the equity method of accounting is discontinued.

Buffalo City Municipality uses the most recent available financial statements of the associate in applying the equity method. When the reporting dates are different, the municipality makes adjustments for the effects of any significant events or transactions between the investor and the associate that occur between the different reporting dates. Adjustments are made to ensure consistency between the accounting policies of the associate and the municipality.

### **1.13 Revenue from exchange transactions**

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### **Measurement**

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### **Sale of goods**

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### **Rendering of services**

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

# **BUFFALO CITY MUNICIPALITY**

Annual Financial Statements for the year ended 30 June 2010

## **Accounting Policies**

---

### **1.13 Revenue from exchange transactions (continued)**

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

### **Interest and Dividends**

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Dividends, or their equivalents are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

### **1.14 Revenue from non-exchange transactions**

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

### **Recognition**

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Accounting Policies

---

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

### 1.15 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

### 1.16 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.17 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.18 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.19 Irregular expenditure

Irregular expenditure as defined in section 1 of the PFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act; or
- (b) the State Tender Board Act, 1968 (Act No. 86 of 1968), or any regulations made in terms of the Act; or
- (c) any provincial legislation providing for procurement procedures in that provincial government.

National Treasury practice note no. 4 of 2008/2009 which was issued in terms of sections 76(1) to 76(4) of the PFMA requires the following (effective from 1 April 2008):

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also

# **BUFFALO CITY MUNICIPALITY**

Annual Financial Statements for the year ended 30 June 2010

## **Accounting Policies**

---

### **1.19 Irregular expenditure (continued)**

be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

### **1.20 Use of estimates**

The preparation of annual financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the municipality's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in the relevant sections of the annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

### **1.21 Presentation of currency**

These annual financial statements are presented in South African Rand.

### **1.22 Offsetting**

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

### **1.23 Revaluation reserve**

The surplus arising from the revaluation of property is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the Statement of Financial Performance.

### **1.24 Investments**

Where the carrying amount of an investment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

### **1.25 Conditional grants and receipts**

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

## **Notes to the Annual Financial Statements**

---

Figures in Rand	2010	2009
-----------------	------	------

---

### **2. Changes in accounting policy**

The annual financial statements have been prepared in accordance with South African Statements of Generally Recognised Accounting Practice on a basis consistent with the prior year except for the withdrawal of the following new or revised standards.

- IPSAS21 Impairment of Non-Cash Generating Assets
- IAS36 Impairments

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations

#### 3.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2010 or later periods:

##### **GRAP 18: Segment Reporting**

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, states that no comparative segment information need to be presented on initial adoption of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment, recognition requirements of this Standard would not apply to such items until the transitional provision in that Standard expires.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

##### **GRAP 23: Revenue from Non-exchange Transactions**

Revenue from non-exchange transactions arises when an entity receives value from another entity without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition.

This revenue will be measured at the amount of increase in net assets recognised by the municipality.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow. As an entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised as recognise an amount equal to that reduction.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2010.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

##### **GRAP 24: Presentation of Budget Information in the Financial Statements**

Subject to the requirements of paragraph .19, an entity shall present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts shall present separately for each level of legislative oversight:

- the approved and final budget amounts;
- the actual amounts on a comparable basis; and
- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where an entity prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the 'Statement of Comparison of Budget and Actual Amounts'. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- are prepared using the same basis of accounting i.e. either cash or accrual;
- include the same activities and entities;
- use the same classification system; and
- are prepared for the same period.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2010.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

### GRAP 103: Heritage Assets

Grp 103 defines heritage assets as assets which have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Certain heritage assets are described as inalienable items thus assets which are retained indefinitely and cannot be disposed of without consent as required by law or otherwise.

A heritage asset should be recognised as an asset only if:

- it is probable that future economic benefits or service potential associated with the asset will to the municipality; and
- the cost of fair value of the asset can be measured reliably.

The standard required judgment in applying the initial recognition criteria to the specific circumstances surrounding the entity and the assets.

Grp 103 states that a heritage asset should be measured at its cost unless it is acquired through a non-exchange transaction which should then be measured at its fair value as at the date of acquisition.

In terms of the standard, an entity has a choice between the cost and revaluation model as accounting policy for subsequent recognition and should apply the chosen policy to an entire class of heritage assets.

The cost model requires a class of heritage assets to be carried at its cost less any accumulated impairment losses.

The revaluation model required a class of heritage assets to be carried at its fair value at the date of the revaluation less any subsequent impairment losses. The standard also states that a restriction on the disposal of a heritage asset does not preclude the entity from determining the fair value.

Grp 103 prescribes that when determining the fair value of a heritage asset that has more than one purpose, the fair value should reflect both the asset's heritage value and the value obtained from its use in the production or supply of goods or services or for administrative purposes.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase should be credited directly to a revaluation surplus. However, the increase should be recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit. If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease should be recognised in surplus or deficit. However, the decrease should be debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Grp 103 states that a heritage asset should not be depreciated but an entity should assess at each reporting date whether there is an indication that it may be impaired.

In terms of the standard, compensation from third parties for heritage assets that have been impaired, lost or given up, should be included in surplus or deficit when the compensation becomes receivable.

For a transfer from heritage assets carried at a revalued amount to property, plant and equipment, investment property, inventories or

---

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

intangible assets, the asset's deemed cost for subsequent accounting should be its revalued amount at the date of transfer. The entity should treat any difference at that date between the carrying amount of the heritage asset and its fair value in the same way as a revaluation in accordance with this Standard. If an item of property, plant and equipment or an intangible asset carried at a revalued amount, or investment property carried at fair value is reclassified as a heritage asset carried at a revalued amount, the entity applies the applicable Standard of GRAP to that asset up to the date of change. The entity treats any difference at that date between the carrying amount of the asset and its fair value in accordance with the applicable Standard of GRAP relating to that asset. For a transfer from investment property carried at fair value, or inventories to heritage assets at a revalued amount, any difference between the fair value of the asset at that date and its previous carrying amount should be recognised in surplus or deficit.

The carrying amount of a heritage asset should be derecognised:

- on disposal, or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset should be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

The effective date of the standard is for years beginning on or after 01 July 2010.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

### GRAP 21: Impairment of non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

An municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, an entity estimates the recoverable service amount of the asset.

The present value of the remaining service potential of a non-cash-generating asset is determined using one of the following approaches:

- Depreciated replacement cost approach
- Restoration cost approach
- Service units approach

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

An municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, an entity estimates the recoverable service amount of that asset.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2010.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

### GRAP 26: Impairment of cash-generating assets

Cash-generating assets are those assets held by a municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

An entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, a municipality estimates the recoverable amount of the asset. When estimating the value in use of an asset, a

# BUFFALO CITY MUNICIPALITY

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and a municipality applies the appropriate discount rate to those future cash flows.

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, a municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, an entity use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

A municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, a municipality estimates the recoverable amount of that asset.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2010.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

### GRAP 25: Employee benefits

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires a municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when a municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

GRAP25 defines, amongst others, the following:

- Employee benefits as all forms of consideration given by a municipality in exchange for service rendered by employees;
- Defined contribution plans as post-employment benefit plans under which a municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods;
- Defined benefit plans as post-employment benefit plans other than defined contribution plans;
- Multi-employer plans as defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that:
  - pool the assets contributed by various entities that are not under common control; and
  - use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the municipality that employs the employees concerned;

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

- Other long-term employee benefits as employee benefits (other than post-employment benefits and termination benefits) that is not due to be settled within twelve months after the end of the period in which the employees render the related service;
- Post-employment benefits as employee benefits (other than termination benefits) which are payable after the completion of employment;
- Post-employment benefit plans as formal or informal arrangements under which a municipality provides post-employment benefits for one or more employees;
- Short-term employee benefits as employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service;
- State plans as plans other than composite social security programmes established by legislation which operate as if they are multi-employer plans for all entities in economic categories laid down in legislation;
- Termination benefits as employee benefits payable as a result of either:
  - an entity's decision to terminate an employee's employment before the normal retirement date; or
  - an employee's decision to accept voluntary redundancy in exchange for those benefits;
- Vested employee benefits as employee benefits that are not conditional on future employment.

The standard states the recognition, measurement and disclosure requirements of:

- Short-term employee benefits;
  - All short-term employee benefits;
  - Short-term compensated absences;
  - Bonus, incentive and performance related payments;
- Post-employment benefits: Defined contribution plans;
- Other long-term employee benefits;
- Termination benefits.

The standard states Post-employment benefits: Distinction between defined contribution plans and defined benefit plans:

- Multi-employer plans;
- Defined benefit plans where the participating entities are under common control;
- State plans;
- Composite social security programmes;
- Insured benefits.

The standard states, for Post-employment benefits: Defined benefit plans, the following requirements:

- Recognition and measurement;
- Presentation;
- Disclosure;
- Accounting for the constructive obligation;
- Statement of financial position;
- Asset recognition ceiling;
- Asset recognition ceiling: When a minimum funding requirement may give rise to a liability;
- Statement of financial performance.

The standard prescribes recognition and measurement for:

- Present value of defined benefit obligations and current service cost:
  - Actuarial valuation method;
  - Attributing benefits to periods of service;
  - Actuarial assumptions;
  - Actuarial assumptions: Discount rate;
  - Actuarial assumptions: Salaries, benefits and medical costs;
  - Actuarial gains and losses;
  - Past service cost.
- Plan assets:
  - Fair value of plan assets;
  - Reimbursements;
  - Return on plan assets.

The standard also deals with Entity combinations and Curtailments and settlements.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

#### GRAP 104: Financial Instruments

The standard prescribes recognition, measurement, presentation and disclosure requirements for financial instruments. Financial instruments are defined as those contracts that results in a financial asset in one municipality and a financial liability or residual interest in another municipality. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

One of the key considerations in initially recognising financial instruments is the distinction, by the issuers of those instruments, between financial assets, financial liabilities and residual interests. Financial assets and financial liabilities are distinguished from residual interests because they involve a contractual right or obligation to receive or pay cash or another financial instrument. Residual interests entitle a municipality to a portion of another municipality's net assets in the event of liquidation and, to dividends or similar distributions paid at management's discretion.

In determining whether a financial instrument is a financial asset, financial liability or a residual interest, a municipality considers the substance of the contract and not just the legal form.

Where a single instrument contains both a liability and a residual interest component, the issuer allocates the instrument into its component parts. The issuer recognises the liability component at its fair value and recognises the residual interest as the difference between the carrying amount of the instrument and the fair value of the liability component. No gain or loss is recognised by separating the instrument into its component parts.

Financial assets and financial liabilities are initially recognised at fair value. Where a municipality subsequently measures financial assets and financial liabilities at amortised cost or cost, transactions costs are included in the cost of the asset or liability.

The transaction price usually equals the fair value at initial recognition, except in certain circumstances, for example, where interest free credit is granted or where credit is granted at a below market rate of interest.

Concessionary loans are loans either received by or granted to another municipality on concessionary terms, e.g. at low interest rates and flexible repayment terms. On initial recognition, the fair value of a concessionary loan is the present value of the agreed contractual cash flows, discounted using a market related rate of interest for a similar transaction. The difference between the proceeds either received or paid and the present value of the contractual cash flows is accounted for as non-exchange revenue by the recipient of a concessionary loan in accordance with Standard of GRAP on Revenue from Non-exchange Revenue Transactions (Taxes and Transfers), and using the Framework for the Preparation and Presentation of Financial Statements (usually as an expense) by the grantor of the loan.

Financial assets and financial liabilities are subsequently measured either at fair value or, amortised cost or cost. A municipality measures a financial instrument at fair value if it is:

- a derivative;
- a combined instrument designated at fair value, i.e. an instrument that includes a derivative and a non-derivative host contract;
- held-for-trading;
- a non-derivative instrument with fixed or determinable payments that is designated at initial recognition to be measured at fair value;
- an investment in a residual interest for which fair value can be measured reliably; and
- other instruments that do not meet the definition of financial instruments at amortised cost or cost.

Derivatives are measured at fair value. Combined instruments that include a derivative and non-derivative host contract are accounted for as follows:

- Where an embedded derivative is included in a host contract which is a financial instrument within the scope of this Standard, an entity can designate the entire contract to be measured at fair value or, it can account for the host contract and embedded derivative separately using GRAP 104. A municipality is however required to measure the entire instrument at fair value if the fair value of the derivative cannot be measured reliably.
- Where the host contract is not a financial instrument within the scope of this Standard, the host contract and embedded derivative are accounted for separately using GRAP 104 and the relevant Standard of GRAP.

Financial assets and financial liabilities that are non-derivative instruments with fixed or determinable payments, for example deposits with banks, receivables and payables, are measured at amortised cost. At initial recognition, a municipality can however designate such an instrument to be measured at fair value.

A municipality can only measure investments in residual interests at cost where the fair value of the interest cannot be determined reliably.

Once a municipality has classified a financial asset or a financial liability either at fair value or amortised cost or cost, it is only allowed to reclassify such instruments in limited instances.

An entity derecognises a financial asset, or the specifically identified cash flows of an asset, when:

- the cash flows from the asset expire, are settled or waived;

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

- significant risks and rewards are transferred to another party; or
- despite having retained significant risks and rewards, a municipality has transferred control of the asset to another municipality.

A municipality derecognises a financial liability when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where a municipality modifies the term of an existing financial liability, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

A municipality cannot offset financial assets and financial liabilities in the statement of financial position unless a legal right of set-off exists, and the parties intend to settle on a net basis.

GRAP 104 requires extensive disclosures on the significance of financial instruments for a municipality's statement of financial position and statement of financial performance, as well as the nature and extent of the risks that a municipality is exposed to as a result of its annual financial statements. Some disclosures, for example the disclosure of fair values for instruments measured at amortised cost or cost and the preparation of a sensitivity analysis, are encouraged rather than required.

GRAP 104 does not prescribe principles for hedge accounting. A municipality is permitted to apply hedge accounting, as long as the principles in IAS 39 are applied.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>4. Cash and cash equivalents</b>		
Cash and cash equivalents consist of:		
Cash on hand	2,699,760	1,662,126
Bank balances	54,469,209	105,488,510
Short-term deposits	501,124,875	585,042,396
Current portion of non-current investments	-	2,385,344
	<b>558,293,844</b>	<b>694,578,376</b>

No cash and cash equivalents (or portions thereof) was pledged as security for any financial liabilities.

No restrictions exist with regard to the use of cash.

No portion is past due or impaired.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking account of any collateral held or other credit enhancements.

### Credit quality of cash at bank and short term deposits, excluding cash on hand

The credit quality of cash at bank and short term deposits, excluding cash on hand that are neither past due nor impaired can be assessed by reference to external credit ratings. Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

### The municipality had the following bank accounts:

Account number / description	Bank statement balances			Cash book balances		
	30 June 2010	30 June 2009	30 June 2008	30 June 2010	30 June 2009	30 June 2008

	92,344,427	64,962,111
Inventories (write-downs)	(924,771)	(748,940)
	<b>91,419,656</b>	<b>64,213,171</b>

Carrying value of stock is disclosed at cost.

### Inventory pledged as security

No inventory was pledged as security.

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>6. Trade and other receivables from non-exchange transactions</b>		
Accrued income	14,603,744	27,321,917
Other debtors	4,531,348	4,003,069
	<b>19,135,092</b>	<b>31,324,986</b>

### Trade and other receivables pledged as security

No portion of accounts receivable was pledged as security for any financial liabilities.

No security is held for any accounts receivable.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking account of any collateral held or other credit enhancements.

Correction of error 2009: refer note 47

R 4 320 248 was adjusted in respect of accrued income.

### Credit quality of trade and other receivables

The credit quality of trade and other receivables that are neither past nor due nor impaired can be assessed by reference to external credit ratings.

Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

### Trade receivables

None of the financial assets that are fully performing have been re-negotiated in the last year.

### Fair value of trade and other receivables

Due to the short term nature of trade and other receivables they are disclosed at face value.

### Trade and other receivables past due but not impaired

Trade and other receivables which are less than that allowed by Council's policy are not considered to be impaired.

## 7. VAT receivable

Net VAT receivable	51,059,163	37,532,147
--------------------	------------	------------

VAT is payable on the receipt basis. VAT is only declared to SARS on receipt of payment from consumers.

## 8. Operating lease asset (accrual)

Current assets	47,649,848	44,744,103
	<b>47,649,848</b>	<b>44,744,103</b>

Correction of error 2009: refer note 47

Adjustment to the amount of R 828 463 was effected in respect of rental income.

### Municipality as lessor: Operating leases minimum future receivables

No later than one year	1,046,685	1,143,115
Later than one year no later than 5 years	5,011,918	4,774,335

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

---

Figures in Rand	2010	2009
-----------------	------	------

---

### 9. Consumer debtors (continued)

No security is held for any of the accounts receivable.

#### Credit quality of consumer debtors

The credit quality of consumer debtors that are neither past nor due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counter party default rates. Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

#### Consumer debtors impaired

As at 30 June 2010, consumer debtors of R 347 274 019 (2009: R 341 487 413) were impaired and provided for.

Amounts totalling R 19 427 016 (2009: R 32 035 992 ) were written off as uncollectable against the debt impairment allowance account. This represents 0.71% (2009: 1.55%) of the total operating income for the year.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking account of any collateral held or other credit enhancements.

No portion is past due or impaired.

### 10. Long term receivables

#### Loans and receivables

Sporting bodies and other loans	93,106	110,912
---------------------------------	--------	---------

---

#### Non-current assets

Sporting bodies and other loans	82,330	93,106
---------------------------------	--------	--------

---

#### Current assets

Sporting bodies and other loans	10,776	17,806
---------------------------------	--------	--------

---

	<b>93,106</b>	<b>110,912</b>
--	---------------	----------------

---

**Sporting bodies:** Loans were granted to sporting bodies before the implementation of the MFMA. No new loans have been issued and the remaining loans are redeemable up to 2016.

No security is held for any of the long term receivables

No long term receivables defaulted and no terms of any of the long term receivables were re-negotiated.

No portion of the long term receivables was pledged as security for any financial liabilities.

The credit quality of long term receivables that are neither past nor due nor impaired can be assessed by reference to external credit ratings. Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

No portion is past due or impaired

These amounts best represent the maximum exposure to credit risk at the end of the reporting period, without taking account of any collateral held or other credit enhancements.

#### Reconciliation of investment property - 2009

	Opening Balance	Other changes, movements	Total
Investment property	-	201,198,657	201,198,657

No Investment Properties were pledged as security.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Operational expenditure regarding investment property earning rentals and those that are not earning rentals are not available.

At reporting date there are no cumulative fair value changes in the surplus and deficit for investment properties.

There are no restrictions on investment properties.

There are no contractual obligations to purchase, construct or develop investment property or for repairs, maintenance or enhancements.

The value of investment property, comprising of land and buildings was determined using the extent of each property and structure. The extent was multiplied by the rate per square meter for the type of property and structure. The rate per square meter for each property and structure type was sourced from the Davis Langdon Property and Construction Handbook 2009. Land values were calculated in terms of the rate per square meter for different geographic areas within the municipality. In order to undertake this process, the land sizes for each property in the register were verified against the Deeds office, AS400 and Cadastre. In cases where no land sizes were provided in the register, the land size was sourced from the Deed, Cadastre and AS400 in that order. The calculation of rate per square meter for the different geographic areas within the municipality was then applied to any property with a valid land size.

The values were determined in-house by the Municipal valuer who is a Registered Professional Valuer with the South African Council for the Property Valuers Profession, Registration No 2417/0.

Rental income from investment properties for the 2009/10 financial year in respect of monthly and annual leases amounted to R1 143 116 (2008/09, R1 163 077).

### 13. Non current investments

These investments are classified financial assets as Loans and Receivables except for listed shares in Sanlam which are classified as Fair value through profit and loss.

Fair value of investments are as at face value and Sanlam shares as at quoted market value at 30 June 2010.

No security is held for any of the non-current investments.

No non-current investments defaulted and no terms of any of the non-current investments were re-negotiated.

No portion of the non-current investments was pledged as security for any financial liabilities.

The credit quality of non-current investments that are neither past nor due nor impaired can be assessed by reference to external credit ratings. Although credit quality can be assessed the entity did not apply any methods to evaluate the credit quality.

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>14. Property, plant and equipment (continued)</b>		
<b>Proceeds on disposal of property, plant and equipment</b>		
Carrying value of property, plant and equipment	2,032,530	1,610,163
Net gain on disposal of assets	1,046,316	3,383,856
	<b>3,078,846</b>	<b>4,994,019</b>

Correction of error 2009: refer note 47

Adjustments amounting to R 345 311; R 19 302; R 2 666 697; R 3 480 954; R 187 340 839 and R 97 619 in respect of other properties, furniture and fittings, office equipment, plant and equipment, roads, electricity network, water network, sewer network and lease assets were made respectively.

### Borrowing costs capitalised

Capital work in progress	-	1,073,020
--------------------------	---	-----------

Capitalisation rates used during the year (2009) were between 5% and 8.8% on specific borrowings for capital projects and 11% being the weighted average cost of funds borrowed generally by the municipality.

### Revaluations

The effective date of the revaluations was 01 July 2009. Revaluations were performed by the municipality.

Land and buildings are re-valued every 4 years.

As land and buildings were identified and revalued during 2009, no historical cost is available and therefore no disclosure could be made of what the carrying value under the cost model would have amounted to.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality. BCM has taken all reasonable steps to ensure the completeness of the fixed asset register by using the best international and local methodology and practice for asset verification, within the limits of the available organisational, human and financial capacity. However it should be noted that as per international precedents, owing to the nature and large scale of the assets as well as the technical and onerous challenges involved in the process, it is impossible to certify that the fixed asset register is 100% complete.

No assets were pledged as security.

### 15. Investment in associate

Name of company	Listed / Unlisted	% holding 2010	% holding 2009	Carrying amount 2010	Carrying amount 2009	Fair value 2010	Fair value 2009
East London Industrial Development Zone (Prop)Ltd	Unlisted	26.00 %	26.00 %	-	3,626,888	-	3,626,888

The carrying amount of the associate is shown net of impairment losses.

### Movements in carrying value

Opening balance	3,626,888	2,437,801
Share of surplus/(deficit)	(3,626,888)	1,189,087
	<b>-</b>	<b>3,626,888</b>

Investment in associate at 30 June 2010 amounted to R - (2009: R 3,626,888).

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>15. Investment in associate (continued)</b>		
<b>Fair value</b>		
There is no active market for the shares of the associate and therefore the fair value for these shares can not be measured reliably. Management accepted face value as fair value.		
<b>Summary of groups interest in associate</b>		
Total equity	176,436,893	(13,949,568)
Total liabilities	(1,406,169,306)	(1,064,823,966)
Revenue	34,489,205	21,980,630
Surplus (deficit)	(190,141,924)	4,577,363
<b>Associate with a different reporting date</b>		
The financial statements of East London Industrial Development Zone (Proprietary) Limited are prepared for the accounting period 01 April 2009 to 31 March 2010 and the interim result for the quarter ending 30 June 2010 are also prepared.		
Note: 2009 - An adjustment was made to the disclosure 'summary of groups interest i.r.o. revenue to be R 21 980 630 and surplus to be R 4 577 363.		
<b>Unrecognised share of loss of associate</b>		
The municipality has discontinued recognising its share of the deficits of East London Industrial Development Zone (Proprietary) Limited, as the investment is held at R nil and the municipality has no obligation for any deficits of the associate. The total unrecognised deficits for the current period amount to R 49,500,481 (2009 : R nil). The accumulated unrecognised deficits to date amount to R 45,873,592 (2009: R nil).		
<b>16. Borrowings</b>		
<b>Held at amortised cost</b>		
Annuity loans	526,711,125	560,149,418
Local registered stock issues	10,000,000	18,160,000
	<b>536,711,125</b>	<b>578,309,418</b>
The entity did not default on any of the borrowings in respect of capital or interest portions.		
No terms attached to the borrowings were re-negotiated.		
<b>Non-current borrowings</b>		
At amortised cost	496,805,746	536,989,896
<b>Current short term portion borrowings</b>		
At amortised cost	39,905,379	41,319,522
	<b>536,711,125</b>	<b>578,309,418</b>
<b>17. Consumer deposits</b>		
Electricity	14,334,781	12,905,502
Water	16,040,324	15,402,825
	<b>30,375,105</b>	<b>28,308,327</b>

Guarantees held in lieu of Electricity and Water Deposits amounted to R10 551 212 (2009: R8 320 256).

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>18. Finance lease obligation</b>		
<b>Minimum lease payments due</b>		
- within one year	988,222	898,826
- in second to fifth year inclusive	962,345	643,774
	<u>1,950,567</u>	<u>1,542,600</u>
Less: Future finance charges	(254,620)	(266,071)
<b>Present value of minimum lease payments</b>	<b><u>1,695,947</u></b>	<b><u>1,276,529</u></b>
<b>Present value of minimum lease payments due</b>		
- within one year	834,147	744,716
- in second to fifth year inclusive	861,800	531,813
	<u>1,695,947</u>	<u>1,276,529</u>
Non-current liabilities	861,800	531,813
Current liabilities	834,147	744,716
	<u>1,695,947</u>	<u>1,276,529</u>

It is BCM policy to lease certain equipment under finance leases.

The average lease term was 3-5 years and the average effective borrowing rate was 8.5% (2009: 9.0%).

Interest rates are either fixed or variable at the contract date. All leases have fixed or variable repayments and in certain instances contingent rent is payable.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets.

The entity did not default on any of the interest or capital repayments of the finance leases.

No terms and conditions of the finance leases were re-negotiated.

Correction of error 2009: refer note 47

An adjustment amounting to R 372 733 was made in respect of finance leases not raised in 2009.

### 19. Provisions

#### Reconciliation of provisions - 2010

	Opening Balance	Additions	Utilised during the year	Reversed / Transferred during the year	Total non-current	Total current
Performance bonus	2,947,958	(2,947,958)	-	-	-	-
Landfill sites	170,035,618	(37,069,363)	(3,728,959)	(110,383,855)	30,815,388	110,383,855
	<b>172,983,576</b>	<b>(40,017,321)</b>	<b>(3,728,959)</b>	<b>(110,383,855)</b>	<b>30,815,388</b>	<b>110,383,855</b>

#### Reconciliation of provisions - 2009

	Opening Balance	Additions	Utilised during the year	Reversed / Transferred during the year	Total non-current	Total current
Performance bonus	1,615,636	1,391,822	(59,500)	(2,947,958)	-	2,947,958
Landfill sites	125,799,795	46,366,017	(947,362)	(99,604,741)	71,613,709	98,421,909
	<b>127,415,431</b>	<b>47,757,839</b>	<b>(1,006,862)</b>	<b>(102,552,699)</b>	<b>71,613,709</b>	<b>101,369,867</b>

Non-current liabilities	30,815,388	71,613,709
Current liabilities	110,383,855	101,369,867
	<b>141,199,243</b>	<b>172,983,576</b>

With regards to the Provision for Landfill sites: It is stated in the Department of Water Affairs and Forestry "Minimum Requirements for Waste Disposal by Landfill", Second Edition 1998, Chapter 2.3.4, that "All landfills except those closed prior to August 1990 when the permitting system came into effect, must be permitted before they can be considered closed. Closure will involve, inter alia, the application of final cover, topsoiling, vegetating, drainage maintenance and leachate management." Rehabilitation costs in respect of geohydrological monitoring is anticipated to be a recurring cost for the next 30 years. The future value of the Rehabilitation of landfill sites obligation was calculated by inflating the non current rehabilitation cost to an estimated future cost which was then discounted to present value.

Assumptions used:

- Interest rate used is BCM's borrowing rate at 8.5% (9.35% 2009).
- The valuation for the landfill site provision was done by Munitech (Pty) Ltd, a company which specialises in infrastructure maintenance and operations and municipal services, which includes solid waste collection and disposal. The company registration number is 1988/761/07 and the SAACE membership number is 439.

Performance bonuses are paid to employees subject to certain conditions. The provision is a calculation of the amount due to employees at the reporting date.

Performance bonuses are measured at face value as it is expected that these would normally be paid shortly after the financial year end once performance evaluations have been completed.

### 20. Trade and other payables

Trade payables	47	205,101,083	166,430,743
Payments received in advanced	47	57,947,044	38,300,789
Retention monies	47	18,360,254	26,709,375
Accrued leave pay		42,291,760	37,202,156
Deposits received		4,279,914	3,147,477
Other creditors		33,014,180	28,892,718
		<b>360,994,235</b>	<b>300,683,258</b>

The entity did not default on any of the accounts payable in respect of capital or interest portions. No terms attached to the accounts payable were re-negotiated.

Bank guarantees to the amount of R3 055 740 (2009: R3 266 740) were held in lieu of market buyers.

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand 2010 2009

### 20. Contingent Liabilities (continued)

Correction of error 2009: refer note 47

Adjustments amounting to R 998 088, R 5 510 417, R 6 762 976 were made to the balances on trade payables, retention monies and payments in advance respectively.

### 21. Unspent conditional grants and receipts

Unspent conditional grants and receipts are detailed on Annexure F.

#### Unspent conditional grants and receipts comprises of:

National grants	196,362,793	189,598,759
Provincial grants	81,105,774	86,590,411
Other conditional grants	18,070,806	19,313,663
	<b>295,539,373</b>	<b>295,502,833</b>

These amounts are invested in a ring-fenced investment until utilised.

Correction of error 2009: refer note 47

Corrections amounting to R 13 677 158 and R 291 288 were made in respect of national grants and other grants respectively.

### 22. Retirement benefit obligation

#### Carrying value

Balance at beginning of year		241,683,344	213,729,777
Interest cost		21,622,200	22,632,724
Current service cost		9,637,626	8,400,986
Actual Employer Benefit Payments		(11,611,287)	(10,971,252)
Actuarial losses recognised in the year (correction of error)	47	-	7,891,109
		<b>261,331,883</b>	<b>241,683,344</b>

BCM employees contribute to 6 accredited medical aid schemes, namely LA Health, Bonitas, Key Health, SAMWU Med, FedHealth and Hosmed. Pensioners continue on the option they belong to on the day of their retirement.

The obligation in respect of the medical care contributions for retirement benefits is valued every year by independent qualified actuaries. The last actuarial valuation was performed on 30 June 2010 by ARCH Actuarial Consulting using the Projected Unit Credit Method.

BCM opted not to recognise the actuarial loss applying the "Corridor" method.

The best estimates for benefit payments in the next annual period is expected to be R12 521 707 (2010: R11 611 287).

Correction of error 2009: refer note 47.

Adjustments amounting to R7 891 109 were made in respect of the retirement obligation.

#### The principal actuarial assumptions used were as follows:

Discount rate	9.16 %	10.82 %
Medical aid inflation rate	7.84 %	9.67 %
Net effective discount rate	1.22 %	1.05 %
Post -Retirement subsidy	60.00 %	60.00 %
<b>Retirement age</b>		
Males	63	63
Females	63	63
Mortality during employment - SA 85-90 Ultimate Table adjusted for female lives		
Mortality post retirement - PA901 Ultimate table rated down one year		
Number of eligible members	2,378.00	2,148.00

	<b>5,063,065,195</b>	<b>4,972,249,020</b>

### 24. Contingent Liabilities

Guarantees by the Council in respect of building society and commercial bank housing loans for officials amount to R502 776 (2009: R 502 776).

Guarantees by the Council in respect of the Department of Labour for COID amount to R4 251 742 (2009: R 4 251 742).

Claims of approximately R3.3 million have been instituted against Council officials due to alleged assault, unlawful arrest and various other charges. Legal advice has been sought for each case and Council will defend the claims where so advised.

Flood damage to Vincent Park Centre has resulted in a possible claim of approximately R31 million. Although no court action has commenced Council's attorney's have been briefed and Council would defend the matter. Council's attorney's have also been instructed to investigate the possibility of recourse through it's Insurers. At present the matter is dormant as we have not heard from the claimants.

Cancellation of a contract by Mtha Building Contractor/Joe Angaviwe JV in the amount of R14 million. Council is defending this matter. At present the matter is dormant as we have not heard from the claimant.

Improvement claim of approximately R2.6 million by Van Loggenberg for improvements not authorised at Bridle Drift Dam. Council is disputing the matter.

The cancellation of a contract to lay a bulk sewer pipe due to non-performance by RJW Ikusasan JV resulted in Council being sued in the amount of R2.5 million. Council is defending the claim.

Performance bonuses amounting to R2 366 331 (2009: R1 375 150) are paid to directors once performance evaluations have been completed. No performance evaluations have been completed to date.

### 25. Financial liabilities by category

The accounting policies for financial instruments have been applied to the line items below:

#### 2010

	Financial liabilities at amortised cost	Fair value through surplus or deficit - held for trading	Fair value through surplus or deficit - designated	Total

	<b>63,734,590,456</b>	<b>12,067,179,340</b>

Valuations on land and buildings are performed every 4 years in terms of the Municipal Property Rates Act, 6 of 2004. The last general valuation came into effect on 1 July 2009. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

Rates are levied on an annual basis with the final date for payment being 30 September. Ratepayers are also given an option of paying their rates monthly on application. Interest at a standard rate as amended from time to time, is paid on any rate which remains unpaid after 30 September, except in cases where the owner has applied to pay by installment.

### 28. Service charges

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>45. Commitments</b>		
<b>Authorised capital expenditure</b>		
<b>Approved and contracted for - Property Plant and Equipment</b>		
• Community	8,396,651	13,746,067
• Infrastructure	276,248,220	151,139,399
• Other	31,207,638	18,014,544
	<b>315,852,509</b>	<b>182,900,010</b>

This committed expenditure relates to Infrastructure, Community and Other Property, Plant and Equipment.

### Operating leases – as lessee (expense)

<b>Minimum lease payments due</b>		
- within one year	5,092,339	4,689,749
- in second to fifth year inclusive	896,765	5,896,442
	<b>5,989,104</b>	<b>10,586,191</b>

Operating lease payments represent rentals payable by the municipality for certain of its office properties. Leases are negotiated for an average term of five years and rentals are fixed for an average of five years.

### 46. Related parties

Buffalo City Development Agency (BCDA) (a Section 21 company registration no 2004/016829/08):

The BCDA was incorporated on 18 June 2004 as a Municipal entity of BCM. BCDA is 100% controlled by BCM. BCM Council resolved to report all Agency related pre-incorporation financial transactions for the first time at 30 June 2005.

One of the envisaged corner-stones of the Agency's business model is the asset base of unutilised or underutilised public land and infrastructure that falls within the Agency's demarcated area, namely the extended waterfront and CBD area of East London.

In Buffalo City, this asset-base constitutes a resource of significant value that could be used as leverage to unlock beneficial synergies with other significant prospective investors, private and public.

Buffalo City Municipality has issued grants of R3 212 957 (VAT exclusive) to the development agency during the current financial year (2009: R 1 000 000 - VAT exclusive).

BCDA has paid consumer accounts of R22 633 during the current financial year (2009: R19 732).

There is an outstanding amount of R449 814 for the payment of output VAT by BCM at 30 June 2009.

Key management personnel information:

Annual Remuneration of the Chief Executive Officer (BCDA), 1 officer, was R524 265 (2009: R707 964)

Annual Remuneration of Senior Management (BCDA), 2 officers, was R879 189 (2009: R1 057 053)

No remuneration was paid to family of key personnel.

There are no share based payments.

There are no post-employment benefits for key personnel.

**All Councillors and Employees** have disclosed their interest in related parties and no one has the ability to control or exercise significant influence over Council in making financial and operating decisions.

Actuarial losses i.r.o the 2009 financial year allocated	-	(7,891,109)
Apportioning prepaid electricity purchased in advance for 2009	-	(6,762,976)
Reversing interest earned on unspent conditional grants incorrectly recognised in the income statement of 2009	-	36,752,771
Correction of movable assets taken on in prior years	-	6,166,953
Correction of accumulated depreciation i.r.o. roads, electricity network, water network, and sewer network in not recognised in prior years	-	(187,340,839)
	-	<b>(142,062,610)</b>

### Financial Period 2009

#### Corrections summarised:

Trade and other payables	20	-	(254,470)
Unspent conditional grants	21	-	13,968,447
Trade and other receivables from non-exchange transactions	6	-	(4,320,248)
PPE	14	-	(181,519,197)
Retirement benefit obligation	22	-	(7,891,109)
Operating lease asset	8	-	828,463
Finance lease obligation	18	-	372,733
Statement of Financial Performance and the Cash Flow Statement		-	36,752,771
<b>Net effect on accumulated surplus</b>		-	<b>(142,062,610)</b>

### 48. Risk management

#### Capital risk management

The municipality's objectives when managing capital are to safeguard the municipality's ability to continue as a going concern in order to provide returns for member and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The capital structure of the municipality consists of debt, which includes the borrowings, cash and cash equivalents and equity.

There have been no changes to what the municipality manages as capital, the strategy for capital maintenance or externally imposed capital requirements from the previous year.

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand 2010 2009

### 48. Risk management (continued)

adverse effects on the municipality's financial performance. Risk management is carried out under policies approved by the accounting officer. The accounting officer provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

#### Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

#### Cash flow interest rate risk

Financial instrument	Current interest rate	Due in less than a year	Due in one to two years	Due in two to three years	Due in three to four years	Due after five years
Trade and other receivables	9.00 %	407,295,672	-	-	-	-
Trade and other receivables - normal credit terms	- %	(238,115,264)	-	-	-	-
Cash in current banking institutions	5.00 %	57,168,969	-	-	-	-
Call investment deposits	6.56 %	501,124,875	-	-	-	-
Trade and other payables	8.00 %	(238,115,264)	-	-	-	-
Long term borrowings	10.69 %	(39,905,379)	(32,091,653)	(67,424,305)	(106,121,729)	(148,539,476)

These amounts best represent maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements.

#### Sensitivity Analysis of Market Risk

Effect of a 1% change in the prime rate	%	Value 30/06/2010	Discounted value at current rate	Discounted value at current rate (-1%)	Discounted value at current rate (+1%)
Amortisation of financial instruments					
Trade and other receivables	9.00 %	407,295,672	373,665,754	377,125,622	370,268,793
Trade and other payables	8.00 %	(238,115,264)	(220,477,096)	(222,537,630)	(218,454,371)
Cash and cash equivalents					
Cash in current banking institutions	5.00 %	57,168,969	54,446,637	54,970,163	53,932,990
Call investment deposits	6.56 %	501,124,875	470,274,845	474,729,893	465,902,636

The sensitivity analysis was based on the assumption that a 1% increase or decrease in the prime rate could occur. The method used to prepare the sensitivity analysis was based on the discounted value of the respective cash flow for 1 year using the respective current interest rate in order to determine the effect of applicable market risk of a 1% increase or decrease in the prime rate.

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base.

### 49. Going concern

# BUFFALO CITY MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>49. Going concern (continued)</b>		
The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.		
The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.		
<b>50. Events after the reporting date</b>		
At the time of preparing and submitting the Annual Financial Statements there were no subsequent events to disclose.		
<b>51. Fruitless and wasteful expenditure</b>		
Payment of commitment fee to DBSA	199,703	-
Incident - During November 2008 DBSA issued an invoice amounting to R 199 703 with regard to commitment fees due as a result of the slow rate of capital expenditure. BCM'S application to waive the commitment fee has been unsuccessful. A report was submitted to the Mayoral Committee.		
<b>52. Irregular expenditure</b>

Annual Financial Statements for the year ended 30 June 2010

## Notes to the Annual Financial Statements

Figures in Rand 2010 2009

### 56. Retirement benefit information (continued)

The Cape Joint Pension Fund's last actuarial valuation was at 30 June 2009 conducted by S. Neethling from Metropolitan Life Limited. The fund was in a sound financial position. Although this fund is a defined benefit plan it cannot be accounted as such as it is part of a multi-employer plan. In the event of the fund being under funded Council's liability would be limited to increased monthly contributions.

The Eastern Cape Local Authorities Provident Fund's last valuation was at 30 June 2009 conducted by E. Du Toit from Alexander Forbes Financial Services who certified that the structure of the assets and the matching of the assets with the liabilities is adequate .

The Government Employees Pension Fund's last valuation was at 31 March 2008 conducted by G. Barnard from Alexander Forbes Financial Services. The fund was considered to be financial sound.

SAMWU National Provident Fund's last actuarial valuation was at 30 June 2005 conducted by E. Potgieter from Fifth Quadrant Actuaries & Consultants (Pty) Ltd. The report stated that the fund was in a sound financial position.

The SALA Pension Fund's last valuation was at 30 June 2009 conducted by J.F.Rosslee of Genesis Actuarial Solutions. The fund was 96% funded as at valuation date. Low investment returns resulted in a decrease from 110%. Although this fund is a defined benefit plan it cannot be accounted as such as it is part of a multi-employer plan. Although the fund is less than 100 % funded no additional action was recommended.

The Municipal Employees Pension Fund's last valuation was at 29 February 2009 prepared by Itakane Consultants and Actuaries (Pty) Ltd. The funding level was 102.2% at this date.

It is Council's policy to fund 60% of Pensioner's medical aid expenses. The current costs amount to approximately R 11.6 million

An amount of R 126.7 million (2009: R 107.3 million) was contributed by Council, Councillor's and employee's in respect of Councillor and employee's retirement funding. These contributions have been expensed.

The East London Municipal A Band and Old Mutual Orion Provident Funds as well as the Aftredevoorsieningsfonds vir Kaapse Plaaslike Overhede are fixed/ defined contribution funds. It is therefore not necessary to perform actuarial valuations for these funds

The Cape Retirement Fund's last actuarial valuation was at 30 June 2009 conducted by S Neethling from Metropolitan life Limited who certified that the fund was in a sound financial position.

### 57. Change in estimate

#### Property, plant and equipment

The useful lives and residual values of certain vehicles were estimated in 2008 and have since been reviewed by management during the current period. The effect of this revision has increased /(decreased) the depreciation charges for the current and future periods as indicated in the table below.

#### Effect on depreciation

Change in residual values	-	1,487,907
Change in estimated useful lives	-	669,151
	-	<b>2,157,058</b>

### 58. Financial assets by category

The accounting policies for financial instruments have been applied to the line items below:

#### 2010

	Loans and receivables	Fair value through surplus or deficit - designated	Total
Trade and other receivables	458,354,836	-	458,354,836
Cash and cash equivalents	560,736,649	1,968,141	562,704,790
	<b>1,019,091,485</b>	<b>1,968,141</b>	<b>1,021,059,626</b>

## Notes to the Annual Financial Statements

Figures in Rand	2010	2009
<b>60. Transactions to and from accumulated surplus</b>		
In terms of GRAP 1, Presentation of Financial Statements, paragraph 144, all reserves and trust fund accounts should be transferred to the opening balance of the Accumulated Surplus in the Statement of Changes in Net Assets. There is no legislative requirement to maintain separate fund accounts, therefore internal funds and reserves should form part of Accumulated Surplus.		
<b>Transfers to and from insurance portion</b>		
Transferred from insurance portion claims iro capex	47,409	2,014,607

## 61. Contingent assets

### Contingent assets

The estimated amount of recoverable traffic fines for 2010 is R 5 936 485 (2009: R 2 977 877), being 25.42% (2009: 19.00%) of all the traffic fines amounting to R 23 353 588 (2009: R 15 673 039) issued but not yet recovered at year end.

## 62. Unauthorised expenditure

Contract no.2841 - Supply and delivery of four 4x4 long wheel base vehicles. The delay in communicating the award to the successful bidder resulted in an upward price adjustment to the original price of R2 042 000 by R140 000.

140,000 -

### 63. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of Council and includes a note to the annual financial statements.

During the financial year under review goods/services totalling R83 866 308 were procured and the process followed in procuring those goods/services deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting officer who considered them and subsequently approved the deviation from the normal supply chain management regulations.
