

GMS

Welcome to GMS Cloud

GMS Cloud is a suite of business productivity applications designed to enhance the way in which you communicate and connect with the world.

GMS Cloud means Greater Efficiency, Better Accessibility and Lower Total Cost of Ownership.

Create, share and collaborate.

With family, with friends, with colleagues.

For business and at home.

Make GMS Cloud your
business productivity
solution

GMS Cloud is our ever-expanding cloud suite built around business-grade email that will allow you and your business to leverage the benefits and resources of the cloud environment, eliminating the need for costly infrastructure and time-consuming maintenance.

With GMS Cloud you can also get Office utilities, integrated video conferencing, project management, smart calendars, mobile device access, cloud storage, and more. All as a cost-effective and user-friendly alternative to Office365.

GMS Cloud is designed for flexibility and accessibility and can be yours for as little as GBP £3 per user, per month.

Using GMS Cloud at Home

GMS Cloud isn't just for businesses and organisations. It's for use at home too.

Our GMS Cloud consumer variant gives dedicated, individual users a cost-effective, efficient and accessible means of using powerful cloud toolsets from the comfort of their own home.

Replete with a variety of innovative and versatile apps, GMS Cloud at Home is available from GBP £1 per month (for individual use only), with Office tools available at an additional cost.

The Small / Medium Business (SMB) Solution

Integrate 3rd party storage services

GMS Drive – Store And Collaborate

Store, share, and collaborate with Drive from GMS. Developed to work seamlessly with your overall GMS experience, Drive is integrated with GMS Webspaces, allowing you to upload and store files so that you can access them wherever you go.

NEVER LOSE TRACK

- › GMS Drive provides cloud-based storage, increasing what you can accomplish with the GMS Cloud service, giving you access your stored documents wherever you are, and improving your ability to accomplish tasks. You can upload and store all of your files safely and securely: photos, videos, documents, PDFs and more.
- › GMS Drive can be accessed in Webspaces and through any modern browser via custom generated URLs, in your home or in your office. You can install the GMS Drive app on your PC to work offline, and merge any changes to your documents automatically.

SHARE YOUR WORK AND WORK LOAD

Collaborate more effectively by sharing any document either by email or in browser to achieve your goals, complete projects and meet deadlines. Choose what content you want to share and password protect any sensitive information. Work with others on anything – from spreadsheets to videos and everything in between. Share entire folders and child folders with a single click.

GMS Drive enhances the contemporary and responsive GMS Webspaces client. Utilizing the same UI, navigating, searching, and using it is simple and satisfying. Real-time email notifications let you know when someone wants to share a file with you, and you can manage shared items effectively within the Webspaces dashboard.

GMS Office

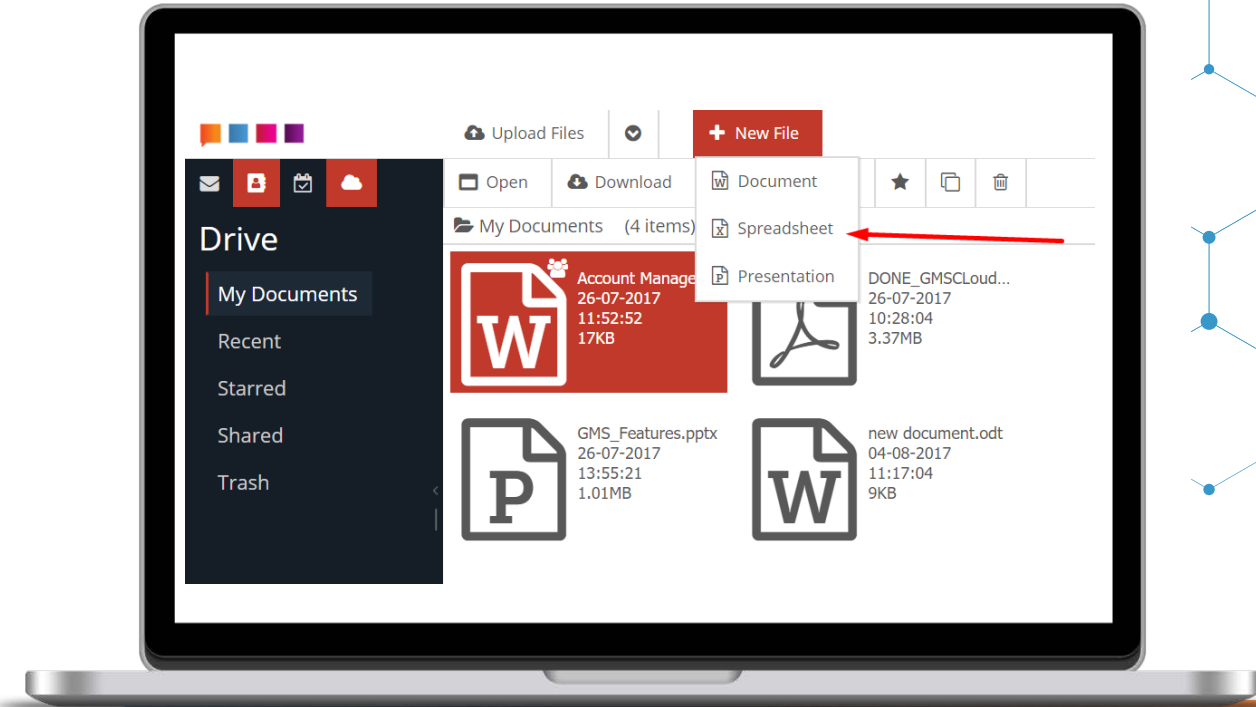

GMS Office delivers a secure, professional and collaborative solution to creating, editing and managing your documents, whether they're text documents, spreadsheets or presentations.

With collaborative editing and optimised use with GMS Drive, your work becomes a team effort.

Your data remains safe and secure thanks to a layered approach to security and the proactive management of over eight million lines of code.

Powered by Collabora, GMS Office uses the unparalleled file format support and rendering capabilities of Libre-Office.

And, with file-sharing and syncing tightly integrated into the enterprise-grade groupware, storage, and email capabilities of GMS, your document suite becomes a hub of activity. Online or offline.

A space where you can create and share your ideas

GMS Cloud - Office

GMS Cloud services can include powerful office suite tools that works across multiple platforms and devices. Enabling access to documents from any location, and authoring new content – save & share work with GMS Drive.

Users can create, view, and edit over one hundred document formats in the browser or on mobile devices and use the desktop editor for full-featured offline editing.

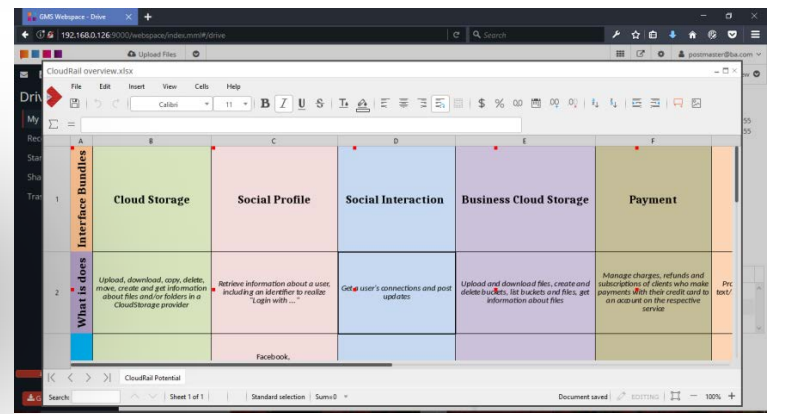

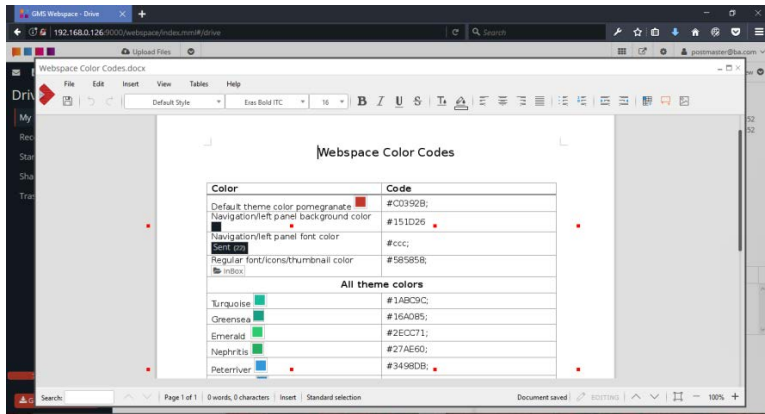

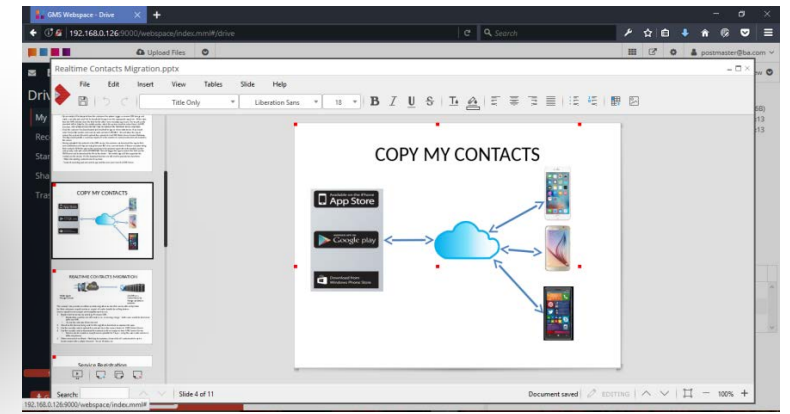

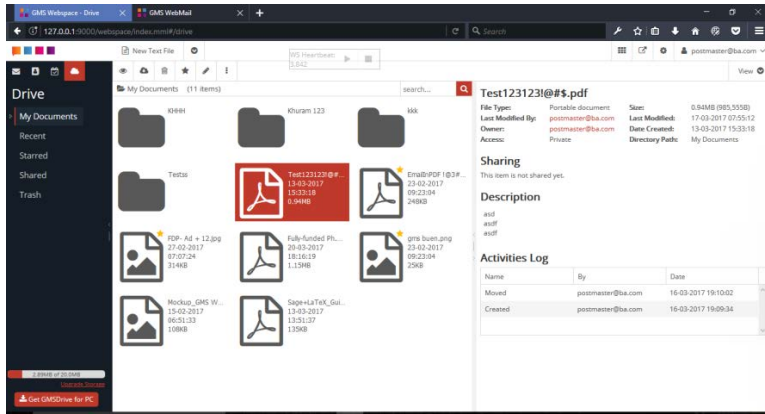

Document Support:

- > DOC, DOCX, PPT, PPTX, XLS, XLSX + ODF
- > Import/ View Visio, Publisher, + 100 more

GMS Cloud Apps: Online Office Capability

GMS Cloud is A Competitive Advantage

Get more for less. GMS Cloud shares functionality with the likes of Office 365, except you can expect to make use of all its integrated business productivity apps for a significantly lower total cost of ownership (TCO).

GBP £3 per user, per month for access to core email, sharing capabilities, 30GB of cloud storage, full malware protection, and support.

For just GBP £1 extra per user, per month, you can also enjoy our integrated collaborative office suite.

With project management tools soon to be incorporated into the GMS Suite, you can expect to make even greater savings when you choose GMS Cloud. GMS Projects will be available soon, for a considerably smaller supplementary fee.

For the most basic package of Office 365 for Business, you can expect to shell out GBP £7.90 per user, per month.

That includes familiar Office apps, cloud storage and sharing, but business-grade email will cost extra.

Office 365's mid-level project management tool, Project Pro, will also set you back a substantial sum, excluding Office applications and services.

A New Way Of Navigating GMS Cloud

GMS Cloud is a complete business communications and productivity solution and it's available in a variety of subscription formats – from the core package, focusing on providing essential email, webmail, malware protection, cloud storage and support; to the powerful bundles, which include GMS Office, video conferencing, and GMS Projects.

GMS Cloud has the means to help your business flourish.

We have built in new navigation to the GMS Cloud products – emphasising accessibility and ease of use.

Subscribe, login, access your products!

GMS Cloud offers discrete access to the whole array of subscribed apps, either via our new app suite portal, or by seamlessly transitioning between them in the core Webspaces client interface.

Meet

A suite office applications designed to enhance the way in which you communicate and connect with the world.

GMS Office Standalone

With the forthcoming standalone app interface for GMS Cloud, individual apps will also get unique navigation interfaces that will emphasise ease of use and more quick and efficient access to features.

GMS Office is among the first of GMS Cloud's business productivity apps to receive the overhaul, providing users with a clear and seamless UI experience, whether they're creating word documents, sharing spreadsheets, or collaborating on presentations. Thumbnails have also been added to allow quick access to "recently worked on" documents.

Project Management with GMS

GMS Projects is our project management app, integrated with GMS Workspace, that will give you all the tools you need to plan projects, manage your time, allocate resources and optimise your business.

Project management and business productivity in one complete package

Email is critical. There's no doubt about it. But when it comes to project management software, the level of email's requirement has always been debateable. Extracting lengthy comms from email threads of often difficult, for example.

This is why, with GMS Projects, we want to bridge the gap between email and project management by leveraging the capabilities of our existing GMS Cloud suite, offering project management functionality with the added bonus of integrated email, collaborative Office tools, cloud storage, and more.

Project management made easy

No longer will you need to trawl through various separate applications for email, storage and project management utilities. GMS Projects will link emails, documents and events, whilst also providing clear visibility on the status and progress of individual tasks, projects and other business-related activities.

The key to operational agility

Plan, track, collaborate and get more done, together. GMS Projects will give your business the operational agility it needs to grow.

You'll be able to create and organise projects and tasks, keep on top of timeline events, resources and communication channels. You'll be able to utilise various project types and templates, such as Kanban, Ticketing and IT development. Or you can just use simple task and event management templates; or design your own.

Choosing your GMS Cloud subscription

GMS Cloud offers subscription types to suit your every business need.

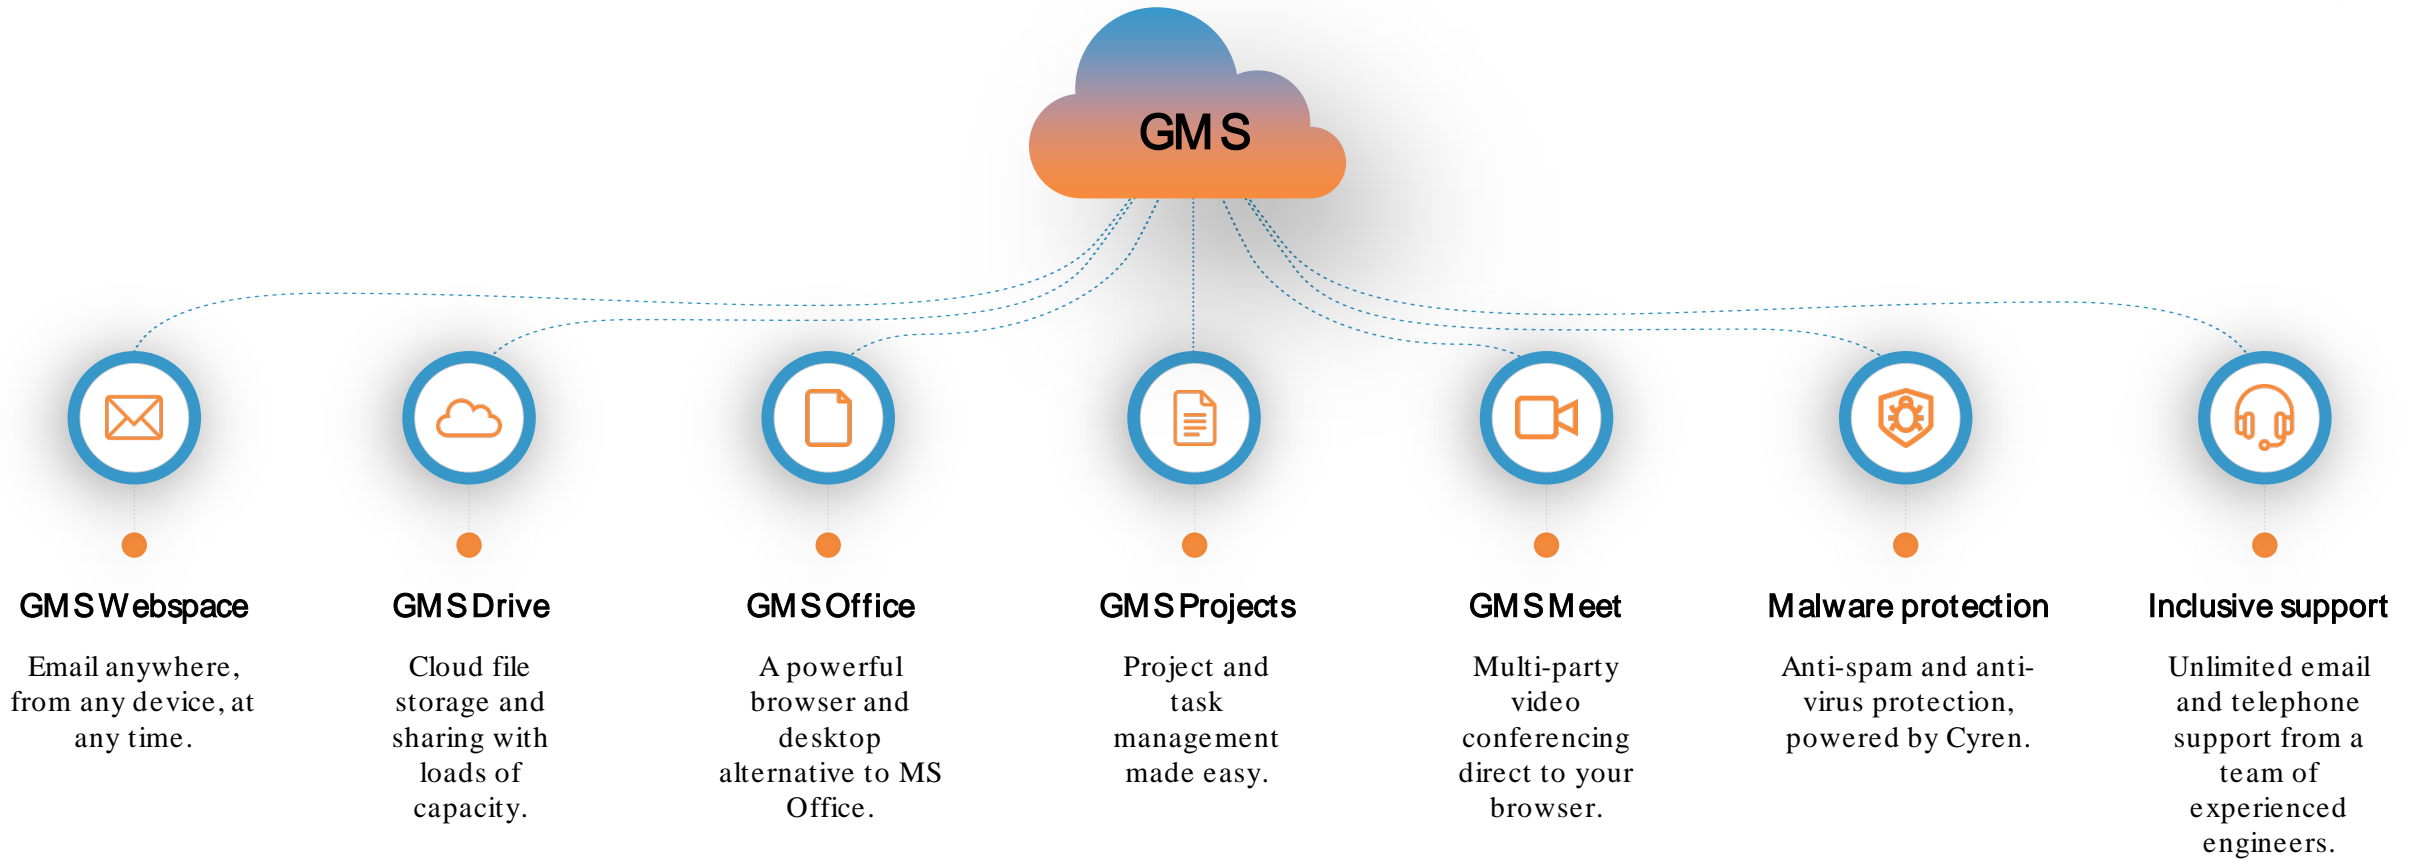

And now with a new subscription configurator, we've made it easy to find and compare the package most suitable for you and your organisation.

Coming in four main flavours, your GMS Cloud instance can have as many, or as few, features as you like. From standard packages including GMS Webspace, telephone and email support, cloud storage, calendars and address books; to comprehensive solutions that have all of that as well as office tools, video conferencing, and our inaugural project management system.
