CHOOSING AN IPAD

Short Advice

Buy the Wi-Fi + Cellular 256 GB model of either the 11-inch iPad Pro or the iPad mini (2019).

Long Advice

Choose Your iPad Size

1

For great performance with a larger screen, 11-inch iPad Pro is our top choice. If cockpit space is at a premium, the iPad mini offers a smaller footprint.

Choose Your Connectivity

2

The Wi-Fi + Cellular iPads contain the internal GPS chip that enables moving map capabilities in ForeFlight.

All models can be paired with an external GPS source like Sentry or compatible panel-mount avionics to provide inflight location data.

Choose Your Storage

3

We strongly recommend at least 128 GB, especially if you use your iPad for more than ForeFlight. The app requires about 15.5 GB for all of the US instrument procedures, airport diagrams, chart supplements, VFR Sectionals, and IFR Enroute charts, as well as the required basemap, navdata, terrain, and obstacles. Canadian data can total 11 GB. However, those requirements are reduced if the entire country is not downloaded at once. For example, downloading the US east of the Mississippi would require around 5 GB.

Important Notes

The Wi-Fi only models do not include a GPS chip, but can be used with external GPSs.

A data plan is not required to use the Wi-Fi + Cellular models or their GPS capabilities. However, we've found a data plan to be very handy for getting weather reports on the go.

Visit the Apple Store to compare all iPad pricing and features: **apple.com/ipad/compare**

DETAILED PLAN COMPARISON

Australia
$62/year | $80/year

New Zealand
$72/year | $100/year

Prices: 🇺🇸 | 🇨🇦   *Prices shown are for Individuals purchasing via the ForeFlight website.*

Ways to Add Jeppesen Charts in ForeFlight

Individuals Can Purchase Coverages From ForeFlight

Visit **foreflight.com/buy** and expand the **Optional Jeppesen IFR Charts** section to select coverages for purchase. Remember to sign into your account first if you're an existing customer.

**Existing Jeppesen Customers Can Link Active Chart Subscriptions**

In the ForeFlight Mobile app, go to **More** > **Jeppesen**, then enter your Jeppesen username and password to activate your existing chart coverage.
Visit **foreflight.com/jeppesen** for help on freeing up Jeppesen seats.

Business Accounts

For a complete listing of chart coverage options and pricing for Business accounts, contact Jeppesen directly at **1-800-894-9501** or email **foreflight@jeppesen.com**.

Download & View Your Charts in ForeFlight

Coverages begin downloading automatically once activated. Access your charts throughout ForeFlight in the same familiar way you access government charts.

EUROPEAN VFR CHARTS

Enhance your VFR flying in Europe with charts, AIPs, and documents from Jeppesen and other popular chartmakers. Available as add-ons to any ForeFlight subscription that includes the **Europe region**. Visit **foreflight.com/europe-data** for coverage maps and pricing.

Available Chart Add-ons

Jeppesen VFR Procedure Charts* Full coverage beside easternmost Europe	**Rogers Data*†** VFR 500 Charts for all except easternmost Europe	**DFS*†** VFR 500K Charts for Western, Central, and Southern Europe	**Air Million** VFR 1:1M Charts for Western, Central, and Southeast Europe
Cartabossy VFR 1:1M Chart for France, Switzerland, and Belgium	**IGN** French VFR ICAO Charts	**NATS** U.K. VFR ICAO Charts	**Avioportolano** Italian VFR ICAO Charts and Flight Guide
Skyguide VFR Guide Swiss VFR Flight Guide	**ANS** Finnish VFR ICAO Charts	**Avinor** Norwegian VFR ICAO Charts	**LFV** Swedish VFR ICAO Charts

***** *Available for individual countries / regions or as a bundle*

† *AIPs / flight guides / trip kits and procedure charts available for certain countries*

Included Jeppesen Data

All European ForeFlight subscriptions automatically include Jeppesen's VFR navigation data for Europe and global IFR navigation data, as well as Jeppesen's high-quality global terrain, obstacle, and airspace datasets.

Jeppesen VFR Navigation Data Coverage

Integrated seamlessly into ForeFlight's Aeronautical Map, Jeppesen's digital VFR navigation data dynamically appears as you pan and zoom. Includes VFR waypoints, entries and exits, traffic circuits, no-overfly areas, and more.
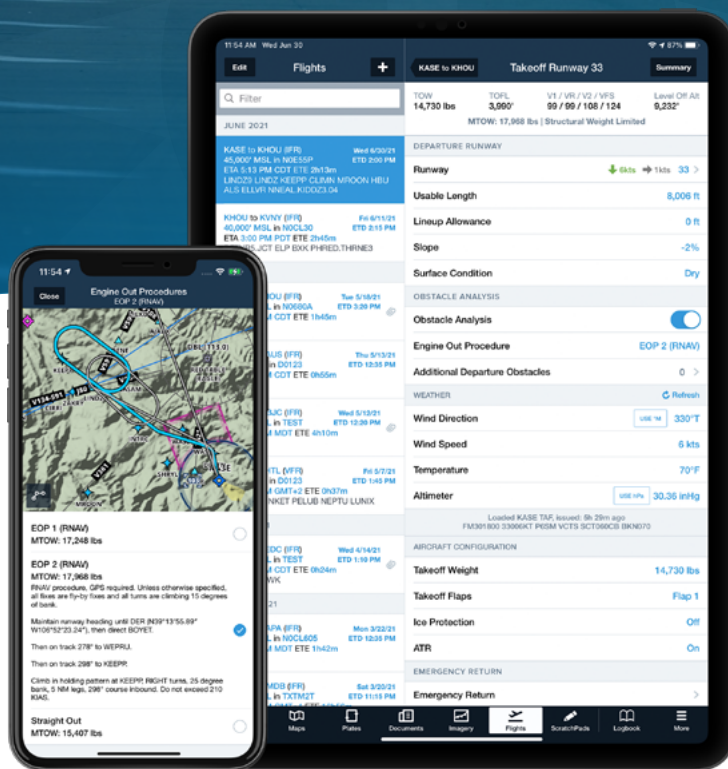

Runway Analysis

Integrated & Indispensible

Safety meets convenience with a sophisticated runway and obstacle analysis for jets that's fully-integrated with ForeFlight's planning workflow. Available for purchase by aircraft type alongside **Performance Plus** and **Business Performance** subscription plans*, with support for a growing list of popular jet aircraft from Gulfstream, Bombardier, Textron, and others.

Runway Analysis is built into the Flights view and automatically leverages available route, fuel, and weight details to quickly calculate your MTOW and other results. With a blazing fast **obstacle analysis** incorporating **engine out procedures**, a detailed Summary document for inflight reference and recordkeeping, and a slew of efficiency-boosting automations, Runway Analysis will help you ensure a safe flight with minimal time and effort.

Learn more and see the complete list of supported models at **foreflight.com/runway**.

*Individual accounts can purchase a selection of light jet models directly through ForeFlight's website.
Business accounts can purchase any supported models by contacting ForeFlight Sales at **sales@foreflight.com**.*

Sentry + Sentry MINI

Easy, affordable access to safety-enhancing inflight information.

Sentry and Sentry Mini are compact, powerful devices that deliver real-time weather, traffic, and more to ForeFlight Mobile on your iPad and iPhone.

- Inflight Weather `MINI`
- WAAS GPS `MINI`
- Weather Replay
- ADS-B Traffic `MINI`
- AHRS
- Pressure Altitude Sensor
- CO Monitor
- 12hr Battery
- Supports 5 Devices & Cockpit Sharing `MINI`

BUYING A SUBSCRIPTION

Start at **foreflight.com/pricing** and follow these simple steps to customize and purchase your subscription to suit your flying needs.

① Choose a Subscription Plan

GBP & EU Currencies also supported

Individual Plans

Allow simultaneous use on up to 2 iPads and 1 iPhone, or 1 iPad and 2 iPhones.

Basic Plus
USD $99.99/year | CAD $139.99/year

All the essentials for VFR and IFR planning, filing, flying, and logging.

Pro Plus
USD $199.99/year | CAD $279.99/year

Everything in Basic Plus, plus geo-referenced approach plates and taxi diagrams, and inflight hazard awareness features like Synthetic Vision, Profile View, and Hazard Advisor.

Performance Plus
USD $299.99/year | CAD $419.99/year

Everything in Pro Plus, plus all the most advanced features like 3D Airports, Preview and Review, forecast weather in Profile View, detailed aircraft performance profiles, highly-accurate time and fuel planning, optimized ATC-friendly autorouting, Takeoff & Landing Distances for pistons, and more.

Business Plans

Allow simultaneous use on up to 2 devices of any type per pilot.

Business Pro
USD $200/year | CAD $280/year

Flight planning in app and on the web, Graphical Briefing, Aviation weather, Aeronautical Maps, VFR & IFR charts, Geo-referenced approaches & charts, Profile View & Hazard Advisor, Cloud Documents, Avionics Connectivity, Printable Navlog, and more.

Business Performance
USD $300/year | CAD $420/year

Everything in Business Pro, plus aircraft performance profiles, time & fuel calculations, optimized autorouting, PDC & D-ATIS, Trip Assistant, 3D Airports, Preview, & Review, Content Pack cloud distribution, and more.

Military & Government Plans

ForeFlight **Military Flight Bag** subscriptions are also available for both individuals and groups, with additional features to support military operations around the globe.

Learn more at **foreflight.com/mfb**.
