#### Table of Contents

Print your own custom, high resolution graphics & logo using Clarus ColorDrop technology

You can clean your Clarus Healthboard with any hospital grade cleaner

Clarus Glass will never stain or ghost, keeping sensitive patient details safe and secure, plus your board will look new every day for a lifetime

Clarus Healthboards come with our On The Wall Promise and outperform and outlast any whiteboard on the market

Clarus Glass is a non-porous material that acts as both an anti-bacterial and anti-microbial that surface stays hygienic and clean

Clarus Healthboard comes shipped with a package of Clarus Preferred markers that offer perfect visibility for your glass writing surface

Room: 2150 Phone Ext: 4589 Primary Doctor: DR. WILLIAMS Nurse: TRACY MCLAIN

Urse Tech: > 7.5PHT A.

#### What is Healthboard?

#### Notes: L LOVE YOU

Featuring an antibacterial, non-porous writing surface, Healthboard is the ideal solution for hospital rooms, nurse stations and other areas where patient health is vital. Fabricated from safety writing glass, Healthboard features rich color palettes and two custom print options, ColorDrop and Transition, to meet a range of versatile healthcare needs.

Clarus Healthboard can be created with essential or supporting design elements in two formats, permanent ColorDrop print and Transition removable graphics.

Clarus ColorDrop technology enables permanent branding, layout or formatting to be printed on Healthboard, creating a fusion of confidence-building brand intimacy and informative elements such as fields, patient information or gridlines.

Clarus Transition, popular in many healthcare settings, allows doctors and nurses to add, remove and otherwise design a Healthboard's backdrop to the patient experience. Transition is a simple solution, via a hidden channel on the back of the Healthboard, that beautifully tailors patient communication within the context of their care. Transition can be easily updated over time as the needs of a healthcare facility evolve.

#### Patient Communication Drives Satisfaction

n Starts Her

w your statistics

With any written medium in a healthcare facility, privacy is paramount. A patient's approval of doctor and nurse communication could be negatively impacted by poorly erasing surfaces. Traditional writing surfaces, such as whiteboards have porosity that traps dry-erase marker ink and other contaminants including bacteria, making them too risky for healthcare - their aesthetics alone could negatively impact HCAHPS scores. Illustrative surfaces, such as Healthboard are also essential to effective communication with patients who don't speak English or the languages in which doctors and nurses are proficient. Patients who speak languages different from their caregivers are likely to score HCAHPS communications metrics poorly if they are unable to understand instructions, diagnoses and bedside care. Healthboard presents the opportunity to illustrate or simply 'write out' concepts, supporting spoken dialogue and enabling patients to discern messaging after the doctor or nurse has left the room.

Healthboard is the ideal medium for doctors and nurses to express their efforts in communication through illustrated and written content. They bring color, personality, and brand equity to the hospital room. And because doctors and nurses should utilize all available channels to connect with patients, Healthboard is an essential medium for optimal communication.

#### Why A Clarus Healthboard:

#### Infection Control | Reduced Maintenance | Improved Patient Satisfaction Scores

Why spend millions of dollars and countless hours dedicated to patient safety and satisfaction, only to come up short in every hospital room? Old whiteboard technology is simply unsafe and unnecessary. With Healthboard by Clarus, never risk patient confidentiality or incorrect treatment directions with ghosted whiteboards. Step up to Healthboard.
