# C-more 6" Micro-Graphic STN Touch Panel

Model EA1-S6MLW C-more 6" Micro-Graphic touch panel has a 5.7-inch STN LCD monochrome 320 x 240 dot display and five selectable LED-driven backlight colors including White, Pink1, Pink2, Pink3 and Red. It features five user-defined function keys, each key with a user-defined red LED indicator. The panel can display up to 40 lines by 80 characters of static text and up to 40 lines by 40 characters of dynamic text with embedded variables and phrases mixed with graphics in landscape orientation. Portrait orientation can display 53 lines by 60 characters of static text and 40 lines by 40 characters of dynamic text. It is rated UL for use on a flat surface of Type 1, 4X enclosure (for indoor use only). The C-more 6" Micro-Graphic STN panels are powered from a 12-24 VDC power supply or can operate in low-power mode\* when powered from the serial communications port of select AutomationDirect PLCs.

#### **Features**

- Touch screen display
- Free downloadable programming software
- 320 x 20 Dot display with up to 40 lines by 80 characters of text and graphics in landscape mode
- Up to 40 lines by 40 characters of dynamic text with embedded variables and phrases mixed with graphics
- 5 programmable function keys can change with every screen. Can increment / decrement values, trigger recipes, view index of
- 5-Color LED backlight for longer lifetime; Green, Red, Amber, Yellow and Lime
- 2 optional keypad bezels, 20-button landscape and 21-button portrait
- · Optional replaceable clear screen overlay
- 1,792 KB memory
- Built in RJ12 serial communications port
- · Built in 15-pin serial communications port
- Built in Alarm Control setup that activates beep, backlight flash, customized alarm banner, and red LED blinking
- 0 to 50 °C (32 to 122 °F) operating temperature range (IEC 60068-2-14)
- NEMA 4/4X, IP65 compliant when mounted correctly, indoor use only
- UL, cUL & CE agency approvals
- · 2-year warranty from date of purchase

NOTE: Don't forget the optional keypad bezels shown in the Accessories section.

#### Part No. EA1-S6MLW

Shown in Landscape (Horizontal) mode

\*NOTE: When EA1-S6ML or EA1-S6MLW is powered through Port1 from a connected PLC or PC, the screen brightness is diminished because the panel is running in Low-Power Mode. For full brightness, connect an external 12-24 VDC power source to the 6" panel's power connection. Low-Power Mode should be used during initial programming only. Connect an external 12-24 VDC power source when the panel is installed in its application.

#### Dimensions

Units: Inches [mm]

### Panel Cutout

#### Panel Thickness

NOTE: The C-more 6" Micro-Graphic cutout dimensions are not equivalent to previous AutomationDirect text panels. The C-more 6" Micro-Graphic panels will not fit in cutouts for DV-1000, EZText, Optimate panels or C-more 6" panels.

# C-more 6" Micro-Graphic Panels Overview

#### Overview

**C-more** 6" Micro-Graphic panels are joined by a full color, TFT model! **C-more** 6" Micro-Graphic panels offer touch screen capability and customizable graphics. Two optional Keypad Bezels are available for either Horizontal or Vertical panel orientation.

In addition to the simple panel configuration software, a very helpful feature is the built-in project simulator. The project simulator allows you to view your project on the PC screen as it would appear on the panel and to test all your screens before downloading the project to the panel. You can simulate your entire project at any stage of development. With version 2.50 or later, simulate the function keys and keypad bezel.

### Support

Our Web site contains all of the information in this section, any new feature releases, tech support, plus much more. Please visit www.automationdirect.com, or visit www.C-moreMicro.com for a more interactive presentation. You may also contact our Technical Support group from 9 a.m. to 6 p.m. ET, Monday - Friday, at 770-844-4200 and we will be glad to assist you.

### Getting started

Installing the software and configuring the **C-more** 6" Micro-Graphic panel is simple. You will need the following to successfully connect and configure a project for the panel:

- *C-more* 6" Micro-Graphic panel
- C-more Micro-Graphic Programming Software, EA-MG-PGMSW
- Programming cable: EA1-S6ML and EA1-S6MLW require the *C-more* Micro-Graphic USB to RS232 converter with cables, EA-MG-PGM-CBL; used to connect the panel to your PC's USB port and run the *C-more* Micro-Graphic programming software.
- Programming cable: EA1-T6CL uses a standard USB A-to-B type cable to connect the panel to your PC's USB port and run the *C-more* Micro-Graphic programming software. AutomationDirect.com sells USB A-to-B cables in a variety of lengths such as USB-CBL-AB6 (6 foot length).
- PLC communications cable (serial) to connect the C-more Micro-Graphic panel to your controller

### **Drivers for your Controller**

**C-More** 6" Micro-Graphic panels have the following drivers available for connection to AutomationDirect DirectLOGIC and many other controllers:

- · AutomationDirect CLICK (Modbus)
- DirectLOGIC K-sequence, DirectLOGIC DirectNET, DirectLOGIC Modbus (Koyo Addressing)
- Modbus RTU
- Allen Bradley DF1 Full Duplex, Allen Bradley DF1 Half Duplex, Allen Bradley PLC5 DF1, AB DH485
- Omron Host Link (C200 Adapter, C500), Omron FINS serial (CJ1, CS1),
- GE SNPX (90/30, 90/70, Micro 90, VersaMax Micro)
- · Mitsubishi Melsec FX
- · Mitsubishi Q and QnA
- · Siemens PPI
- · Entivity Modbus RTU

### EA1-S6ML

<--->
Shown in Portrait
(Vertical) mode

Shown in Portrait (Vertical) mode

NOTE: EA1-T6CL requires Software and Firmware Version 2.50 or later. Software and Firmware Version 2.0 or later is required with models EA1-S6ML and EA1-S6MLW.

Available for free download at www.automationdirect.com.

# Features

#### **Bitmaps**

- 320 X 240 pixel graphical display supports bitmaps
- Use bitmap images of pushbuttons, switches, indicators, your company logo
- Use provided library of bitmaps
- Create your own library of bitmaps

#### Text - 40 lines

- 40 lines by 80 characters of static text in Landscape Orientation
- 53 lines by 60 characters of static text in Portrait Orientation
- · Look up text, scroll up to 128 characters
- 40 lines by 40 characters of dynamic text, embedded variables, on/off phrases, scroll up to 40 characters
- Scroll text object with up to 128 characters
- Inverse video to accentuate text

#### Beep

- Beep to indicate an alarm
- Beep for a special message
- Beep to verify when button is pressed

#### Bar graphs

· Line, vertical, horizontal, skinny, fat, multiple

#### Data entry

- Pop-up numeric key pad on the screen
- Increment/decrement a value by touching arrows
- Two optional keypad bezels, Landscape and Portrait

#### Recipes

Each recipe button transfers up to 99 values from PLC source registers to PLC destination registers and/or from the recipe table to PLC destination registers.

#### 5 dynamic background colors - EA1-S6ML and EA1-S6MLW

Screen background can be controlled by the program to choose one of five colors depending upon the model. Choices for model EA1-S6ML are green, lime, yellow, amber and red. Model EA1-S6MLW background colors include white, pink1, pink2, pink3 and red . For example, use a red background for an alarm condition or a yellow background on a caution screen that will be easily noticed.

EA1-S6ML

#### 32K Colors - EA1-T6CL

The TFT panel has a palette of 32K colors available to make full use of color for objects and bitmaps as well as backgrounds.

#### Up to 999 Screens

**C-more** Micro-Graphic supports up to 999 screens. Screen quantity is limited by memory usage which is determined by the total bitmaps, objects, etc. that are used.

| • Enclosure                          | For use on a flat surface of Type 1, 4X enclosure (Indoor use only)  |   |                      |  |  |
| <ul> <li>Agency Approvals</li> </ul> | CE (EN6113   | l-2), UL508, CUL Canadian C22.2 No. 142-M9  | 95, UL File E157382  |  |  |

NOTE: The environmental specifications for the panels shown above are also applicable for the C-more 6" Micro-Graphic accessories shown later in this section of the catalog.

|   | Specifications   |   |  |  |  |  |  |
|---|--|---|--|--|--|--|--|
| EA1-S6ML and EA1-S6MLW  |  |   |  |  |  |  |  |
| Electrical  |  |   |  |  |  |  |  |
|   | Low Power Mode*  | High Power Mode   |  |  |  |  |  |
| • Input Voltage Range   | 5.0 VDC (4.75 – 5.25 VDC)  | 12/24 VDC (10.2 – 26.4 VDC)   |  |  |  |  |  |
| • Input Power   | Supplied through the panel's RJ12 serial communications port con-<br>nection when used with most AutomationDirect PLCs having a RJ12<br>communication port or from a PC USB. | Supplied from an external 12-24 VDC power source                    |  |  |  |  |  |
| • Power Consumption   | 1.05 W (220 mA@4.75 VDC)   | 6.5 W (640 mA @ 10.2 VDC)   |  |  |  |  |  |
| • Recommended Fuse  | No fuse required when directly connected to a PLC or PC with recommended cable.  | Type AGC fast acting glass fuse,<br>750 mA, 250 VAC, ADC p/n AGC-75 |  |  |  |  |  |
| • Maximum Inrush Current  | 1 A for 500 μs   | 10 A for 500 μs   |  |  |  |  |  |
| <ul> <li>Acceptable External<br/>Power Drop Duration</li> </ul> | Maximum 1 ms   |   |  |  |  |  |  |

\*NOTE: When the 6" panel is powered through Port1 from a connected PLC or PC, the screen brightness is diminished because the panel is running in Low-Power Mode. For full brightness, connect an external 12-24 VDC power source to the 6" panel's power connection. Low-Power Mode should be used during initial programming only. Connect an external 12-24 VDC power source when the panel is installed in its application.

| Specifications Specification Specif |   |   |  |  |  |  |
|--|---|---|--|--|--|--|
|  | EA1-T6CL  |   |  |  |  |  |
| Electrical   |   |   |  |  |  |  |
|  | USB Bus Power (Programming only)*   | High Power Mode   |  |  |  |  |
| • Input Voltage Range  | 5.0 VDC (4.75 – 5.25 VDC)   | 12/24 VDC (10.2 – 26.4 VDC)   |  |  |  |  |
| • Input Power  | Supplied from a PC USB.   | Supplied from an external 12-24 VDC power source                    |  |  |  |  |
| <ul> <li>Power Consumption</li> </ul>  | 2 W (420 mA @ 4.75 VDC)   | 6.5 W (640 mA @ 10.2 VDC)   |  |  |  |  |
| • Recommended Fuse   | No fuse required when directly connected to a PLC or PC with recommended cable. | Type AGC fast acting glass fuse,<br>750 mA, 250 VAC, ADC p/n AGC-75 |  |  |  |  |
| <ul> <li>Maximum Inrush Current</li> </ul>   | 4.5 A for 800 μs  | 13 A for 800 μs   |  |  |  |  |
| <ul> <li>Acceptable External<br/>Power Drop Duration</li> </ul>  | Maximum 1 ms  |   |  |  |  |  |

\*NOTE: The EA1-T6CL can be powered through Port1 when connected to a PC for programming, the screen brightness is diminished because the panel is running in Low-Power Mode. For full brightness, connect an external 12-24 VDC power source to the 6" panel's power connection. An external 12-24 VDC power source must be used when the panel is installed in its application.

# C-more 6" Micro-Graphic **Power Connection Wiring**

### Providing power to the touch panel

- 1.) During operation, the panel functions in High-Power Mode when powered by a minimum 1 Amp 12 - 24 VDC power source. Recommended power supplies are AutomationDirect part number PSP24-024S or PSP24-024C
- 2.) C-more Micro-Graphic STN panels EA1-S6ML and EA1-S6MLW are powered during programming from the PC through the USB to RS-232 Programming Cable Assembly, EA-MG-PGM-CBL. C-more Micro-Graphic TFT panel EA1-T6CL is powered during programming through a USB A-to-B cable such as USB-CBL-AB6. The panel will operate in Low-power mode when powered by the PC and result in a dim screen.\*
- 3.) Optionally, the C-more Micro-Graphic STN panels EA1-S6ML and EA1-S6MLW can function in Low-Power Mode powered from most AutomationDirect PLC's RJ12 serial communications port. Use a DV-1000CBL communications cable, or a DV-1000CBL communications cable with a FA-15HD 15-pin HD DSub/RJ12 Adapter connected to most AutomationDirect PLC's 15-pin HD communications port (DL06, D2-250-1 & D2-260) for Low-Power operation. See Chapter 6: PLC Communications in the Hardware User's Manual (P/N: EA1-MG6-USER-M) for additional details. The panel will operate in low-power mode when powered by the PLC. The C-more Micro-Graphic TFT panel EA1-T6CL cannot be powered from a PLC.

### EA1-S6ML or EA1-S6MLW powered from an AutomationDirect PLC via communications cable

\*NOTE: When the panel is powered through Port1, the screen brightness is diminished. For full brightness, connect an external 12-24 VDC power source to the panel's power connection. Low-Power Mode should be used during initial programming only. Connect an external 12-24 VDC power source when the panel is installed in its application.

### 6" Panel powered from a DC power source - wiring diagram

#### EA1-S6ML & EA1-S6MLW

#### EA1-T6CL

NOTE: Recommended DC power supply to power the C-more Micro-Graphic Panel, AutomationDirect Part No. PSP24-024S or PSP24-024C.

# C-more 6" Micro-Graphic PLC Connections

### Cabling requirements

When using the built in RJ12 serial port (Port1) on models EA1-S6ML or EA1-S6MLW to connect with the CLICK, DL05, DL06, DL105, DL205, D3-350 and DL405 CPUs, your cabling choices are fairly simple.

- DV-1000CBL connects to CLICK, DL05, DL06, DL105, DL205, D3-350 and D4-450 phone jack.
- D4-1000CBL connects to all DL405 CPU 15-pin ports.

A maximum cable length of 10 feet between the EA1-S6ML or EA1-S6MLW and the PLC is recommended when powering the panel in Low-Power Mode from the PLC. The EA-T6CL cannot be powered from a PLC.

The C-more 6" Micro-Graphic panels can communicate through its built-in 15-pin serial port (Port2) via RS-232, RS-422 and RS-485 using these cables.

- EA-2CBL connects to CLICK, DL05, DL105, DL205, D3-350 and D4-450 phone jack.
- EA-2CBL-1 connects to D2-250, D250-1, D2-260, DL06 VGA

The EA1-T6CL can only communicate to a controller through the 15-pin serial Port2.

### Supported protocols

- AutomationDirect CLICK (Modbus)
- · DirectLOGIC K-sequence
- DirectNFT
- Modbus (Koyo Addressing)
- Modbus RTU
- Entivity Modbus RTU
- Allen-Bradley DF1 Half Duplex
- Allen-Bradley DF1 Full Duplex
- Allen-Bradley PLC5 DF1
- Allen-Bradley DH485
- GE Fanuc SNPX (90/30, 90/70, Micro 90, VersaMax Micro)
- Omron Host Link (C200 Adapter, C500)
- · Omron FINS Serial (CJ1, CS1)
- Mitsubishi Melsec FX
- · Mitsubishi Q and QnA
- Siemens PPI

# C-more 6" Micro-Graphic Panel Accessories

### 20-Button Keypad Bezel, Landscape Orientation

The 20-button keypad bezel is designed to be used with all C-more 6" Micro-Graphic panels. The keypad includes four directional arrow cursor buttons, a full numeric keypad, and one each of an ESCAPE, MENU, CLEAR and ENTER button. The keypad is intended to be used with the numeric entry object (Style 3) to allow changing of a value, and can also be used to

navigate and select screen objects. The numeric buttons can be used to enter a new value, along with the ENTER and CLEAR buttons. The 6" panels mount directly into the bezel; no panel configuration is required.

# C-more 6" Micro-Graphic Panel Accessories

### D-SUB 15-pin 90-degree Communication Port Adapter

The EA-ADPTR-4 adapter plugs into the 15-pin serial port on the rear of a 6" panel to allow a controller communication cable to be plugged in at a 90 degree angle to reduce panel depth requirements. 15-pin straight through pin-out. UL Recognized.

## D-SUB 15-pin to Terminal Block Adapter

The EA-COMCON-3 adapter plugs into the 15-pin serial port on the rear of a 6'' panel to allow wire terminal connections for an RS-422/RS-485/DH-485 PLC communication cable. UL Recognized.

# C-more 6" Micro-Graphic Panel Accessories

### Clear Screen Overlay

Optional clear screen overlay used to protect *C-more* 6" Micro-Graphic displays from minor scratches and wear. Package contains 3 clear screen overlays.

#### Part No. EA-6-COV2

#### **Dimensions**

## Clear Screen Overlay Installation

#### Step 1

Remove the overlay from the package

Remove the paper backing from the overlay

Align the overlay with the screen and press the adhesive firmly into place

Remove the protective film\*

\*Note: The overlay cover ships with a thin protective film on the face that should be carefully removed after installation.

# C-more 6" Micro-Graphic Replacement Parts

The optional replacement parts can be used to replace damaged, worn or lost **C-more** 6" Micro-Graphic panel components.

### Replacement parts at a glance:

| Part Number     | Description   | Price |
|-----------------|---|-------|
| EA-MG-BZ2-BRK   | Replacement mounting clip for <i>C-more</i> Micro-Graphic panel and keypad bezels. Also used to mount the <i>C-more</i> 3" Micro-Graphic bezel EA-MG-BZ2. (pk of 8) | <>    |
| EA-MG-DC-CON    | Replacement adapter DC power connector (pk of 5)  | <>    |
| EA-MG6-S6ML-GSK | Replacement mounting gasket for <i>C-more</i> 6" Micro-Graphic panels   | <>    |
|                 | Replacement mounting gasket for <i>C-more</i> 6" Micro-Graphic keypad bezels EA-MG6-BZ2 and EA-MG6-BZ2P   | <>    |
| EA-MG6-S6ML-FKL | Replacement function key label insert for <i>C-more</i> 6" Micro-Graphic panels (pk of 5; 3 blank, 1 F1-F5 for landscape, 1 F1-F5 for portrait)                     | <>    |

# Panel Mounting Clips Part No. EA-MG-BZ2-BRK

(pk of 8)

# DC Power Connector Part No. EA-MG-DC-CON

(pk of 5)

# Function Keys Label Inserts Part No. EA-MG6-S6ML-FKL

(pk of 5; 3 blank, 1 F1-F5 for landscape, 1 F1-F5 for portrait)

# Panel Gasket Part No. EA-MG6-S6ML-GSK

### Keypad Bezel Gasket Part No. EA-MG6-BZ2-GSK

# C-more Micro-Graphic Programming Software

### FREE software!

**C-more** Micro-Graphic Programming Software can be downloaded at no charge or a CD version may be purchased by ordering EA-MG-PGMSW. The software requires a USB port on your PC to connect to the **C-more** Micro-Graphic panel. Software Help Files are included in the download. This software programs all the **C-more** Micro-Graphic panels (does not program the **C-more** 6" through 15" touch panels).

Note: This software is used to program C-more Micro-Graphic panels only.

Part Numbers: EA1-S3ML, EA1-S3ML-N, EA1-S3MLW, EA1-S3MLW-N, EA1-S6ML, EA1-S6MLW, EA1-T6CL

NOTE: Software and Firmware Version 2.50 or later is required with model EA1-T6CL.

Software and Firmware Version 2.0 or later is required with models EA1-S6ML and EA1-S6MLW.

Software and Firmware Version 1.5 or later is required with models EA1-S3MLW and EA1-S3MLW-N.

Available for free download at www.automationdirect.com.

**C-more** Micro-Graphic Programming Software is a spin-off of its powerful sibling C-more Touch Panel. It offers very high end features designed to reduce your configuration time. Simply drag and drop the objects from the object list (right side of screen) onto the the screen construction area. Then configure your PLC tags and click on the objects you wish to use. Use the built-in simulator to review your work on your PC before ever downloading your project! The time saving benefits of the **C-more** Micro-Graphic configuration software could easily pay for the panel. Check out www.C moreMicro.com to download a free version.

# Thumbnail project preview pane

Helps keep track of multi-screen projects.

### Built-in project simulator

- Runs your project on your PC
- Test all of your screens before downloading
- Time savings pays for the panel
- Version 2.5 or later Simulate function keys and keypad bezel.

# Built-in user object/screen libraries

Save time by re-using your custom objects and screens.

# Scrolling object selection window

Lets you find the object you want fast. Just drag and drop it on the screen.

## PC requirements

Following are the minimum system requirements for running **C-more** Micro-Graphic Programming Software, EA-MG-PGMSW, on a PC:

- Personal Computer with a 333 MHz or higher processor (CPU) clock speed recommended;
- Keyboard and Mouse or compatible pointing device
- Super VGA color video adapter and monitor with at least 800 x 600 pixels resolution (1024 x 768 pixels recommended) 64K color minimum
- 150 MB free hard-disk space
- 128 MB free RAM (512 MB recommended); 512 MB free RAM (1GB recommended) for Vista
- $\bullet$  CD-ROM or DVD drive for installing software from the CD, or internet access to download free programming software
- USB port to use with an EA-MG-PGM-CBL, USB to RS232 Programming Cable Assembly for project transfer from the programming software to the panel
- Operating System Windows\* XP Home / Professional Edition Service Pack 2, Windows\* 2000 with Service Pack 4, or Windows\* Vista

# C-more Micro-Graphic Programming Software

| C-more Micro-Graphic Panel Objects   |   |   |   |  |  |  |
|--|---|---|---|--|--|--|
| Object   | Graphic                                   | Object  | Graphic                                 |  |  |  |
| The <b>Line</b> object, just like with drawing tools, allows the user to insert a straight line drawing into a project. When a Line is inserted into a project, a window opens to allow the user to setup all available parameters for the Line object. Some of the uses for Line Objects include but are not limited to adding callouts, pointers, or ndicators.  | *   | The <b>Analog Meter</b> object is used to display the current value of a Tag Name.  | 1000 2500 2500 2500 2500 2500 2500 2500 |  |  |  |
| The <b>Rectangle</b> object, just like with drawing tools, allows the user to insert a drawing of a Rectangle as well as other geometric shapes into a project. When his object is inserted into a project, a window opens to allow the user to setup all available parameters for the Rectangle object.   |   | The <b>Bar Meter</b> object is used to monitor up to two assigned Tag Names continuously. This object has various appearances depending upon the relative value of the tags. The Bar Meter can be used to create digital versions of level, current, and flow meters to name a few samples, or gauges that measure speed and other measurable data.   | 9999<br>-<br>5000<br>-<br>0             |  |  |  |
| the <b>Circle</b> object, just like with drawing tools, allows the user to insert a drawing of a Circle or ellipse shape into a project. When this object is inserted into a project, a window opens to allow the user to setup all available parameters for the Circle object.  |   | The <b>Bitmap Button</b> object offers the ability to use a Bitmap graphic to perform the functions of a Button. This allows users to create their own graphics and implement them within the software project. The Bitmap Button object can be used to activate or deactivate components assigned to a Discrete Tag Name. The C-more Micro-Graphic display only supports two colors, black and white.  |   |  |  |  |
| The <b>Frame</b> object allows the user to insert a Frame to the project that can be used of Frame other objects. Some of the uses for Frame object include but are not imited to graphically separating objects for different operations that may appear on one screen and emphasizing pushbuttons or other objects that may require more attention by the operator.  |   | The <b>Static Bitmap</b> offers the ability to display a Bitmap graphic on any screen. The Static Bitmap does not change state. Refer to the Dynamic Bitmap Object if you require the graphic object to change state based on a Tag Value in your PLC. The dialog box for a "Static Bitmap" object allows you to "read from disk" and select a graphic file for import. Graphics must be in one of the following formats: .BMP .WMF .JPG .JPEG  | 1/200                                   |  |  |  |
| The <b>Pushbutton</b> object is available from the Button Category of the Object List<br>window. The Pushbutton object is an electronic version of a typical Pushbutton<br>normally found on control panels. The Pushbutton object can be used to activate<br>or deactivate components assigned to a Discrete Tag Name.  | 0   | Recipe objects make it easy to make a large number of tag changes with the push of a single button. Create Recipes with up to 99 entries, and multiple sets of values. Then just push a button to load an entire set of values into the group of recipe tags.   |   |  |  |  |
| The <b>Switch</b> object is an electronic version of a typical Switch that normally can be found on control panels. The Switch object can be used to activate or deactivate components assigned to a Discrete Tag Name.  |   | The <b>Dynamic Bitmap</b> object offers the ability to make an object using two different Bitmap graphics that will display one graphic when the Tag is On and a different graphic when the Tag is Off. Use your own bitmap designs or use some of the bitmaps provided with the software that are located in the User Graphic Library.   | Auto Aut                                |  |  |  |
| The Indicator Button object is available from the Button Category of the Object List<br>window. The Indicator Button object is an electronic version of a typical Indicator<br>Button normally found on control panels. The Indicator Button is a combination of a<br>Pushbutton and an Indicator Light. The Indicator Button can be used to activate or<br>deactivate components assigned to a Discrete Tag Name.   |   | The <b>Static Text</b> object is used to display a Frame with a personalized Message. This Frame and Message can be placed on any screen and any location within the screen.  | STATIC TEXT                             |  |  |  |
| The <b>Indicator Light</b> object is an electronic version of a typical Indicator Light normally found on industrial control panels. The Indicator Light can be configured o display the status of the assigned Discrete Tag Name.   |   | The <b>Lookup Text</b> object is used to display a Frame with a personalized Message. This Frame and Message can be placed on any screen and any location within the screen. The object is always displayed like a sign but is configured to display only the message prompted by an assigned Tag Name. Messages are retrieved from a Message Database which is configured by the user with text defined by the user. The Lookup Text Object will scroll text up to 128 characters.   | LOOK OF TEXT                            |  |  |  |
| The <b>Graphic Indicator Light</b> object is a more enhanced version of the "Indicator Light Object" that allows the user to choose more detailed graphics to display the status of a tag. This object is an electronic version of a typical Indicator Light normally found on industrial control panels. The Indicator Light can be configured o display the status of the assigned Discrete Tag Name.  | <b>™</b> -b: <b>∩</b>                     | The <b>Dynamic Text</b> object is used to display text that is retrieved from data stored in a Tag. The Tag Name is assigned to registers in the PLC that contain set character data. The data can be stored in the PLC in ASCII format and may include information such as machine numbers, locations, part numbers, and such. The Message can be configured to be visible (Trigger) when an associated Tag Name is On or Off. This object can be placed on any screen and any location within the screen. The Dynamic Text Object will scroll text up to 40 characters. | DenamicText                             |  |  |  |
| The <b>Numeric Display</b> consists of a frame that displays a real-time numeric value according to the value of data received from an assigned Tag Name. The Numeric Display supports numeric Signed Decimal, Unsigned Decimal, BCD, and Floating Point data types with up to 11 digits, including decimal point. User Defined Alpha Numeric Prefix and Suffix values are also supported.   | 1234512345                                | The <b>Scroll Text</b> object is available from the Text Category of the Object List window. The Scroll Text object is an electronic version of a marquee. It is similar to the Static Text Object. If the text in the object does not fit in the window, it will scroll from right to left across the window. The Scroll Text object does not require a Tag Name assignment. The Scroll Text Object has a maximum character limit of 128 characters.   | ScrollText                              |  |  |  |
| The Numeric Entry object is used to enter a value from your Panel to a PLC<br>Register. This object, when selected, opens a Numeric Keypad that allows the user<br>o enter a new value that will be written to the assigned Tag Name. The Numeric<br>Entry supports numeric Signed Decimal, Unsigned Decimal, BCD, and Floating<br>Point data types with up to 11 digits, including decimal points. User Defined<br>Alpha Numeric Prefix and Suffix values are also supported. | 1234512345                                | The <b>Screen Change</b> Pushbutton object is available from the Control Category of the Object List window. The Screen Change Pushbutton object is a pushbutton that can be configured to activate another screen in the project. This object may be edited to various colors and sizes. Users can configure the button to activate the Power-Up screen, Forward Screen, Previous Screen, or any one of the project screens.   |   |  |  |  |
| The Increment/Decrement Value object is used to add or subtract a value by pressing a button on the Panel. Basically the object uses two Tags, one to read a alue from and another to write a modified value to. The Increment/Decrement falue supports numeric Signed Decimal, Unsigned Decimal, BCD, and Floating boint data types with up to 11 digits, including decimal points. The Increment and lecrement values are also user selectable.                              |   | The <b>Screen Selector</b> object is available from the Control Category of the Object List window. This object is an enhanced version of the Screen Change pushbutton in that it offers many more features and defaults with data from screens in the project. This helps to save time by not having to create Screen change buttons for each screen. This object may be edited to various colors and sizes.   | Screen<br>Selector                      |  |  |  |
| The <b>Real Time Graph</b> object displays the value stored in up to two PLC tags, over a history of up to 24 points each. One point is added at each refresh.   | 2 4 5 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 | The Adjust Display Contrast object is used to allow the operator to adjust the Panel Display Contrast. The default Display setting often works in most applications, however lighting may vary based on the location of each application. In these cases the operator can use this object to make adjustments. The current display setting value will appear on the top of the button and will change as the arrow keys are pressed. This button can be modified to various sizes.  | 10                                      |  |  |  |
| The <b>Line Graph</b> object displays the values of up to 24 PLC address points. Up to two address arrays can be displayed. The line is drawn in its entirety at each refresh.   |   | The <b>Function</b> object is used to assign the panels function key buttons to a particular action as well as assigning the control of the LED On/Off status. When a button has been assigned as a shift button, the then F1 through F5 will become F6 through F10. The Function Object buttons will activate when the hardware button is pressed or when the object is pressed on the screen. The object size is restricted so that the keys will line up with the hardware function keys on the panel.   |   |  |  |  |

**Operator Interface** 

# C-more STN Micro-Graphic **Programming Connections**

Using the C-more Micro-Graphic Programming Software for project development, STN C-more Micro-Graphic panels can be connected to a PC (personal computer) by using EA-MG-PGM-CBL, the USB-to-RS-232 cable assembly.

• Connect the USB programming cable (included) from a USB port type A on the PC to the USB type B port on the converter (included). Next connect the serial programming cable from the converter's RJ12 port to the panel's RJ12 serial port. The panel receives power from the USB port of the PC that it is connected to through the USB to RS-232 converter assembly.

# Cable Assembly

Part No. EA-MG-PGM-CBL

NOTE: The TFT panel EA1-T6CL does NOT use the EA-MG-PGM-CBL assembly. The TFT panel EA1-T6CL uses a standard USB A-to-B type cable such as USB-CBL-AB6.

| USB to RS-232 Converter Specifications   |  |  |  |  |
|--|--|--|--|--|
| Part Number  | EA-MG-PGM-CBL  |  |  |  |
| Hardware   |  |  |  |  |
| USB Interface  | USB Specification Rev. 1.1 Connector: USB Type B jack to accept USB Type B cable plug                        |  |  |  |
| Serial Interface   | RS-232 (EIA-232-E)<br>Connector: RJ12 phone jack 6p to accept RJ12 cable plug                                |  |  |  |
| Baud Rate  | 115.2 kbps Maximum   |  |  |  |
| Input Voltage  | 5 VDC (Supplied thru serial interface cable.)  |  |  |  |
| Power Consumption  | 50 mA (Does not include power to panel and/or bezel.)  |  |  |  |
| Accessory Cables (included)  |  |  |  |  |
| USB Cable  | USB Type A plug to PC on one end, USB Type B plug to converter on other end, 0.30 m [1 foot] length (* Note) |  |  |  |
| Serial Cable   | RJ12 phone plug connectors on both ends, 2.0 m [6.56 feet] length (* Note)                                   |  |  |  |
| Physical   |  |  |  |  |
| Dimensions   | 2.559" (W) x 1.417" (H) x 0.886" (D)<br>[65.0 mm x 36.0 mm x 22.5 mm]  |  |  |  |
| Weight   | 1.06 oz. [30 g]  |  |  |  |
| Environmental  | See Micro-Graphic panel specifications at the beginning of this catalog section.                             |  |  |  |
| * Note: Maximum cable length for either the USB or serial cable should not exceed 2.0 m [6.56 feet] in length. |  |  |  |  |

### C-more TFT Micro-Graphic Programming Connection

The C-more TFT Micro-Graphic panel EA1-T6CL includes an integral USB to serial converter. It is programmed via any USB Type A to Type B cable.

When properly installed on your PC, the device driver will be assigned a communication port number and appear in Windows Device Manager as a serial com port.

#### **USB** cable options for programming EA1-T6CL

| Part Number  | <b>Description</b>  | Price |
|--------------|---|-------|
| USB-CBL-AB3  | Standard 3-ft. (0.9 m) USB 2.0 cable, A-type connector to B-type connector, used to connect personal computer to any <i>C-more</i> touch panel for setup and programming. (Note: Touch panels require a 24 VDC power source for configuration and operation.)   | <>    |
| USB-CBL-AB6  | Standard 6-ft. (1.8 m) USB 2.0 cable, A-type connector to B-type connector, used to connect personal computer to any <i>C-more</i> touch panel for setup and programming. (Note: Touch panels require a 24 VDC power source for configuration and operation.)   | <>    |
| USB-CBL-AB10 | Standard 10-ft (3 meter) USB 2.0 cable, A-type connector to B-type connector, used to connect personal computer to any <i>C-more</i> touch panel for setup and programming. (Note: Touch panels require a 24 VDC power source for configuration and operation.) | <>    |
| USB-CBL-AB15 | Standard 15-ft. (4.6 m) USB 2.0 cable, A-type connector to B-type connector, used to connect personal computer to any <i>C-more</i> touch panel for setup and programming. (Note: Touch panels require a 24 VDC power source for configuration and operation.)  | <>    |
