SUBJECT INDEX

- Aborigines (in Australia), 306
 accessory rights to ores, 240
 acid rain, 280
 Afghan nomads, 9–10, 9
 age distribution, 14–5
 ages of people (prehistory to present), 215
 agriculture
 environmental issues, 63–5
 money, 65–8
 air conditioner, 319–20
 air pollution, 279–84
 cities with problems, 282–3
 aldicarb, 260
 alpha particle, 200
 amino acids, 37
 angle of repose, 116, 118
 animal production, 52–5, 57
 regional preferences, 53–5
 animal raising, 53–5
 in pastures, 6–7, 53–6
 in pens, 53
 anoxic decay, 180–2
 Antarctic, 320–2
 Antarctic bottom water (AABW), 296
 anticline, 182–3
 aquiclude, 147
 aquifer, 145
 Arabian Gulf, 184–5
 Aral Sea, 156
 artesian system, 150–2
 asbestos, 251
 Asbestos Hazard Emergency Response Act (AHERA), U.S., 251
 Asian countries, 16–7
 not Islamic, 16–7
 Aswan High Dam, Egypt, 142
 atmosphere
 composition, 288, 291–3
 controls, 288–97
 history, 288–97
 Australia, 313
 banded iron formation (BIF), 232
 Bangladesh family planning, 30
 barrier island, 109–10
 Basel Convention on hazardous waste, 265
 bauxite, 231
 bay, 109
 beach, 109–10
 beach replenishment, 113
 beneficiation of ores, 236–8
 Bessemer process, 237–9
 beta rays, 200
 Bhopal, India, 262
 biodegradable pesticides and herbicides, 259
 biologically active waste, 274–5
 biologically mediated mineral deposits, 231–2
 birthrate, 11–16
 Black triangle, eastern Europe, 281–2
 black-body radiation, 295
 blitzkrieg and megafauna extinction, 306
 blue clay, 118
 Bolivia, 234
 breakwater, 113
 Brent Spar, 264
 British thermal unit (Btu), xxi–xxii, 170–1
 Bronze Age, 215
 building stone, 224–5, 228
 bulk waste, 249–54
 burning, 250
 history, 249–50
 landfill (*see* landfill)
 recycling, 250–3
 Bushmen, 12
 Butte, Montana, 242–3
 California–Mexico border, 24
 calorie, xxi–xxii, 41, 170–1
 Canada
 energy consumption, 208
 energy production, 208
 gas production, 189
 gas reserves, 189
 land use, 3
 oil production, 189
 oil reserves, 189
 population density, 3
 surface-water supply, 135
 carbamates, 259–60
 carbaryls, 259–61
 carbohydrates, 34
 carbon dioxide, 291–3
 in atmosphere, 291–3
 in oceans, 291–3
 reservoirs, 291–3
 transfer rates, 291–3
 carbonate solubility in oceans, 292
 carboxyl, 37
 carrying capacity, 26–7
 cash crops, 68
 Caspian Sea, 192–3
 catalysis, 220
 cellulose, 34
 centigrade scale, 169
 Central American and Caribbean countries, 16–17
 Chernobyl, Ukraine, 204
 Belarus contamination, 204
 nuclear accident, 204
 Chile, 234

- China
 birth control, 29
 Three Gorges dam (*see* Three Gorges dam, China)
- chlordan, 259
- chlorofluorocarbons (CFCs), 318–21
 effect on ozone, 319–20
- chlorophyll, 33
- cholesterol, 38
- clay, 225
- climate
 controls, 293–7
 effect of human activity, 301–2
 future changes, 302–4
 history of past 1000 years, 297–300
 history throughout geologic time, 288–9
- Coal Age, 215
- coal, 197–9
 consumption, 198–9
 geology, 197–9
 production, 198–9
 reserves, 198–9
 smoke, 280
 transportation, 198–9
- coastal erosion, 104–13
- coastal flooding, 104–13
- coastline, 104–13
 effects of human activity, 111–13
 features, 109–10
 risk of living along, 106–12
- Colorado River, U.S., 140–5
- combustion of organic matter, 171–3, 180–2
- commons, 52–3
- condensation of water, 128
- cone of depression (*see* drawdown around water wells)
- conservation of energy, 74
- continental margins, 75–6, 109
 active, 75–6, 109
 passive, 75–6, 109
- continental-basin mineral deposits, 229–31
- convection in earth's mantle, 74
- Convention on International Trade in Endangered Species (CITES), 311–13
- Copper Age, 215
- core of earth, 74
- corn (maize), 45
 chemical composition, 45
- cosmic ray, 268
- creep, 113–14
- Creutzfeldt-Jakob disease, 56
- critical mass, 202
- crop production, 40–52
- crop requirements, 42–5
 light, 42
 nitrogen, 45
 nutrients, 43–5
 phosphorus, 45
 potassium, 45
 water, 42–3
- cropland, 4, 6–7
- crushed rock, 225
- crust of earth, 74
- crystal segregates as mineral deposits, 226
- curie, 267
- cyclodienes, 259, 259
- dams, 141–3, 175–7
 DDT, 257–8
 death rate, 11–14
 debris avalanche, 113
 deforestation, 313–17
 delta, 109
 demographic transition, 14–15
 desalination, 132, 313–17
 desert regions, 131, 133
 dioxins, 257
 direct energy, 171–3
 disasters, 78
 worldwide cost, 119–21
- doubling time, 5–8
- drainage basin, 139–41
- drainage divide, 139–41
- drawdown around water wells, 151–3
- drinking water, 155–9
 bacteria, 155–7
 chlorinated hydrocarbons, 157
 hardness, 159
 iron, 159
 lead, 157–9
 parasites, 155–7
 salt content, 159
 volatile hydrocarbons, 157
- dunes, 109–10
- earthquake damage, 83–7
 disease, 87
 disruption of services, 87
 fire, 86–7
 ground displacement, 86
 landslides, 87
 liquefaction, 87
 shaking and collapse, 86
 subsidence, 86
 tsunamis (*see* tsunami)
- earthquakes, 82–9
 causes, 83
 faults, 83, 87
 frequency–magnitude relationship, 83–5
 kinds, 83
 Richter magnitude, 83
 risk analysis, 86–9
- Easter Island, 307
- Eastern Europe, 256, 281–2
- education in lesser-developed countries, 17–20
- Einstein equation for equivalence of mass and energy (*see* mass-energy conversion)
- elastic limit, 83
- elastic strain, 83
- electricity, 173–7
 generator, 173–4
 production, 209–10
- electromagnetic radiation, 294–6
 spectrum, 295
- employment in lesser-developed countries, 17–20
- endangered species, 312–3
 Endangered Species Act (U.S.), 313
- endothermic process, 171
- energy, 40–2, 169–71
 in human nutrition, 40–2, 62
 relationship to population density, 11
 non-food sources, 171–9
 value of foods, 40–2
- energy consumption, 206–11
 future changes, 209–10
 present use, 207
- enzymes, 38–40
- estrogen, 38–9, 275–6
- estrogen-mimicking compounds, 275–6
- Euphrates River, Iraq, 102, 107–8
- eutrophication, 277–9
- evaporation of water, 128, 132, 230
- Everglades, Florida, 158–9
- Exclusive Economic Zone (EEZ), 58–9
- exothermic process, 172
- exponential curve, 5–11
- external heat engine of the earth, 73
- extinction, 305–17
 rate, 310–11
- Exxon Valdez, 194–5
- Fahrenheit scale, 169
- fats, 34–7
- faults (*see* earthquake faults)
- ferrous metals, 224
- fertility rate, 11–14
- fertilizer, 45, 224
- fibers, 51–2
- firestick farming, 313
- fish, 55–63
 food chain, 55–9
 nurture, 55–9
 production, 59–61
