

Car: Performance Tyres

ECSTA PS91

Super-UHP Tyre for Sports Cars

- Latest generation silica compound
- Excellent dry handling performance
- High speed stability
- Extremely short braking distance on dry roads
- Precise steering response
- Developed for ultimate sports cars

ECSTA PS71

Improved Ultra-High Performance Tyre

- Improved overall wet performance
- Shorter braking distance
- Improved resistance against lateral aquaplaning
- Outstanding driving stability at high speed
- Comes in new sizes to fit bestselling executive saloons, luxury and sports cars

ECSTA KU39

Ultra-High Performance Tyre

- 100% silica tread compound
- Short braking distance on dry and wet roads
- Excellent resistance against aquaplaning
- Secure handling and stability at high speed
- Improved steering response
- Optimised for mid-size saloons, luxury and sports cars

ECSTA KU31

High Performance Tyre

- For the driver who wants a fine balance between comfort, high performance and safety.
- Available in XRP run-flat fitment in some sizes
- Delivers excellent wet and dry traction in normal or high-speed driving conditions
- Provides excellent water drainage and resistance to aquaplaning
- Smooth ride and precise, responsive handling

Car: Touring Tyres

ECSTA HS51

High Performance Tyre

- New HDMS (High Dispersible Micro Silica) tread compound
- Outstanding braking performance on wet roads
- Excellent aquaplaning performance
- Optimal handling on wet and dry roads
- Maximum comfort and high mileage
- For compact, medium and upper medium cars

ECSTA KH31

High Performance Saloon Tyre

- Renowned for its well-balanced performance
- Perfect for drivers of higher powered saloons and estates who are looking for high-speed stability and excellent all-round performance
- Now fitted as original equipment to the BMW 3 series.
- Maximum water drainage
- Improved durability and handling performance

- Engineered for a perfect balance between wet and dry performance

Car: General Use Tyres

ECOWING ES01 KH27

Performance Tyre with Optimised Rolling Resistance

- Compound optimised for low rolling resistance
- Excellent handling and cornering in dry and wet conditions
- Comfortable and quiet driving
- High mileage capability
- For small and compact cars as well as lower medium saloons

SOLUS KH17

Standard Performance Tyre

- With proven quality
- Extremely quiet and smooth-running
- Good handling performance
- High mileage capability
- For small and compact cars

Car: Winter Tyres

WinterCraft WP71

Latest Ultra High Performance Tyre

- New compound technology for excellent braking performance in winter conditions
- Excellent traction on snow and ice with new tread pattern design and 3D sipes
- Optimised tyre construction for improved driving stability
- Enhanced performance on wet roads through new tyre contour design
- With M+S marking and snowflake (3PMSF)
- For midsize saloons, luxury and sports cars

WinterCraft WP51

Newly developed High Performance Tyre

- Directional pattern design offering excellent resistance against aquaplaning
- Enhanced grip on ice and snow through latest sipe technology
- Silica tread compound for short braking distance
- With M+S marking and snowflake (3PMSF)
- For compact and medium cars

KW7400

Safe Winter Tyre with Dependable Performance

- Designed to be fitted to smaller cars
- Features a rubber compound with a high silica content that improves traction on snow-covered roads

- Handles well on wet or dry roads and offers a quiet and comfortable ride
- Superb water clearing ability
- Improved traction on snowy and icy roads
- Excellent driving stability in dry and wet condition

IZEN KW27

Proven Ultra High Performance Tyre

- Asymmetric pattern design for balanced driving performance
- 3D sipes for improved traction on snow and ice
- Silica tread compound for better performance on wet roads
- With M+S marking and snowflake (3PMSF)
- For mid-class and executive vehicles as well as sports cars
- Also available as XRP

IZEN KW23

Proven High Performance Tyre

- Improved water displacement through directional pattern design with lateral grooves
- 3D sipes for better traction in winter conditions
- Silica tread compound for better braking performance
- With M+S marking and snowflake (3PMSF)
- For compact and medium cars
- Also available as XRP

Car: All Season

Solus HA31

New High Performance All-Season Tyre

- Superb and well-balanced performance in all weather conditions
- Outstanding handling performance on wet roads
- Very good traction on snowy roads
- High mileage capability
- Strong winter performance
- With M+S marking and 3PMSF (3 Peak-Mountain-Snow flake) symbol
- For small and compact cars as well as mid-size saloons

Van: Summer

RADIAL 857

Van Tyre with Proven Quality

- Modern tyre for light commercial vehicles
- Excellent driving characteristics in dry and wet conditions
- High steering precision and capability for high mileage
- Extremely smooth-running and comfortable
- Robust carcass structure

Portran KC53

New Generation Tyre for Vans

- Improved durability and low wear even with high loads
- Higher mileage and improved traction through robust carcass structure
- Optimised fuel efficiency through low rolling resistance
- Excellent driving quality on wet and dry roads

Van: Winter

PorTran CW51

Latest Winter Tyre for Vans

- Optimised sipes for perfect grip on ice and snow
- Excellent handling performance
- Higher mileage and even wear through symmetric pattern design
- With M+S marking and snowflake (3PMSF)

Powergrip KC11

- Directional tread profile
- New sipes for ideal grip on snow and ice
- Excellent handling characteristics in dry and wet conditions
- Durable for high mileage
- For vans, people carriers and mobile homes

SUV: On-Road

CRUGEN HP91

Ultra High Performance Tyre for SUVs

- Latest silica tread compound
- Quiet and comfortable
- Driving stability even at high speed
- Strong aquaplaning resistance
- Good cornering stability
- Short braking distance

SOLUS KL21

High Performance Tyre for Modern SUVs

- Driving comfort
- Well-balanced tyre
- Increased handling stability
- Enhanced fuel economy and even wear
- Low rolling noise

Road Venture APT KL51

All Purpose Tyre for SUVs and Off-Road Vehicles

- Good on-road driving performance
- Also for mild off-road use
- Comfortable and quiet
- Improved mileage and excellent traction
- With M+S marking

CRUGEN KL33

Premium Tyre for SUVs

- Excellent driving comfort
- Low rolling noise
- Optimised rolling resistance
- Well-balanced performance on wet and dry roads
- OE tyre for Hyundai and Kia

ECSTA x3 KL17

Total Control Tyre for SUVs, even at high speed

- Combines class-leading on-road comfort with high levels of high-speed driving stability and aqua-planing resistance
- Maximum performance for luxury SUVs
- High-speed driving stability
- Enhanced cornering power
- Rapid water evacuation

SOLUS KL21

Specially Developed Tyre for premium SUVs and cross-overs

- Engineered with a focus on luxury, all-season traction and ride comfort
- Improved rolling resistance and fuel economy
- Enhanced fuel economy and even wear
- Increased handling stability
- Optimised traction on wet and snowy roads
- Smoother, quieter ride

SUV: All Terrain

Road Venture AT KL78

All Terrain Tyre for SUVs and Off-Road Vehicles

- Superior on- and off-road driving stability
- Good off-road performance
- Strong traction
- With M+S marking

SUV: Mud Terrain

Road Venture MT KL71

Mud Terrain Tyre for Extreme Off-Road Use

- Off-road tyre with latest technology
- Ultimate in mud terrain and rock crawling performance
- Exceptional self-cleaning and traction
- With M+S marking
- POR* tyre.

*POR tyres are specially designed to reach exceptional adherence performances in poor conditions and in all terrain.

Road Venture MT51

Latest Generation Mud Terrain Tyre

- Optimised for off-road and mud terrain use
- Ultimate traction through zigzag grooves and robust shoulder design
- Mud and stone ejecting tread pattern structure
- Improved on-road performance
- With M+S marking and snowflake (3PMSF)
- POR* (Professional Off-Road) tyre

SUV: Winter

Izen KC15

Winter Tyre for SUVs and Off-Road Vehicles

- Asymmetric pattern design for excellent handling
- Silica tread compound
- Special sipes for better traction on snow and ice
- With M+S marking and snowflake (3PMSF)

Motorsport Tyres: Circuit

ECSTA V70A

- Impressive tyre grip for optimised handling on the track
- Incorporates technology developed for Auto GP, Formula 3, Audi R8 LMS and Super GT

ECSTA S700/W700

- Racing slick for circuit use
- Adopted as the inaugural official tyre for the new F3 Euroseries in addition to the Marlboro Masters of F3 and the Korea Super Prix
- Well proven in European sports car racing
- Available in 13", 15", 17" and 18" sizes in a choice of hard, medium and soft compounds to suit differing track conditions
- W700 available for wet weather use

Motorsports: Rally

ECSTA C03

- Developed to meet the differing demands of gravel & Tarmac surfaces
- We utilise our knowledge and experience from European Rally to provide diverse compounds and patterns that perform both off road and on paved surfaces

R700

R700 is DOT Approved and delivers excellent performance thanks to its deep, open and independent block tread design that maximises both wet and dry traction on dirt and gravel roads. The R700 also features sharp shoulder block edges for enhanced sideways grip and cornering traction on loose surfaces. The upper sidewall of the tyre has protector ribs to help protect the tyre from cuts and loose debris, while the lower sidewall uses protector ribs to prevent debris or objects from being pushed between the sidewall and the rim.

R800

The R800 is DOT Approved and has an asymmetrical and directional tread pattern designed for intermediate and hard packed surfaces, as well as sharp shoulder block edges for enhanced cornering traction. The tyre can be grooved as required for very poor conditions. The upper sidewall of the tyre has protector ribs to help protect the tyre from cuts and loose debris, while the lower sidewall uses protector ribs to prevent debris or objects from being pushed between the sidewall and the rim.

R900

R900 tyre is part of a range of Kumho tyres that are recognised as the one to beat in many rally championships such as the British, Irish and International Rally Championship. Kumho tyres are fitted to several top drivers' vehicles and they regularly help their drivers to class wins and championship titles. The bigger block pattern of the tyre means it can deal with hard packed gravel, while the structural rigidity and stabilisation mean they can be relied upon at all times. They are the ideal tyre for a swept surface with a hard packed lower layer. R900 is also cost effective for competitors across all levels.

TW01

TW01 is an FIA approved intermediate tyre, designed for tarmac rally use in damp conditions. It has proved to ultra successful in tarmac rally championships since Kumho tyres first burst onto the motorsport scene. Having proved itself in the toughest competitions and with a string of high profile successes in Irish rallying, it is fast becoming a 'must have' on many teams' shopping lists. The moulded pattern design gives maximum grip on damp tarmac and can be cut or grooved to a wet pattern (regulations permitting). It is available in various compounds to ensure the correct tyre for the conditions.

TW02

TW02 is an FIA approved wet rally tyre, designed for tarmac rally use in wet conditions. It has proved to ultra successful in tarmac rally championships since Kumho tyres first burst onto the motorsport scene. Having proved itself in the toughest of competition, and with a string of high profile successes in Irish rallying, it is fast becoming a 'must have' on many teams' shopping lists. The moulded pattern design gives maximum grip on wet tarmac with additional tread blocks for extra performance. It can be grooved to offer better grip for standing water etc (regulations permitting).
