About the Careers Are Everywhere Activities Workbook

Careers are everywhere. More than just the title of this career-related elementary level activities workbook, the fact is that children start the process of exploring the world of work as early as the elementary grades. With each class they take, with each life experience, they gain a greater awareness of the nature of work and begin to form ideas about their future career goals.

The activities in this workbook are intended to be fun and challenging. They have been designed around the building blocks of the elementary National Career Development Guidelines with the goal of raising career awareness. Specific objectives of the workbook include the concept of self-knowledge, the development of a basic understanding of interests, likes and dislikes and how to interact with others. The various activities are also designed to raise awareness of the relationship between work and learning, the awareness of how work relates to the needs and functions of society and the interrelationship of life roles. The elementary grades are also a good time to introduce the importance of personal responsibility and good work habits and the benefits of educational achievement.

This is the first edition of the Career Activities workbook from the Labor Market and Career Information (LMCI) department of the Texas Workforce Commission. We encourage counselors and teachers to use this workbook with students and share with us any unique teaching methods or lesson plans you develop so that we might share them with your colleagues in the state. If students would like to know more about a particular occupation they see in this workbook, they can view short video clips on their computer from the Career Clusters Digital Video Show product also available from LMCI. The Video Show provides roughly two-minute clips on the duties, interactions and workplace environments of over 350 occupations, 180 of which also have Spanish language narration.

Special recognition is due to Jane Herrmann, LMCI Finance Manager, as the driving force in conceptualizing and designing this Workbook. Additional recognition is owed to Roger Gonzales for his creative drawings and to Gary Tucker for the sterling layout design. Each of these contributors has shown extraordinary talents and dedication in turning this idea into reality. Thanks also to the National Association of State Directors of Career & Technical Education Consortium, State's Career Cluster Initiative for use of the 16 career cluster icons.

Introduction

Awareness is the first process for students to begin exploring career possibilities. This activity book tries to help them develop Self-knowledge, Educational and Occupational Exploration, and Career Planning awareness while exploring sixteen career clusters. Career Clusters are groupings of jobs that share common characteristics. By looking at clusters of jobs, students may find a variety of careers with similar characteristics in which they may be interested. The Career Clusters shown in this activity book were developed by the US Department of Education. These clusters and associated careers and pathways can be viewed online at www.careerclusters.org.

The activities in this book were prepared with the National Career Development Guidelines (NCDG) in mind to help students achieve the following twelve goals for elementary grades.

Self-Knowledge:

1. Knowledge of the importance of self concept
(Self-Knowledge, pg.5; My First Résumé, pg.9; Work Environment, pg.23)
2. Skills to interact with others
(Assembly Line, pg. 29)
3. Awareness of the importance of growth and change
(The Future, pg.7)

Educational and Occupational Exploration:

4. Awareness of the benefits of educational achievement
(Interview, pg.35)
5. Awareness of the relationship between work and learning
(Doghouse, pg.11; Choose an Occupation, pg.17; Interview, pg.35)
6. Skills to understand and use career information
(Matching, pg.13; Choose an Occupation, pg.17; Maze, pg.25)
7. Awareness of the importance of personal responsibility and good work habits
(Assembly Line, pg.29; Work Habits, pg.33)
8. Awareness of how work relates to the needs and functions of society
(Definitions, pg.21)

Career Planning:

9. Understand how to make decisions
(Interview, pg.35; True/False Quiz, pg.38)
10. Awareness of the interrelationship of life roles
(Multiple Roles, pg.27)
11. Awareness of different occupations and changing male/female roles
(The Future, pg. 7; Definitions, pg.21)
12. Awareness of the career planning process
(Interview, pg.35; True/False Quiz, pg.38)

The activities can stand alone or be incorporated into a career curriculum. Self-knowledge, exploration and planning are life-long activities that begin at an early age.

Be Alert, Be Aware.....Careers are EVERYWHERE! Get started now!

Can You Haiku?

Haiku poems are unrhymed traditional Japanese poetry.

They are very short, just 3 lines, with 17 syllables total. The first and third lines have 5 syllables and the second line has 7 syllables. Most Haiku poems describe some detail of everyday life with a personal reaction. The poems have two sections.

The poet moves from description to reflection. Try to create an image of yourself or a career with just a few words following the Haiku format.

Why Study This??

“Why Study This??” is a collection of interviews with twenty people who work in math- and science-related fields. Its aim is to engage middle school students and encourage them to take as much math and science in high school as possible. The interviewees include an astronaut, storm chaser, forensic scientist, space farmer, drafter, engineer, marine biologist, actuary, architect and more. They focus on their daily activities and how they use math and science in their jobs. In addition to the interviews, the magazine offers an introduction, “Lessons Learned,” that debunks some misconceptions students may have about people who work in math and the sciences. “Why Study This??” also details how students can translate their interest in math and science careers into high school course selections. \$2.00
