Cambridge University Press is the printing and publishing house of the University of Cambridge, and is the oldest press in the world. It is a charitable enterprise required by University Statute to devote itself to printing and publishing in the furtherance of the acquisition, advancement, conservation, and dissemination of knowledge in all subjects; to the advancement of education, religion, learning, and research; and to the advancement of literature and good letters.

Orders

Please place your orders for all books with your local bookshop. You will find a list of bookshops on the back cover of this catalogue. Please quote the International Standard Book Number (e.g. 0 521 31580 8) when ordering books.

Prices

All prices are in sterling and are correct at the time of going to press, although subject to alteration without notice. Booksellers may have to increase prices to cover the cost of freight charges from the UK.

Cambridge Student Guides: Shakespeare

Series editor: Rex Gibson

Cambridge Student Guides is a new series designed for advanced level students, to help develop the necessary knowledge and skills needed to study Shakespeare

- **Detailed act by act commentaries**

Each act in the play is examined scene by scene, with particular attention given to unfamiliar language, key concepts and classical or cultural references. Key lines and episodes are also stressed, and the commentary describes their significance with reference to dramatic and critical approaches.

- **Range of contextual and background information**

Background material is provided to identify and explain the social, historical and cultural contexts of each play.

- **Language**

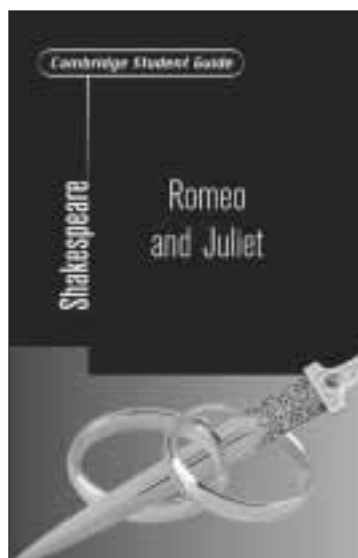

Aspects, such as imagery and repetition, are explored in order to illustrate how such devices create dramatic effect and linguistic appeal.

- **Variety of critical approaches**

Explanations and examples of traditional and modern criticism provide students with the tools needed for them to express independent opinions, informed by different interpretations and performances through the ages.

- **Framework for exam responses**

Students are provided with structured frameworks to adapt for answering essay or extract questions with persuasive, informed and coherent responses. A carefully controlled list of relevant resources is also provided for convenience.

The Cambridge Revision Guide

GCE O Level English

R.Glover, G.Rodway, P.Shirley, H.Toner

This is a comprehensive, user-friendly guide for students studying for the O Level examination. It has been written by a team of four senior Cambridge examiners, and takes the students through the main units of the syllabus – continuous and directed writing, comprehension and summary. Each unit is written in a clear and straightforward style and is carefully graduated for easy understanding and practice.

English Basics

Practice and Revision

Mark Cholij

English Basics helps students to practise and understand key aspects of written English using a systematic work and study programme over a series of three books. Each book offers informative and stimulating tasks, which focus on the three mechanics of the English language. A reference section provides accessible explanations of the language points covered.

Book 1 introduces younger pupils to the basic principles of spelling, grammar and punctuation, whilst books 2 and 3 build on this and provide practice for older pupils.

Ages 14–16

GCE English Language

A Study and Revision Course for O level

Elizabeth Cripps, Caroline Footman

For the new London O level syllabus

GCE English Language – A study and Revision Course for O level has been written for the revised London O level syllabus.

Main features:

- Endorsed by Edexcel International
- Complete coverage of the London English Language O level syllabus
- Clear and precise explanations of assessment objectives
- Well structured student-friendly text
- Excellent use of authentic source material throughout

Contents

Introduction; The syllabus and the examination; 1. Reading a variety of texts for explicit meaning; 2. Reading a variety of texts for implied meaning; 3. From reading to writing; 4. Presenting information from your

reading; 5. Writing in different ways for different audiences; 6. Writing creatively in a range of styles; 7. Writing accurately in standard English; 8. Checking and correcting your examination paper; Appendix; Glossary and Index

English Language and Literature: AS Level

Helen Toner and Elizabeth Whittome

This textbook supports the new CIE examination at AS Level for English Language and Literature. The language section is divided into two parts: passages for comment and composition, with directed writing tasks and exemplar answers. The literature section analyses skills for the study of poetry and prose and explores structure and form in drama, including Shakespeare.

CXC English

Peter Roberts

This comprehensive textbook is intended for pupils in the final stages of the CXC syllabus. After having completed all the units, pupils will be ready for the CXC examination.

The text was developed specifically for Caribbean pupils and, in keeping with the CXC philosophy, pursues a holistic approach. Attention is given to spelling, vocabulary, punctuation and sentence composition in every unit. There is a wide range of exercises including multiple choice, completion of words and sentences, transformation exercises, filling in blanks, error detection and exercises for groups. The content also relates to the wider world of work and advanced study.

A special feature of the text is the story of the English language. It provides examples of the similarities and differences between Caribbean and standard English.

Cambridge Advanced Learner's Dictionary

The *Cambridge Advanced Learner's Dictionary*, first published as the *Cambridge International Dictionary of English*, provides a clear and reliable guide to modern English for advanced learners.

This new edition has been completely updated and redesigned. There are references to over 80,000 words and phrases, explained in clear and natural English. More than 1,000 new words have been added, as well as 16 full page colour pictures and new notes to help learners avoid common errors. The CD-ROM goes even further and provides special tools to help with writing, pronunciation and vocabulary building.

CORE SCIENCE

Ages 11–14

Core Science

Series Editor: Bryan Milner

Core Science is a course for 11–14 year olds. It comprises a two-book format, with the first book containing material for the first two years of study, and the second book revisiting and extending the concepts.

Core Science is:

- flexible, allowing the topic to be taught in any order
- accessible to a range of students
- attractive, with full colour throughout
- differentiated to allow progression through the different topics

Photocopiable supplementary materials accompany each text. They include answers to questions in the student's books, suggestions for practical activities, worksheets and end-of-topic tests.

Core Science Homework

Bryan Milner and Jean Martin

Core Science Homework is for use by students both for homework assignments and as a revision aid. Its slim format means that it can easily be carried between home and school as required.

Core Science Homework:

- provides concise topic summaries and questions to test pupils' understanding of the key ideas covered in lessons
- contains a wide variety of activities which help develop scientific literacy
- uses carefully controlled language level and colourful presentation to make it accessible to lower ability pupils
- is the ideal companion to the *Core Science* materials for pupil or school purchase

96 pp.
0 521 66660 0 Paperback £4.50

Core Biology

Core Chemistry

Core Physics

Bryan Milner, Jean Martin, John Mills and Peter Evans

These three textbooks form a comprehensive resource supporting separate science teaching for 11–14 year olds. The material from *Core Science* has been extended and refined to meet the need of more able pupils, whilst retaining the same accessible approach.

Photocopiable supplementary materials accompany each text to provide teachers with a range of additional information and resources to support use of the pupil's text. They include answers to questions in the pupil's books, suggestions for practical activities, worksheets and end-of-topic tests.

CXC Integrated Science

Second edition

June Mitchelmore, John Phillips and John Steward

This second edition of the widely acclaimed *CXC Integrated Science* is now available in full-colour.

This new edition has been completely updated in consultation with teachers and covers the Caribbean Examination Council's new science syllabuses for Single Award Basic and General Proficiency, first examined in 2002.

New and improved features include:

- additional practicals integrated within the text
- wide-ranging questions throughout the text to test understanding
- new topics such as use and abuse of drugs; magnets and electromagnets; pollution and conservation
- a selection of CXC-style questions
- guidance on developing the skills needed for school-based assessment
- clear presentation of topics on large double-page spreads
- accessible language level
- full colour artwork and Caribbean photographs
- an index with more than 1,000 entries

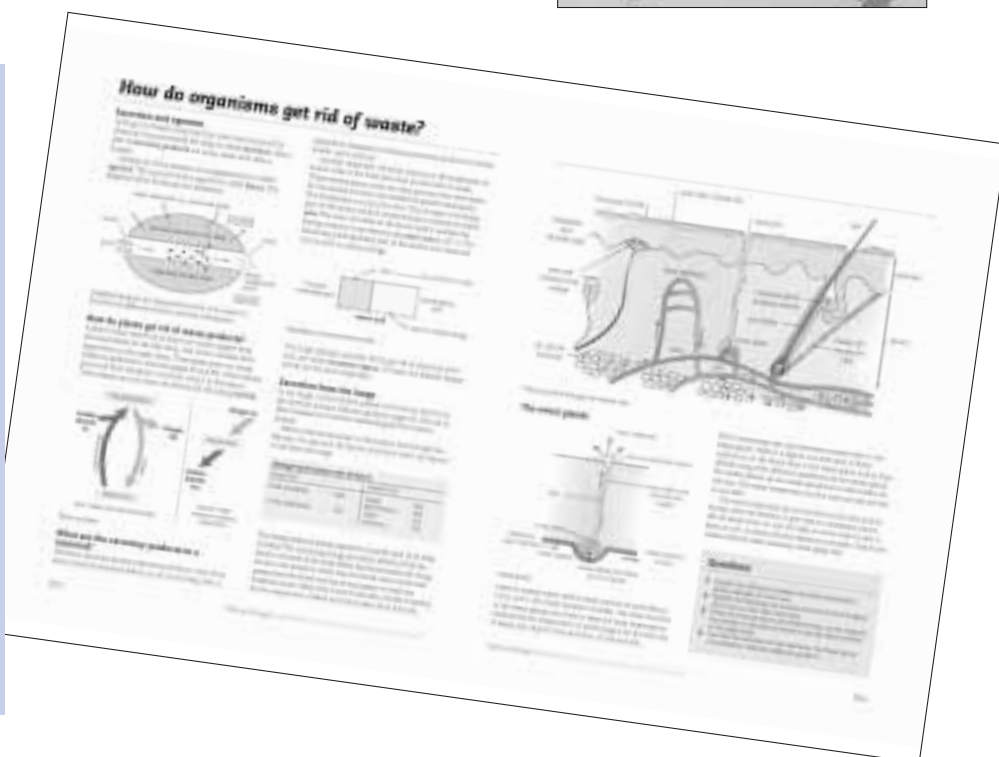

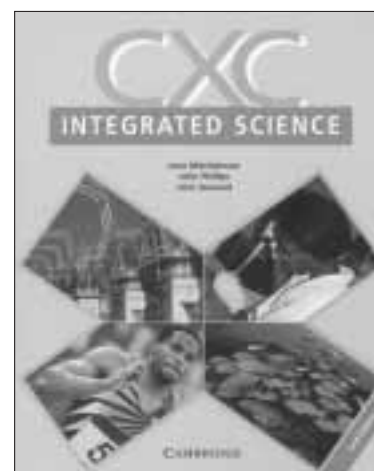

336 pp. 440 colour illustrations 130 photos
numerous tables

NEW EDITION

CXC Revision and Assessment Series

These books are designed to help students achieve a sound understanding of the main sciences examined by the Caribbean Examinations Council. Each text presents all the information relevant to the particular CXC syllabus in a clear and concise way to help students with revision and provide a framework in which sound skills and good study practice can be developed.

CXC Biology

Third Edition

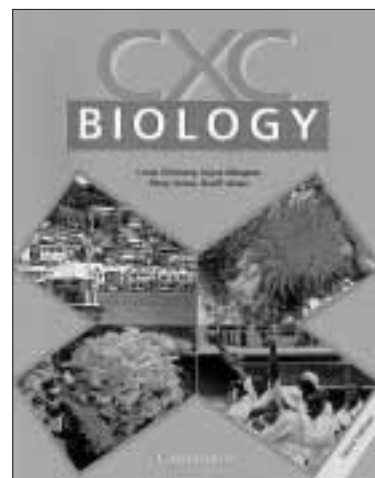

Louis Chinnery, Joyce Glasgow, Geoff Jones and Mary Jones

Now available in full-colour, this new edition of *CXC Biology* has been fully revised in response to needs expressed by practising teachers and covers the current CXC syllabus in great detail.

Chapters have been restructured and re-arranged to facilitate understanding, e.g. basic chemical processes are explained before students encounter the chapters on how plants/animals feed, respiration, etc.

New material includes:

- genetic engineering
- environmental and social issues, e.g. plant and animal breeding
- mangroves and forest communities
- human beings and health, with special attention to HIV/Aids and substance abuse

Features that remain and have been improved are:

- clearly and extensively labelled diagrams, as well as photographs and photomicrographs that are used to illustrate and to form a basis for deductive questions
- specific questions throughout the text to aid understanding
- practicals that include ideas for open-ended investigations to help with the skill of Planning and Design
- a full-colour section on coral-reef biology
- an updated section for the teacher on School-Based Assessment in Biology
- a glossary of more than 400 terms
- a detailed index

The Cambridge Revision Guide: GCE O Level Biology

Ian J. Burton

Newly Revised Edition

The Cambridge Revision Guide: GCE O Level Biology is a fundamental revision tool for students sitting the Cambridge O Level examination in 2002 and beyond. It should be of great value also to those taking other examinations. Through a topic-by-topic structure, the book explains essential biological concepts using accessible language and clear illustrations. Students are encouraged to apply their knowledge through practical

investigations and extensive structured and multiple-choice questions.

Revision topics covered include:

1. Cell structure; 2. Specialised cells, tissues and organs; 3. Diffusion and osmosis
4. Enzymes; 5. Nutrition;
6. Plant nutrition; 7. Animal Nutrition;
8. Transport in flowering plants;
9. Transport in human beings;
10. Respiration; 11. Support, movement and locomotion; 12. Excretion;

13. Homeostasis; 14. Coordination and response; 15. The use and abuse of drugs; 16. The diversity of organisms;
17. The relationship between organisms and the environment; 18. The effects of human activity on the ecosystem;
19. The need for conservation;
20. Reproduction; 21. Sexual reproduction in human beings;
22. Inheritance.

Cambridge Advanced Sciences

Subject Editors: Mary Jones, Brian Ratcliff and David Sang

This series has been produced in response to revisions to new advanced level science syllabuses. The material covered by some of the titles has been adapted, in part, from titles in the successful *Cambridge Modular Sciences* series. This material has been updated, revised and supplemented with new material where necessary to ensure that the new books fully meet new syllabus requirements. These books are ideal for self-study or for directed classroom learning.

The topics studied are supported by the extensive use of self-assessment questions with answers provided, chapter introductions with clear learning objectives, end-of-chapter summaries, and exam-style exercises.

Chemistry 1

Helen Eccles, David Johnson,
John Nicholson, Brian Ratcliff,
John Raffan

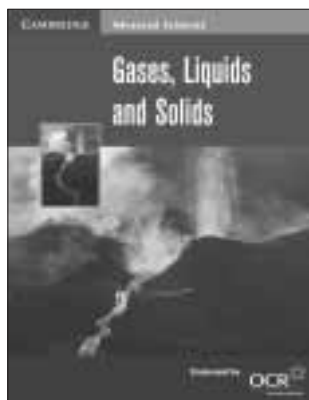

Provides coverage of core material suitable for the first year of an advanced level chemistry course.

Contents

Foundation chemistry 1. Atomic structure; 2. Atoms, molecules and stoichiometry; 3. Chemical bonding and structure; 4. Periodic patterns; 5. The group II elements and their compounds; 6. The group VII elements and their compounds; **Chains and rings** 7. Basic concepts in organic chemistry; 8. Hydrocarbons: fuels; 9. Hydrocarbons: alkanes; 10. Hydrocarbons: alkenes; 11. Alcohols; 12. Halogenoalkanes; **How far, how fast** 13. Enthalpy changes; 14. Reaction rates; 15. Equilibria.

216 pp.

0 521 78778 5 Paperback £11.85

Chemistry 2

Brian Ratcliff, Helen Eccles

Provides coverage of core material suitable for the second year of an advanced level chemistry course.

Contents

Chains, Rings and Spectroscopy

1. Chains and rings revisited; 2. Arenes; 3. Carbonyl compounds; 4. Carboxylic acids and esters; 5. Nitrogen compounds; 6. Stereoisomerism in organic synthesis; 7. Polymers; 8. Spectroscopy; Part II.

Trends and Patterns

9. Lattice enthalpy; 10. Period 3 of the Periodic Table; 11. The transition elements; Part III.

Unifying Concepts

12. How fast? 13. How far? 14. Acids, bases and buffers;

Biology: AS and A Level

Mary Jones, Richard Fosbery,
Jennifer Gregory, Dennis Taylor

Biology: AS and A Level is a new title written to match the requirements of the Cambridge International Examinations AS and A Level biology syllabuses.

Main Features

- Endorsed by Cambridge International Examinations
- Self-assessment questions (with answers) offer excellent opportunities for independent study.
- Chapter introductions and summaries provide a basis for structured revision.
- Key information on practical aspects of the syllabus.
- Extensive glossary providing explanations of technical terms.
- Full-colour illustrations.

c. 320 full colour

Physics 1

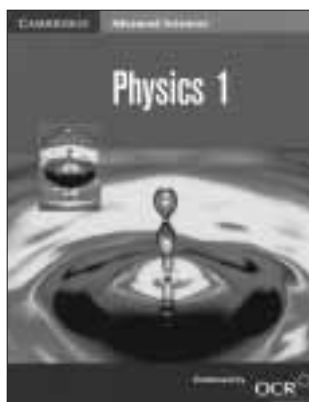

David Sang, Keith Gibbs, Robert Hutchings

Provides coverage of core material suitable for the first year of an advanced level physics course.

Contents

Forces and motion 1. Kinematics – describing motion; 2. Accelerated motion; 3. Dynamics – explaining motion; 4. Working with vectors; 5. Forces, moments and pressure; 6. Work, energy and power; 7. Forces, vehicles and safety; 8. Deforming solids; **Electrons and photons** 9. Electric current; 10. Resistance and resistivity; 11. Voltage, energy and power; 12. DC circuits; 13. Practical circuits; 14. Kirchhoff's laws; 15. Electromagnetism; 16. Quantum physics; 17. Spectra; **Wave properties** 18. Reflection and refraction; 19. Waves; 20. Superposition of waves;

224 pp.

Advanced Level Mathematics

Hugh Neill, Douglas Quadling,
Steve Dobbs, Jane Miller

Advanced Level Mathematics has been designed to match the requirements of the Cambridge International Examinations AS Level and A Level syllabuses. The authors have worked closely with CIE to ensure that the content within the books matches the syllabuses and is pitched at a suitable level.

These textbooks are also highly suitable for use with other advanced level mathematics syllabuses.

A Mathematical Dictionary for Schools

Brian Bolt, David Hobbs

A Mathematical Dictionary for Schools is aimed at students aged 11–16. There are over 500 definitions of technical terms students are likely to meet. Key words and phrases are explained in clear, simple language with illustrations to aid understanding of more difficult terms.

160 pp.
0 521 55657 0 Paperback £6.50

CXC Principles of Business

A. Layne, W. Samuel and K. Anthony

This book provides complete coverage of the CXC Principles of Business syllabus. Its comprehensive treatment will remove the need to buy more than one text to meet the examination requirements.

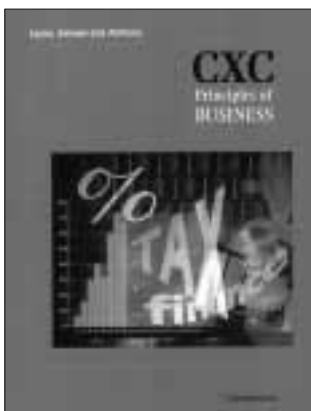

The language level is simple enough to accommodate fourth year students but provides enough detailed information for fifth year students. It encourages participation from students at all stages.

The 21 chapters are based around the eight units of the CXC syllabus. There are points to note and questions at the end of each chapter.

The book gives insights into Caribbean business, economic and legal activities and compares them with those of other industrial countries.

Contents

1. The nature of business and the business environment; 2. The organisation of production; 3. The scale and location of production; 4. Business organisations; 5. Money, capital and the financial sector; 6. Marketing; 7. The pricing of goods; 8. Distribution; 9. The need for business documents; 10. Processing purchases of goods; 11. Processing sales on credit; 12. Business instruments; 13. Business documents used in settling overseas payments; 14. The nature of management; 15. The role of government; 16. Agreements leading to contracts; 17. Discharge and breach of contracts; 18. Some types of special contracts; 19. Social accounting; 20. International trade; 21. The regional and international business environment.

336 pp.
0 521 44766 6 Paperback £8.25

Business Studies: AS Level and A Level

Peter Stimpson

Business Studies: AS Level and A Level matches the requirements of the Cambridge International Examinations syllabus in Business Studies.

The key and distinctive feature of this book is the international perspective it adopts to business. Very few businesses today operate in a narrow national market place and students are therefore encouraged to look at business organisations and business decisions from an international viewpoint.

Main features

- Endorsed by Cambridge International Examinations
- Clear differentiation between AS and A Level material
- Stimulating activities and case studies
- Examination practice questions throughout

Contents

Unit 1 – Business and the environment
Unit 2 – People in organisations
Unit 3 – Marketing decisions
Unit 4 – Operations management decisions
Unit 5 – Business accounting and finance
Unit 6 – Numerate techniques for business studies
Unit 7 – Revising for examinations

538 pp.
0 521 00367 9 Paperback £16.80

Economics: AS Level and A Level

Colin Bamford et al

NEW

Economics: AS Level and A Level matches the requirements of the new Cambridge International Examinations (CIE) syllabus in Economics. The book is divided into two units, core (AS) and extension (A Level), each of which represents a self-contained programme of study.

Main features

- Endorsed by Cambridge International Examinations
- Clear differentiation between AS and A Level material
- Comprehensive self-assessment tasks ideal for class or independent use
- Examination advice based on actual past papers
- Key words identified in each section

Contents

Introduction: The economist's 'tool kit' and the Cambridge International Examination; **Unit 1: Core (AS Level)**; 1. Basic economic ideas; 2. The price system; 3. Government intervention in the price system; 4. International trade; 5. Measurement in the macro-economy; 6. Macroeconomic problems; 7. Policies of correct balance of payments disequilibria; **Unit 2: Extension (A Level)**; 8. Basic economic ideas – economic efficiency; 9. The price system and the theory of the firm; 10. Government intervention in the price system; 11. Theory and measurement in the macro-economy; 12. Macroeconomic problems; 13. Macroeconomic policies; Preparing for examination; Glossary; Index

An Introduction to Accounting for CXC Students

Dr Armand Layne

A comprehensive textbook for students following the CXC Principles of Accounts syllabus. As well as covering the syllabus, this book provides additional material on topics such as the use of computers and costing.

In addition to CXC candidates, the book is suitable for all beginners in secondary schools, colleges and universities, as well as students who are preparing for the early stages of foundation professional examinations.

326 pp. 127 line drawings and photographs
0 521 36942 8 Paperback £10.75

An Introduction to Computer Studies

Noel Kalicharan

An Introduction to Computer Studies is intended for people meeting the subject for the first time. As it covers both core and optional material for many exam syllabuses, the book is ideal as a core text and is particularly relevant to Caribbean students involved with the Cambridge O level exam or CXC.

367 pp. c. 50 diagrams

Sociology Today

Gerard O'Donnell

Written in a clear, direct style, this sociology text provides an excellent introduction to the subject for students embarking upon courses in sociology or social studies. It is designed to be used for individual study and includes self-test questions and answers.

Topics include education, youth culture, race, ethnic groups, social class, poverty, the welfare state, the environment, politics, the media, advertising, censorship, the economy, trade unions and religion.

298 pp. illustrations, diagrams and tables
0 521 42670 7 Paperback £9.15

Ages 16+

Sociology Explained

Andy Barnard and Terry Burgess

This text takes full account of the wide range of students who study sociology by presenting the subject in a lively and accessible way. It encourages the development of a searching, critical approach to sociology through interaction with the reader.

Contemporary issues are explored and made relevant. The main theoretical perspectives and debates are presented thoroughly and clearly. Ideas and guidance for course and project work are provided along with preparation for examinations.

The text will be useful to students following a range of A level examinations. *Sociology Explained* is also a superb introduction to sociology for people on vocationally oriented courses in nursing, social work, teaching and management training.

496 pp.
0 521 42671 5 Paperback £13.50

Forthcoming September 2003

Sociology: AS and A Level

Burgess and Kirby

NEW

Sociology AS and A Level matches the Cambridge International Examinations syllabuses for AS and A Level Sociology. This book presents the main theoretical perspectives and encourages the development of a searching and critical approach to sociology. Written in a lively and accessible manner, this textbook is also an introduction to the subject for undergraduates and for people on vocational courses in nursing, social work, education and management training.

Contents

Geography for AS

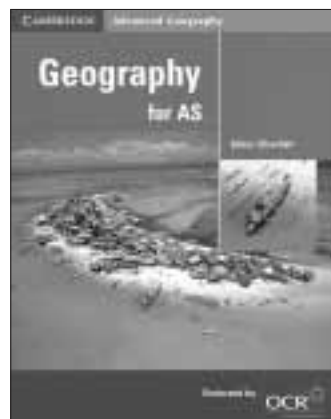

Edited by Clive Hart

Geography for AS has been written for students on the first year of an advanced level geography course.

It provides structured topic coverage, with a range of features to ensure that the book is easy to use and promotes understanding of key concepts. Learning objectives are outlined at the beginning of each unit, and key terms and concepts are highlighted and explained clearly. Activities are included to reinforce skills, and a range of case studies provide additional context and depth. Each unit concludes with a summary to aid revision.

The book covers the physical environment, the human environment and geographical investigations. It includes a wide range of topics: hydrological systems; ecosystems; lithospheric systems; atmospheric systems; population: pattern, process and change; rural and urban settlement; local studies; summary of reasearch skills.

304 pp. 0 521 78609 6 Paperback £14.85

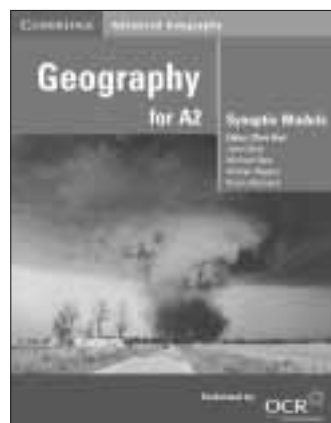

Geography for A2

NEW

Synoptic Module

Geography for A2 has been written for students in the second year of an advanced level geography course. The book covers 4 main options and encourages students to develop the skills and understanding required at advanced level.

232 pp. 0 521 89349 6 Paperback £14.20

Contents

- Geographical aspects of the European Union
- Managing Urban Environments
- Managing Rural Environments
- Hazardous Environments

Ages 14–16

Caribbean World

A Complete Geography

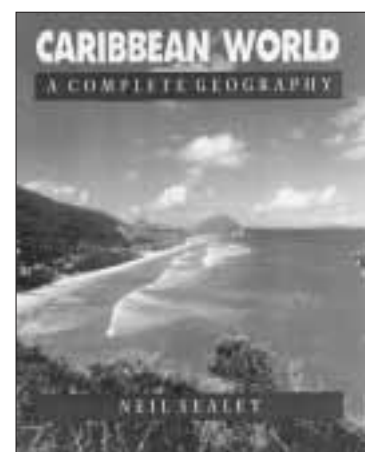

Neil Sealey

A major textbook written specifically to cover the CXC and (B) GCSE Geography syllabuses. It is also probably the best and most up-to-date compendium of geography information about the Caribbean region at this level.

The text follows the same 'systems' approach as all major geography syllabuses, recognising that the geography of the region can be affected by phenomena both within and outside the realm of geography.

- Gives comprehensive explanations of the natural and human factors which affect the geography of the region.
- Extensively illustrated with photographs and line diagrams, using Caribbean examples throughout.
- Also suitable as an introduction to the geography of the West Indies at college or university level.
- *Caribbean World* includes the results of research published in the 1980s.

256 pp. fully illustrated 0 521 37764 1 Paperback £11.85

Music Worldwide

Elizabeth Sharma

Music Worldwide investigates both folk and traditional music from various parts of the non-Western world. The book describes the predominant instruments in each chosen culture and explores the main musical ingredients of different styles. An accompanying compact disc links in with the book to demonstrate the variety of musical styles and traditions. By studying the explanatory text, illustrations and music extracts, the student will be suitably equipped to tackle the chapter assignments, which exploit the skills of listening, composing and performing.
