BEAM CLAY®

Bocce Courts

CHOOSING YOUR BOCCE COURT SURFACE

For very serious bocce players, properly maintained natural clay makes the best playing surface. We make **Beam Clay®** Bocce Court Mix in Red, Orange, Brown, Tan or Grey from natural clays. These install 3" - 4" deep compacted over a firm drainage base. A properly maintained clay court is firm and yet has bounce or "life" to it. However, a clay court takes much work to install and properly maintain.

For those less dedicated to maintaining a bocce court, a stone dust, oyster shell, brick dust or "Fast Dry" court may be preferable as these dry quickly after rain and generally only require a light raking, occasional rolling, and watering. However, stone dust, oyster shell, or brick dust courts are generally softer and indent more easily (and may be too coarse or too dusty) and do not have the "live" feel of a properly maintained clay court.

The option we highly recommend is a "**Fast-Dry**" court. Typically used for tennis court installations, a "**Fast-Dry**" tennis court requires an irrigation system since "**Fast-Dry**" surfaces must be slightly moist to be resilient. However, covering less area, bocce courts can easily be hand watered when needed with a hose. The media refer to these "**Fast-Dry**" courts as "clay" courts; however they are finely crushed green or red aggregates that go thru a heat process with a gypsum binder. When slightly moist, "**Fast-Dry**" surfaces provide a resilient playing surface like natural clay at optimal conditions but are much easier to install and maintain. These install 1" deep compacted over a firm drainage base.

If you want even less maintenance, we also offer **Artificial Turf for Bocce Courts** (pages 16–22) which can be glued to a concrete or asphalt base or loose laid over a compacted aggregate base.

CONSTRUCTING & MAINTAINING A BEAM CLAY® NATURAL CLAY BOCCE COURT

Please see pages 3 - 5.

CONSTRUCTING & MAINTAINING A "FAST-DRY" BOCCE COURT

FAST-DRY BOCCE COURT SURFACING comes in 80 lb. bags in **Green** (Grayish Green) or **Red** (Burgundy Red) and only needs to be installed 1-1/4" thick (which compacts to 1" thick) over a firm drainage base of 3/4" minus or 3/8" minus crushed stone (with fines so that it compacts to a firm base yet drains well) covered by 1/2" of stone screenings. Do not use all one size "clean" stone which will not provide a firm enough base and will allow the playing surface to gradually sink into the voids. If you do use "clean" stone, cover with a geotextile fabric to prevent the surface material from sinking into the voids. With a geotextile fabric you can eliminate the 1/2" of stone dust layer. To install **Fast-Dry Bocce Court Surfacing**: spread, screed or rake level, thoroughly moisten, roll with a hand roller filled with water and broom smooth. Ready for play. Be sure to install "weep holes" in your frame at the court surface to allow excess water to drain off quickly.

To maintain **Fast-Dry Bocce Court Surfacing**: moisten, roll, rake or broom when needed. Each spring (in northern climates) or once a year (in southern climates), lightly scarify surface (1/4" - 1/2" deep) to keep surface well blended. If necessary, add 400 lbs. of Fast-Dry Bocce Court Surfacing per 1,000 s.f. to freshen court surface. Then same as before: screed, drag, or rake level, uniformly moisten, roll with hand roller filled with water and broom smooth. Ready for play.

BEAM CLAY®

Bocce Courts

BOCCE BALL COURT LAYOUT

RECOMMENDED AREA

Ground space is 1,824 square feet to 2,816 square feet.

SIZE AND DIMENSION

Overall court dimensions are 13'-0" to 19'-6" W by 78'-0" to 92'-0" L, although residential courts are often 10' x 60' or smaller. Additional space of at least 3'-0" on each side and 9'-0" on each end is recommended.

ORIENTATION

Preferred orientation is for the long axis to be north-south although it is of minor importance.

SPECIAL CONSIDERATIONS

Optional low wooden barrier should be provided at each end and/or side of court.

COURT LAYOUT

www.beamclay.com • sales@beamclay.com

RECOMMENDATIONS FOR CONSTRUCTING & MAINTAINING A BEAM CLAY® - NATURAL CLAY BOCCE COURT

1. Make frame of 2 x 8's on bottom with additional 2 x 6's on ends.
2. Place entire frame on a level drainage bed of 3/8" minus or 3/4" minus stone (with fines so that it compacts firmly yet drains) a minimum of 3" deep compacted depending on site conditions. Drainage bed should be larger than frame by at least one foot all around and have a drainage outlet if native ground drains poorly. **IMPORTANT** - Apply stone first with frame on top.
3. Apply 1/2" layer of stone dust over drainage base within frame.
4. Apply 3-4" of **BEAM CLAY® - Bocce Court Mix** and screed to a uniform grade. It is generally best to construct a wood screed to pull across a level frame to maintain even grade. A Z-shaped screed of 2 x 4's or a rigid metal drag mat are also useful tools for leveling surfaces.
5. After a natural wetting by rain, check for low spots; fill with **BEAM CLAY® - Bocce Court Mix**; thoroughly saturate filled low spots. Remember to drill drainage holes in frame at court surface to allow for surface drainage.
6. When court has dried to sufficient moisture content, compact with water-filled roller, hand tamper or vibratory compactor. After drying further, surface will crack and continue to crack until sufficiently compacted. After another wetting by rain and drying to proper moisture content, rework surface as above.
7. PLEASE NOTE: Clay courts will crack at first and must be rolled and broomed until cracks get smaller and smaller and disappear. A clay court that cracks the first year will in later years have a long useful life; but a court that doesn't crack at first is too sandy, will wear out prematurely, and will require more maintenance in later years.
8. Once cracking becomes sufficiently small (hair-line cracks) apply approximately 200 lbs. of top-dressing and thoroughly broom. If top-dressing is applied too soon, it will fill the cracks but (by working into the clay) shorten the long-term life of the court.
9. After applying and brooming top-dressing, apply 50 lbs. of calcium chloride. After approximately 12 hours, re-broom and roll court. Ready for play.
10. After rain, re-broom and roll court when surface has dried. Reapply top-dressing and calcium chloride as needed.
11. For northern climates, in the fall, we suggest removing top-dressing from court. This will protect your **BEAM CLAY®** surface from being diminished by blending in of top-dressing. In the spring, scarify and smooth court surface, then reapply top-dressing.

RECOMMENDATIONS FOR RESURFACING EXISTING BOCCE COURTS WITH BEAM CLAY®

If resurfacing an existing clay bocce court, remove top-dressing from clay surface, scarify surface approximately 1/2" in depth, and work in 1"+ **BEAM CLAY® - Bocce Court Mix**, then follow above recommendations.

Remember to drill drainage holes in frame at court surface to allow for surface drainage.

RECOMMENDATIONS FOR RECONDITIONING NATURAL CLAY BOCCE COURTS AFTER WINTER SEASON

1. Sweep or blow top-dressing from court.
2. Scarify court with drag mat. Then thoroughly broom.
3. After natural wetting by rain, check for low spots; fill with **BEAM CLAY® - Bocce Court Mix**, working into the existing surface for good bonding. Thoroughly saturate filled areas.
4. Apply approximately 200 lbs. of top-dressing, while court is still damp. Broom in both directions.
5. Apply 50 lbs. of calcium chloride (flakes). After calcium chloride thoroughly dissolves and court reaches proper moisture content (12 to 24 hours), court should be re-broomed and compacted (rolled). Ready for play.
6. After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as need during season. Normally, 3-4 applications are sufficient for season.

RECOMMENDATIONS FOR RESURFACING NATURAL CLAY BOCCE COURTS

1. Sweep or blow top-dressing from court.
2. Scarify court approximately 1/2" in depth.
3. Apply 1"+ of **BEAM CLAY® - Bocce Court Mix**.
4. Re-scarify to blend **BEAM CLAY®** with existing surface. Then drag mat entire court.
5. After a natural wetting by rain, check for low spots; fill with **BEAM CLAY® - Bocce Court Mix**. Thoroughly saturate filled areas.
6. When court has dried to sufficient moisture content, compact with water-filled roller, hand tamper or vibratory compactor.
7. PLEASE NOTE: Clay courts will crack at first and must be rolled and broomed until cracks get smaller and smaller and disappear. A clay court that cracks the first year will in later years have a long useful life; but a court that doesn't crack at first is too sandy, will wear out prematurely, and will require more maintenance in later years.
8. Rework surface as above, until cracking becomes sufficiently small (hair-line cracks) apply approximately 200 lbs. of top-dressing and thoroughly broom, If top-dressing is applied too soon, it will fill the cracks but (by working into the clay) shorten the long-term life of the court.
9. After applying and brooming top-dressing, apply 50 lbs. of calcium chloride (flakes). After calcium chloride thoroughly dissolves and court reaches proper moisture content (12 to 24 hours), court should be re-broomed and rolled. Ready for play.
10. After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as needed during season. Normally, 3-4 applications are sufficient for season.

4" High x 3" Wide x 6' Long (20 lbs./piece, up to 100 pieces/pallet)	#RC-4X3X6	\$40
4" High x 3" Wide x 4' Long (13 lbs./piece, up to 140 pieces/pallet)	#RC-4X3X4	\$28

Please note: The 4" wide sections are grooved and can be stacked to create desired height. However, the 3" W is not stackable. 3" W lengths of curbing are not grooved for stacking.

NOTE: The 6' lengths = 5'8" actual coverage due to 4" overlap

NOTE: 4' curb = 3.7 linear foot due to overlap

- More resilient than wood
- No warping or discoloring
- No splinters
- Non toxic
- Will not rot
- Stackable
- Interlocking
- Available in 4 ft lengths and 4" or 6 ft lengths and 4", 6" and 8" heights

- No CCA or other harmful chemicals
- Easy to install with pre drilled holes
- Made from 100% recycled tires
- Flexible with rounded edges
- Will not breed ticks, termites or other insects
- Maintenance free
- Hardware & Caps included
- Neutral brown tone-compatible with any surface color

2 stakes and 2 caps are included with each curb

natural brown bendable stackable interlocking hardware included

Rubber Curbing For Bocce Courts

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer
2. Physical properties of the rubber composite:
 - a) Density 0.6 oz/cu in (ASTM C642)
 - b) Durometer Hardness 65A ± 7 (ASTM D2240)
 - c) Tensile Strength* minimum 125 psi (ASTM D412)
(* main structural areas)
 - d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
 - e) Brittleness at Low temperature: -40°F (ASTM D746)
 - f) Freeze and thaw when exposed (ASTM C672)
to deicing chemicals no loss after 50 cycles
 - g) Coefficient of thermal expansion: 8 x10⁻⁵ in/in/°F (ASTM C531)
 - h) Weathering 70 hours at 158°F (ASTM D573)
 - hardness retained 100% (± 5%)
 - compressive strength 100% (± 5%)
 - tensile strength 100% (± 5%)
 - elongation retained 100% (± 5%)
3. Available models:
 - a) 4"W x 4"H x 72"L with weight of 30 lbs.
 - b) 4"W x 6"H x 72"L with weight of 45 lbs.
 - c) 4"W x 8"H x 72"L with weight of 70 lbs.
 - d) 3"W x 4"H x 72"L with weight of 20 lbs.
 - e) 3"W x 4"H x 48"L with weight of 13 lbs.
4. Finishing color: dark brown

Installation methods:

- a) with 2 spikes 18" long x 3/8" diameter provided for each 4" high piece
- b) with 2 spikes 24" long x 3/8" diameter provided for each 6" high or 8" high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and 3/4" long, supplied with the product.

Components:

- a) 100% recycled rubber from car and truck tires (NR, SBR)
- b) polyurethane prepolymer for rubber granules
- c) brown pigment

7' WIDE MAHOGANY BOCCE COURT BROOM
WITH 3 ROWS OF 7" FIBER BRISTLES & 2 STEEL HANDLES

This is the traditional court broom made the same way for over 75 years. The solid mahogany block is aesthetically pleasing and unaffected by water and severe temperature changes. Three full rows of 7" long bassine fiber absorb moisture and help dry the court. Two heavy gauge steel handles are included. The handles are reversible to prolong broom life. The broom provides an even sweep 7' wide.

#311-7

\$510

7' WIDE ALUMINUM BOCCE COURT BROOM
WITH 3 ROWS OF 5-1/2" GREEN POLYPRO BRISTLES
& TWO 4' ALUMINUM HANDLES WITH 20" CROSS PIECE

This is the ultimate bocce court broom. The aluminum back brush is "dynamically weighted" to provide a one time pass 7' wide. It is the fullest brush on the market with 3 rows stiff polypropylene bristles 5.5" long epoxy set into the aluminum block. Bristles are inert to the elements. The broom is sold complete with two 4' aluminum handles joined by a 20" PVC cross piece. The handles are reversible for added broom life. The broom can be flipped over and used as a scraper. Two hooks are provided for hanging up.

#411-7

Bocce Court Grooming Tools - Brooms**MIDWEST™ 7' WIDE MONSTER BROOM**

Heavy-duty aluminum construction. Available with two or three rows of 4-1/2" bristles. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82084 Monster Drag Broom (Two-Row Bristles)	\$260.95
#83084 Monster Drag Broom (Three-Row Bristles)	\$295.95
#SP50067 7' Replacement Bristles (One Row)	\$51.95

**BOCCE COURT SCARIFIER BROOM**

Identical to the two-row Monster Broom, except with scarifying edge.

#82384 7' Scarifier Broom (Two-Row Bristles)	\$333.95
#SP50067 7' Replacement Bristles (One Row)	\$51.95

**MIDWEST™ 28" MAXIMUM-DUTY BROOM**

Made from the same heavy-duty extrusion as the 7' Monster Broom, this broom is one of the heaviest built brooms on the market. By flipping the broom over, you have a scraping edge. The 28" head is available with two-row or three-row bristles. Available with the innovative 60" bent powder-coated aluminum handle, excellent for eliminating back strain. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82928 28" Maximum-Duty Broom (Two-Row Bristles)	\$107.95
#83928 28" Maximum-Duty Broom (Three-Row Bristles)	\$120.95
#SP50068 28" Replacement Bristles (One Row)	\$15.95

**28" SCARIFIER BROOM**

With scarifying edge.

#82328 28" Scarifier Broom (Two-Row Bristles)	\$153.95
#SP50068 28" Replacement Bristles (One Row)	\$15.95

**24" GENERAL-PURPOSE BROOM**

This 24" general-purpose broom is an excellent choice for the garage or shop, and is also used for base path and infield dressing. Professional grounds keepers flip the broom over for a final dressing of base paths. Available with either a 60" ergonomic bent powder-coated aluminum handle or a 60" straight powder-coated aluminum handle.

#82924 24" General-Purpose Broom, Bent Handle	\$78.95
#82925 24" General-Purpose Broom, Straight Handle	\$78.95

Bocce Court Grooming Tools - Squeegees

MIDWEST™ ROLLER SQUEEGEES

These roller squeegees are built to outlast and outperform other brands. The heavy-duty aluminum frame construction and stainless steel axles ensure the roller stays secure. Two roller styles are available: Non-Absorbent—pushes water; and PVA Absorbent—made of superior high-tech polymer designed to soak up incredible amounts of liquid off hard surfaces. Rollers are easily replaceable and interchangeable.

Non-Absorbent Roller Squeegee

54" Powder Coated Curved Aluminum Handle With 6" Vinyl Grip.

**TRU-FLOW TOP-DRESSERS**

This top-dresser offers unmatched performance in distributing Fast-Dry Bocce Court Surfacing.

Tru-Flow spreaders handle the toughest of conditions. For top-dressing to be effective, it needs to be applied as uniformly as possible. Tru-Flow's unique 8" dispersal drum is encased in expanded metal. Conventional drop spreaders rely on gravity to help release the Fast-Dry from its hopper, but the Tru-Flow pulls the surface out of the hopper and on to the court with unmatched consistency.

24" Hand Spreader holds up to four 80 lb. bags. Simply bolt on the handle and you are ready to start your pre-season renovation.

\$15.95**THE TREAD BLASTER**

The Tread Blaster is uniquely designed to remove dirt and grit from your shoes without getting the tops of your shoes wet. A necessity for all facilities with clay courts. Easy to install, all you need is access to water and a hose with a spigot that provides a pressure of 30 to 60 psi. You'll be happy you made the investment.

#147-4000

\$560**TENNIE TWO-STEP**

The Tennie Two-Step keeps carpets, players' shoes and walkways cleaner. The Tennie Two-Step is simplicity in itself. It is a UV-resistant polyethylene water-holding basin containing two patented perforated rubber panels designed to force water into the soles of your shoes while you rock back and forth on your feet. The results are noticeable everywhere. Clean shoes mean no more Fast-Dry in the house, on walkways, or in your car. Tennie Two-Step is available in its classic form, or with a newly designed shoe brush attached to the frame for more aggressive cleaning needs. You can also upgrade your existing units by installing a brush. Installation is simple and requires two holes to be drilled and two bolts to be tightened. All the appropriate hardware is included.

#147-3012 **SHOTTSWB** - Tennie Two-Step with Brush**\$280**#147-3046 **SHOTTS** - Tennie Two-Step (without Brush)**\$220**#147-3011 **SHOTTSBR** - Brush attachment**\$75****COURT MAID**

Court Maid's powder-coated, all-aluminum frame is designed to be installed at the entrance and exit points of your bocce court for cleaning shoes and trapping clay or Fast-Dry within its collection basin. The brush unit on top lifts off for easy removal of the accumulated Fast-Dry. Simply hose off to clean.

#147-3576 **SHOCMJ** - Black 14 3/4" x 20" x 4"**\$410****HAR-TRU SHOE BRUSH**

The Har-Tru "Scrusher" shoe brush can be attached to the sidewalk or left free standing. The softer upper bristles dust off the upper portion of the shoe while the stiffer lower bristles scrape topping from the soles. The base is made of heavy-duty carbon steel. The shoe brush is easily cleaned with a hose or soap and water.

BOCCE TURF™ - SYNTHETIC TURF FOR BOCCE COURTS

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Permeable turf not recommended—can cause wash out in base. Perimeter drainage best—weep holes in frame if above ground at surface of turf, perimeter drains if below ground (3/4-1" plastic pipe at both sides of center line or at corners connected to drain will work. Foam backing recommended—helps lessen bounce and helps prevent dimples forming in the aggregate base. Scrim over foam backing recommended for glue down, without scrim over aggregate base (less curling). Turf (over aggregate base) can be nailed to pressure treated 2x4's installed vertically around perimeter and/or a bounce board can be added to frame to hold turf down to prevent edges from curling—up but not so tightly to prevent drainage unless there are weep holes. Perforated not recommended — can cause wash out in base and uneven play.

Here are some guidelines for choosing turf:

Most Popular - Bocce 25 oz. Nylon and 24 oz. Polypro with shorter and denser fibers and 5mm foam backing are the most popular, followed by 36 oz. Polypro and 36 oz. Nylon.

Bounce - 5mm foam backing gives less bounce. 1mm rubber gives more bounce. Bounce has a lot to do with the face of the turf as well: more turf in the face (greater pile height and density) will cushion the bounce more. Adding round sand will decrease bounce. Adding angular or sub-angular sand will increase bounce.

Speed - 24 oz. Polypro is the fastest surface, followed by 36 oz. Polypro. Speed can be increased by adding either sand and adjusted on any except 24 oz. Polypro, which is too dense and short. Adding up to 2 lbs. sand per square foot allows you to get the speed and bounce you prefer.

Memory - Nylon turf DOES NOT have "memory" Polypropylene does. What this means is if you walk on Polypropylene turf every day for a year or more, eventually it will mat down. It "remembers" being mashed down and eventually doesn't come back up. However, Nylon turf will look the same after each use — it doesn't remember being mashed down and goes back to its original state after each use. However, this come with a price. Nylon is more expensive.

25 oz. NYLON stadium grade synthetic turf with 5mm foam backing with or without scrim in Turf Green or Verde. No infill. 15' Stock Rolls	PL30615W5MM	\$4.85/sf
36 oz. NYLON stadium grade synthetic turf with 1mm rubber backing in Turf Green or Verde. 15' Stock Rolls	PL30815W1MM	\$4.55/sf
48 oz. NYLON stadium grade synthetic turf with 1mm rubber backing in Turf Green, 2-3 lbs./sf dry 70 mesh sand or smaller sand recommended. 15' Stock Rolls	PL30715W1MM	\$5.35/sf
24 oz. POLYPROPYLENE synthetic turf with 5mm foam backing with or without scrim - Pine Green. 15' Stock Rolls	PL35715W5MM	\$3.65/sf
24 oz. POLYPROPYLENE synthetic turf with SilverBack™ Polyurethane, Pine Green. 15' Stock Rolls	PL35715WSB	\$2.25/sf
36 oz. POLYPROPYLENE synthetic turf. Available in 14 colors.		
15' wide, spring green or pine, 5mm foam	PL70515W5MM	\$4.50/SF
15' wide, spring green or pine, SilverBack™ polyurethane	PL70515WSB	\$3.25/SF

15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue SilverBack™ polyurethane	PL705L15WCSB	\$3.65/SF

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a \$2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a \$100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

INSTALLING BOCCE TURF™ ON CONCRETE

Floor Preparation

Concrete should be cured, clean and dry. Concrete shall be free of paint, dirt, grease, oil curing or parting agents, and other contaminants, including sealers, that may interfere with the bonding of the adhesive. Whenever a powdery or porous surface is encountered, a primer compatible with the adhesive shall be used to provide a suitable surface for the glue-down installation. Patching of cracks and depressions shall be made with an appropriate and compatible latex or polymer fortified patching compound. Do not exceed manufacturer's recommendations for patch thickness. Large patched areas must be primed.

Recommended Glues

Nordot 34G for 50°F and up. Buy direct from Synthetic Surfaces Inc. at 908-233-6803.

Turf Claw for 55°F and up available shipped with turf.

Robert's 6700 Indoor/Outdoor for over 60°F available at Home Depot or Lowes.

Turf Installation

Unroll in place to be sure fit is correct.

Roll up section at one end and apply glue to concrete. Unroll over glue.

Roll up from other end. Apply glue to concrete. Unroll over glue.

Roll with 100 pound roller. Re-roll 5-6 hours later.

Cure times will vary and will be affected if overnight temperatures drop below 60°F.

Make sure glue has 24 hours to dry by covering with plastic if wet weather is projected within 24 hours.

General Maintenance

OUTDOOR USE

Sweep the synthetic turf as needed frequently with a broom to remove surface soil, and hose down occasionally with water. Do not use a rotary brush machine.

INDOOR USE

Vacuum the grass like carpeting as you would any other type of carpeting to pick up surface soil.

STAIN REMOVAL

Synthetic turf is resistant to stains. However, spills do occur, and the resulting stains should be removed as soon as possible. In most cases, they can be removed with either detergent suds or a solvent-based cleaning agent. Follow the **STAIN REMOVAL CHART** for specifics.

Stain Removal Chart

WATER-BORNE AND MISCELLANEOUS STAINS

Acid, Alcohol, Animal Urine, Alkali, Blood, Coffee, Tea, Cola, Soot, Chocolate, Dye, Glue, Fruit Juice, Ice Cream, Latex Paint, Milk, Mustard, Rust, Water Colors

REMEDY

Sponge with detergent suds and cold water. This method will be effective even after 24 hours. Note: It is important to use just enough fluid to irrigate solid particles out of fabric. Too much fluid will leave a "ring." Clean from outside of stain in toward center so as not to leave a ring.

PERSISTANT STAINS

Chewing Gum
Crayon
Nail Polish
Lipstick
Metal Polish
Furniture Stain
Tar
Oil Paints

REMEDY

Spray with Freon Aerosol and Scrape
Sponge with dry cleaning solvent
Sponge with acetone.
Sponge with dry cleaning solvent
Sponge with dry cleaning solvent
Sponge with dry cleaning solvent
Scrape Excess, Sponge with dry Cleaning Solvent
Blot Immediately, Sponge with turpentine or paint remover. Blot with detergent and water. Re-sponge with cold water to remove detergent

EMULSIFIED STAINS

Cosmetics, Ink, Shoe Polish

REMEDY

Sponge with detergent and cold water. Apply solvent. Clean solvent residue with soap and water. Re-sponge with cold water to remove detergent

Note: in some cases it may be necessary to repeat any of the above procedures to insure thorough cleaning
