Vikan is the leader in advancing hygienic cleaning for customers in safety critical environments where hygiene is a fundamental business driver. Our tools and solutions are designed to deliver in terms of health, safety and environment through quality control and plant management to infection control.

Vikan strives to make cleaning simpler, easier and more effective in sectors such as food and drink processing, healthcare, kitchens and restaurants, retail and supermarkets, education and local authorities, and transport. We work collaboratively with customers to maintain a clear and thorough understanding of their market challenges and needs.

Vikan's systems are designed to improve and raise the visibility of internal hygiene control, support HACCP compliance, and make it easier to maintain and document protocols for internal and external audits. We provide customers with pragmatic, environmentally conscious solutions that are easy to understand and simple to implement, and offer money saving guidance on product selection, cleaning protocols and tool storage to maximise the tools' lifespan.

All Vikan solutions are designed around materials approved for use in health and food preparation environments, comply with US and European legislation, and are licensed under food safety and eco-label systems. Leading edge innovations include pre-prepared microfibre mops, cloths and brushes for efficient, effective and hygienic cleaning; colour-coded tools for use in environments where avoidance of cross contamination is key; ergonomic and adjustable tool designs for operator comfort; and tools made from FDA compliant materials and live up to the EU regulation 10/2011 for applications in the food industry.

We maintain complete control over our quality, environmental and security credentials as all product development, testing and manufacture takes place in Denmark.
