Car Grip

Lightweight Performance Body Filler

→ Area of application

Use for Dents to Small Scratches with the same Product. Works on the most Automotive Substrates.

→ Characteristics

- Improves cycle time
- High Standard of quality
- No need for Body Filler & Putty, Car Grip is both in one

Art. No.	Specification	SP	MOQ
153.432	light blue / 8,82 lbs (4000g) tin (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Soft

polyester body putty

→ Area of application

For filling deep, uneven areas, particularly suitable for large areas.

→ Characteristics

Easily sandable, high viscosity, concentrated filling, pore-free surface.

Art. No.	Specification	SP	MOQ
127.972	beige / 3,97 lbs tin (incl. hardener)	1	6
132.116	beige / 5,73 lbs cartridge (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1
123.892	Putty dispenser- manual for 3kg cartridges	1	1

Multi Green

polyester multifunctional putty - green

→ Area of application

For universal use on all steel, aluminium and galvanised bodywork in car repairs as well as on GRP and wooden parts.

→ Characteristics

Multifunctional putty for a variety of surfaces.

This new multifunctional putty is a complete new developed putty with resins and fillers of the latest generation.

This high thixotropic putty is characterised by a high stability during application matched with a rapid drying time and a pore-free surface before sanding. VOC reduced.

Art. No.	Specification	SP	MOQ
146.706	green / 3.53 lbs tin (incl. hardener)	1	6
147.337	green 5.56 lbs cartridge (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1
123.892	Putty dispenser- manual for 3kg cartridges	1	1

Multi Glas Green

polyester multifunctional fibreglass reinforced putty - green

→ **Area of application**

Reinforced fibreglass putty for steel-, aluminium- and galvanised carbodies as well as for GRP and wooden elements.

→ **Characteristics**

This new fibreglass putty has not only a wide range of surface applications but also enhanced improvements in spreading behaviour, sandability and an even more pore-free surface as conventional fibreglass putties. VOC reduced.

Art. No.	Specification	SP	MOQ
146.707	green / 3.64 lbs (1.650 g) tin (incl. hardner)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Glas white

polyester fibreglass reinforced putty - white

→ **Area of application**

A fibreglass filler for repairing GRP components and for filling deeper uneven areas.

→ **Characteristics**

This white fibreglass putty has a direct adhesion on GRP components, steel and wood. The white neutral colour makes it versatile applicable on these various surfaces. It's modified fibre structure offers a better spreading behaviour and makes it easier to sand.

Art. No.	Specification	SP	MOQ
144.808	white / 3.97 lbs (1.800 g) tin (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Steel

polyester body putty

→ **Area of application**

For filling bodywork edges, wing flanges and joints, as well as for repairs to tank supports and door edges.

→ **Characteristics**

Putty with a very high degree of hardness. Suitable for special repairs.

Art. No.	Specification	SP	MOQ
138.587	alu-grey / 1.98 lbs (900g) tin (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

For all our polyester body pastes:
If there is resin floating on top, please don't mix but throw it away.
Mixing causes air pockets in the paste and pinholes on the surface.

Liquid Putty

polyester finishing putty

→ Area of application

Liquid Putty is used for filling small surface imperfections like scratches and pinholes before applying the primer / filler. It can be used to fill up to approx. 3 mm deep imperfections.

→ Characteristics

Liquid Putty is a 2 component polyester finishing. Liquid Putty has been specially developed for the professional. It has excellent adhesion to metal, body filler, wood, fibreglass, catalysed primers and old / sanded OEM topcoats.

Art. No.	Specification	SP	MOQ
143.496	beige / 2.20 lbs (1.000 g) bottle (incl. hardener)	1	8
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

1K NC Putty

kombi putty

→ Characteristics

The CS 1K NC Putty is 1-component nitrocellulose-based filler. The putty is ideal for spot repair of small unevenness, such as scratches, holes or stone damages. By application in thin layers, the filler dries very fast and forms a smooth surface. The 1K NC Putty is applicable on polyester fillers, acrylic fillers, metal, steel, aluminium and galvanized surfaces.

Art. No.	Specification	SP	MOQ
154.093	CS 1K NC Putty 7,05 oz. (200g)	1	24

Spray

polyester spray filler

→ Area of application

For filling uneven surfaces, sanding traces and pore bubbles on bodywork parts, both in the area of cars and lorries and also in vehicle construction and repair.

→ Characteristics

Spray is a 2 comp. polyester spray filler that is easy to sand. It has good adhesive properties to metal, wood, polyester puttied areas and GRP parts. It is for filling smaller and larger uneven areas. It dries up rapidly and produces a pore-free surface.

→ Processing equipment

All polyester products are porous and precautions should be taken to insure peak product performance. Once Spray is sanded, it must be topcoated immediately with a good quality 2K urethane primer such as CS Air Plus or 540 to properly seal the surface from moisture penetration.

→ Area of application

Gravity Spray Gun, jet size 2,5 diameter. Pressure: 2-2,5 bar.

Art. No.	Specification	SP	MOQ
127.978	grey / 3.31 lbs (1.500 g) tin (incl. hardener)	1	6

Plastic Pro
plastic putty

→ **Area of application**

To repair scratches and damages on plastic parts.

→ **Characteristics**

A specialized new developed plastic putty for the most common plastics available on the market. The putty has excellent properties such as adhesion, elasticity and sandability as well as fineness of the surface.

Art. No.	Specification	SP	MOQ
149.613	black / 2.20 lbs (1.000g) tin (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Flex

polyester contour putty for plastics

→ **Area of application**

For repairing small scratches and defects on plastic parts.

→ **Characteristics**

Plastic outline putty.

Art. No.	Specification	SP	MOQ
134.796	dark grey / 2.20 lbs (1.000) g tin (incl. hardener)	1	12
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Alu Spezial

aluminium & galvanized putty

→ **Area of application**

A special putty for working on aluminium surfaces.

→ **Characteristics**

Alu Spezial is a special polyester hard putty for aluminium surfaces. It has a lower temperature expansion with less shrinking at a very high degree of hardness. This flexible repair putty absorbs vibrations and oscillations better. It is suitable for all special repairs on aluminium. Besides it offers perfect adhesion on steel-, zinc- and aluminium bases.

Art. No.	Specification	SP	MOQ
148.524	lightgrey / 3.97 lbs (1.800 g) tin (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Multi Silver Light

polyester multifunctional putty

→ **Area of application**

For universal use as a filling and fine putty with excellent adhesion to all metallic surfaces, particularly aluminium and galvanized steel. Very lightweight (1.44g/ml) polyester multifunctional putty. Because of its thixotropic processing properties, suitable even for difficult areas.

Art. No.	Specification	SP	MOQ
140.795	silver / 3.31 lbs (1.500 g) tin (incl. hardener)	1	6
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

BPO Hardener

BPO Hardener

→ **Area of application**

BPO hardener for polyester putty.

Art. No.	Specification	SP	MOQ
132.413	red / BPO hardener tube / 1,41 oz (40 g)	10	10

1K Spray Primer

spray filler

→ **Area of application**

Smooths shallow uneven spots and serves as a blocking primer on polyester putty.

→ **Characteristics**

Fast-drying acrylic filler with excellent adhesion and very high filling performance.

Art. No.	Specification	SP	MOQ
125.580	grey / 13.53 oz (400 ml)	1	12

Spray Thinner

spray putty thinner

→ **Description**

Thinner for polyester spray putty.

Art. No.	Specification	SP	MOQ
124.315	transparent / 33.81 oz (1 l) tin / spray putty thinner	1	6

Plastic Spreader

plastic spreader

→ **Characteristics**

Unbreakable and solvent-resistant plastic spreader, width 12 cm.

Art. No.	Specification	SP	MOQ
152.719	115 mm x 77 mm	100	100

Dualmatic

putty dispenser - manual

→ **Area of application**

Precise measuring of polyester putty and hardener in order to ensure the correct mixing ratio. The amount of hardener to be added can be adjusted.

→ **Characteristics**

Mobile, handy device for 3 kg cartridges. Manual operation.

Art. No.	Specification	SP	MOQ
123.892	putty dispenser - manual for 3 kg cartridges	1	1
132.116	Soft beige / 5,73 lbs cartridge (incl. hardener)	1	6
147.337	Multi green 5.56 lbs cartridge (incl. hardener)	1	6
142.889	Putty Board 10 pcs. bag	1	1
152.719	CS Plastic Spreader Box á 100 pcs.	1	1

Speedmixer 3 kg

putty mixing dispenser

→ **Area of application**

The Speedmixer produces a perfect ready mixed putty - homogenous and free of air bubbles.

→ **Characteristics**

For 3 kg cartridges.

Art. No.	Specification	SP	MOQ
152.823	Speedmixer 3 kg	1	1
152.088	Multi Green / slow / green / 5,56 lbs (2,523 kg) cartridge (incl. hardener) / Speedmixer	6	6
152.266	A bag of 90 nozzles for each carton of 6.	1	1
152.719	CS Plastic Spreader Box á 100 pcs.	1	1
142.889	Putty Board 10 pcs. bag	1	1

Putty Knife

steel spreader

→ **Characteristics**

Steel spreader with a solvent-resistant plastic handle.

Art. No.	Specification	SP	MOQ
137.435	60 mm	1	12
137.436	80 mm	1	12
137.437	100 mm	1	12

Slim Tape

special masking tape

→ **Area of application**

High-performance masking tape for problematic materials, such as rubber and plastic parts.

→ **Characteristics**

Extremely thin, flexible and waterproof. High curve resistance, hardly any paint edges, temperature resistant up to 100 °C.

Art. No.	Specification	SP	MOQ
133.827	18 mm x 50 m	10	160

Master Tape Green

masking tape

→ **Area of application**

Professional masking tape for paint shops.

→ **Characteristics**

Waterproof, temperature resistant up to 110°C.

Art. No.	Specification	SP	MOQ
149.221	19 mm x 50 m	48	48
149.225	38 mm x 50 m	24	24
149.226	50 mm x 50 m	24	24

WR-Lifting Tape Premium

masking tape - perforated

→ **Description**

Special masking tape for protecting rubber profiles on bonded wind-screens, as well as for covering headlamps, rear lights and direction indicators.

→ **Characteristics**

A masking tape which consists of a highly resistant, transparent, perforated plastics material strip. Waterproof, temperature resistant up to 100°C. It offers two sizes in a band, 9 and 11 mm.

→ **Processing equipment**

For this masking tape a dispenser is not necessary because it is perforated.

Art. No.	Specification	SP	MOQ
151.504	perforated / 9 + 11 mm x 10 m	1	36

Foam Tape

foam sealing tape

→ **Area of application**

For professionally covering openings (doors, boot lids and engine bonnets). For perfectly sealing gaps and holes.

→ **Characteristics**

Silicone-free tape, temperature resistant up to 80 °C. The rounded geometry ensures a very easy and universal application.

Art. No.	Specification	SP	MOQ
148.861	13 mm x 50 m	1	80
