Olympus Lock, Inc.

EXPERIENCE

Olympus Lock has over 30 years of experience designing and manufacturing easily rekeyable pin tumbler, interchangeable core and engineered cabinet lock bodies for third party cylinders. We offer a wide selection of keyways and cabinet lock solutions for commercial and institutional facilities. Our design philosophy is to create locks that provide long-term benefits to the facility through increased efficiency and easy maintenance.

APPLICATIONS

Olympus cabinet locks are used in a variety of cabinet and casework applications including: K-12 public schools, colleges and universities, correctional facilities, medical offices, hospitals, casinos, retail cash drawers, lockers, kiosks, retail showcases, airline ticket counters, museums, hotels and motels, amusement parks, theaters, restaurants, country clubs, libraries, airports, police stations, fire stations and churches.

PIN TUMBLER SOLUTIONS

Olympus Lock specializes in pin-tumbler cabinet locks for the institutional and retail marketplace. When large numbers of locks will be installed within a facility, pin tumbler locks are preferred because they are more secure and allow the complex master keying and sub-master keying required in larger institutional settings such as schools, banks and hospitals. We provide a wide range of cabinet lock options for the cost conscious, yet security minded user. Beyond that, we can supply cabinet locks keyed to match your door hardware allowing for "one-key" simplification.

INNOVATION

We hold numerous U.S. and Canadian patents proving our commitment to provide innovative solutions for your cabinet lock needs. It has always been the intent of Olympus to provide cabinet locks that are easy to install, use and service. Each product is carefully designed, engineered and manufactured to exacting standards. We offer a wide range of accessories to make the installation, use, and service of our products as easy as possible.

SERVICE

Our delivery is the fastest in the industry. We have an extensive inventory of off-the-shelf masterkeyed locks and can ship most custom keyed orders within 1-5 business days.

ELECTRONIC KEY RECORDS

We manage and save all our custom keying records for future reference. Need to add locks to an existing job? No problem. We've got all the records at our fingertips making it easy for you to order locks for various job phases. We manage the records so you don't have to.

SPECIFICATIONS

Olympus is an AIA certified education provider. We provide comprehensive pre-written architectural specifications for each of our locks. Specifications can be obtained directly from our web site at **olympuslock.com**.

CONTACT

Visit our website at **olympuslock.com** or call us toll-free at 800-525-0954 for more information. Subscribe online to our eNews list and receive new product announcements, technical bulletins.

ARCHITECTURAL FINISH CHART

Olympus Lock offers locks in the most popular architectural finishes. Not all finishes are available on all products. See catalog page for standard finishes available on a specific item. Other finishes may be available through our custom plating service. Call Olympus for pricing and availability.

Institutional grade cabinet locks

## — Heavy duty locks for high use applications —

BENEFITS OF PIN TUMBLER

Pin tumbler key systems provide significantly more key changes than disc tumbler systems. See the chart below for the typical number of allowable key changes under a single master key:

Wafer/disc	80 key changes
4 pin tumbler..........	650 key changes
5 pin tumbler..........	2,000 key changes
6 pin tumbler..........	4,000 key changes
7 pin tumbler..........	16,000 key changes

ANSI/BHMA STANDARDS

We offer a selection of cabinet locks that have passed ANSI/BHMA Grade 1 or Grade 2 testing requirements and are compatible for use when ANSI/BHMA locks are specified.
PIN TUMBLER

- *5 or 6 chambers, pin #s 0-9 (10 total steps per chamber)*
- *2000+ keyed different and master keyed total key changes*
- *Can be grand master keyed*
- *More secure keyway*
- *For high-use commercial applications*
DISC TUMBLER

- *5 or 6 chambers disc #s 0-2 (3 total steps per chamber)*
- *80 keyed different and master keyed total key changes*
- *Cannot be grand master keyed*
- *Less secure keyway*
- *Typical usage is in furniture*

CABINET DOORS

LH — Left-hand (LH) Hinged on left
RH — Right-hand (RH) Hinged on right

DRAWERS

VH — Vertical-hand (VH) Bolt locks up
IH — Inverted-hand (IH) Bolt locks down

STANDARD FUNCTION

Key removable in the locked or unlocked position. Locks ship with standard function unless key retaining is specified at time of order.

KEY RETAINING

The key cannot be removed from the lock while in the "unlocked" position. Key-retaining function is generally used in instances where cabinets or drawers should not be left unlocked.

HANDING

Handed locks must be ordered either LH, RH, VH or IH (see figure at left).

Non-handed locks can be ordered as either door or drawer. Door locks will work in both LH or RH applications and drawer locks will work for both vertical or inverted function.

Product Groups

▶ **RIM CYLINDER CONVERSION KIT**
Electronic rim cylinder conversion kit allows you to convert a SALTO US rim cylinder and other third party US rim cylinders into a latch or deadbolt cabinet lock. **(Page 10)**

▶ **PADLOCKABLE CAM LOCK**
This unique cam lock is typically used in locker applications where the end-user will supply the padlock. We offer a variety of cam styles and lengths allowing this item to be adapted to a wide range of manufacturing styles. Our DCP500 includes an integrated cabinet pull.
(Pages 8-9)

▶ **N SERIES**
A value-priced alternative to commercial keyway or interchangeable core locks, N Series locks use the National D4291 (4 pin) or D4292 (5 pin) key system. A variety of lock types are available including door and drawer deadbolt and latch locks, cam locks, sliding door plunger locks, ratchet locks and file cabinet locks. **(Pages 12-20)**

▶ **R SERIES**
A value-priced alternative to commercial keyway or interchangeable core locks, these locks use the CCL R1 (5 pin) key system. A variety of lock types are available including door and drawer deadbolt and latch locks, cam locks, sliding door plunger locks and ratchet locks. **(Pages 21-26)**

▶ **SCHLAGE C KEYWAY**
This product family offers locks utilizing the Schlage C keyway—one of Schlage's most popular keyways. Choose from door and drawer deadbolt and latch locks, cam lock or ratchet lock. All locks are easily rekeyable. **(Pages 28-33)**

▶ **LESS CYLINDER** (Schlage Compatible)
This product family includes the same locks as our Schlage C keyway but without cylinders. You can install a variety of popular third-party (Schlage compatible or Medeco) cylinders so your cabinet locks can match the same key system as the rest of the facility. **(Pages 29-33)**

▶ **LESS CYLINDER** (Sargent Original)
We offer door and drawer deadbolt lock bodies made specifically to chamber Sargent original cylinders. Key your cabinet locks into your existing Sargent system with ease. **(Page 27)**

▶ **SARGENT IC CORE**
Olympus is the only company that manufactures cabinet locks for Sargent interchangeable core. Add one-key convenience to your existing Sargent interchangeable core system by having your cabinets keyed to match your existing Sargent IC system. **(Page 42)**

▶ **SCHLAGE FULL-SIZE IC CORE**
Olympus offers a range of cabinet lock options that will accept Schlage full-size (or compatible) interchangeable cores. Locks include door and drawer deadbolt locks, cam lock, latch lock and ratchet lock. **(Pages 34-37)**

▶ **CORBIN/RUSSWIN IC CORE**
Olympus is the only company that manufactures cabinet locks for Corbin/Russwin interchangeable core. Add one-key convenience to your existing Corbin/Russwin system by having your cabinets keyed into your Corbin/Russwin key system. Locks are available door and drawer deadbolt, drawer latch and cam lock. **(Pages 38-39)**

▶ **MEDECO/YALE IC CORE**
Looking for a cabinet lock to accept a Medeco or Yale large format interchangeable core? We have them. Locks are available door and drawer deadbolt and cam lock. **(Pages 40-41)**

▶ **SMALL FORMAT IC CORE**
(Best Compatible) Olympus offers a wide selection of small format (BEST style) interchangeable core locks including direct retrofits for Best original cabinet locks. Available styles include door and drawer deadbolt and latch locks, cam locks, sliding door plunger locks, through-glass locks, ratchet locks and mailbox locks. **(Pages 44-56)**

▶ **BEST KEYWAY 3/4" CAM LOCK**
This is a non-IC core cam lock available with a Best A, B, E, F, G, J, K, L or R keyway. It fits in a standard 3/4" hole and includes our patented cam shifting mechanism for maximum flexibility. **(Page 43)**

▶ **BRASS PADLOCKS**
BP Series all weather indoor/outdoor brass padlocks are available either keyed alike or keyed different in a variety of sizes and shackle lengths. The CRB Series padlocks accept a Corbin/Russwin interchangeable core cylinder. **(Page 58-59)**

▶ U.S. SHIPMENTS

All merchandise is shipped F.O.B. from our Lynnwood, Washington warehouse and becomes the property of the customer when accepted by the carrier. Olympus Lock will pay freight charges on orders of **$1,500.00** net or more to a single destination within the continental U.S.A. (excluding Alaska) via the carrier of our choice. For Hawaii and Alaska Customers: Olympus will pay freight on shipments of **$1,500.00** net or more to closest U.S. West Coast port.

▶ CANADIAN SHIPMENTS

All merchandise is shipped F.O.B. our Lynnwood, Washington warehouse and becomes the property of the customer when accepted by the carrier. Olympus Lock will pay freight charges on Canadian orders of **$1,500.00** net or more to closest U.S.A. border crossing via the carrier of our choice provided this information is clearly specified at time of order. Olympus Lock will pay freight charges on Canadian orders of **$2,000.00** net or more to a single Canadian destination via the carrier of our choice. All duty and/or customs charges are the sole responsibility of the customer.

▶ DELIVERY

Claims resulting from loss, shortages or damage-in-transit must be reported to Olympus Lock within 15 days of delivery.

Any claims resulting from shortages, overages, or the shipment of incorrect products by Olympus Lock must be reported to Olympus Lock within 15 days of delivery.

Olympus Lock does not assume responsibility for any damages resulting from any delays in delivery.

▶ CANCELLATIONS

Cancellations or alterations to orders will be accepted only when the cancellation or alteration can be made without loss to Olympus Lock. Orders for non-stock and/or custom items may not be cancelled after work has begun.

▶ RETURNED GOODS POLICY

No material is to be returned without our verbal or written permission in advance. All returned goods require a Returned Goods Authorization (RGA) number to be obtained from Olympus Lock prior to returning the goods. Only products purchased within the last 12 months may be returned. Any products purchased more than 12 months prior are ineligible for return. Whether goods may be returned will be at the sole discretion of Olympus Lock, Inc. Merchandise returned must be identified as to original purchase order number, date of purchase, and shipper's name and address.

A 25% restocking fee will apply to all returned goods which are found not to be the responsibility of Olympus Lock.

All goods must be shipped freight prepaid and received at our warehouse within 30 days of receiving an RGA number. Goods not received within 30 days of RGA issuance or for which an RGA number was not issued will not be returned and no credit will be issued.

Returned goods must be received in first-class resalable condition and in original factory packaging. The determination of "first-class resalable condition" will be at the sole discretion of Olympus Lock. Goods that are returned and determined by Olympus Lock not to be in first-class resalable condition will not be returned, will be scrapped at the factory, and no credit will be issued.

The following are non-returnable:
1. Custom keyed, non-stock items
2. Goods that have been installed
3. Goods that required custom stamping
4. Goods with custom, special order finishes
5. Products or parts that have been modified
6. Obsolete or discontinued items

▶ LIMITED WARRANTY

Olympus Lock warrants that its products are free from defects in workmanship and materials under normal installation, use and service. This warranty does not cover defects or damages arising from improper installation, improper maintenance, ordinary wear and tear, misuse or abuse.

The only liability of the company in tort or in contract, whether under this warranty or otherwise shall be limited to repair or replacement of products which are returned prepaid to us within one year of the date of original purchase.

This is a limited warranty and is in lieu of all other representations and expressed or implied warranties. Under no circumstances shall Olympus Lock be made liable for any incidental or consequential damages or losses.

▶ CALIFORNIA PROPOSITION 65 STATEMENT

⚠ **WARNING:** This product can expose you to chemicals including chromium, which is known to the State of California to cause cancer and birth defects or other reproductive harm. for more information go to www.P65Warnings.ca.gov.

What is California Proposition 65?
Also known as the Safe Drinking Water and Toxic Enforcement Act of 1986, California Proposition 65 is a law that requires warning to consumers if a product exposes consumers to a wide variety of chemicals known by the State of California to cause cancer, birth defects and/or other reproductive harm. Proposition 65 applies only in California.

What does the Proposition 65 Warning mean?
A Proposition 65 warning means that the business issuing the warning knows that one or more listed chemicals is merely present in its product. A warning must be given unless a business demonstrates that the exposure it causes poses "nosignificant risk."

Why does Olympus Lock place a Proposition 65 warning on its products?
A Proposition 65 warning means one of two things: (1) the company evaluated the exposure and has concluded that product exceeds the "no significant risk level"; or (2) the company has chosen to provide a warning simply based on its knowledge about the presence of a listed chemical without attempting to evaluate the exposure. Out of an abundance of caution, Olympus Lock has elected to place the Proposition 65 warning on all products shipped to California.

Replacement Guide

Information given is for dimensional and keyway replacement only. Olympus Lock cabinet locks differ from other manufacturer's locks because they are easily rekeyable in five minutes or less with readily available tools.

OLYMPUS LOCK INC

GRAND MASTER KEYING
Before we can create a grand master key system, we need to have a realistic idea of the complete number of masters, sub masters and key codes that the system will require and whether there will be future expansion. Without this information at the beginning of the process, the options for future expansion may be limited.

SPECIAL STAMPING
Custom (non-stock) lock face and key stamping and/or engraving is available for an additional charge. See price list for details and pricing.

▶ N Series Keying

STOCK KEYING
   4-pin standard: KD and KA# 101, 103, 107, 915
   - **100/200/DCN:** Additional (4-pin) KA# 51001, 51002, 51003, 51004
   - **T37:** Additional (4-pin) KA# 51001 through 51011 and 001 through 030

STOCK MASTER KEYING
   5-pin standard: Orders ship with 2 master keys per project and 2 change keys per lock. Includes **4-digit numeric** key code stamped on the change keys and face of lock. Provide key schedule at time of order.

NON-STOCK MASTER KEYING
   4-pin: Orders ship standard with 2 master keys per project and 2 change keys per lock. Includes **3-digit numeric** key code stamped on the change keys and face of lock. Provide key schedule at time of order.
   5-pin: Orders ship standard with 2 master keys per project and 2 change keys per lock. Includes **4-digit numeric** key code stamped on the change keys and face of lock. Provide key schedule at time of order.

GRAND MASTER KEYING
   5-pin: Orders ship standard with 2 grand master keys per project and 2 change keys per lock. Includes **4-digit numeric** key code stamped on the change keys and face of lock. Provide key schedule and full scope of project at time of order and indicate required number of sub master keys for each group. Sub master keys are charged separately.

▶ Schlage C Keying

STOCK KEYING
   5-pin standard: KD and KA# 101, 102

STOCK MASTER KEYING
   6-pin standard: Orders ship standard with 2 master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys. Lock face stamping available separately. Provide key schedule at time of order.

NON-STOCK MASTER KEYING
   5-pin: Locks ship standard with 2 master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys. Lock face stamping available separately. Provide key schedule at time of order.
   6-pin: Locks ship standard with 2 master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys. Lock face stamping available separately. Provide key schedule at time of order.

GRAND MASTER KEYING
   5-pin: Orders ship standard with 2 grand master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys. Lock face stamping available separately. Provide key schedule and full scope of project at time of order and indicate required number of sub master keys for each group. Sub master keys are charged separately.
   6-pin: Orders ship standard with 2 grand master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys. Lock face stamping available separately. Provide key schedule and full scope of project at time of order and indicate required number of sub master keys for each group. Sub master keys are charged separately.

▶ R Series Keying

STOCK KEYING
   5-pin standard: KD and KA# 4T2, 4T3

STOCK MASTER KEYING
   5-pin standard: Orders ship standard with 2 master keys per project and 2 change keys per lock. Includes **3-digit numeric** key code stamped on the change keys and face of lock. Provide key schedule at time of order.

NON-STOCK MASTER KEYING
   5-pin: Orders ship standard with 2 master keys per project and 2 change keys per lock. Includes **3-digit numeric** key code stamped on the change keys and face of lock. Provide key schedule at time of order.
   *****6-pin:** Orders ship standard with 2 master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys and face of lock. Provide key schedule at time of order.

GRAND MASTER KEYING
   5-pin: Orders ship standard with 2 grand master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys and face of lock. Provide key schedule and full scope of project at time of order and indicate required number of sub master keys for each group. Sub master keys are charged separately.
   *****6-pin:** Orders ship standard with 2 grand master keys per project and 2 change keys per lock. Includes numeric key code stamped on the change keys and face of lock. Provide key schedule and full scope of project at time of order and indicate required number of sub master keys for each group. Sub master keys are charged separately.

*** 6-pin keying note:** *Available on 500, 600, 996, and 997 series locks only.*

▶ SFIC Keying

STOCK KEYING
   N/A: All cores are custom keyed. Specify keyway and type of keying at time of order.

CUSTOM / MASTER KEYING
   6-pin or 7-pin: Orders ship standard with 2 change keys per core. Includes numeric key code stamped on the change keys. 2 additional cut keys (master keys and/or control keys—specify at time of order) are included with each project. Provide key schedule at time of order. Additional keys may be purchased separately.
GRAND MASTER KEYING
   6-pin or 7-pin: Orders ship standard with 2 change keys per core. Includes numeric key code stamped on the change keys. 2 additional cut keys (master keys and/or control keys—specify at time of order) are included with each project. Provide key schedule and full scope of project at time of order and indicate required number of sub master keys for each group. Sub master keys are charged separately.

**ANSI/BHMA
A156.11 Grade 1
E07121**

**Woodwork Institute
(WI) acknowledged
product**

LB: Long bolt option

US19 flat black finish now available

SPECIFICATIONS
Keying: Can be keyed together with other N Series locks

Rekeyable: Easily rekeyable via set screw cylinder release mechanism

ANSI/BHMA: Passed ANSI/BHMA A156.11 Grade 1 performance requirements. Equivalent to E07121(100DR) / E07041(200DW).

Standard function: Key removable in locked or unlocked position. Standard function locks are non-handed.

Key-retaining: Key removable in locked position only. Specify handing (KL/KR for doors or KI/KV for drawers) when ordering.

US Patent Nos: 4,899,563; 4,920,774

Body: Zinc die cast

Cylinder: Solid brass, pin tumbler

Cylinder length: 15/16", 1-3/8" or 1-5/8"

Barrel diameter: 7/8"

Finish: 26D, US4, 10B or US19

Packaged: Packed 10 per box

100DR
Function: Standard function lock
Includes: 2 keys, 56-1 bar strike, and lock mounting screws

100B - Weather Resistant
Function: Weather resistant construction. Suitable for outdoor use in covered areas only.
Includes: 2 keys, 56-1 bar strike, and lock mounting screws

100M - MRI Function
Function: MRI locks are made of all non-magnetic materials and components specifically for use in MRI medical applications.
Includes: 2 keys, 56-1 bar strike, and lock mounting screws (keys, components and materials are non-ferrous/non-magnetic)

KEYING INFORMATION
Keyway: N Series (equivalent to National D4291 4-pin or D4292 5-pin system)

Keys: Includes 2 keys per lock

Stock keying: KD/KA - 4 pin standard

Stock KA#: 101, 103, 107, 915, 51001, 51002, 51003, 51004*note

Masterkeyed: 5 pin standard

Grand masterkeyed: Available

Keyblank 4-pin: KBN-4-NP (equivalent to NA14, 1069L)

Keyblank 5-pin: KBN-5-NP (equivalent to NA12, 1069LA)

Keyblank 5-pin copper plated: KBN-5B (use with 100M/200M MRI locks)

INCLUDED ACCESSORIES
100DR/100B: 2 keys, 56-1 bar strike, and lock mounting screws

100M: 2 keys, 56-1 bar strike, and lock mounting screws (keys, components and materials are non-ferrous/non-magnetic)

OPTIONAL ACCESSORIES
See the accessories section of this catalog for a complete list.

Spacers: WP20 (3/16" thick), WP21 (3/32" thick), WP22 (1/4" thick), WP23 (1/2" thick)

OLYMPUS LOCK INC

▶ **T54C** T-Knob Cylinder Replacement Kit

T54C

Replacement cylinder
Item	Finish	Type	Use with	Keying
T54C	26D	Replacement cylinder	CompX/National C8154 or C8155	Ships standard with empty chambers and 2 ringed 4-pin keyblanks. KD, KA or MK available.

Usage: T54C T-Knob Cylinder Replacement Kit replaces original CompX/National T-knob pin tumbler cylinders. No need to replace the entire t-knob lock, just replace the non-functioning cylinder. Cylinder is all brass construction for increased durability. This 5-pin cylinder can be keyed to match existing 4-pin or 5-pin systems. T54C replacement cylinder works with all CompX/National pin-tumbler t-knob locks regardless of handing or key operation (key removable in locked or unlocked position) or latch configuration. *Can be keyed to match our T37 Series locks (see opposite page) or any of our N Series products.*

SPECIFICATIONS
Keying: Can be keyed together with other N Series locks
Rekeyable: Includes working top-slide for easy rekeying
Replaces: CompX/National original cylinder for C8154 or C8155 pin tumbler t-knob locks for metal cabinet doors.
Cylinder: Drilled for 5 pins. Can be keyed to match existing 4-pin or 5-pin systems.
Material: Solid brass
Finish: 26D
Packaged: Packed 25 per box

KEYING INFORMATION
Keyway: N Series (equivalent to National D4291 4-pin or D4292 5-pin system)
Keying: Can be keyed to match National 4 or 5 pin key systems
Includes: Plug and housing, no pins or springs and 2 ringed KBN-4-NP (4-pin) keyblanks
Custom keying: Available
Keyblank 4-pin: KBN-4-NP (equivalent to NA14, 1069L)
Keyblank 5-pin: KBN-5-NP (equivalent to NA12, 1069LA)

FC26-AR Adapter Ring

Front   Back
Item	Finish	Description
FC26-AR	26D	Adapter ring converts FC10 to work as a replacement for HON F26 style lock.

SPECIFICATIONS
Retrofit: Converts the Olympus FC10 file cabinet lock so it can be used as a replacement for a HON F26 style vertical file cabinet lock.
Usage: Use the FC26-AR adapter ring in place of the bezel ring that comes standard with the FC10.
Installation: Install trim collar with arrow on back facing top of cabinet.

SPECIFICATIONS

Retrofits: Best 1E7E4
ANSI/BHMA: Passed ANSI/BHMA A156.11 Grade 1 performance requirements. Equivalent to E07261/E07271.
Cylinder diameter: 1-1/8"
Across flats: 7/8"
Max. material thickness: 1-1/8"
Min. material thickness: 0.08"
Functions: Includes parts for key-retaining or non-key-retaining function
Body: Zinc die cast or machined solid brass
Finish: 26D, US26, US3 or US4
Packaged: Packed 10 per box

KEYING INFORMATION

Cores: Not included.
Accepts: Best, Arrow, Falcon, KSP, Schlage SFIC or equivalent small format interchangeable cores
Compatible electronic cylinders: Medeco Nexgen XT or VIDEX CyberLock SFIC cylinders

INCLUDES

725-PA plastic thumbturn
720-PL3 stabilizer plate
725-1 spacer to fit 6 or 7 pin cores
720-3-1 short inverted cam
720-3-2 long vertical cam
720-CDLM lost motion cam shifter
720-CDDM key retaining door cam shifter
720-KR key retaining drawer cam shifter

OPTIONAL ACCESSORIES

See accessories on page 76-77. See page 77 for cam assembly instructions.

Optional cams: 7-3-2, 7-3-3, 7-3-4, 7-3-5
Trim collars: TR200 Series
Switch accessory pack: SW-1
CL-MP-118: Double-D metal punch (page 66)
SFIC cores: 206/207 Series (page 60)

FOR METAL CABINETS/ENCLOSURES

Locking mechanism (inside of cabinet)
To open cabinet, bolt retracts allowing handle on outside to rotate disk, disengaging top and bottom latching mechanisms. When handle and disk are moved back into the closed position, bolt springs back into slot in disk and the cabinet is locked.

▶ **FDB Series** Display Boards
FDB-001

FDB-002

FDB-003

FDB-004

SPECIFICATIONS

This valuable resource demonstrates the variety of pin-tumbler cabinet locks available from Olympus Lock. Each lock is mounted so it can be functionally tested. Boards are made of particle board with plastic laminate and are free-standing for countertop display (except FDB-005). Specific finishes or locks may be requested at time of order.

FDB-001
PRODUCT LINE OVERVIEW
Includes a sampling of each product family: Large pin, small pin, interchangeable core, padlockable cam locks.
Includes the following locks: DCP500, 100DR, DCN2 w/DCNP pull, L78V, DCP, 725RL, 300SD, 700S, N078, 888, 729R w/729RS-3

FDB-002
SMALL PIN LOCKS
Includes a sampling of our small pin N Series or R Series locks.
Includes the following locks: 100DR, 200DW w/ETS2, 998V, N078, 300SD, DCN1

FDB-003
SCHLAGE FULL-SIZE IC + LARGE PIN LOCKS
Includes a sampling of our large pin and/or Schlage full-size interchangeable core locks.
Includes the following locks: 700S, L92V   w/ETS1, 800S, 820SC w/ TR203, 777, 920 w/TR203

FDB-004
SMALL FORMAT IC LOCKS
Includes a sampling of our small format interchangeable core locks.
Includes the following locks: L72V, 721DW w/ETS1, 721DR, 720, 725RD, 722S

FDB-005
SAMPLE STICK
This small board is easy to carry and includes our best selling items.
Includes the following locks: 720 w/ TR203, 721DW w/ETS1, DCN1, 100DR, DCP500

FDB-006
SAMPLE STICK
This small board is easy to carry and includes our the **DCN, 100DR w/ETS2 and DCP500**

▶ CL-HIT-25 Cabinet Lock Drill Guide

SPECIFICATIONS
Rubber lined jaws: Protect cabinet doors and give greater holding power.
Adjustable stop: For repeat installations on the same cabinet door.
Maximum thickness: Works on doors up to 1-1/2″ thick.
Hole location: Locate the cylinder hole up to 2-5/8″ from the edge of the door.
Five sizes of drill bushings for versatility:
3/4″, 7/8″, 1", 1-1/8″ and 1-1/4″.
These bushings are designed to be used with clean cutting Forstner type drill bits and are not compatible with hole saws, paddle, or spade-type bits.

▶ CL-MP-118 Double D Metal Punch
For 1-1/8" diameter cam locks

SPECIFICATIONS
Hole type: Punches a DOUBLE "D" hole in sheet metal cabinet drawers and doors.
Metal type: Use on metal cabinets or any type of sheet metal door made with 18 gauge (.048) or lighter steel.
To use: Drill a 3/4" hole centered where the cam lock is to be installed, slide the punch through the hole and tighten down the hex nut with a 11/16" wrench or socket set.
Hole size: Punches a DOUBLE "D" hole size approximately 7/8" wide by 1-1/8" high.
For use with: 1-1/8" diameter Olympus cabinet locks 720, 820, 920, CR25 ME93, SA54 and YA93.

▶ ETS Series Through-bolt mounting hardware

ETS SERIES (a)
Exterior through-bolt plate

Attractive mounting: External metal through-bolt plate *figure (a)* allows for flush mounting of the cabinet lock face with face of cabinet

Increases security: Reinforces the cabinet face by direct connection of lock mounting screws to through-bolt plate's binder posts

Available finishes: US3 and 26D
Includes: Mounting screws

ETST SERIES (b)
Spacer/template for through-bolt plate

Mounting guide: The spacer/template *figure (b)* allows for proper mounting hole placement of external through-bolt plate

Spacer: Can be used as a 1/8" shim spacer
Available finishes: US3 and 26D

(a)   (b)
Through-bolt plates and spacer/templates increase security by providing through-bolt mounting of Olympus cabinet locks.
U.S. Patent No. D490,686 S

▶ ETS1-PL Pull for 1-1/8" diameter locks

ETS1-PL

ETS1

Flush mount with spacer and pull on front of cabinet
SPECIFICATIONS

Mounting: The ETS1-PL cabinet pull fits between our ETS1 through-bolt plate and the face of the cabinet. If mounted "pull down" in drawer applications, the pull will protect the face of the cabinet from the wear and tear of hanging keys.

Through-bolt security: When combined with the ETS1 through-bolt plate, they provide through-bolt mounting of the cabinet lock and pull in a single unit.

Function: Works for both door or drawer applications

Compatible with: Existing ETS1 hardware and screws

Available finishes: US3 and US26D

Use with 1-1/8" barrel diameter locks: 700, 721, 754, 777, 800, 850, 854, 888, 931, 950, L92V, L72V

Item	Finish	Description	Use With
ETS1-PL	26D, US3	1/8" thick pull	700, 721, 754, 777, 800, 850, 854, 888, 931, 950, L92V, L72V
ETS1-125	26D, US3	1/8" thick through-bolt plate	
ETS1-250	26D, US3	1/4" thick through-bolt plate	

Note: ETS1-PL requires use of ETS1-125 or ETS2-250

It is recommended that you use the ETST2 spacer/template for proper placement and drilling of mounting holes prior to installation.

Flush mount with spacer and pull on front of cabinet
SPECIFICATIONS

Mounting: The ETS2-PL cabinet pull is mounted on the face of the cabinet and provides through-bolt mounting of the cabinet lock and pull in a single unit. If mounted "pull down" in drawer applications, the pull will protect the face of the cabinet from the wear and tear of hanging keys.

Function: Works for both door or drawer applications. Does not require use of ETS2 through-bolt plate. Works with existing ETST2 through-bolt spacer/template.

Available finishes: US3 and US26D

Use with 7/8" barrel diameter locks: 100, 200, 500, 600, L20V

Cam Assembly Instructions

For 1-1/8" Diameter Cam Locks

▶ For 1-1/8" Diameter Cam Locks
720, 820, 920, CR25, ME93, SA54, and YA93
(excludes 720B-DM)

NOTE: These instructions do not apply to the **720B-DM direct drive** cam lock. The 720B-DM uses different cams and cam shifter mechanism.

Above referenced 1-1/8" diameter cam locks ship standard with A, B and C cam shifters (pictured below).

720-CDLM
lost motion cam shifter
(non-key-retaining)

720-CDDM
key retaining
door cam shifter

720-KR
key retaining
drawer cam shifter

820 requires proper installation of universal driver into back of cylinder
(see picture at right) ⟶

The 820 Series includes universal driver (item no. 10-360). For cam rotation to work properly, the supplied universal driver must be installed under the cap at the back of the cylinder in either of the 2 vertical positions indicated at the right (with tab to the left or right only). DO NOT install universal driver in the horizontal (tab up) position.

Schlage compatible cylinder

Correct universal driver position for 820 cam lock
The cam shifter and cams must be assembled per the below instructions to achieve the proper handing and operation. To make cam assembly easier, it is recommended that a core is installed into the lock before the cam and cam shifter is assembled onto the back of the lock.

BOX A

720-3-2 VERTICAL CAM / 720-3-4 LONG 3" CAM
IMPORTANT: If your cam has a brass pin between the two notched cut outs, use these instructions, otherwise see Box B.
BOX B

720-3-2 VERTICAL CAM / 720-3-4 LONG 3" CAM
IMPORTANT: If your cam has a brass pin on the bottom of the cam, use these instructions, otherwise see Box A.
720-3-3 INVERTED CAM / 720-3-5 INVERTED CAM

720-3-1 SHORT CAM

Rekeying Instructions

Rekeying instructions are also available on our website under each individual product page or videos in our video library at **www.olympuslock.com**

▶ 100,200,500,600,996,997,998,999,L20V

1. Remove set screw from barrel of lock.
2. Remove internal cylinder housing from lock body.
3. Remove brass retainer on back of cylinder plug.
4. Turn key 1/4 turn and place follower tool into back of cylinder plug.
5. Push follower through lock, removing plug for rekeying.

▶ 300SD,400SD

Note: These locks need not be removed from cabinet to be rekeyed.
1. Open lock (cylinder projects forward).
2. Locate "speed release" button on left side of projected cylinder and depress with sharp tool. Cylinder will spring forward.
3. Turn key 1/4 turn and pull cylinder forward out of lock.
4. Pull up retaining pin located at rear of cylinder. Cylinder may be rekeyed in two ways: use a follow tool to remove plug, or access top slide.
5. After keying, hold bolt stable and reinsert cylinder while depressing "speed release." Lock cylinder will automatically realign itself and snap back into place.

▶ 329R/429R

1. Remove strap from lock.
2. Turn lock over so that the back of the lock faces up and you have access to the set screw.
3. Remove the set screw and the small triangular metal cap.
4. Turn the lock onto its side with the protruding section facing you.
5. Using a sharp tool or paperclip, depress the button at the bottom of the hole. This will release the cylinder housing for removal.
6. Remove the cylinder housing from the lock body.
7. Rekey as necessary.
8. Reassemble lock.

▶ B7,DCN,DCR,FC10

1. Remove cam and screw.
2. Turn lock upside down.
3. Take a sharp tool and push retainer staple out.
4. Turn key 1/4 turn and place follower tool into back of cylinder plug.
5. Push follower through lock removing plug for rekeying.

▶ T37

1. To remove bolt:
   a. Turn key to the 2:00 position, pull bolt up
   b. Using a small tool, depress the bolt spring through the hole on the back of the lock and pull the bolt out
2. Remove the trim collar from the lock.
3. Slide the pin retaining cap off to expose springs and pins.
4. Rekey as necessary.
5. After keying, slide pin retaining cap back into place.
6. Replace trim collar.
7. To reinsert bolt:
   a. Insert key and turn to 2:00 position.
   b. Insert bolt until spring snaps into place.

▶ PN50

1. Visit our website at: www.olympuslock.com for complete rekeying instructions.

▶ N078,R078

1. Remove set screw from barrel of lock.
2. Remove internal cylinder housing from lock body.
3. Remove brass retainer on back of cylinder plug.
4. Turn key 1/4 turn and place follower tool into back of cylinder plug.
5. Push follower through lock, removing plug for rekeying.

▶ 700,800,L78,754,854

1. Remove set screw from barrel of lock.
2. Turn key 1/4 turn and pull out cylinder and housing from lock body.
3. Extract cylinder and rekey same as a Schlage-style cylinder. Olympus brass cylinder body will chamber Schlage and Weiser original cylinders along with Lori replacement plugs. Less cylinder locks may chamber other manufacturer's cylinders.
4. Replace cylinder in housing. For proper operation, lazy cam must be timed.
   Door timing: Driver bar faces away from direction the bolt is projecting.
   Drawer timing: Driver bar faces in same direction the bolt is projecting.
5. Insert cylinder and housing by aligning set screw and hole.
6. Push until cylinder is approximately 1/8" from seated position. Use key to pick up lazy cam which will fully seat cylinder. If key does not withdraw at end of bolt throw, cam is not timed correctly (see "timing" above - Step 4).

▶ 820

1. Remove both <u>set screw</u> and <u>set screw/stop pin</u> from back of lock.
2. Remove rear housing section from back of lock.
3. Remove internal cam driver from back of cylinder.
4. Remove cylinder from lock body.
5. Remove brass retainer on back of cylinder plug.
6. Turn key 1/4 turn and place follower tool into back of cylinder plug.
7. Push follower through lock, removing plug for rekeying.

▶ 829

1. Turn lock over and remove the 4 screws from the bottom rectangular plate.
2. Remove bottom plate, then remove remaining set screw from bottom of lock.
3. Remove cylinder and cylinder top block from lock body.
4. Rekey cylinder, then reassemble into lock body using the reverse of above steps.

▶ 850

1. Remove set screw from barrel of lock.
2. Remove internal cylinder housing from lock body.
3. Turn key 1/4 turn and pull out cylinder and housing from lock body.
4. Extract cylinder and rekey same as a Schlage-style cylinder. Olympus brass cylinder body will chamber Schlage and Weiser original cylinders along with Lori replacement plugs. Less cylinder locks may chamber other manufacturer's Schlage compatible key-in-knob cylinders.
5. Insert cylinder and housing by aligning set screw and hole.

OLYMPUS LOCK INC

Small Pin

Available on the National or CCL keyway, these value priced locks allow for high quality, pin tumbler security without the need of a commercial keyway.

Interchangeable Core

Match your cabinet locks to your existing interchangeable core key system. Choose from small format (BEST), Schlage, Corbin Russwin, Medeco, Sargent or Yale.

Schlage

Available in Schlage "C" keyway or less cylinder to accept any Schlage compatible key-in-knob cylinder including ILCO, Medeco, Videx and Mul-T-Lock as well as lock bodies for Sargent original cylinders.

Specialty

Padlockable Cam Locks use padlocks as locking device. Great for lockers. Rim cylinder conversion kit allows you to turn any US rim cylinder into a latch or deadbolt cabinet lock.

Padlocks & Accessories

Brass padlocks, spacers, through-bolt mounting plates, strikes, trim rings, SFIC cylinders, keys, pin kits, display boards and installation tools.
