Delivering quality science to the world

About Us

Canadian Science Publishing is an independent not-for-profit scholarly publisher dedicated to serving the needs of researchers and their communities.

Our Mission

CSP strives to advance the understanding and development of science and technology.

Our History

CSP began as the NRC Research Press in 1929 and has continued to grow and evolve to meet the needs of the global scientific community.

We publish 20 journals under the NRC Research Press imprint, many of which have been active for decades, and FACETS, Canada's first multidisciplinary open access science journal.

Our Reach

We publish international, peer reviewed scholarly research on a range of topics and represent researchers and audiences from all over the world.

To learn more about CSP including our Board of Directors, strategic plan, and other services please visit the CSP website: www.cdnsiencepub.com.

The **NRC Research Press** journals are **Canadian Science Publishing's** flagship suite of **award-winning** international publications.

We publish 20 titles under this imprint, many in continuous publication since 1929.

Canadian Science Publishing is an independent, not-for-profit scholarly publisher dedicated to serving the needs of researchers and their communities.

Our journals cover a broad range of scientific disciplines and feature more than 2,000 articles each year published on a state-of-the-art electronic platform.

These award-winning, high impact scientific and technical journals have an international readership in more than 175 countries.

Executive Editor-in-Chief
Bruce P. Dancik, Ph.D.

Deputy Executive Editor-in-Chief
Moira M. Ferguson, Ph.D.

HOW TO SUBSCRIBE

Librarians can subscribe to the NRC Research Press journals a number of ways:

By using the “**Subscribe**” button on each journal website

 www.nrcresearchpress.com

Through your preferred subscription agent

 please see the full list on page 31.

What's New at Canadian Science Publishing

In October 2015, CSP welcomed three new journals to the NRC Research Press suite, the *Canadian Journal of Animal Science* (CJAS), the *Canadian Journal of Plant Science* (CJPS), and the *Canadian Journal of Soil Science* (CJSS). These journals, acquired from the Agricultural Institute of Canada, have been fully integrated into the CSP sales catalogue and are available now. Read the full press release on the [CSP website](#).

CSP is also proud to announce that in April 2016 it launched *FACETS*, Canada's first and only multidisciplinary open access science journal. *FACETS* is now accepting submissions and we invite you to visit the *FACETS* website to learn more: www.facetsjournal.com.

Competitive Pricing; No "Big Deals"

CSP is a not-for-profit scholarly publisher dedicated to serving the needs of researchers and their communities. As such, ensuring that research published in our journals is available to researchers, no matter the size or location of the institution, is an essential component of our pricing policy. For librarians, we continue to support flexibility in acquisitions by offering a 10% discount when you subscribe to as few as four titles. Librarians are under no obligation to purchase large packaged deals, our pricing allows for title by title acquisition based on the needs of your collection and community.

Expanding Electronic Offerings

Our customers continue to let us know that their acquisitions priorities are focused on electronic content. To better support these initiatives CSP has discontinued the print-only subscription option. This allows us to focus our resources on electronic content and delivery. While we are continuing to support print, as of the 2017 subscription year, any customer ordering print will also receive an electronic subscription. Electronic subscriptions include access from 1996 to the current year, access that represents an additional 2,000 articles per title, allowing libraries to provide great access to students, researchers and faculty.

Impact Beyond the Impact Factor

As a signatory member of the Declaration of Research Assessment (DORA), CSP recognizes that impact goes far beyond the Impact Factor. Starting in 2016, CSP now displays Altmetric scores for all published articles. CSP also actively promotes article-level-metrics as well as plain language summaries, blogs and other innovative methods of communicating scientific research.

Stay connected with Canadian Science Publishing by subscribing to our newsletters or joining us on Facebook and Twitter. We look forward to connecting.

Applied Physiology, Nutrition, and Metabolism

www.nrcresearchpress.com/journal/apnm

Applied Physiology, Nutrition, and Metabolism publishes original research articles, reviews, and commentaries, focusing on the application of physiology, nutrition, and metabolism to the study of human health, physical activity, and fitness. The published work will be of interest to exercise physiologists, physical fitness and exercise rehabilitation specialists, public health and health care professionals, as well as basic and applied physiologists, nutritionists, and biochemists.

Indexed in: Current Contents/Life Sciences, Excerpta Medica Abstract Journals, Focus On: Sports Science and Medicine, MEDLINE/PubMed, Nutrition Abstracts and Reviews Series A: Human and Experimental, Physical Education Index, Science Citation Index Expanded, Scopus, EBSCO, OCLC, Summon, ReadCube, and more.

This monthly journal has a 30-year history of publishing, first as the *Canadian Journal of Sport Sciences*, and later as the *Canadian Journal of Applied Physiology*.

Arctic Science

www.nrcresearchpress.com/journal/as

Arctic Science is an open-access peer-reviewed journal. An interdisciplinary journal, it publishes original peer-reviewed research from all areas of natural science and applied science & engineering related to northern Polar Regions. The focus is on basic and applied science including the traditional knowledge and observations of the indigenous peoples of the region as well as cutting edge developments in biological, chemical, physical and engineering science in all northern environments. Reports on interdisciplinary research are encouraged. Special issues and sections dealing with important issues in northern polar science are also considered.

Biochemistry and Cell Biology

www.nrcresearchpress.com/journal/bcb

Published since 1929, this bimonthly journal explores every aspect of general biochemistry and includes up-to-date coverage of experimental research into cellular and molecular biology, as well as review articles on topics of current interest and notes contributed by recognized international experts. Special issues each year are dedicated to expanding new areas of research in biochemistry and cell biology.

Indexed in: Biochemistry and Biophysics Citation Index, BIO- SIS, Chemical Abstracts, Current Contents/Life Sciences, MEDLINE/PubMed, Nucleic Acids Abstracts, Science Citation Index, Scopus, EBSCO, OCLC, Summon, ReadCube, and more.

Biochemistry and Cell Biology was formerly part of the *Canadian Journal of Biochemistry and Physiology* (1954 - 1963) and was formerly known as the *Canadian Journal of Biochemistry* (1964 - 1982) and *Canadian Journal of Biochemistry and Cell Biology* (1983 - 1985)

Journal of Unmanned Vehicle Systems

www.nrcresearchpress.com/journal/juvs

The *Journal of Unmanned Vehicle Systems* was established in spring 2013, with the first issue published that fall. This quarterly electronic-only journal features editorials, articles, notes, and letters related to developments in the rapidly emerging international field of unmanned vehicle systems (remotely controlled machines used for aerial, terrestrial, and aquatic systems) and their sensors. The journal is broadly themed into four main areas of applications of practical and academic interest: civil, environmental, military, and engineering technology. Submissions are welcomed from researchers and practitioners in academia, government, and industry from all over the world.

FACETS

www.facetsjournal.com

FACETS is a multidisciplinary and interdisciplinary open access science journal that primarily features research articles, but will also include review articles, communications, notes, perspectives, editorials, and science applications forum papers. *FACETS* currently focuses on six research areas. Although not officially covering Social Sciences and Humanities (SSH) topics, the Integrative Sciences section includes intersections of science and the social sciences. Additional subject categories will be added as the journal evolves in conjunction with emerging scientific advances.

As a benefit of online publishing, papers are aggregated by subject areas rather than into the usual volume/issue format, making the best use of online technology to improve discovery of related content. Finally, new and emerging fields can be easily added without the delays caused by developing and setting up a new online publishing platform.
