"It's a proven product"

"For me it is essential that my animals get the most out of what I give to them. With fast growing animals like a Blue the more they convert the better they become. Lactaid is a proven product – I tried it and it worked!"

Ross Pattinson, Temon Farm, Brampton

Lactaid® is the UK's Next Generation Stabilised Yeast. It has been developed to consistently support the farmer to help achieve improved daily live-weight gain in beef cattle and help improve milk production in dairy cows.

Providing rural insurance until the cows come home

Farming is an unpredictable business at the best of times, so you need to be sure of your farm insurance if things take a turn for the worst. With over 100 years experience protecting farms, vehicles and livestock no one understands this better than Cornish Mutual. That's why your local Cornish Mutual contact takes the time to clearly explain everything about your Policy so you know your way around your insurance as well as you know your farm.
