SAINT-GOBAIN

CertainTeed Ceilings Cross-Reference Guide

This document's primary purpose is to provide our customers with appropriate CertainTeed Ceilings acoustical ceiling product cross-references to acoustical ceiling products produced by other ceiling manufacturers based on shared aesthetic and/or technical performance similarities. There are very few truly "equal" products in the ceiling industry. However, the cross-references provided in this guide are close enough in terms of their generally intended purpose that a competitive comparison of the products noted is worthy of consideration. The basis for the comparisons provided in this guide was the printed and web information available, at the time of publication, from each respective manufacturer.

It should also be noted that CertainTeed Ceilings offers a number of products which have aesthetic and/or technical performance characteristics that are unique. **As such, these products have no legitimate cross-reference that would stand up to a competitive comparison and are listed to the right.** These products are considered proprietary; thus we have no equivalent listed in the following pages.

We encourage you to explore what makes these products special at www.certainteed.com/ceilings.

Consult your CertainTeed Ceilings Architectural Sales Manager or Inside Sales Representative for additional product information and pricing. This information is subject to change without notice. CertainTeed assumes no responsibility for any errors that may inadvertently appear in this document.

The cover image features Ecophon® Focus™ Ds. The project was designed by Inventure Design of Houston, Texas, for Louisiana Land Oil and Gas (LLOG) Exploration Company's headquarters in Covington, Louisiana.
