

GREEN RIDE GLOBAL

A white silhouette of a wind turbine is positioned to the right of the text 'GREEN RIDE GLOBAL', with its tower extending through the word 'GLOBAL'.

Green Preferred Supplier List™ Chauffeured Ground Transportation

August – September 2009

Sedan • SUV • Limousine • Van • Limo Bus • Shuttle Bus • Motor Coach

INTRODUCTION

The Green Preferred Supplier List is an easy to use directory for DMC's, Event Planners, Corporate Travel Buyers and Procurement Departments to find Chauffeured Ground Transportation companies that have made environmental sustainability a primary focus moving forward. All companies in this directory have the ability to provide 3rd party issued supply chain emissions reports to their clients.

Green Ride Global implements industry leading environmental sustainability programs into ground transportation companies around the world. All Green Ride Global member companies are operating inside of a robust Environmental Policy and Environmental Management System that is designed to guide their operation to a 20% reduction in greenhouse gas emissions over the next 5 years.

- ☑ Corporate Environmental Policy
- ☑ ISO 14001 Compliant Environmental Management System
- ☑ Verified Quarterly and Annual GHG Emissions Reporting
- ☑ Complete Business Wide GHG Inventory
- ☑ Fortune 1000 RFP Environmental Verification
- ☑ US EPA Climate Leaders (where applicable)

If all ground transportation companies across North America achieved the same level of greenhouse gas emissions reductions as Green Ride Global members, the environmental impact would equal:

- 1,000,000 barrels of oil not used
- 100,000 cars off the road
- 400,000 acres of carbon absorbing forest

Remember to invite Green Ride Global companies to participate in all business tendering procedures.

RECIPIENT ORGANIZATIONS

Recipient organizations have requested to receive updated versions of the Green Preferred Supplier List on a bi-monthly basis. These organizations understand the importance of environmental sustainability as it relates to ground transportation. All GRG/GPSL companies can provide event or trip specific supply chain emission reports. These reports enhance the recipient organizations' ability to prove that their ground transportation partner is operating inside the highest level environmental sustainability programming possible.
