# Focus on customers as global concept

## We are more than merely on site

As a family business with over 90 years of experience, we have built excellent ties with first-class producers. Through our customer relations we know what is needed for most different applications. We always deliver the correct quantity at market prices to the required destination in time. Our product portfolio ensures systematic solutions for different requirements on a cross-application basis. You have access to the extensive know-how of the whole STOCKMEIER Group at any time:

- **STOCKMEIER Chemie + STAUB & CO. – SILBERMANN + BASSERMANN minerals + RCN Chemie + DE NOORD**  
Trading in standard chemicals and specialties, lime and other industrial minerals, development and production of cleaners for food processing / surface technology / the automotive industry / toll manufacturing and solvent recycling
- **KRUSE Automotive**  
System solution for AdBlue® and Blue Sky®
- **KAPP-CHEMIE**  
Development and production of flexographic printing inks, cleaners, glues and paper additives as well as compounds for technical textiles and wet refining
- **STOCKMEIER Urethanes**  
Development and production of polyurethane systems
- **STOCKMEIER Food**  
Development and production of aromas and flavoring agents and trading in raw materials and additives for the food industry
- **STOCKMEIER 3S**  
Refinement of particle surfaces

# More than merely products

## Our service is value-added for your account

We develop, produce and provide after sales service for our customers far beyond what is common in the traditional trade in chemicals. Our highly qualified experts develop custom solutions also for complex challenges.

We provide extensive support and service to customers of our products such as in development or logistics. We take responsibility for complete projects, from professional consultation and the efficient handling of purchase orders to the speedy and correct delivery in our own bottoms. We are at your side as adviser already at the development stage, analyze your requirement profile and work out intelligent custom solutions entirely in

accordance with your requirements. We cooperate closely with the experts in our development departments. Our experienced field experts have extensive knowledge of the industry and will visit your premises to discuss your problems with you. In addition to our extensive range of chemicals you also have the benefit of some very exclusive agencies of leading producers with global activities. Just see for yourself.

The STOCKMEIER idea – product-related service

# Quality management

Our commitment: Highest quality

Your advantage: Highest safety

Our mature quality management system supports highest demands in all areas. We even give this to you in writing in our updated materials safety data sheets and specifications that come with all products.

We not only supply quality products to you, we also put all our know-how at your disposal. The related logistics comprises the complete procedure, from warehousing and marking to transporting the chemicals. In addition, all procedures from the receipt of the purchase order to the acceptance of the products by the customer are documented. Toll manufacturing and the bottling of solvents, aqueous-alkaline cleaners and other liquids are also part and parcel of our activities. Our fully automatic bottling plant for

very small packages makes us a specialist for the 20 ml to 5 l package bracket where we can deliver any need.

On top of our supply range, we also provide services for your safety management and professional take-back and disposal of obsolete products and vessels.

You will find this and other information also on our website: [www.stockmeier.de](http://www.stockmeier.de)

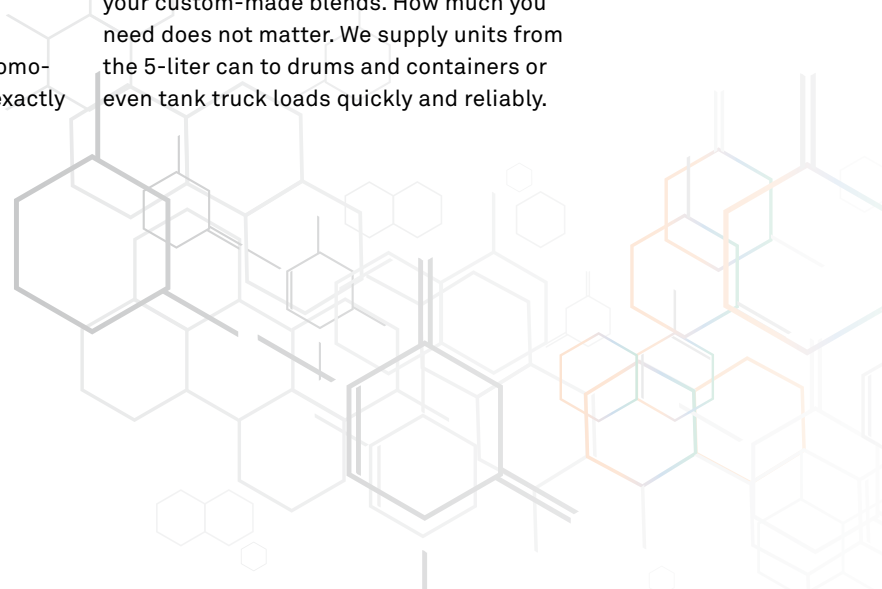

## Solvents & plasticizers

The optimum solution for all requirements

A massive part of our supply range comprises solvents of most different kinds. In addition to systematic standard products we also supply products of specialty nature.

Many customers, for example, in the automotive industry, need blends which match exactly

different specifications and quantities. We use a special software program to find VOC-free or non-hazardous recipes. You can also take advantage of our flexibility and order your custom-made blends. How much you need does not matter. We supply units from the 5-liter can to drums and containers or even tank truck loads quickly and reliably.

A
Acetone pure
Adipates, different types
Alcohols
Alkanesulfonic acid ester
Amines
Aminoethyl piperazine
Antifreeze fluids

B
Balm turpentine oil
Benzoates, different types
Benzyl alcohol
Blends acc. to recipe
Butanediol 1.3 + 1.4
Butanols, N-, iso, secondary
Butyl acetate 85 + 98/100 %
Butyl diglycol
Butyl diglycol acetate
Butyl glycol
Butyl glycol acetate
Butyl lactate
Butyl triglycol

C
Carbitol®, all types (Dow)
Castor oil

Cellosolve®, all types (Dow)
Cellulose thinners
Chlorinated hydrocarbons
Chloroform techn. grade
Citrates
Citric acid ester
Citrus terpenes
Cleaner, solvent-based
Cold cleaning agents of the Stobiclean series
Cooling solutions*
Cyclohexane
Cyclohexanol
Cyclohexanone

D
Dalpad A® (Dow)
Dearomatized hydrocarbons (D series test naphthas)
Decanols
Degreasing agents
Denaturated alcohol
Diacetone alcohol
Dibasic ester
Dichloromethane
Diethanolamine LFG + pure
Diethylene glycol

Diethylene triamine (DETA)
Diethylketone
Diisobutylcarbinol
Diisobutylketone
Diisobutylphthalate (DIBP)
Diisononylphthalate (DINP)
Dimethylacetamide
Dimethylethanol amine
Dimethylformamide
Dimethylsulfoxide (DMSO)
Diethylphthalate (DOP)
Diethylterephthalate (DOTP)
Dipentenes
Dipropylene glycol
D-limonene
Dowanol®, all types (Dow)
- Individual products: PM, DPM, TPM, PnP, DPnP, PnB, DPnB, TPnB, PPh, PGDA, PMA, DPMA, DMM, EPH

E
EPH glycol ether
Estisol®, Estisurf®, Esticlean® (Esti-Chem)
Ethanol amine, different types
Ethanol, different types
Ethoxypropanol

Ethoxypropyl acetate
Ethyl acetate 98/100 %
Ethyl amylketone
Ethyl benzene
Ethyl diglycol
Ethyl glycol (2-ethoxy-ethanol)
Ethyl glycol acetate (2-ethoxyethyl-acetate)
2-ethyl hexanol
2-ethylhexyl acetate
Ethyl lactate
Ethyl triglycol
Ethylene carbonate
Ethylene diamine (EDA)
Ethylene glycol / mono- techn.
Ethylene glycol diacetate ( EGDA)

F
Fatty acid ester
Film former (Dowanole®, glycols)

G
Gamma butyrolactone
Gasolines, test naphthas, white spirits
Glycerol, diff. conc. gradients, vegetable, high-purity

**G (cont.)**

Glycols
Glykosol N® (pro KÜHLSOLE)*

**H**

Heptane, n, iso
Hexane, n, iso
Hexanediol
Hexyl diglycol
Hexyl glycol
Hexyl triglycol
Hexylene glycol
Hot degreasing agent

**I**

Isobutanol
Isobutyl acetate 98/100 %
Isohexadecane
Isohexane
Isomer mixtures
Isoparaffins
Isophorone
Isopropyl acetate 98/100 %
Isopropyl alcohol, techn. + high-purity / isopropanol
Isopropyl glycol
Isopropyl myristate

Isopropyl palmitate water-white
Isopropylol

**K**

Kaltreiniger A 151® (Shell)
-----------------------------

**L**

Lactates, different types
Lactol pharma 90 %
Linseed oil varnish
Lipinol O

**M**

Methanol pure (methyl alcohol)
Methoxy butanol
Methoxy butyl acetate
Methoxy hexanone
Methoxy propanol
Methoxy propyl acetate
2-methyl butanol
Methyl acetate 98/100 %
Methyl amyl ketone
Methyl diglycol
Methyl ethyl ketone (butanone-2)
Methyl ethyl ketoxim (2-butanonoxim)
Methyl glycol
Methyl glycol acetate

Methyl isoamyl ketone
Methyl isobutyl carbinol
Methyl isobutyl ketone
Methyl lactate
Methyl triglycol
Methylene chloride 98/100 % (dichloromethane)
Monoethanol amines
Monoethylene glycol

**N**

Naphthas, special and test naphthas
N-butanol
N-butyl glycolates
N-butyl propionate
N-ethyl pyrrolidone
N-heptane ultra-pure
N-hexyl acetate
N-methyl pyrrolidone
Nonanols
N-paraffin C 10 - C 13
N-pentanol
N-pentyl propionate
N-propanol
N-propyl acetate
N-propyl propionate

**O**

Orange terpenes
-----------------

**P**

Paint stripper
Paint thinner
Paraffin oils
Paraffins, n-, iso
Pekasol®, all types (pro KÜHLSOLE)*
Pekasolar®, (pro KÜHLSOLE)*
Pentane, n-, cyclo, iso
Petroleum
Petroleum ether
Phosphoric acid ester
Phthalates, phthalic acid ester
Pine oil types
Plasticizers, full product range of products with or without phthalate
PM glycol ether
PMA glycol ether
PnB glycol ether
PnP glycol ether
Polyamines
Polyethylene glycoles, PEG's (200 – 20,000)
Polypropylene glycoles, PPG's (400 – 4,000)

Proglyde DMM® (Dow)
Propionates
Propyl acetate, n-, iso
Propylene carbonate
Propylene glycol diacetate (PGDA)
1.2 propylene glycol techn./USP
P-tert. butyl phenol

**S**

Safety systems Dow-Safechem
Sebacates, different types
Sec-butyl alcohol
Shellsole®, all types (Shell-Chemie)

Shell universal cold cleaner A 151®
Silicone emulsions
Silicone oil
Solar heat transfer fluids
Solvent IK® (Dow)
Solvent mixtures of all kinds
Solvent naphtha, light, heavy, super heavy
Special naphthas, all types
Styrene monomer

**T**

Terpenes
Test naphthas, white spirits, all types

Tetrahydrofuran
Texanol®
Thermal transfer fluids*
Thinner
Toluene
TPM glycol ether
TPnB glycol ether
Triethanol amines, LFG + pure
Triethylamine
Triethylene glycol
Triethylene pentamine (TEPA)
Triethylene tetramine (TETA)
Triisopropanolamine
Trimellitates, different types
Tripropylene glycol (TPG)

Turpentine substitute
-----------------------

**U**

Universal cold cleaning agent
Universal thinner

**V**

Varnish removers
VOC-free solvents

**W**

White mineral oil
-------------------

**X**

Xylene
--------

\* = Agent of pro KÜHLSOLE GmbH

## Acids & alkalis

### An extensive range for precise applications

In acids and alkalis, our range addresses a very wide clientele in the metal, textile, water treatment and other industries.

In addition to the full range of products common in the market, you can also combine and

order special blends. With our modern bottling equipment we can supply custom size units of special blends. On request, our specialists produce, load and move hazardous goods in tank trucks to your storage tanks. All you should do is let us know your needs and requirements.

**A**

Acetic acid anhydride
Acetic acids, all concentration gradients
Acid mixtures
AdBlue®, urea solution DIN 70070
Aluminium chloride solutions "Stobirid series", acid
Aluminium nitrate solutions „Stobiklar“
Ammonia solution 0.910 techn., other grades on request
Ammonium hydroxide solutions / ammonia liquor, diff. concentration gradients

**B**

Battery acid 1.28 / sulfuric acid 38 %
Blends
Borofluohydric acid 50 %
(Brindi acid) hydrochloric acid spec. inhibited

**C**

Calcium chloride solution
Caustic potash solution, all concentration gradients (potassium hydroxide)
Caustic soda solution
Chlorine bleaching agent / soda bleaching agent
Chlorine liquid 98/100 % (chlorine gas)
Citric acid solutions, techn. + Food Grade

**D**

Demineralized water
Dodecylbenzenesulfonic acid

**E**

Ethylene diamine tetra acetic acid (Na4 EDTA)
--------------------------------------------------

**F**

Ferric chloride solution 40 %
Fluorosilic acid / hexafluorosilicic acid
Formaldehyde / formalin
Formic acid, all concentration gradients

**G**

Gluconic acid 50 %
Glutaric acid, techn.
Glycolic acids 57 % / 70 %
Glyoxal pure solution approx. 40 %

**H**

Hexafluorosilicic acid
Hydrochloric acids, techn. + chem. pure
Hydrofluoric acids
Hydrofluorosilicic acid
Hydrogen peroxides, techn. spray + immersion grade (OXTERIL® Evonik)**

**I**

Iron chloride
Iron chloride sulfate solution
Isononanoic acid
Isooctanoic acid

**L**

Lactic acid
Lactic acid, edible 80 % by wt.
Levoxin / Hydrazin® (Bayer)
Luminate solutions „Stobimin series“, alkali
Lime milk, all concentration gradients

**M**

Methanesulfonic acid 70 %
---------------------------

**N**

Nitric acids, techn. + chem. pure
Nitrilotriacetic acid (NTA)

**O**

Orthophosphoric acid 85 %
Oxteril® (Evonik)

**P**

Para-toluene sulfonic acid liquid
Perchloric acid 70 %
Phenol(4)sulfonic acid
Phosphoric acids, all concentration gradients
Phosphorous acid 70 %
Polyaluminium hydroxide chloride solutions, diff. concentrations
Potassium metasilicate solution
Potassium water glass
Preserving agents
Propionic acid

**S**

Soda bleaching agent (sodium hypochlorite solution)
Sodium aluminates, diff. concentrations "Stobimin series"
Sodium bisulfite solution 38-40 %
Sodium carbonate solution
Sodium chloride solution
Sodium chloride solution 300 W
Sodium hydroxide solutions, different concentration gradients
Sodium sulfide solution
Sulfuric acids, techn. + chem. pure
Sulfurous acid 5-6 % (sodium sulfide solution)

**U**

Urea solution, techn.
-----------------------

**W**

Water, demineralized
----------------------

## Solids

### Widest product range in best quality

The STOCKMEIER solids range includes products for all industrial applications, particularly for complex requirements.

From A like adipic acid to Z for zinc phosphate, our range includes all heavy chemicals available in the market. Very special solutions are a

particular challenge for our specialists, who will outdo themselves to find the best possible solution together with you. Whether you need a pure solid or a blend of several components – we deliver the exact composition. As always, our primary focus will be on quality and safety, both in indigenous and imported products.

<b>A</b>
ACEMATT® matting agent (Evonik) **
Activated charcoals, all types
Active descaling agent
Adipic acid
AEROSIL® fumed silica (Evonik) **
Alabaster brilliant white
Aluminium chloride
Aluminium hydroxide
Aluminium silicate
Aluminium sulfate
Amidosulfonic acid
Amidosulfonic acid with anti-caking agent
Ammonium acetate
Ammonium acetate techn. cryst.
Ammonium alum
Ammonium bicarbonate (ABC-Trieb)
Ammonium bicarbonate / ammonium hydrogen powder
Ammonium bifluoride
Ammonium carbamate
Ammonium carbonate
Ammonium chloride
Ammonium dihydrogen phosphate
Ammonium hexafluorosilicate
Ammonium iron(II)sulfate
Ammonium nitrate
Ammonium oxalate cryst.
Ammonium persulfate
Ammonium phosphate
Ammonium sulfate prills
Ammonium sulfate technical
Ammonium trioxide
Antioxidants
Ascorbic acid (Vitamin C)
Axal-/ Regenit® salt tablets (ESCO)

<b>B</b>
Barium carbonate 98/99%
Barium chloride dihydrate
Bentonites
(1H-) benzotriazole
Benzoguanamine
Benzoic acid
Benzyl-2-naphthyl ether
Biotin
Bitter salt (magnesium sulfate)
Blanc fixe powder N® (barium sulfate)
Bleach activator (see TAED)
Boiler scale preventer
Bonderite®
Borax gran. / powder
Boric acid gran. powder
Boric oxide
Broxo salt

<b>C</b>
Calcium acetate, powder E 263
Calcium bromide hydrate
Calcium carbonate (lime)
Calcium caseinate
Calcium chloride
Calcium formiate
Calcium hypochlorite tabs / granulated
Calcium hypophosphite
Calcium lactate E327
Calcium-D-pantothenat
Calcium nitrate cryst. (nitrate of lime)
Calcium phosphate
Calcium stearate
Calcium sulfate
Carboxy methyl cellulose
Carnauba wax
Caroat® potassium peroxomonosulfate (Evonik)
Caustic potash flakes / prills (potassium hydroxide)
Caustic soda flakes / prills (sodium hydroxide)
Chile niter
China clay
Chloral hydrate BP98
Chloride of lime
Chromic acid
Chromium chloride
Citric acid mono., anhydrous
Cobalt nitrate
Cobalt sulfate
Complexing agents, sequestrants
Copper-II-chloride
Copper-II-nitrate-3-hydrate
Copper carbonate
Copper sulfate fine cryst. (vitriol of copper)
Corn starch n (native + modified)
Cream of tartar
Crushed castor
Cryolite / synth.
Crystallised soda

<b>D</b>
Degreasing agent
Desiccating bags
Detergents
Dextrin
Dextrose
Diammonium phosphate
Dicalcium phosphate
Diethylthiourea
Dimethyl sulfate
Dimethylolurea powder
Dipotassium hydrogen phosphate
Dipotassium phosphate

Disodium phosphate
DRESSER DRI – oil binding agent, type R3

<b>E</b>
Evaporated industrial salt, fine

<b>F</b>
Filter cartridges
Fluorosilicic acid
Fructose
Fruit acids
Fumaric acid
Fumed silicas (Evonik) **

<b>G</b>
Glauber's salt (sodium sulfate)
Guar gum
Gum arabic, ground techn.

<b>H</b>
Heavy spar EWO, barite powder F
Henkel-Surface-Tech. P3 products
Hexamethylene tetramine
Huntsman surfactants
Hydrated lime
Hydrous ferrous sulfate (iron-II-sulfate / green salt)
Hydroxylamine sulfate 99%

<b>I</b>
Industrial salts
Ion exchange resins
Iron chloride 60% granulated
Iron hydroxide
Iron oxide
Iron-II-fumarate
Iron-II-oxalate power 2-hydrate
Iron-III-nitrate
Iron-III-sulfate (iron-II-chloride)

<b>K</b>
Kieselguhr

<b>L</b>
Lactose low-germ Food Grade
Lactose, pharmaceutical gr.
Lime
Lithium bromide
Lithium chloride
Lithium citrate

<b>M</b>
Magnesium carbonate
Magnesium chloride
Magnesium fluorosilicate
Magnesium hydroxide chem. pure
Magnesium nitrate
Magnesium oxide

Magnesium stearate
Magnesium sulfate (bitter sulfate)
Magnesium sulfate anhydrous
Maize starch
Maleic acid
Maleic acid anhydride
Malic acid
Manganese dioxide
Manganese sulfate
Mannitol
Marina salt tablets
Monoammonium phosphate
Monocalcium phosphate
Monochloroacetic acid / flakes
Monoopotassium phosphate cryst. / powder
Monosodium phosphate

<b>N</b>
Natron (sodium hydrogencarbonate)
Neopentyl glycol flakes
Nickel carbonate
Nickel chloride
Nickel oxide 75/76%
Nickel sulfate

<b>O</b>
OBRA® Siogel desiccant bags
Odor absorber
Oil-Dri® oil binder and other types
Oxalic acid cryst.

<b>P</b>
P3® products (Henkel-Surface-Tech.) (Bonderite®)
PAC (polyaluminium chloride), powder
Paradichlorobenzene
Paraffin sheets, flakes, pastilles, blocks
Para-toluene sulfonic acid flakes
Pea starch
Penta 77®, Penta 99® oil binders
Phosphates
Phthalic acid anhydride (PSA)
Polyethylene glycol (PEG)
Polymers
Polypropylene glycol (PPG)
Potash (potassium carbonate)
Potash alum (potassium aluminium)
Potash niter 99/100% (potassium nitrate)
Potassium acetate
Potassium acetate chem. pure
Potassium benzoate powder anhydrous E 212
Potassium bicarbonate
Potassium bromide

**P (cont.)**

Potassium carbonate (potash)
Potassium chlorate
Potassium chloride
Potassium chromium sulfate (chrome alum)
Potassium citrate
Potassium cryolite
Potassium cyanide granulated
Potassium dichromate
Potassium ferricyanide (prussiate of potash)
Potassium ferrocyanide (yellow prussiate of potash)
Potassium fluorosilicate
Potassium hydrogencarbonate
Potassium iodide Ph. Eur., BP, USP
Potassium metabisulfite
Potassium nitrate (potash niter)
Potassium permanganate
Potassium peroxomonosulfate
Potassium persulfate
Potassium phosphate
Potassium sodium cumene sulfonate, powder / pellets
Potassium sorbate gran. / powder
Potassium sulfate
Potassium tetrafluoroborate powder
Potassium tripolyphosphate
Potato starches (Emsland Stärke) *** (native + modified)
Precipitation silicic acids (Evonik) **
Pumice powder

**Q**

Quality detergent RAWA®
Quartz sand

**R**

Refined sugar, fine
Regenerating slates
Regent® Compact salt

Regesal® tablet salt
Rice starch
Road salt
Rock dusts
Rock salts
Roferose®

**S**

Saccharin
Saccharose
Sachtolith® types
Sal ammoniac fine white
Salicylic acid
Salt of sorrel
Salt tablets acc. to DIN 19604, diff. brands
Silicic acids (Evonik) **
SIPERNAT® precipitation salicic acids (Evonik) **
Soda ash, heavy
Soda ash, light
Sodium acetate chem. / techn. / anhydrous
Sodium aluminate
Sodium ascorbate USP/DAB-E301
Sodium benzoate
Sodium bicarbonate Ph. Eur., techn. (sodium hydrogencarbonate)
Sodium bisulfate
Sodium bisulfite / sodium pyrosulfite
Sodium bromide ultrapure
Sodium carbonate chem.
Sodium carbonate light / heavy
Sodium carbonate techn. (washing soda)
Sodium chlorate 98/100%
Sodium chloride
Sodium chlorite 300 W
Sodium cumol sulfonate
Sodium diacetate
Sodium dichromate fine cryst.

Sodium difluoride
Sodium dithionite (sodium hydrosulfite)
Sodium fluoride
Sodium formiate
Sodium gluconate
Sodium glutamate
Sodium hexametaphosphate
Sodium huminate
Sodium hydrogen difluoride
Sodium hypophosphite
Sodium metabisulfite / sodium disulfite
Sodium metasilicate, anhydrous, 5-hydrate
Sodium nitrate
Sodium nitrite
Sodium perborate - monohydrate, tetrahydrate
Sodium percarbonate
Sodium persulfate
Sodium phosphate
Sodium sulfate (Glauber's salt)
Sodium sulfide (sodium sulfuret)
Sodium sulfide flakes
Sodium sulfite anhydrous 47/49
Sodium thiosulfate (fixing salt)
Sodium tripolyphosphate
Sorbic acid
Stearic acids
Strontium carbonate
Sulfur powdered
Surfactants

**T**

Table salt
TAED, blue / white / green
Talc
Tapioca starch
Tartaric acid
Tetrapotassium phosphate
Tetrasodium pyrophosphate

Thawing sale
Thiourea
Tin-II-sulfate cryst. techn.
Titanium dioxide
Tricalcium citrate
Tricalcium phosphate
Tripotassium citrate
Tripotassium phosphate
Trisodium citrate
Trisodium phosphate cryst., powder

**U**

Urea
Urea nitrate
Urea, pure A

**V**

Versene® powder (Dow)
Vienna polishing chalk
Vitamin C

**W**

Wheat starch
Winter grit
Wisprofloc®

**X**

Xanthene 80 Mesh
------------------

**Y**

Yellow prussiate of potash (potassium ferricyanide / potassium ferrocyanide)
------------------------------------------------------------------------------

**Z**

Zetag® polymers (BASF)
Zinc acetate
Zinc chloride
Zinc oxide
Zinc stearate
Zinc sulfate (white vitriol)
Zinc white

## Your benefits at a glance

### Facts and figures that convince

Take advantage of the combination of a wide product range, first-class quality, extensive know-how of the industry and a unique service.

- With 25 locations and sales offices in Germany, the STOCKMEIER Group is never far away from its customers.
- A workforce of over 1,330 generates the success of the company; training and further education are provided on an ongoing basis.
- More than 90 field staff experts are available for direct contact with our customers.
- 30,000 satisfied customers are supplied with goods by the STOCKMEIER Group.
- Over 26,000 products are distributed or produced by the STOCKMEIER Group.
- 400 tanks and totally 120 trucks ensure that your orders are always shipped and delivered to your destination in time.

Use our wide range, extensive know-how and full-area distribution network – our solutions are fit for the future.

## Specialty chemicals Special products for special applications

Sales of specialty chemicals have been optimized and intensified very much during the last few years.

Reliable quality and individual consultation are the basis on which we provide custom solutions for your application. We have a competent team of application engineers and sales specialists to assist you in finding a suitable solution and delivering the best products for it to you.

As partner of different innovative producers with global activities, we offer a product portfolio from powerful surfactants, silicones, dyes and aromas, to fatty acids and esters for different industries and applications. Take advantage of this wide array of products and our extensive know-how. We look forward to your inquiry.

## Water treatment Strong bonds for clear water

Water treatment, operational safety and hygiene have become ever more important in recent years. The STOCKMEIER Group has always considered this to be self-evident.

STOCKMEIER has the optimum solution for every problem. We assist you from the first to the last step of your process. Our application engineers are highly experienced and flexible so that we can react quickly to changing conditions and come up with customized solutions or even suggest alternative products. We invariably focus on high quality and delivery in time.

We develop solutions for boiler conditioning, municipal and industrial waste water treatment, sludge treatment and many other fields in the laboratory. In this process, we not only coordinate any requirement profile with our suppliers, we also develop special methods.

We will not leave you in the lurch once we have delivered the products. Constant controls, documentation of results and optimization of your system are not only important to us, they are matters of course.

## Precipitation and flocculation

<b>Aluminium salts</b> (solutions, granular products and powders of different concentrations and grain sizes)
– Aluminium chlorides
– Aluminium nitrates
– Aluminium sulfates
– Sodium aluminates
– Polyaluminium chlorides
<b>Iron salts</b> (bivalent and trivalent solid or liquid iron salts, different concentrations)
– Iron sulfates
– Iron chlorides
<b>Metal salt blends</b>
– Different combination precipitants with different modifications of the aluminium and iron contents as well as polymeric active substance components
<b>Polymeric flocculation aids</b>
– Cationic emulsions and granulates on the basis of polyacrylamide
– Anionic emulsions and granulates on the basis of polyacrylamide
– Polyamines, PolyDADMACs
– Biologically degradable polymers based on vegetable materials
<b>Complexing and emulsion separating agents</b>
– Heavy metal precipitants, e.g., trimercapto-s-triazine & thiocarbamates
– Separating powders

## External carbon sources

<b>Organic carbon carriers for denitrification</b>
– Glycerol, different grades and concentrations
– Glycols, e.g., monoethylene glycol
– Methanol
– Special blended products with higher active substance concentrations and optimized biological availability
<b>Inorganic carbon carriers for denitrification</b>
– Acetic acid, different grades and concentrations

## Lime products

Calcium oxide and calcium hydroxide, solid
Lime milk, different concentrations
Chalk

## Water conditioning

Antiscalants, to prevent inorganic and mineral deposits
Disinfection products, with or without chlorine
Defoaming agents, with or without silicone
Ion exchange resins
Salt tablets for water softening (acc. to DIN/Euronorm)

## Filtration additives

Activated charcoal, different grain sizes (granulate, extrudate and powder)
Filter anthracite
Filtering charcoal
Filtration gravels; Juraperle/marble gravel/dolomite/quartz filtration gravels

## Industrial and process water treatment

<b>Boiler chemistry, steam production, cooling water, district heating, drinking water, autoclaves</b>
– Corrosion protection agents
– Anti-scaling agents
– Oxygen binders
– Biocides
– Hardness stabilizers

We would be glad to give you more information  
about our products or fix a date with you.  
Please contact us.

# Swimming pool chemicals

We have a range of high-purity chlorine and chlorine products and tested swimming pool cleaners, provide conceptual advice and will discuss all questions of flocculation and filtering with you.

## Disinfection

Chlorine, ultrapure 99.8% according to EuroNorm 937
Chlorine bleaching solution (soda bleaching solution / sodium hypochlorite solution / Stobipool available chlorine content EN 901)
Chlorine tablets and chlorine granulates, organic/inorganic, different package sizes.

## Flocculation

Aluminium hydroxide chloride acc. to EN 881 – StobiKlar series
Polyaluminium hydroxide chloride acc. to EN 883 – StobiKlar series
Polyaluminium hydroxide chloride sulfate acc. to EN 883-Flock Delta and Flock Ultra

## pH control

pH reducer acc. to DIN 19643/EN899, liquid/solid, sulfuric acids diff. concentrations, hydrochloric acid acc. to EN 939
PH-Plus, liquid or solid acc. to EN 896
Special solids such as soda, Na.bicarbonate, Na.thiosulfats and Na.bisulfate

## Cleaners, etc.

Cleaners, also RK listed (basic and maintenance cleaners, acid, alkaline and neutral cleaners, special cleaners)

## Services

Our service is pure value-added for your business

Our customers have taken advantage of our comprehensive service package for decades of years.

In addition to a comprehensive range of quality products, we offer professional advice and application technology for your industry in all segments such as toll manufacturing and order blends. We provide assistance in analytical work and documentation. We dispose of used solvents on request. Even purchasing functions and the logistic link-up to available route schedules are part of our daily business. Add to this the certified service and production according to ISO 9001, VDA 6.1 and ESAD 2, for example, providing advisory service for special tank construction and different financing models. Of course, we also develop an individual solution for you – just contact us.

### Product related services

Blanket coverage security of supply from warehouses and cooperation partners in Germany and Europe
Competent documentation
Formulation of new products according to customer specifications
Provision of commercial and application specific advice at the customer's place
Preliminary tests in the factory and the laboratory
Toll manufacturing
Toll filling of large and small units
Chlorine emergency vessel, professional advice for swimming pool chemicals

### Laboratory & analytical services

Gas chromatography
UV / VIS
Specific density
pH value
Conductivity
Water content
Potentiometric titration
Hazen color unit
Distillation
Sieve analysis
Other analytical work (wet chemical)

### Other services

Shipments with own logistics or specialized shippers
Stocking of about 9,000 different raw materials
Temporary warehousing for customers, warehousing concepts
Labeling / labeling for customers
Advisory services for plant construction / troughs / racks / tank sites / payback concepts
Advisory services for use of chemicals, practical tests
Advisory services under the chemicals legislation
Safety training and seminars
KSB – Customer service area on the web
Quality management / assistance with certifications
Return of used solvents and reliable recycling of solvents (RCN)

### Other activities and business areas

STOCKMEIER Chemie Dpt. Autochemie	→ Vehicle cleaning and care
STOCKMEIER Chemie Dpt. Oberfläche	→ Metal preparation and cleaning
STOCKMEIER Chemie Dpt. Ernährungs- und Getränkeindustrie	→ Cleaners and disinfection agents for the food industry
STOCKMEIER Chemie Dpt. Papier / KAPP-CHEMIE	→ Special products for the paper industry

## Cleaners

Many decades of experience and a comprehensive product range make STOCKMEIER Chemie a strong partner for your business also in matters of cleaning and disinfection.

Our focus is on the following industries:

- Cleaners and disinfection agents for the food and beverage industry
- Cleaners and degreasers for the metal-working industry
- Cleaners and care agents for the whole automotive sector
- Cleaners and special products for the aircraft industry
