What do you throw out when you need it and take in when you don't need it? An anchor.

Match the words with the clues provided. Once the match is made, the number of the correct clue is placed in the proper space of the square that is marked by the letter of the matching word. If the words and clues are matched correctly, the magic square columns, rows, and diagonals, will add up to the same number.

What is a bow that is impossible to tie? A rainbow.

Numbered clues appear below the spiral grid. Determine the word that matches the clue, and write that word in the spiral puzzle. The word does not overlap with the next word (marked by the next number) and it must be written in the correct direction (from a lower numbered space to a higher numbered space).
