I. Introduction

The Sprint Cloud Binder app is available for Android phones/tablets and iPhones/iPads. Sprint Cloud Binder is an app that allows people to connect cloud storage accounts and view/access their content.

1. Understanding the User Manual

➤ *The user manual main sections are described below:*

The User Manual sections:

- **Launch the Sprint Cloud Binder** explains how the user accesses and launches the app.
- The **Get Started** section explains how to set up a Sprint Cloud Binder user account. How to add a cloud drive account to the app and how to sign into multiple mobile devices with your user account.
- The **Home Screen** section explains the Home screen functions.
- The **Top Bar: Options** section explains the main navigation options on the Home screen and other main screens.
- The **Photos** section explains all functionality available on the Photos section.
- The **Videos** section explains all functionality available on the Videos section.
- The **Music** section explains all functionality available on the Music section.
- The **Documents** section explains all functionality available on the Documents section.
- The **Favorites** section explains all functionality available on the Favorites section.
- The **Folders** section explains all functionality available on the Folders section.
- The **Menu Options** section explains all additional functionality available on the app.
- The **Additional Functions** section explains how to use the search feature and details about upload/download notifications.
- The **Settings** section explains all functionality available for the user settings.
- The **Advertisements** section explains the appearance of ads.
- The **High Level Differences Between Operating Systems** explains differences between operating systems that affect functionality in Sprint Cloud Binder.

2. System Requirements

➤ *This section displays the system requirements for running the mobile Android and iOS apps.*

- Android handsets and tablets with Android 4.2 and above
- iPhones and iPads with iOS 8.0 and above

3. Supported Cloud Drives

➤ *This section lists the supported Cloud drives on the mobile apps.*

- Google Drive
- OneDrive
- Dropbox
- Box
- Amazon Cloud Drive
- MediaFire
- SugarSync
- My Device (local device)

II. Launch the Sprint Cloud Binder App

- *This section explains how to access, install and launch the Sprint Cloud Binder the first time via the VPL app.*

On Android devices, the Sprint Cloud Binder app is pre-loaded onto many Sprint devices and the app icon appears on the mobile phone in the app tray. If your device does not have the Sprint Cloud Binder app pre-loaded, you can open the Play Store app and install the Sprint Cloud Binder app from the store.

If your device is an iPhone or iPad, you can open the Apple App Store and install the Sprint Cloud Binder app from the App Store.

1. Tap the **Sprint Cloud Binder** app icon.
2. An introductory screen appears with a button to install the app.
3. Tap the button.
4. On Android devices: The phone will open the Google Play Store application.
On iOS devices: The phone will open the Apple App Store application.
5. Search the store for 'Sprint Cloud Binder'.
6. Install or update the application.
7. When the installation is complete the **Sprint Cloud Binder** app icon will appear in the list of apps on your mobile device home screen or apps tray.

You are now ready to begin using the Sprint Cloud Binder app.

III. Get Started

1. Initial Setup Wizard

➤ *This section explains the screens seen the first time when entering the app.*

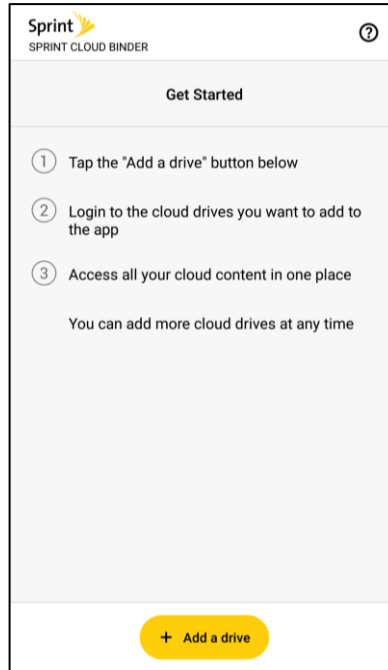

When the app is installed for the first time, the tutorial screens appear. You are then prompted to select your cloud drive(s).

1. Launch the **Sprint Cloud Binder** app.
2. Scroll through the app's tutorial and tap **Skip** or **Get Started/Continue**.

Tutorial Screen

3. Tap **Agree and continue** on the EULA acceptance screen to continue. If **Decline** is selected, the app automatically closes. **Agree and continue** must be selected in order to continue the initial setup.

Get Started description screen

2. Add/Remove a Cloud Drive

➤ This section explains how to add or remove a cloud drive account to the app.

Adding or removing a cloud drive account to the app requires that you follow the steps below. Multiple accounts from each supported cloud drive service can be added to the **Sprint Cloud Binder** app.

ADD A CLOUD DRIVE

1. Tap **Add a drive**.

a. On first time app launch:

+ Add a drive

Tap the **Add a drive** button on the **Get Started** screen.

b. On regular app launch:

My Drives

Tap the **My Drives** button from the **Home** screen and tap the **Add a drive** button.

2. The **Add a Cloud Drive** screen opens showing the list of cloud drives.

Tap on one of the cloud drives in the list.

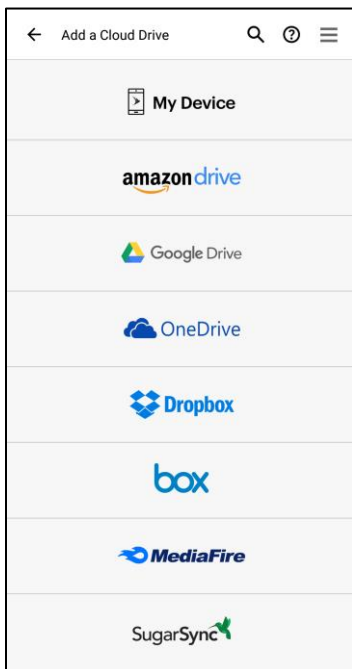

3. The **Add Account** screen appears.

Note: On the iOS Cloud Drives and Android Amazon Drive only this screen does not appear.

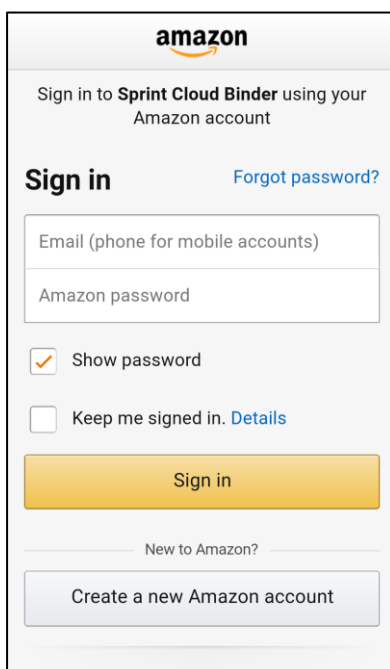

a. Tap **Existing** and follow the prompts to sign in to an existing account.

b. Tap **New** and follow the prompts to create a new account.

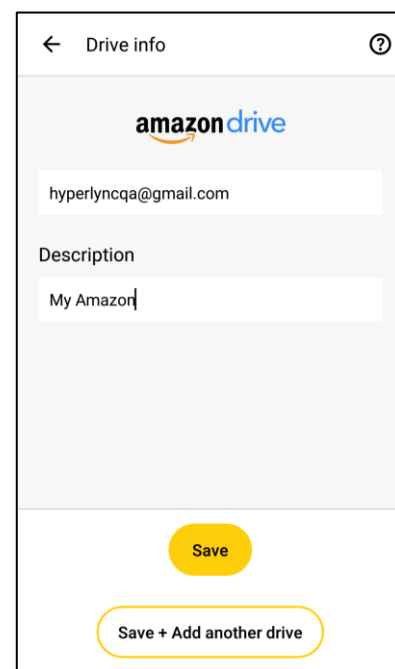

4. After signing in to the selected drive successfully, the **Drive Info** screen appears displaying the free space indicator, account name and account description. Tap to edit account **Description** field.
 - a. Tap **Save** to add the selected cloud drive to the app. The **Home** screen then appears.
 - b. Tap **Save + Add another drive** to add the selected cloud drive to the app and return to the **Add a Cloud drive** screen.
5. After selecting **Save**, the next screen that appears is the **Home** screen.

Android: Add a Drive screen

Android: Sign in/create account

Android: Drive Info

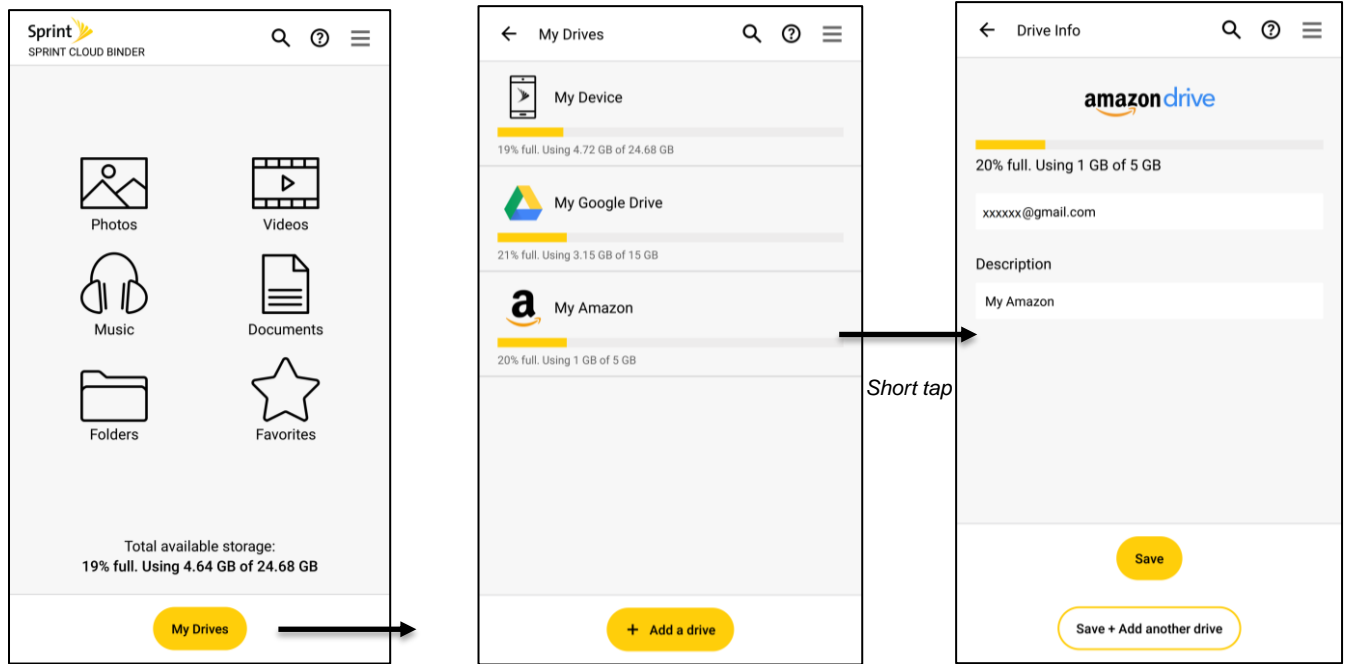

EDIT OR REMOVE A CLOUD DRIVE

After adding a drive or additional drives to the Sprint Cloud Binder, the list of drives can be seen in the **My Drives** screen. Each drive can be edited or removed.

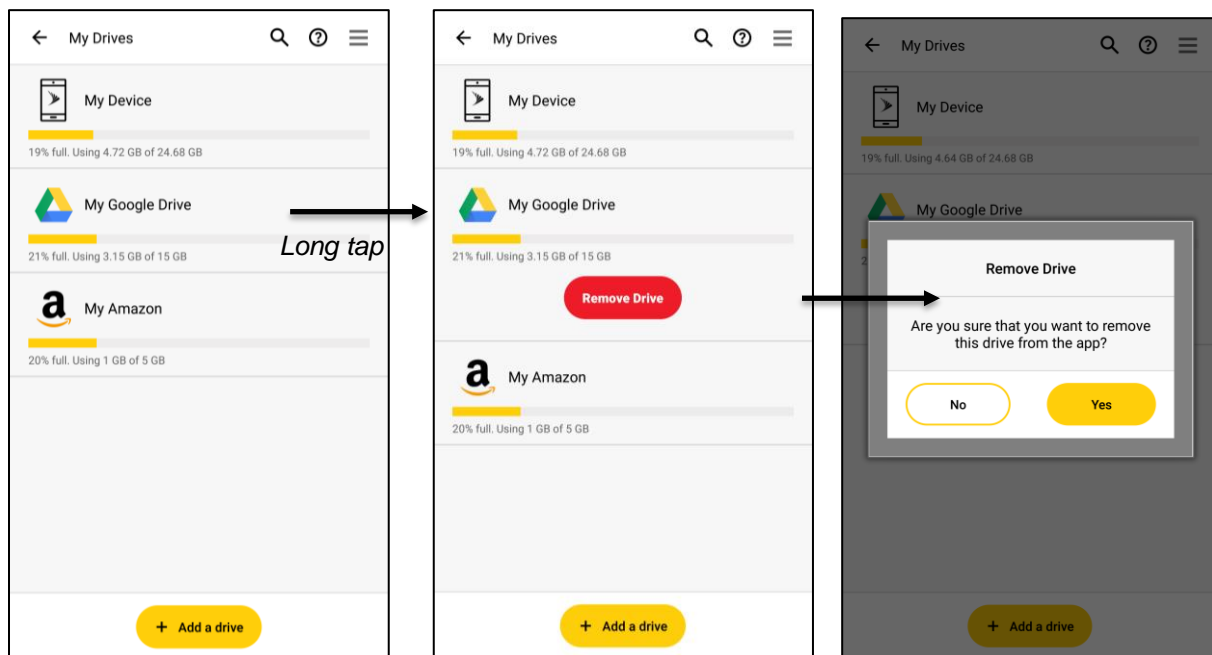

1. From the **Home** screen tap **My Drives**.

2. The **My Drives** screen opens.
 - a. Short tap on a cloud drive in the list to open the **Drive Info** screen.
Short tap on a cloud drive and the details of the drive account are displayed. The account description can be edited by tapping in the **Description** field. Tap **Save** to save any changes made and return to the **My Drives** screen.
 - b. From the **My Drives** screen, you can select and account to remove it from the app. Long tap (Android) or swipe left (iOS) on a cloud drive. The **Remove Drive** option appears. Tap on **Remove Drive**. Two options appear – YES, NO.
 - Tap **YES** to remove the selected drive.
On Android: A window appears with the confirmation that the drive has been removed successfully. Tap **OK**.
 - Tap **NO** to exit the window without removing the selected cloud drive.

Android: Home screen > Android: My Drives screen - Short Tap > Android: Drive Info

Android: My Drives screen - Long Tap > Android: Remove Drive > Android: Remove Drive confirmation

TOP BAR: OPTIONS

The following options appear on the top bar of the **My Drives** and **Add a Cloud Drive** screens:

← **BACK:**

Once you have added your desired Cloud Drives, tapping the **Back** button from the **Add a Cloud Drive** and **Drive Info** screens goes to the **Home** screen.

Note: on iOS, tapping the **Back** button from the **Drive Info** screen returns you to the **My Drives** screen.

MENU:

Tap the **Menu** icon to open the following list of options:

- **Upload:** Tap **Upload** to select a file or files to upload then select the Cloud Drive (as per the list of cloud drives you have already added) to upload it to.
- **Settings:** Tap **Settings** to open the **Settings** screen with the list of app settings. See the 'Settings' section for more information.

ⓘ **HELP:**

Tap the **Help** icon to open and the online help.

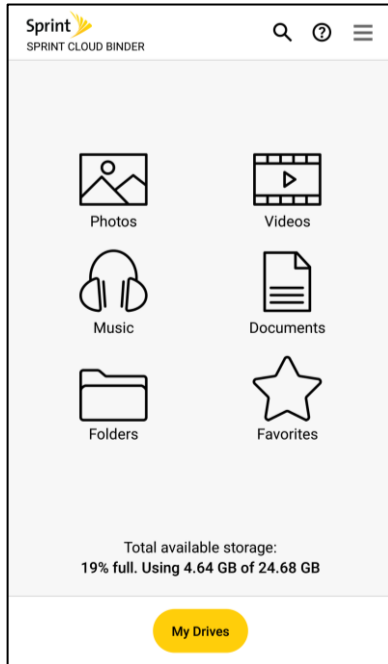

SEARCH:

Tap the **Search** icon to open the search field.

IV. Home Screen

➤ *This section explains the Home screen functions.*

The **Home** screen is the entry point into all the main functions of the app.

Home screen

Photos:

Tap **Photos** to view a combined list of the photos on all added cloud drive accounts and to use all the functions available for photos.

Music:

Tap **Music** to view a combined list of the music on all added cloud drive accounts and to use all the functions available for music.

Videos:

Tap **Videos** to view a combined list of the videos on all added cloud drive accounts and to use all the functions available for videos.

Documents:

Tap **Documents** to view a combined list of the documents on all added cloud drive accounts and to use all the functions available for documents.

Folders:

Tap **Folders** to view the folders and files on all added cloud drive accounts and to use all the functions available for folders and files.

Favorites:

Tap **Favorites** to view the combined list of your photos, music, videos and documents that have been designated as “favorite files”. A file designated as a favorite file will be stored locally and appear in the **Favorites** view. A Favorites icon will also appear on that file in all other media views. Tap **Favorites** to see the combined list of favorite files in the cloud drive accounts and to use all the functions available for them.

Total Available Storage:

The total available storage is displayed. This shows the combined total available and used space of all of the cloud drive accounts that are currently signed into the app.

TOP BAR: OPTIONS

Menu:

Tap the **Menu** icon to open the following list of options:

- **Refresh Content:** Tap **Refresh Content** to refresh the screen information.
- **Settings:** Tap **Settings** to open the **Settings** screen with the list of app settings. See the ‘Settings’ section for more information.

Help:

Tap the **Help** icon to open and the online help.

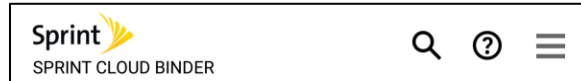

Search:

Tap the **Search** icon to open the search field.

V. Top Bar: Options

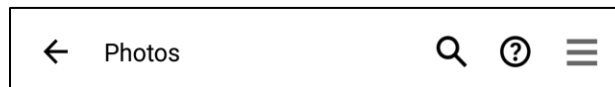

➤ This section explains the options on the top bar of the Home screen and other main screens.

1. Home Screen

-  **Menu:** Tap to open the list of the app's menu options.
-  **Help:** Tap to open and the online Help.
-  **Search:** Tap to open the search field.

2. Photos, Music, Videos, Documents, Folders, Favorites, My Drives, Drive Info

-  **Menu:** Tap to open the list of the app's menu options.
-  **Help:** Tap to open and the online Help.
-  **Search:** Tap to open the search field.
-  **Back:** Tap back to return to the previous screen.

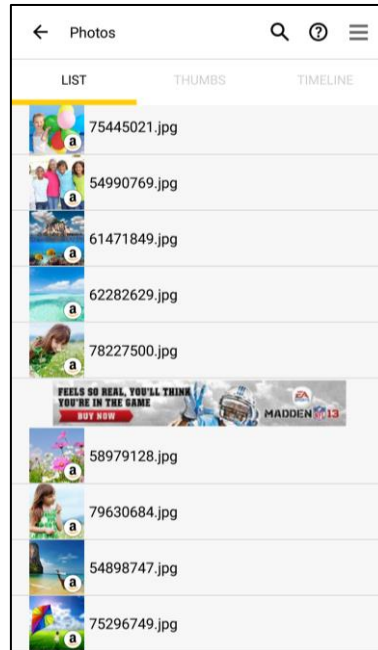

VI. Photos

➤ This section explains all functionality available when accessing the **Photos** content.

Select one of the photo views to see the combined list of photos on the connected cloud drive accounts including your mobile device. The **Thumbs** view appears by default.

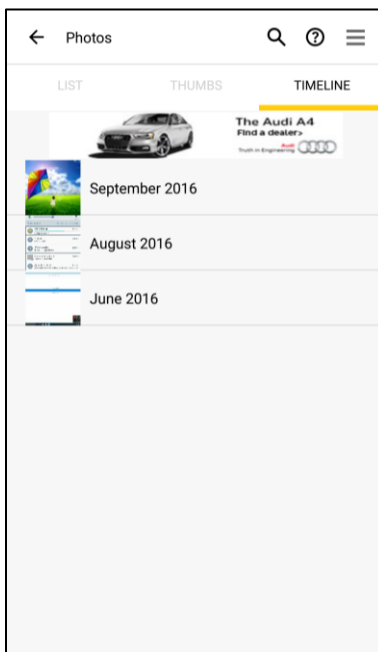

Android: Thumbs view

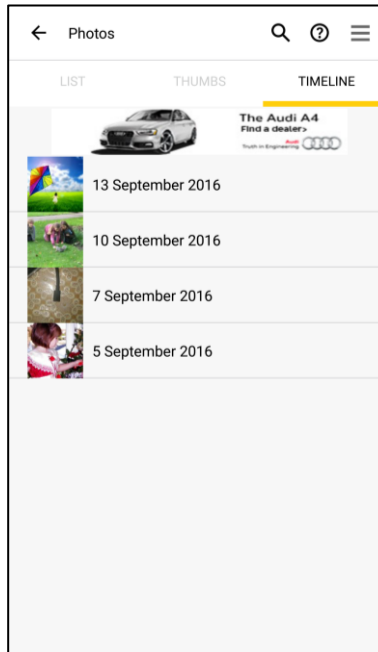

Android: List view

Android: Timeline view (Year)

Android: Timeline view (Months)

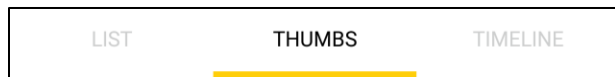

Android: Timeline view (Days)

Android: Timeline view (Selected Day)

1. Photos Views: List View, Thumbs View & Timeline View

➤ This section explains about the main **Photos** views.

Android: Photos View Tabs

Tap **Photos** on the **Home** screen. The **Photos** screen with the following view options appears.

LIST VIEW

Tap the **List** tab on the **Photos** screen to view a list of the photos on the connected cloud drive accounts. Each file appears with the file name and thumbnail.

THUMBS VIEW

Tap the **Thumbs** tab on the **Photos** screen to view thumbnail images of the photos on your cloud drive accounts.

Note: After tapping **Photos** from the Home screen, the Thumbs view appears by default.

TIMELINE VIEW

Tap the **Timeline** tab on the **Photos** screen to navigate through the photos in your cloud drive accounts sorted by years, months or days, based on the date the file was created on the cloud.

VIEWING OPTIONS:

-  **Cloud Drive File Source:**
Each file appears with a small icon indicating its cloud drive source.
- **Filter by drive:**
Select the **Filter by drive** menu option and then choose the options you want from the cloud drives list. Only the files on the selected drives will display on the screen. This filter will reset automatically when you leave the Photo view screen and return to the **Home** screen.
- **Sort by:**
Select the **Sort by** menu option (not available on the Timeline view) and then choose to sort by file name, date or file type. The files will display sorted by file name, date or file type. This filter will reset automatically when you leave the Video view and return to the Home screen.
- **Refresh Content:**
Select the **Refresh Content** menu option to refresh the content being viewed.
- **Full Size View:**
Tap on a photo to view it in **Full Size** view.

2. Photos: Full Size View

➤ *This section explains about the Photos Full Size view.*

1. Tap **Photos** on the **Home** screen.
2. Tap the **List**, **Thumbs** or **Timeline** tab.
3. Tap on a photo to select and view it in **Full Size** view.
4. Tap or pinch to Zoom In or Zoom Out of the photo.
5. Scroll right or left to view the next or previous photo in the list.
6. The bottom bar displays a list of the photo options (for more information see the 'Photo Options' section).
7. Tap **Back** to exit the **Full Size** view and return to the previous screen.

Android: Photos - Full Size view

3. Selection Mode: Select Files

Open the selection mode to select multiple files.

1. On Android: Long tap on one file to select that file and open the selection mode. Tap on other files to select additional files. Each selected file appears with a check mark. The number of selected files appears on the top of the screen. Tap '**X**' to deselect the files and exit the selection mode.
2. On iOS: Tap the **Select** menu option to open the selection mode and select multiple files. The number of selected files appears on the top of the screen. Tap **Cancel** to exit the selection mode
3. The bottom bar displays a list of the photo options (for more information see the 'Photo Options' section).

4. Photo Options

➤ This section lists the options available for photos.

The photo options appear on the bottom bar in the **Selection Mode** or in the **Full Size** view.

DELETE

Delete file(s).

1. Select file(s) from your cloud drives.
2. Select the **Delete** option (not available for local My Device files).
3. Confirm deletion.'

DOWNLOAD

Download photos from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
2. Select the **Download** option (not available for local My Device files).
3. The file(s) are downloaded to your mobile device.

MOVE

Move the selected photo(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option (not available for local My Device files).
3. Select a cloud drive to move the selected file(s) to it.
4. The file(s) are moved to the selected location.

COPY

Copy photos between cloud drives.

1. Select file(s) from your cloud drives.
2. Select the **Copy** option and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share photos using the supported services.

1. Select file(s) from your cloud drives.

2. Select the **Share** option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s) with one of the supported services.

RENAME

Rename a photo on the source drive.

1. Select the file you want.
2. Select the **Rename** option (not available for local My Device files), enter a new file name and tap **Update/OK**.

ADD TO FAVORITES

Select file(s) to add to your list of favorite files.

1. Select file(s) from your cloud drives.
2. Select the **Favorite** option. The file appears with a small star icon indicating that it's a favorite file.
3. Go to the **Favorites** mode to see the List View and Thumbs view of all your favorite files (for more info see the **Favorites** section).

REMOVE FROM FAVORITES

Select file(s) to remove from your list of favorite files.

1. Select the favorite file(s) you want to remove from the **Favorites** view.
2. Select the **Remove from favorites** option. This option appears when selecting the file(s) with a small star indicating it as a labelled favorite file.
3. This will only remove the file from the **Favorites** view and will not actually delete the file. The file will remain in the source location as it did before.

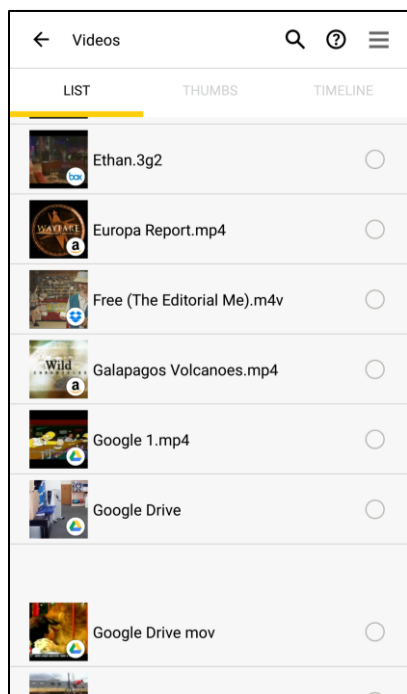

See also:

- **Upload:** in the **Menu Options** section.
- **Search:** in the **Additional Functions** section.

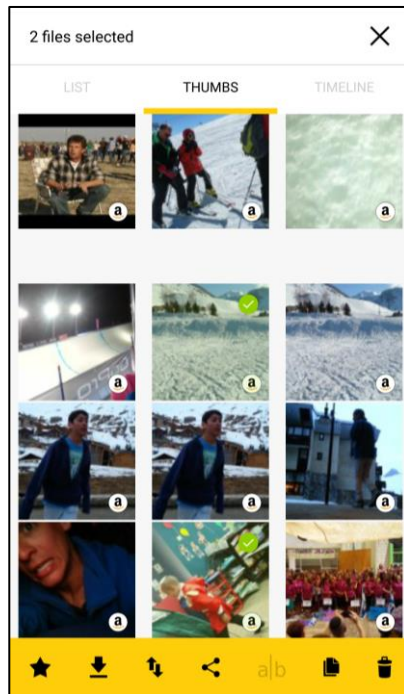

VII. Videos

➤ This section explains all functionality available when accessing the **Videos** content.

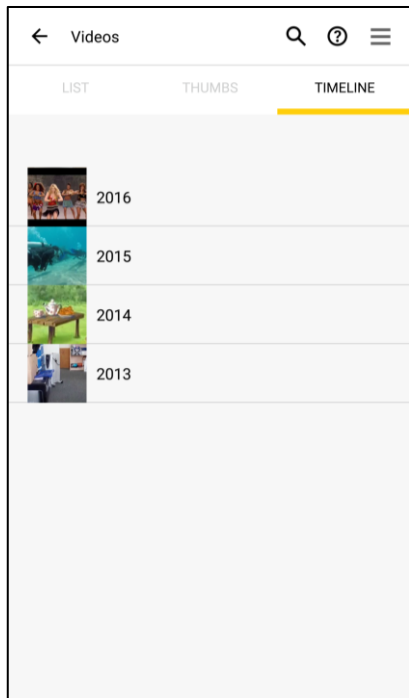

Select one of the video views to see the combined list of videos on the connected cloud drive accounts including your mobile device. The **List** view appears by default.

Android: List view

Android: Thumbs view

Android: Timeline view

1. Videos Views: List view, Thumbs View & Timeline

➤ This section explains about the main **Videos** views.

Android: Videos View Tabs

Tap **Videos** on the **Home** screen. The **Videos** screen with the following view options appears.

LIST VIEW:

Tap the **List** tab on the **Videos** screen to view a list of the videos on the connected cloud drive accounts. Each file appears with the file name and thumbnail.

Note: After tapping **Videos** from the **Home** screen, the List view appears by default.

THUMBS VIEW:

Tap the **Thumbs** tab on the **Videos** screen to view thumbnails of the videos on your cloud drive accounts.

TIMELINE VIEW:

Tap the **Timeline** tab on the **Videos** screen to navigate through the videos in your cloud drive accounts sorted by years, months or days, based on the date the file was created on the cloud.

VIEWING OPTIONS:

-  **Cloud Drive File Source:**
Each file appears with a small icon indicating its cloud drive source.
- **Filter by drive:**
Select the **Filter by drive** menu option and then choose the options you want from the cloud drives list. Only the files on the selected drives will display on the screen. This filter will reset automatically when you leave the **Videos** view screen and return to the **Home** screen.
- **Sort by:**
Select the **Sort by** menu option (not available on the Timeline view) and then choose to sort by file name, date or file type. The files will display sorted by file name, date or file type. This filter will reset automatically when you leave the **Video** view and return to the **Home** screen.
- **Refresh Content:**
Select the **Refresh Content** menu option to refresh the content being viewed.
- **Full Size View:**
Tap on a video to view it in **Full Size** view.

2. Play Videos

➤ *This section explains how to play a video.*

Tap on a video in one of the views to play it in **Full Size** view. The video begins to download for local playback. The default player will play the file. If there is no default player, a prompt appears to select a player.

1. On Android: Tap on a video to download it for playback. If prompted, choose an app to play it in full size. Use playback controls to play the video. When the video ends the app returns to the previous view.
2. On iOS: Tap on a video to download it for playback. When the  **Download** icon changes to the  **Play** icon tap again to play it in full size. Use playback controls to play the video. When the video ends the app returns to the previous view.

3. Selection Mode: Select Files

Open the selection mode to select multiple files.

1. On Android: Long tap on one file to select that file and open the selection mode. Tap on other files to select additional files. Each selected file appears with a check mark. The number of selected files appears on the top of the screen. Tap 'X' to deselect the files and exit the selection mode.

2. On iOS: Tap the **Select** menu option to open the selection mode and select multiple files. The number of selected files appears on the top of the screen. Tap **Cancel** to exit the selection mode.
3. The bottom bar displays a list of the video options (for more information see the ‘Video Options’ section).

4. Video Options

➤ *This section lists all the options available for videos.*

The video options appear on the bottom bar in the **Selection Mode**.

DELETE

Delete file(s).

1. Select file(s) from your cloud drives.
2. Select the **Delete** option to delete the files (not available for local My Device files).
3. Confirm deletion.

DOWNLOAD

Download videos from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
2. Select the **Download** option (not available for local My Device files).
3. The file(s) are downloaded to your mobile device.

MOVE

Move the selected video(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option (not available for local My Device files).
3. Select a cloud drive to move the selected file(s) to it.
4. The file(s) are moved to the selected location.

COPY

Copy videos from one cloud drive to another.

1. Select the file(s) you want.
2. Select the **Copy** option and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share videos using the supported services.

1. Select the file(s) you want.
2. Select the **Share** option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s) with one of the supported services.

RENAME

Rename a video on the source cloud drive.

1. Select the file you want.
2. Select the **Rename** option (not available for local My Device files), enter a new file name and tap **Update/OK**.

ADD TO FAVORITES

Select file(s) to add to your list of favorite files.

1. Select the file(s) you want.
2. Select the **Favorite** option. The file appears with a small star icon indicating that it's a favorite file.
3. Go to the **Favorites** mode to see the List View and Thumbs view of all your favorite files (for more info see the **Favorites** section).

REMOVE FROM FAVORITES

Select file(s) to remove from your list of favorite files.

1. Select the favorite file(s) you want to remove from the **Favorites** view.
2. Select the **Remove from favorites** option. This option appears when selecting the file(s) with a small star indicating it as a labelled favorite file.
3. This will only remove the file from the **Favorites** view and will not actually delete the file. The file will remain in the source location as it did before.

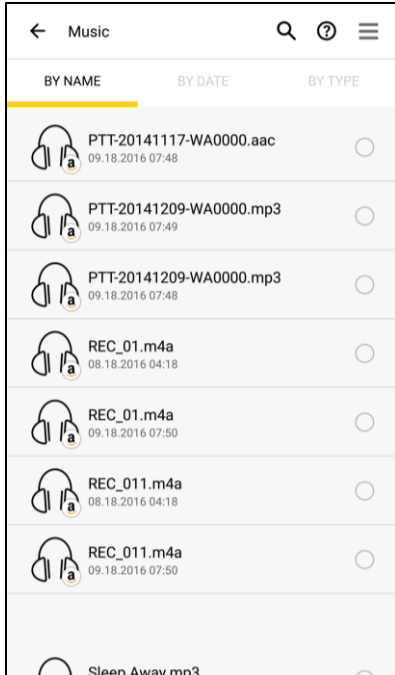

See also:

- **Upload:** in the **Menu Options** section.
- **Search:** in the **Additional Functions** section.

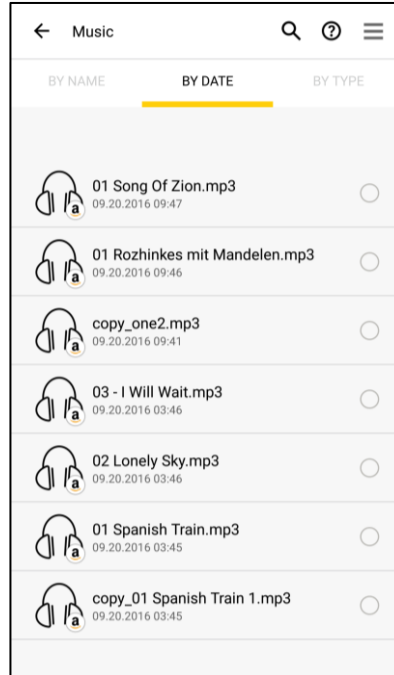

VIII. Music

➤ This section explains all functionality available when accessing the Music content.

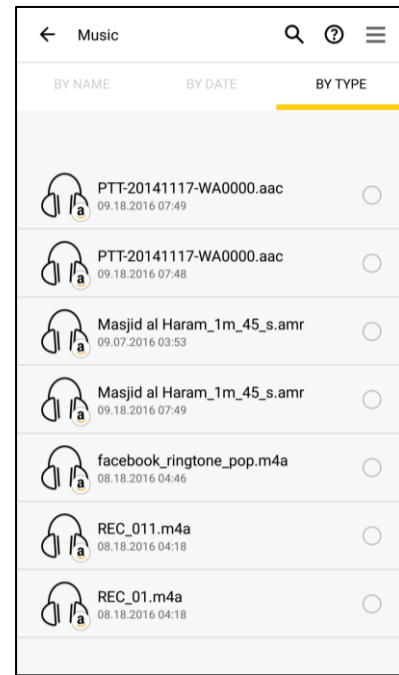

Select one of the music views to see a combined list of songs on the connected cloud drive accounts including your mobile device. The **By Name** view appears by default.

Android: By Name view

Android: By Date view

Android: By Type view

1. Music Views: By Name, By Date & By Type

➤ This section explains about the main **Music** views.

Android: Music View Tabs

Tap **Music** on the **Home** screen. The **Music** screen with the following view options appears.

BY NAME VIEW

Tap the **By Name** tab on the **Music** screen to view a list of the music sorted by file name on your cloud drive accounts. Each file appears with the file name, file type and date.

Note: After tapping **Music** from the Home screen, the **By Name** view appears by default.

BY DATE VIEW

Tap the **By Date** tab on the **Music** screen to view a list of the music sorted by date on your cloud drive accounts. Each file appears with the file name and date.

BY TYPE VIEW

Tap the **By Type** tab on the **Music** screen to view a list of the music sorted by file type on your cloud drive accounts. Each file appears with the file name and date.

VIEWING OPTIONS:

-  **Cloud Drive File Source:**
Each file appears with a small icon indicating its cloud drive source.
- **Filter by drive:**
Select the **Filter by drive** menu option and then choose the options you want from the cloud drives list. Only the files on the selected drives will display on the screen. This filter will reset automatically when you leave the Music view screen and return to the **Home** screen.
- **Refresh Content:**
Select **Refresh Content** to refresh the content being viewed.

2. Play Music

➤ *This section explains how to play music.*

Tap on a song in one of the views to play it. The song begins to download for local playback.

1. **On Android:** Tap on a song to download for playback. If prompted, choose an app to play the song. Use music controls to play the song. Tap **Back** to return to the previous view.
2. **On iOS:** Tap on a song to download for playback. When the  **Download** icon changes to the  **Play** icon tap again to play it. Tap the  **Stop** button to stop playing the song. Tap **Back** to return to the previous view.

3. Selection Mode: Select Files

Open the selection mode to select multiple files.

1. **On Android:** Long tap on one file to select that file and open the selection mode. Tap on other files to select additional files. Each selected file appears with a check mark. The number of selected files appears on the top of the screen. Tap **'X'** to deselect the files and exit the selection mode.
2. **On iOS:** Tap the **Select** menu option to open the selection mode and select multiple files. The number of selected files appears on the top of the screen. Tap **Cancel** to exit the selection mode.
3. The bottom bar displays a list of the music options (for more information see the 'Music Options' section).

4. Music Options

➤ This section lists all the options available for music.

The music options appear on the bottom bar in the **Selection Mode**.

DELETE

Delete file(s).

1. Select file(s) from your cloud drives.
2. Select the **Delete** option (not available for local My Device files).
3. Confirm deletion.

DOWNLOAD

Download music from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
2. Select the **Download** option (not available for local My Device files).
3. The file(s) are downloaded to your mobile device.

MOVE

Move the selected song(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option (not available for local My Device files).
3. Select a cloud drive to move the selected file(s) to it.
4. The file(s) are moved to the selected location.

COPY

Copy music.

1. Select file(s) from your cloud drives.
2. Select the **Copy** option and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share music using the supported services.

1. Select the file(s) you want.

2. Select the **Share** option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s) with one of the supported services.

RENAME

 Rename a song.

1. Select the file you want.
2. Select the **Rename** option (not available for local My Device files), enter a new file name and tap **Update/OK**.

ADD TO FAVORITES

 Select file(s) to add to your list of favorite files.

1. Select file(s) from your cloud drives.
2. Tap the **Favorite** option. The file appears with a small star icon indicating that it's a favorite file.
3. Go to the **Favorites** mode to see the List View and Thumbs view of all your favorite files (for more info see the **Favorites** section).

REMOVE FROM FAVORITES

 Select file(s) to remove from your list of favorite files.

1. Select the favorite file(s) you want to remove from the **Favorites** view.
2. Select the **Remove from favorites** option. This option appears when selecting the file(s) with a small star indicating it as a labelled favorite file.
3. This will only remove the file from the **Favorites** view and will not actually delete the file. The file will remain in the source location as it did before.

- **Upload:** in the **Menu Options** section.
- **Search:** in the **Additional Functions** section.

IX. Documents

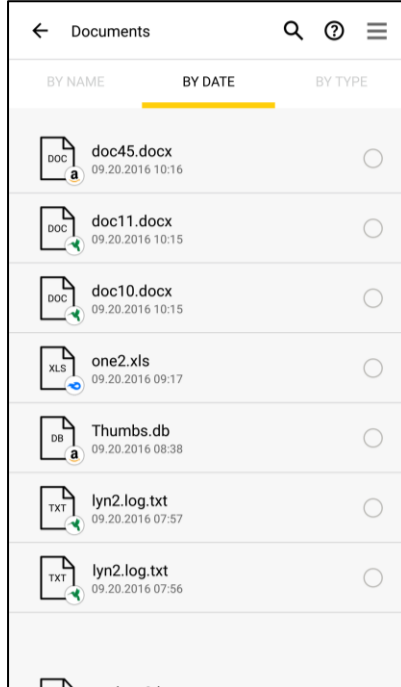

➤ This section explains all functionality available when accessing the Documents content.

Select one of the document views to see the combined list of documents on the connected cloud drive accounts including your mobile device. The **By Name** view appears by default.

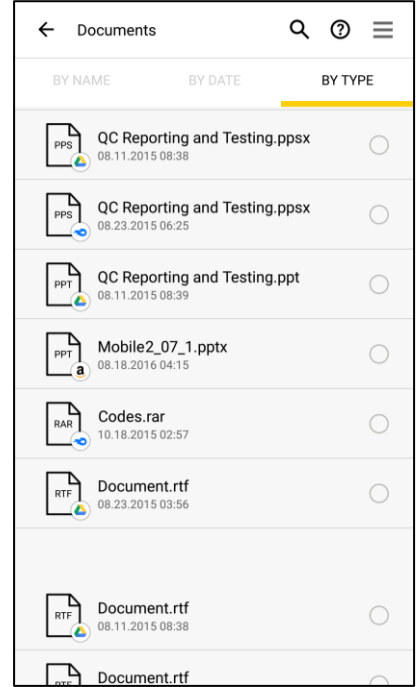

In addition to regular documents, any content in the cloud that is not music files, photos or videos will appear in the documents views.

Android: By Name view

Android: By Date view

Android: By Type view

1. Documents Views: By Name, By Date & By Type

➤ This section explains about the main Documents views.

Android: Documents View Tabs

Tap **Documents** on the **Home** screen. The **Documents** screen with the following view options appears.

BY NAME VIEW

Tap the **By Name** tab on the **Documents** screen to view a list of the documents sorted by file name on your cloud drive accounts. Each file appears with the file name, file type, date and time.

Note: After tapping **Documents** from the Home screen, the By Name view appears by default.

BY DATE VIEW

Tap the **By Date** tab on the **Documents** screen to view a list of the documents sorted by date on your cloud drive accounts. Each file appears with the file name, file type, date and time.

BY TYPE VIEW:

Tap the **By Type** tab on the **Documents** screen to view a list of the documents sorted by file type on your cloud drive accounts. Each file appears with the file name, file type, date and time.

VIEWING OPTIONS:

-  **Cloud Drive File Source:**
Each file appears with a small icon indicating its cloud drive source.
- **Filter by drive:**
Select the **Filter by drive** menu option and then choose the options you want from the cloud drives list. Only the files on the selected drives will display on the screen. This filter will reset automatically when you leave the **Documents** view and return to the **Home** screen.
- **Refresh Content:**
Select the **Refresh Content** menu option to refresh the content being viewed.

2. View Documents

➤ *This section explains how to view a document.*

Tap on a document in one of the views to view it. The document begins to download for local viewing.

1. **On Android:** Tap on a document to download for viewing. If prompted, choose an app for viewing the file. Tap **Back** to return to the previous view.
2. **On iOS:** Tap on a document to download for viewing. When the  **Download** icon changes to the  **Open** icon tap again to open it. Tap **Back** to return to the previous view.

3. Selection Mode: Select Files

Open the selection mode to select multiple files.

1. **On Android:** Long tap on one file to select that file and open the selection mode. Tap on other files to select additional files. Each selected file appears with a check mark. The number of selected files appears on the top of the screen. Tap **'X'** to deselect the files and exit the selection mode.
2. **On iOS:** Tap the **Select** menu option to open the selection mode and select multiple files. The number of selected files appears on the top of the screen. Tap **Cancel** to exit the selection mode.
3. The bottom bar displays a list of the document options (for more information see the 'Document Options' section).

4. Document Options

➤ This section lists all the options available for documents.

The document options appear on the bottom bar in the **Selection Mode**.

DELETE

Delete file(s).

1. Select file(s) from your cloud drives.
2. Select the **Delete** option to delete the files (not available for local My Device files).
3. Confirm deletion.

DOWNLOAD

Download documents from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
2. Select the **Download** option (only available for Android and not available for local My Device files).
3. The file(s) are downloaded to your mobile device.

MOVE

Move the selected document(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option (not available for local My Device files).
3. Select a cloud drive to move the selected file(s) to it.
4. The file(s) are moved to the selected location.

COPY

Copy documents.

1. Select file(s) from your cloud drives.
2. Select the **Copy** option and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share documents using the supported services.

1. Select the file(s) you want.

2. Select the **Share** option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s) with one of the supported services.

RENAME

 Rename a document.

1. Select the file you want.
2. Select the **Rename** option (not available for local My Device files), enter a new file name and tap **Update/OK**.

ADD TO FAVORITES

 Select file(s) to add to your list of favorite files.

1. Select the file(s) you want.
2. Tap the **Favorite** option. The file appears with a small star icon indicating that it's a favorite file.
3. Go to the **Favorites** mode to see the List View and Thumbs view of all your favorite files (for more info see the **Favorites** section).

REMOVE FROM FAVORITES

 Select file(s) to remove from your list of favorite files.

1. Select the favorite file(s) you want to remove from the **Favorites** view.
2. Select the **Remove from favorites** option.
3. This will only remove the file from the **Favorites** view and will not actually delete the file. The file will remain in the source location as it did before.

See also:

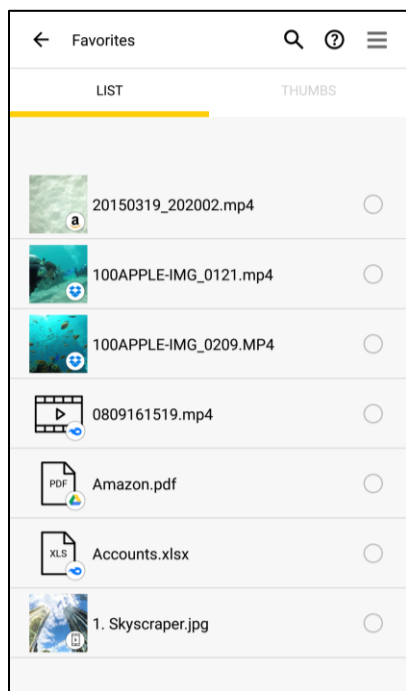

- **Upload:** in the **Menu Options** section.
- **Search:** in the **Additional Functions** section.

X. Favorites

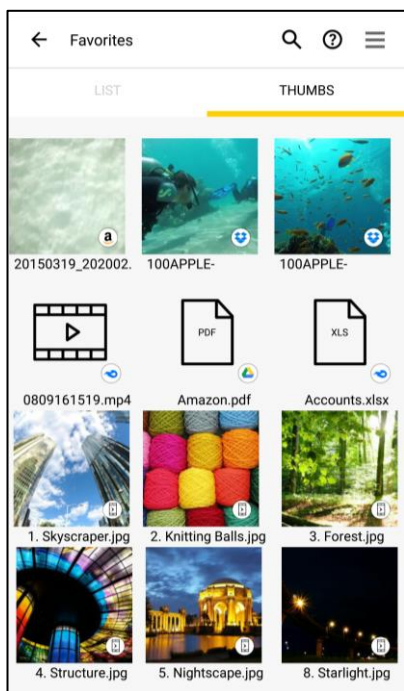

➤ This section explains all functionality available when accessing the **Favorites** content.

View a combined list of your favorite photos, videos, music and documents that have been designated as “favorite files”. A file designated as a favorite file is stored locally and appears in the **Favorites** view. A Favorites icon will also now appear on that file in all other media views. The combined list of favorite files in the cloud drive accounts appears under the Favorites icon on the Home screen. The **List** view then appears by default.

Favorites only appear in the app when their cloud drive service is connected in the app.

Android: Favorites – List view

Android: Favorites – Thumbs view

1. Favorites Views: List View and Thumbs View

➤ This section explains about the main **Favorites** views.

Android: Favorites View Tabs

Tap **Favorites** on the **Home** screen. The **Favorites** screen with the following view options appears.

LIST VIEW

Tap the **List** tab on the **Favorites** screen to view a list of your favorite files: photos, videos, music and documents. Each file appears with the file name and thumbnail.

Note: After tapping **Favorites** from the **Home** screen, the **List** view appears by default.

THUMBS VIEW

Tap the **Thumbs** tab on the **Favorites** screen to view thumbnails of your favorite files: photos, videos, music and documents. Each file appears with the file name and thumbnail.

VIEWING OPTIONS:

-  **Cloud Drive File Source:**
Each file appears with a small icon indicating its cloud drive source.
- **Refresh Content:**
Select **Refresh Content** to refresh the content being viewed.

2. Viewing Favorites Files

PHOTOS: FULL SIZE VIEW

➤ *This section explains how to view photos in Full Size view.*

1. Tap on a photo in one of the views to open it in **Full Size** view.
2. Tap or pinch to Zoom In or Zoom Out of the photo.
3. Scroll right or left to view the next or previous photo in the list.
4. The bottom bar displays a list of the photo options (for more information see the **File Options** section).
5. Tap **Back** to exit the **Full Size** view and to return to the previous screen.

VIDEOS: PLAY VIDEOS

➤ *This section explains how to play a video.*

Tap on a video in one of the views to play it in **Full Size** view. The video begins to download for local playback. The default player will play the file. If there is no default player, a prompt appears to select a player.

1. On Android: Tap on a video to download it for playback. If prompted, choose an app to play it in full size. Use playback controls to play the video. When the video ends the app returns to the previous view.
2. On iOS: Tap on a video to download it for playback. When the  **Download** icon changes to the  **Play** icon tap again to play it in full size. Use playback controls to play the video. When the video ends the app returns to the previous view.

MUSIC: PLAY MUSIC

➤ *This section explains how to play music.*

Tap on a song in one of the views to play it. The song begins to download for local playback.

1. On Android: Tap on a song to download for playback. If prompted, choose an app to play the song. Use music controls to play the song. Tap **Back** to return to the previous view.
2. On iOS: Tap on a song to download for playback. When the  **Download** icon changes to the  **Play** icon tap again to play it. Tap the  **Stop** button to stop playing the song. Tap **Back** to return to the previous view.

DOCUMENTS: VIEW DOCUMENTS

➤ *This section explains how to view documents.*

Tap on a document in one of the views to view it. The document begins to download for local viewing.

1. On Android: Tap on a document to download for viewing. If prompted, choose an app for viewing the file. Tap **Back** to return to the previous view.
2. On iOS: Tap on a document to download for viewing. When the  **Download** icon changes to the  **Open** icon tap again to open it. Tap **Back** to return to the previous view.

3. Selection Mode: Select Files

Open the selection mode to select multiple files.

1. On Android: Long tap on one file to select that file and open the selection mode. Tap on other files to select additional files. Each selected file appears with a check mark. The number of selected files appears on the top of the screen. Tap **'X'** to deselect the files and exit the selection mode.
2. On iOS: Tap the **Select** menu option to open the selection mode and select multiple files. The number of selected files appears on the top of the screen. Tap **Cancel** to exit the selection mode.
3. The bottom bar displays a list of the file options (for more information see the 'File Options' section).

4. File Options

➤ This section lists all the options available for Favorites.

The file options appear on the bottom bar in the **Selection Mode**.

DELETE

Delete file(s).

1. Select file(s) from your cloud drives.
2. Select the **Delete** option to delete it from the source cloud (not available for local My Device files).
3. Confirm deletion.

DOWNLOAD

Download files from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
2. Select the **Download** option (not available for local My Device files).
3. The file(s) are downloaded to your mobile device.

MOVE (Not Available in Favorites View)

Move the selected file(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option.
3. Select a cloud drive to move the selected file(s).
4. The file(s) are moved to the selected location.

COPY

Copy files from one cloud driver to another.

1. Select file(s) from your cloud drives.
2. Select the **Copy** and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share files using the supported services.

1. Select file(s) from your cloud drives.

2. Select the **Share** option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s) with one of the supported services.

RENAME

 Rename a file.

1. Select the file you want.
2. Select the **Rename** option (not available for My Device files), enter a new file name and tap **Update/OK**.

REMOVE FROM FAVORITES

 Select file(s) to remove from your list of favorite files.

1. Select file(s) from your cloud drives.
2. Select the **Remove from favorites** option.
3. This will only remove the file from the **Favorites** view and will not actually delete the file. The file will remain in the source location as it did before.

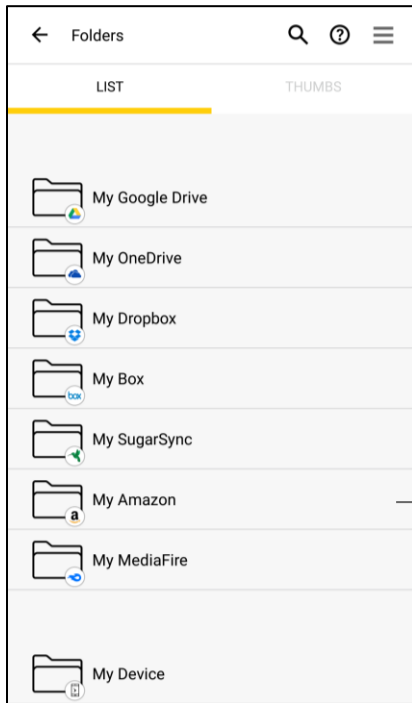

See also:

- **Upload:** in the **Menu Options** section.
- **Search:** in the **Additional Functions** section.

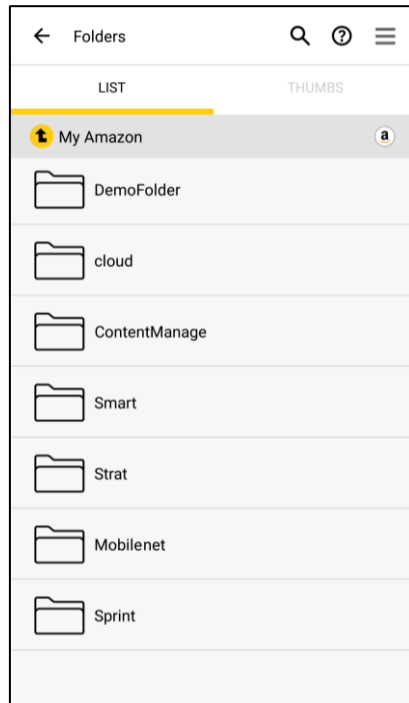

XI. Folders

➤ This section explains all functionality available when accessing the **Folders** content.

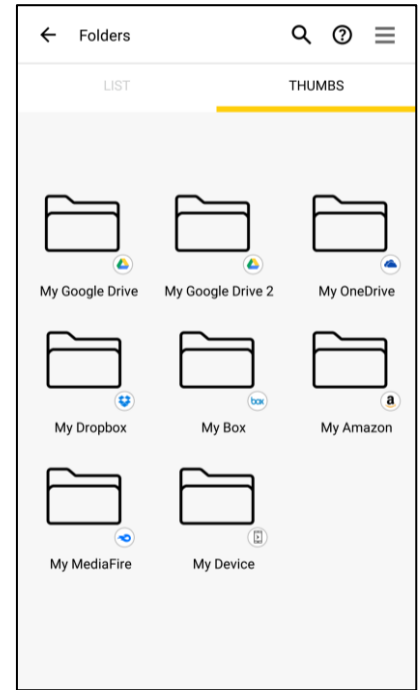

The **Folders** view displays the actual folder hierarchy of each connected cloud drive account.

Android: Folders - List view

Android: Folders - Selected List view

Android: Folders - Thumbs view

1. Folders Views: List View and Thumbs View

➤ This section explains about the main **Folders** views

Android: Folders View Tabs

Tap **Folders** on the **Home** screen. The **Folders** screen with the following view options appears.

LIST VIEW

Select the **List** tab on the **Folders** screen. Select one of the connected cloud drives or 'My Device' to view all folders and files in a list.

Note: After tapping **Folders** from the **Home** screen, the List view appears by default.

THUMBS VIEW

Select the **Thumbs** tab. Select one of the connected drives to view all folders and files as thumbnails.

VIEWING OPTIONS:

- Tap on a folder to open it and view folders and files inside of it. Tap the **Back** button on the top bar to return to the previous folder.
-  **Cloud Drive File Source:**
The cloud drive icon on the top bar indicates which cloud drive is being viewed.
- **Refresh Content:**
Select **Refresh Content** to refresh the content being viewed.

2. Viewing Files in Folders

PHOTOS: FULL SIZE VIEW

➤ *This section explains how to view photos in full size view.*

1. Tap on a photo to open it in **Full Size** view.
2. Tap or pinch to Zoom In or Zoom Out of the photo.
3. Scroll right or left to view the next or previous photo in the list.
4. The bottom bar displays a list of the photo options (for more information see the **Folder Options** section).
5. Tap **Back** to exit the **Full Size** view and to return to the previous screen.

VIDEOS: PLAY VIDEOS

➤ *This section explains how to play a video.*

Tap on a video to play it in **Full Size** view. The video begins to download for local playback. The default player will play the file. If there is no default player, a prompt appears to select a player.

- a. On Android: Tap on a video to download it for playback. If prompted, choose an app to play it in full size. Use playback controls to play the video. When the video ends the app returns to the previous view.
- b. On iOS: Tap on a video to download it for playback. When the  **Download** icon changes to the  **Play** icon tap again to play it in full size. Use playback controls to play the video. When the video ends the app returns to the previous view.

MUSIC: PLAY MUSIC

➤ *This section explains how to play music.*

Tap on a song to play it. The song begins to download for local playback.

1. On Android: Tap on a song to download for playback. If prompted, choose an app to play the song. Use music controls to play the song. Tap **Back** to return to the previous view.
2. On iOS: Tap on a song to download for playback. When the  **Download** icon changes to the  **Play** icon tap again to play it. Tap the  **Stop** button to stop playing the song. Tap **Back** to return to the previous view.

DOCUMENTS: VIEW DOCUMENTS

➤ *This section explains how to view documents.*

Tap on a document to view it. The document begins to download for local viewing.

1. On Android: Tap on a document to download for viewing. If prompted, choose an app for viewing the file. Tap **Back** to return to the previous view.
2. On iOS: Tap on a document to download for viewing. When the  **Download** icon changes to the  **Open** icon tap again to open it. Tap **Back** to return to the previous view

3. New Folder

➤ *This section explains how to open a new folder.*

1. Tap **Folders** on the **Home** screen.
2. Select one of the **Folders** views. Select one of the connected cloud drives and then select a subfolder.
3. Tap **Menu** and select the **New folder** option.
4. Name your folder and tap **OK**.
5. The new folder is created and added to the selected cloud drive.

4. Selection Mode: Select Files/Folders

Open the selection mode to select multiple files.

1. On Android: Long tap on one file/folder to select that file/folder and open the selection mode. Tap on other files/folders to select additional files/folders. Each selected file/folder appears with a check mark. The number of selected files/folders appears on the top of the screen. Tap **'X'** to deselect and exit the selection mode.
2. On iOS: Tap the **Select** menu option to open the selection mode and select multiple files/folders. The number of selected files/folders appears on the top of the screen. Tap **Cancel** to exit the selection mode.
3. The bottom bar displays a list of the file options (for more information see the 'File Options' section).

5. Folder Options

➤ This section lists all the options available for Folders.

The folder and file options appear in the **Selection Mode**.

DELETE

Delete folder(s).

1. Select folder(s) from your cloud drives.
2. Select the **Delete** option to delete the folders (not available for local My Device files).
3. Confirm deletion.

MOVE

Move the selected folder (s) from one cloud drive to another.

1. Select folder(s) from your cloud drives.
2. Select the **Move** option (not available for My Device on iOS).
3. Select a cloud drive to move the selected folders.
4. The folders(s) are moved to the selected location.

COPY

Copy folder(s).

1. Select folder(s) from your cloud drives.
2. Select the **Copy** option and then select a cloud drive to copy the selected folder(s) to it.
3. The selected folder(s) are copied to the selected location.

RENAME

Rename a folder.

1. Select the folder you want (not available for My Device on iOS).
2. Select the **Rename** option (not available for My Device files), enter a new file name and tap **Update/OK**.

6. File Options

➤ This section lists all the options available for Files.

The file options appear in the **Selection Mode**.

DELETE

Delete file(s).

1. Select file(s) from your cloud drives.
2. Select the **Delete** option (not available for local My Device files).
3. Confirm deletion.

DOWNLOAD

Download files from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
 - a. Android: Photos, videos, music and documents.
 - b. iOS: Photos and videos.
2. Select the **Download** option.
3. The file(s) are downloaded to your mobile device.

MOVE

Move the selected file(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option (not available for local My Device files).
3. Select a cloud drive to move the selected file(s) to it.
4. The file(s) are moved to the selected location.

COPY

Copy files.

1. Select file(s) from your cloud drives.
2. Select the **Copy** and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share the file(s) using the supported services.

1. Select the file(s) you want.
2. Select the **Share** option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s).

RENAME

 Rename a file.

1. Select the file you want.
2. Select the **Rename** option (not available for My Device files), enter a new file name and tap **Update/OK**.

ADD TO FAVORITES

Select file(s) to add to your list of favorite files.

1. Select the file(s) you want.
2. Tap the **Favorite** option. The file appears with a small star icon indicating that it's a favorite file.
3. Go to the **Favorites** mode to see the List View and Thumbs view of all your favorite files (for more info see the **Favorites** section).

REMOVE FROM FAVORITES

Select file(s) to remove from your list of favorite files.

1. Select the file(s) you want.
2. Select the **Remove from favorites** option or menu option. This option appears when selecting the file(s) with a small star indicating it as a labelled favorite file.
3. This will only remove the file from the **Favorites** view and will not actually delete the file. The file will remain in the source location as it did before.

See also:

- **Upload:** in the **Menu Options** section.
- **Search:** in the **Additional Functions** section.

XII. Menu Options

- *This section explains all additional functionality available from the **Menu** options. These options include: **Select**, **Filter by Drive**, **Sort By**, **Upload**, **Refresh Content**, **Settings**. The menu options that appear depend on the current mode/view.*

1. Select

- *This section explains how to select file(s) for iOS only.*
 1. Tap **Menu** and choose the **Select** option.
 2. The **Select** menu option opens the current view in Selection Mode.
 3. Tap the file(s) to add to the selection.

2. Filter by Drive

- *This section explains how to filter file(s) according to the selected cloud drive accounts.*
 1. Tap **Menu** and then select the **Filter by Drive** option.
 2. The **Filter by Drive** menu options appear.
 3. Select the drives with the files you want to view or deselect the drives you do not want to appear, then tap **OK** to view your filtered files view as per the **Filter by Drives** selection.

3. Sort by

- *This section explains how to sort file(s) according to the selected criteria.*
 1. Tap **Menu** and then select the **Sort by** option.
 2. The **Sort by** menu options appear. The files can be sorted according to: **Name**, **Date**, **Type**.
 3. Tap an option to choose it and then tap **OK** to view your current mode as per the **Sort by** selection.

4. Upload

- *This section explains how to manually upload files to cloud drive accounts.*

Upload files manually from your mobile device to one of the connected cloud drives.

1. Tap **Menu** and select the **Upload** option.
2. Select files:
 - a. On Android: Long tap on a file, select folders or files and tap **Upload**.
 - b. On iOS: Select an album, then select the photos you want and tap **Done**.
Note: You can only upload photos and videos from your camera roll.
3. Choose an option from the cloud drives list to upload to it.
4. The files are uploaded to the selected cloud drive.

5. Refresh Content

➤ *This section describes the refresh functionality of the app.*

The Refresh Content allows you to refresh content from the connected cloud drives.

1. Tap **Menu** and select the **Refresh Content** option.
2. The content for the connected cloud drives is refreshed.
3. 'Refresh started...' appears upon refreshing and when complete 'Refresh finished' appears.

Note:

- Content will also refresh in a drive if it is removed and added again.
- There is no automatic refresh mechanism in. Items added through another entry point to a cloud account that is connected to the Sprint Cloud Binder will not appear in the Cloud Manager until the app is refreshed.
- The refresh may take a moment to complete if many drives are connected or if there is a lot of content in the connected drives.

6. Settings

➤ *This section outlines the app setting options.*

The following settings can be adjusted:

Uploads, Offline Files, About

See the '**Settings**' section for more information.

XIII. Additional Functions

1. Search

➤ *This section explains how to search for files.*

To search for files:

1. Tap **Search** on the top bar to open the search mode.
2. Type your search query and the results appear on the screen.
Tap '**X**' to clear the search results.
3. Tap on a photo to open and view it in **Full size** view. The photo begins to download for local viewing.
4. Tap on a video to play it in **Full size** view. The video begins to download for local playback.
5. Tap on a song to play it. The song begins to download for local playback.
6. Tap on a document to view it. The document begins to download for local viewing.
7. Open the selection mode to select multiple files.
 - a. On Android: Long tap on a file to open the selection mode and then select multiple files. The number of selected files appears on the top of the screen. Tap '**X**' to exit the selection mode.
 - b. On iOS: Tap the **Select** menu option to open the selection mode and select multiple files. The number of selected files appears on the top of the screen. Tap **Cancel** to exit the selection mode.
 - c. The selection mode bottom bar displays a list of the file options (for more information see the **File options** section).

2. Search File Options

➤ *This section lists all the options available for searched files.*

The file options appear in the selection mode.

DELETE

1. Select file(s) from your cloud drives.
2. Select the **Delete** option (not available for My Device on iOS).
3. Confirm deletion.

DOWNLOAD

Download files from your cloud drives to your mobile device.

1. Select file(s) from your cloud drives.
 - a. Android: Photos, videos, music and documents.
 - b. iOS: Photos and videos.
2. Select the **Download** option.
3. The file(s) are downloaded to your mobile device.

MOVE

Move the selected file(s) from one cloud drive to another.

1. Select file(s) from your cloud drives.
2. Select the **Move** option.
3. Select a cloud drive to move the selected file(s) to it.
4. The file(s) are moved to the selected location.

COPY

Copy files.

1. Select file(s) from your cloud drives.
2. Select the **Copy** and then select a cloud drive to copy the selected file(s) to it.
3. The file(s) are copied to the selected location.

SHARE

Share the file(s) using the supported services.

1. Select the file(s) you want.
2. Select the **Share** option or menu option and then choose one of the share options to share the selected file(s). Follow the prompts to share the file(s).

RENAME

Rename a file.

1. Select the file you want.
2. Select the **Rename** option or menu option, enter a new file name and tap **Update/OK**.

ADD TO FAVORITES

Select file(s) to add to your list of favorite files.

1. Select the file(s) you want.
2. Tap the **Favorite** option or menu option. The file appears with a small star icon indicating that it's a favorite file.
3. Go to the **Favorites** mode to view all your favorite files (for more info see the Favorites section).

REMOVE FROM FAVORITES

Select file(s) to remove from your list of favorite files.

1. Select the file(s) you want.
2. Select the **Remove from favorites** option or menu option.
3. This will only remove the file from the favorites view and will not actually delete the file. The file will remain in the source location as it did before.

3. Upload/Download Notifications

➤ *This section describes the upload/download notifications in the app.*

1. Android will show an upload/download progress indicator in the notifications pane when content is uploading/downloading.
2. iOS shows an upload notification overlay in the app interface when content is uploading. Download progress is shown on each file.
3. Pressing the X button in any of the notifications will cancel the upload/download of the specific file being uploaded/downloaded at that time. If there are remaining items in the upload/download queue, the next item in the queue will then proceed.

XIV. Settings

➤ *This section explains all functionality available for the app settings.*

The Settings allow you to control the uploading of your files and offline file accessibility.

To access the Settings:

1. Tap  **Menu** located on the top bar.
2. Tap **Settings** to open the Settings screen.

The following Setting options appear.

1. Uploads

➤ *This section explains how to upload new local content automatically to cloud drives.*

Upload new content from your mobile device to cloud drive accounts.

Tap the **Menu** button and then the **Settings** option.

The following options appear under the UPLOADS section of the settings.

UPLOAD NEW CONTENT

Tap the control to select YES and turn the option on. This allows the app to upload new content automatically. All new content added to the local device after this option is enabled will be automatically uploaded according to the upload settings.

The following settings appear when enabled:

1. Media to Upload

Check the media type check boxes to upload.

Android: Photos, videos, music and documents.

iOS: Photos, videos and music.

2. Upload Destination

Select the cloud drive as upload destination. The following options appear:

- **Let the app decide: YES**
Tap the control to select **YES**. The app will select the upload destination.
- **Let the app decide: NO**
Tap the control to select **NO**. Select each destination drive per content.
 - **Upload Photos to**: Tap to select the upload drive for photos.
 - **Upload Videos to**: Tap to select the upload drive for videos.
 - **Upload Music to**: Tap to select the upload drive for music.
 - **Upload Documents to**: Tap to select the upload drive for documents.

PHOTO UPLOAD SIZE

Tap a setting to select a photo size option: **Original**, **Medium**, **Small**

UPLOAD NEW CONTENT ONLY VIA WIFI

Tap the box to select **YES** to upload only via Wi-Fi.

If the option is disabled, when **NO** is selected, the content will be uploaded via mobile data.

UPLOAD NOW

Use this option to upload all the content that is already on your local device to the connected cloud accounts. The content types and destination cloud drives are determined based on the other upload settings that are set in the **Uploads** settings.

1. Tap **Upload Now** to begin the upload.
2. A confirmation window appears. Tap **Yes** to continue or **No** to exit.
3. To continue after tapping **YES**, you are prompted to set your upload settings if they are not set.
4. Cancel Uploads: When any upload is in progress, the **Upload Now** option will become a **Cancel Uploads** option. Use the Cancel Uploads option to stop all current uploads

2. Offline Files

➤ *This section explains how to save files for offline view.*

Option to store files that were opened in the app to a local device cache so they are accessible in the app for even when the device is offline.

1. Tap the **Menu** button and then the **Settings** option.
2. Tap **YES** on the control for the **Cache the stuff I use so I can access it offline** option so that any file that is downloaded while this setting is enabled will remain accessible and continue to appear in the app even when the mobile device has no internet connectivity.
3. The **Offline Cache Size** displays the offline cache size details.
4. Tap the **Empty cache** option to clear the app's download cache on the local device.

3. About Cloud Binder

➤ *This section explains the information shown about Sprint Cloud Binder.*

1. Tap the **Menu** button and then the **Settings** option. The following information appears:
2. Tap **About Sprint Cloud Binder** on the **Settings** screen.
 - Tap **Terms of Service** to view the Sprint terms of service.
 - Tap **Open Source Licensees** view the licenses for the open source software used in the development of the app.
 - Tap **Rate Sprint Cloud Binder** to rate the app. The store entry for Sprint Cloud Binder will open in the Google Play Store where you can rate the app and leave a comment.

XV. Advertisements

➤ *This section explains the appearance of ads in Sprint Cloud Binder.*

1. **Ads in Media views**

Sprint Cloud Binder is provided to Sprint customers for free. The app includes ads spaced out throughout the Photos, Videos, Music, Documents, Folders, and Favorites views.

Tapping an ad in the Sprint Cloud Binder app will open the advertisement outside of the Cloud Binder app.

XVI. High Level Differences Between Operating Systems

➤ *This section lists some of the high-level differences between operating systems that affect functionality in Sprint Cloud Binder*

1. Upload of Local Content

1. Android can upload any content on the device that is recognized as Music, Photo or Video. Documents for upload include the following file types: txt, pdf, xls, xlsx, rtf, doc, docx, epub, wps, wpd, ppt, pptx, csv, pps, ods, odt, vcf
2. iOS can upload pictures and videos from the Camera Roll.

2. File Downloads and Download Destinations

1. Android downloads content to a Sprint Cloud Binder folder in the Downloads folder.
2. iOS downloads Pictures and Videos to the Camera Roll.

3. Media Playback

All media playback is dependent on the local playback support on the particular device. If the device doesn't support a particular file, it will not play in Sprint Cloud Binder.

4. Background Upload of New Content

1. Android supports uploading new content even while app is in the background.
2. iOS Phone will upload new content automatically only when the app is in the foreground. Background uploads are not supported by this OS.

5. Upload/Download Notifications

1. Android will show an upload/download progress indicator in the notifications pane when content is uploading/downloading.
2. iOS shows an upload notification overlay in the app interface when content is uploading. Download progress is shown on each file.

Appendix

Intellectual Property: All Intellectual Property, as defined below, owned by or which is otherwise the property of Hyperlync Technologies, Inc. or its respective business partners relating to Sprint Cloud Binder, including but not limited to software relating there to, is proprietary to Hyperlync Technologies, Inc. and protected under federal laws, state laws, and international treaty provisions. Intellectual Property includes, but is not limited to, inventions (patentable or unpatentable), patents, trade secrets, copyrights, software, computer programs, and related documentation and other works of authorship. You may not infringe or otherwise violate the rights secured by the Intellectual Property. Moreover, you agree that you will not (and will not attempt to) modify, prepare derivative works of, reverse engineer, decompile, disassemble, or otherwise attempt to create source code from the software. No title to or ownership in the Intellectual Property is transferred to you. All applicable rights of the Intellectual Property shall remain with Hyperlync Technologies, Inc. and its business partners.
