New Contour Finish – A Delight for the Senses

The beauty of wood is enhanced by the design of the natural wood grain. Imagine further enhancing that wood grain so it becomes both a visual and tactile experience for the senses. Introducing the new 'Contour' finish by Swissmar.

Our new finishing process creates the beauty of weathered barn wood, with a smooth contoured finish.

We have chosen our most popular mill designs to offer a select assortment of Mills with this unique 'Contour' finish.

Connoisseur Collection

Embrace your inner chef as you season and spice like a pro! Aptly named in honour of their German heritage, the Connoisseur collection of German-Made mills are crafted with the precision and care you would expect of European made mills.

Exclusive to the Munich mills in this collection, mills feature a unique technology called HELICOIL® that prevents the adjustment knob from coming loose ensuring the grind setting does not change during use.

Pepper Mechanism

Made in Germany, this spice specific mechanism is made from case-hardened steel, the industry benchmark. Features a two channel grinding system for consistent results with every use.

Salt Mechanism

Made of corrosion proof durable ceramic, the mechanism is adjustable from coarse to remarkably powder fine. Yielding incredible output, this mechanism will revolutionize the salt mill category.

Select & Set Collection

This collection of mills features exotic wood mill bodies. Each mill is crafted from a single piece of genuine wood, enhancing the grain and natural beauty of the wood itself.

American Walnut is a top quality wood that is known for its strength and durability. Full of natural luster, the dark color of the wood is layered with elegance and sophistication. Harvested in North America.

North American Cherry Wood, with its hints of pink or dark red, add warmth and radiance to any room.

Cherry wood darkens beautifully over time, suited for both contemporary and classic designs. Harvested in North America.

Italian Olive Wood has variations in the color and grain within the wood, each highlighting a combination of brown streaks beautifully complemented by the lighter yellow streaks of sapwood. As it ages, the grain and color becomes more dark and rich, and if well cared for, the beauty is unmatched by any other wood.

German Beech Wood is widely known for its supple texture and organic style. It offers exquisite beauty in its natural color or with a stained finish. Harvested in Germany.

Fully adjustable ceramic mechanism suitable for pepper, salt and dry herbs. Grind adjustment is done at the base of the mill with a simple rotation of the adjustment ring.

Why choose a Salt Keeper?

Our beautiful genuine Italian olive wood salt keepers certainly add a decorative touch to kitchen counters, but perhaps more importantly they ensure salt is accessible while cooking. There is no need to fiddle with a salt mill or shaker in the midst of the culinary process, simply open the lid and reach for a pinch. To prevent moisture from dampening the salt, be sure the lid is used.

It may well be one of the simplest tools in your culinary arsenal, but to get the most flavor out of your herbs and spices, you should abandon the electric grinder or food processor in favor of a simple ancient device, one of the oldest in the world, the mortar and pestle.

Whether you're getting serious about making curry paste or simply mashing up some herbs to spread over a roast chicken, a mortar and pestle makes it better.

Say Cheese

Entertaining with cheese! Imagine an assortment of ripe and delicious cheeses presented on a beautiful slate board, paired with cheese knives specifically designed for cutting and serving cheese...that's true Swissmar style.

Chef's Tip – Serving Cheese

When putting together a cheese board, to be served before or after dinner, remember to limit your selection to no more than five different cheeses. Serve cheeses of different sizes, shapes, and flavor or texture profiles to create diversity and add interest to your cheese board. Strong, pungent cheeses shouldn't be placed next to delicately flavored cheeses, and try to have individual knives for each cheese.

A Swiss Tradition... and so much more.

Originating in Switzerland, raclette (the dish), is one of Switzerland's best-loved national fares. Its origin dates back hundreds of years, to when shepherds (Swiss cowboys) would move their herds high into the mountains for grazing in the warm summer months. Supplies would be limited to what could be carried and consisted of basics, such as potatoes, flour, perhaps some pickled gherkins, a round of cheese produced from the milk of their beloved cows, and of course, a good Swiss wine. Long, lonely evenings were passed in front of a campfire, and a simple and primitive tradition was born: A wheel of cheese was cut in half and placed on a rock near the fire's edge. The cheese slowly bubbled and just before dripping into the fire, the wheel was lifted from its perch and scraped onto a waiting plate of potatoes and pickles - the word "Raclette" comes from the French word "racler" meaning "to scrape off". From these humble origins, the Raclette tradition was born.

Oil & Broth Fondue Fun Fact

Sometime after World War II, Swiss cooks began cooking meat in hot oil as an alternative to their beloved cheese fondue — a kind of French-fried meat supper. It became known as fondue Bourguignonne because the French-speaking Swiss are descended from the Burgundians.

Tip: The cooking oil should be heated in the metal fondue pot on top of the kitchen stove. The optimum temperature for frying the meat is 375°F, although it can be cooked properly down to 360°F. A deep-frying thermometer is an essential tool for telling when the oil has reached the frying temperature.

All oil and broth fondue sets include stainless steel/copper pot, 6 forks, rechaud, spatter ring, fondue burner and recipe card. See page 55/56 for accessories.

Chocolate Fondue

Chocolate fondue was created by a Swiss Chef living in New York in the 1960s, and is the perfect way to stir up a dinner party. It is practically effortless to prepare and your guests can participate and enjoy a fun and delicious chocolate dessert at a relaxed pace.

Tips for Chocolate Fondue

Chocolate should be melted in the top of a double boiler, over gently simmering water, never over direct heat. You can also microwave it, uncovered, on medium, stirring frequently. If you are using cream, ensure that it is warm when adding it to the chocolate. If the chocolate clumps together, try stirring in unsalted butter or vegetable oil one teaspoon at a time, until the chocolate becomes smooth again.

Shucker Paddy

OYSTER GEAR

A collection of products designed exclusively in collaboration with Patrick McMurray BPHE, World Champion oyster shucker and Guinness Record Holder for 39 oysters opened in one minute.

The Shucker Paddy Original Oyster Knife is the result of three years experimentation and 50 prototypes. The knife's handle fits the palm like a pistol; a 3 inch notched stainless-steel blade is where the pistol's barrel would be, with sharpened edges top and bottom. Traditional oyster knives have only one axis, running straight down the blade, but the Shucker Paddy has two - one down the blade, the other down the angled pistol grip. That dual axis gives the knife a lot more leverage and less force required. The result, an Oyster Knife that will let you, Professional or at home, "Shuck with Ease".

Unique Design

The unique ergo-dynamic Dual Axis Pistol Grip design keeps the forearm in alignment with the blade for maximum transfer of power. Dual axis lever = less force to open oysters.

Safety

Integrated finger guard and non-slip handle offers superior protection when shucking. Light weight high-impact injection moulded non-slip PP handle provides highest in sanitary qualification.

Versatility

Ambidextrous – Suitable for left or right handed.

How to Shuck with Shucker Paddy:

Place Oyster cup-side down, exposing on the hinge. Hold the Oyster firmly so it does not move.

Insert the tip of the knife into the hinge of the oyster, with a slight twisting motion (like turning a key) - until the knife sets 1/4" into the hinge. Once the knife is set, a light 1/4 turn of the handle, will pop the hinge.

Pry the top shell up, and scrape the top adductor muscle - 2/3 of the way up from the hinge, on the right of the middle of the oyster - to release the top shell.

Locate the lower adductor muscle. Insert blade of knife under this muscle, and scrape loose from bottom shell.
