# College of Medicine MD Student CV Guide

The Office of Career Advising and Mentorship (OCA&M) plays an important role in preparing students for the residency match process. When medical students begin applying to the Canadian Resident Matching Service (CaRMS) to begin the application process, they will need to create a CV as part of their application. There are several documents that make up the residency application; the CV is included in the "Extra Documents" section. Always check the preferences for the residency program descriptions before assigning extra documents as some programs would like to see specific documentation and some do not want to review extra documents.

## What is a CV?

In Canada, the term curriculum vitae (CV) is used to reference a specific type of job search document that is used for the following: applying to graduate school, a medical position, an academic position (post-secondary teaching and/or research focused), and some performing and studio art positions.

It is not uncommon to hear the terms resume and CV used interchangeably but they are different documents. If an employer asks for a CV and you are not applying for one of the categories listed above, it is likely that a resume is required.

One of the biggest distinctions in the formatting of resumes and CVs is that in Canada resumes are usually 1–2 pages, while CVs used for residency applications are typically between 3-5 pages.

## **Social Media and Your Job Search**

- Review all of your social media accounts and privacy settings.
- Consider creating a LinkedIn profile which allows you to upload your CV content and connect with professionals locally and around the world.
- For tips on how to build a professional student LinkedIn profile check out Leverage LinkedIn students.usask.ca/articles/linkedin.php

## **Organization/Layout**

- Set margins at 1 inch
- Use a common font style and size (Calibri, Times New Roman, 11 or 12 point size) throughout your document, and ensure consistency with your personal letter
- Consider submitting your draft to the Writing Help Centre for proofreading and assistance with your grammar.

## **Know Yourself and Your Audience**

- Can you comfortably articulate your values, knowledge, skills, abilities and interests as they relate to your residency application documents?
- Did you perform an adequate amount of research on the prospective program through <u>carms.ca</u>?

## **Showcase Your Abilities**

- Did you take inventory of the broad range of abilities you have and did you crossreference those abilities with the CanMEDS Roles?
- Did you begin your bulleted achievement statements with action verbs?
- Were you mindful of creating achievement statements that demonstrate your skills rather than just listing descriptive adjectives (such as good communication skills) or job duties?
- Did you provide quantitative and/or qualitative details when possible? (This helps a program director to better understand the scope of your experience)

## **Polish Your CV**

- □ Is your CV concise? (Eliminate repetition and redundancies)
- Have you reviewed your CV for spelling mistakes and grammatical errors?
- Did you prioritize your content by placing the most relevant information first?
- Did you organize your information in reverse chronological order?
- Did you present the most targeted information on the left side first (i.e. Job title(s) on the left, dates on the right)?
- □ Were you consistent with format, verb tense and font?
- Did you begin your achievement statements with bullets and action words?

## **Next Steps**

- Do you have references who can attest to your work style, academic profile, and/or personal qualifications, and who have agreed to be a reference?
- Have you begun the process of drafting your personal letter?
- □ Have you booked an appointment with the Office of Career Advising and Mentorship (OCA&M) to review your documents?

Resource: CaRMS program descriptions are publicly available at carms.ca.

Begin with your most recent experience and work your way back (reverse chronological order).

to surgery.

University of Alberta, Edmonton, AB

Supervisors: Dr. G. House, Dr. J. Wilson

### **Curriculum Vitae (CV)**

Keep in mind that a CV can be multiple pages in length (even though this example is only four pages long). Before beginning your CV, take inventory!

### **Ouestions for Consideration:**

### When Applying to CaRMS

- How can you effectively showcase your knowledge, skills and abilities (competencies) to be selected for an interview?
- What are the specific specialty keywords that programs are looking for?
- What abilities did you develop in your previous research, teaching, clinical experience, artistic endeavours, volunteer and extracurricular experiences, that are needed for all the programs that you are applying to?
- What are your major accomplishments?
- Did you supervise, train or teach others?
- What particular value would you bring to a program?

### Student's Name

City, Province Cell Number Email Address

EDUCATION	
Doctor of Medicine Candidate	Aug 2014 – Present
University of Saskatchewan, Saskatoon, SK • Expected date of completion: June 2018	
Bachelor of Science (Honours) – Physiology	June 2014
University of Saskatchewan, Saskatoon, SK	
EXAMINATIONS (if applicable)	
United States Medical Licensing Exam (USMLE)	January 2017
Part I Pass	
RESEARCH	
Dean's Summer Research Project	Summer 2016
Supervisor: Dr. K. Rodney	
Title of Project Saskatchewan Cancer Agency, University of Saskatchewan	
Dean's Summer Research Project	Summer 2015
Supervisor: Dr. N. Seagram Title of Project	
College of Medicine, University of Saskatchewan	
Publications	
<ul> <li>Thompson, C., J.Y. Bunn, S. Name, R.J. Butler, J.F. Zachary, and E.P. Blankenship. 2017. Genetic susceptibility to histopathological lesions and clinical signs of experimental allergic encephalom genetics of multiple sclerosis. Canadian Journal of Pathology, 165(5):1593-602.</li> </ul>

CLINICAL EXPERIENCE	
General Internal Medicine Consult Services (PREP)	Sept 3 – Sept 22, 2017

### **Potential Sections** to include in **Program-Specific CV:**

The hierarchy of categories can change based on the individual, although education, research, and clinical rotations should always be close to the top as they are most relevant.

- Education/Academic Credentials/ Academic History (includes thesis/ dissertation/project title)
- Certifications/Designations (non-academic credentials)
- Clinical Experience
- Leadership Experience Executive club roles such as President or Treasurer, founding roles, and formal leadership training
- Research Interests/Teaching Interests (reflective of your current competencies and future interests)
- Research/Research Experience (current funded research projects, research assistantships, thesis, dissertation, postdoctoral fellowships, abstracts)
- Research Funding History/ **Project Grant Information/** Research Grants (Categories: Senior Responsible Author, Principal Author, Co-Principal Author, Co-Investigator, Collaborator)
- Honours/Awards/Distinctions/ **Recognitions** (academic awards, medals, fellowships, scholarships, prizes)
- Teaching Experience/Academic Work History/Academic Achievements/Teaching **Dossier** (examples of scholarly work: teaching experience, instructorships, teaching assistantships, marker)
- Related/Supplementary Work Experience/Consulting **Experience** (list all relevant work experience)

· Managed patients pre- and post-operatively. Discussed the benefits and risks of multiple medical and surgical interventions prior

### CONTINUED

### **Potential Sections to** include in your CV:

Graduate Student Committee/ **Conference Organizer** 

- Intellectual Property (Categories: Patents Granted/ Pending, Copyright, Licenses, Disclosures, and Trademarks)
- Artistic Exhibitions/ Performances/Works/ Compositions
- Languages (level of reading, writing and oral fluency or competency)

Professional Organizations/ Memberships/ Advisory **Committees/Research Groups** 

- Publications (Sub-categories: Peer-reviewed, Non-peer reviewed, Works Submitted, Works in Progress, Reports, Technical Articles, Print, Social Media, Books, Chapters; use the editorial style that is associated with your discipline)
- Additional Medical Education (Sub-categories: Papers—both contributed and refereed, Posters, Presentations, Proceedings, Attended, Invited Lectures/ Seminars)
- Community Contributions/ Involvement (both academic and non-academic)

Using action words to begin your statement will help you create a more powerful and concise example of your skills and/or responsibilities. Consult the suggested Medical Expert Action Words provided on Page 10.

Student's Num       Page         Internal Medicine: HIV/AIDS       Aug 13 – Sept 1, 2017         St. Paul's Hospital, Vancouver, BC       Supervisors: Dr. K. Smith, Dr. T. Jones         • Managed inpatients on HIV ward. Gained an understanding of his disease and its impact on the patient. Developed a basic approach to medical therapy. Saw a diversity of opportunistic infections and how these correlate to the immune status of the patient.         • Learced about how these infections should be treated and prevented, and encountered some of the complications that can arise surrounding therapy. Gained insight into the management of patients suffering from addictions and social instability.         Styperology       Apr 23 – May 4, 2017         Iniversity of Saskatchewan, Regina, SK       Supervisors: Dr. K. Knee, Dr. H. ## Should I include my extracurricular activities?

For some people, it allows them to show a potential employer a more holistic view of themselves apart from their education and work experience.

This section can be subdivided into areas such as: interests (spare time or healthy lifestyle activities), commitments, community involvement (locally, provincially, regionally, nationally, internationally), athletic involvement, memberships (in student clubs/ groups, professional associations, gyms or training centres).

	Student's Name Page 4
VOLUNTEER EXPERIENCE	
Student Wellness Initiative Toward Community Health (SWITCH), Saskatoon, SK	Aug 2012 - Present
• Volunteered twice monthly at this student-run, after-hours, inner-city clinic	
• Participated in social team: prepared food, interacted with clients and assisted with program d	elivery
• In later years, participated in interprofessional clinical team: performed history and physical e team to form management plan for walk-in patients.	examination, then reviewed with
Internal Medicine Rotation, POCUS, Saskatoon, SK	March 2016
· Used POCUS to assess patients for presence of ascites and pleural effusion	
U of S Admissions MMI, Saskatoon, SK	
• Acted as a host to candidates through the Health Sciences building during the multiple mini-in	nterview process.
College of Medicine Choir, Saskatoon, SK	October 2014 – Present
• Performed with the College of Medicine choir at nursing homes around Saskatoon and at in-house events for the community	
Big Brothers Big Sisters In-School Program, Saskatoon, SK	December 2014 - Present
· Individually matched with elementary students in the BBBS CoMMent Program	
Accompanied our 'little brothers and sisters' to several athletic events	
College of Medicine Peer Mentor, Saskatoon, SK	September 2014 – Present
• Mentored a Year 1 medical student by providing an experienced perspective on medical school and helping him balance the curriculum with his daily life	
MEMBERSHIPS	
Student Medical Society of Saskatchewan (SMSS) Canadian Federation of Medical students (CFMS) Canadian Medical Association (CMA) Canadian Society of Internal Medicine Saskatchewan Medical Association (SMA) College of Medicine Internal Medicine Interest Group	
HOBBIES AND INTERESTS	
Badminton – recreational and coaching.	

• Cooking – take a class in every country I visit.

- Saskatoon Nature Society coordinate events and lead tours of Saskatchewan flora.
- Triathlons completed four within Canada in the last several years.

The examples within this guide are fictitious. No association with any real person, company, organization, product, email address, place, or event is intended or should be inferred. Some sections adapted from the AAMC's Careers in Medicine CV Examples.

Join the national organization for your specialties of interest. Many have free or discounted student memberships.

# This is an example of a CV of a student who is interested in surgical disciplines.

Prioritize your strongest sections first.

Elective descriptions are optional. Use them if the elective was unique, you managed a unique case, or you had duties above what a clerk would typically do. If you think the elective was self-explanatory to your typical file reviewer, omit and use the space elsewhere. Your clinical experience is also addressed in your application in the reference letters, MSPR, personal letter and interviews.

### Letter of Reference (LOR)

LORs are a required component of your application to residency (CaRMS). You do not get to view the contents of a LOR, so it is important to have an honest discussion with your referee about your performance and how they can support your application for a particular specialty."

- Program tend to request three LORs.
- Referees attest to your clinical skills either during your third-year rotations or fourth-year electives. Occasionally, you may request an academic supervisor for research you have worked on to be a referee.
- Program descriptions are on CaRMS. ca and clearly identify the criteria for referees.
- You may to choose to create a cover sheet to send referees that outlines what they are to write about, accompanied by your CV.
- Referees submit their letter via CaRMS.ca or by mail
- Check what reference format your programs of interest require on their CaRMS program description.

Don't neglect to include a hobbies and interests section. This can be a useful section for programs to learn about you and to break the ice during CaRMS interviews.

## **Components of a Residency Application**

There are several documents that make up a residency application, but not all documents are required for all programs or matches. Always consult the program descriptions for specific requirements available at **carms.ca**. You should review these descriptions regularly to make sure you are aware of the latest requirements, as modifications are made throughout the year. These document types may be required in your applications to programs:

- College of Medicine Transcript
- Medical Student Performance Record (MSPR)
- CV
- Personal Letters (inline)
- Letters of Reference
- Proof of citizenship (notarised or certified)
- Photo (JPEG max. 2MBs) (not revealed to programs until after interviews offered)

AAMC's Careers in Medicine<sup>®</sup> (2016) notes that the number of residency programs to which you should apply is specific to your situation and comprised of:

- the content of your application (i.e., your competitiveness),
- the competitiveness of the specialty you're pursuing,
- the competitiveness of the programs you're pursuing,
- your geographic restrictions, and
- any other constraints.

The more competitive the specialty and programs and the more constrained you are by location and other factors, the more programs you'll need to apply to for a successful match. Your ultimate goal: identifying enough programs you're willing to attend thaVt, considering your specific situation, will land you a residency spot.

The most commonly reviewed file elements are the completeness of your documents and your application, the content of your LORs, and how you've aligned and conveyed your interest in the specific discipline or program.

The Canadian Resident Matching Service (CaRMS) is a national, independent, notfor-profit, fee-for-service organization that provides a fair, objective and transparent application and matching service for medical training throughout Canada. They have matched 70,000+ medical students to available residency training positions. CaRMS administers the electronic process that matches medical students and residents with residency programs throughout the country.

## **CanMEDS** Framework

CanMEDS is a framework that identifies and describes the abilities physicians require to effectively meet the health care needs of the people they serve. These abilities are grouped thematically under seven roles. A competent physician seamlessly integrates the competencies of all seven CanMEDS Roles. It is important to integrate the CanMEDS language into your residency application documents to emphasize your competencies in these areas.
