OHIO STATE  
UNIVERSITY**

**COLLEGE  
OF  
PHARMACY**

**BACHELOR OF SCIENCE  
IN PHARMACEUTICAL  
SCIENCES  
(BSPS) PROGRAM**

# BSPS

The Ohio State University College of Pharmacy Bachelor of Science in Pharmaceutical Sciences program is a highly unique undergraduate program that thoroughly prepares students to have the **breadth** and **depth** of knowledge and skills for a career in a variety of biomedical fields.

We are looking for future pharmacists, doctors, dentists, optometrists, veterinarians and scientists who will improve healthcare around the country and across the globe.

**WILL IT BE YOU?**

## THE PROGRAM

In learning the disciplines of medicinal chemistry, pharmaceuticals, pharmacology, and pharmaceutical administration, BSPS students will study the areas of drug discovery, delivery, action and therapy. Students are able to pursue this degree through one of two pathways, enabling them to focus in areas that would be most relevant to their post-baccalaureate goals: the Healthcare Professions Pathway, and the Drug Discovery and Development Pathway.

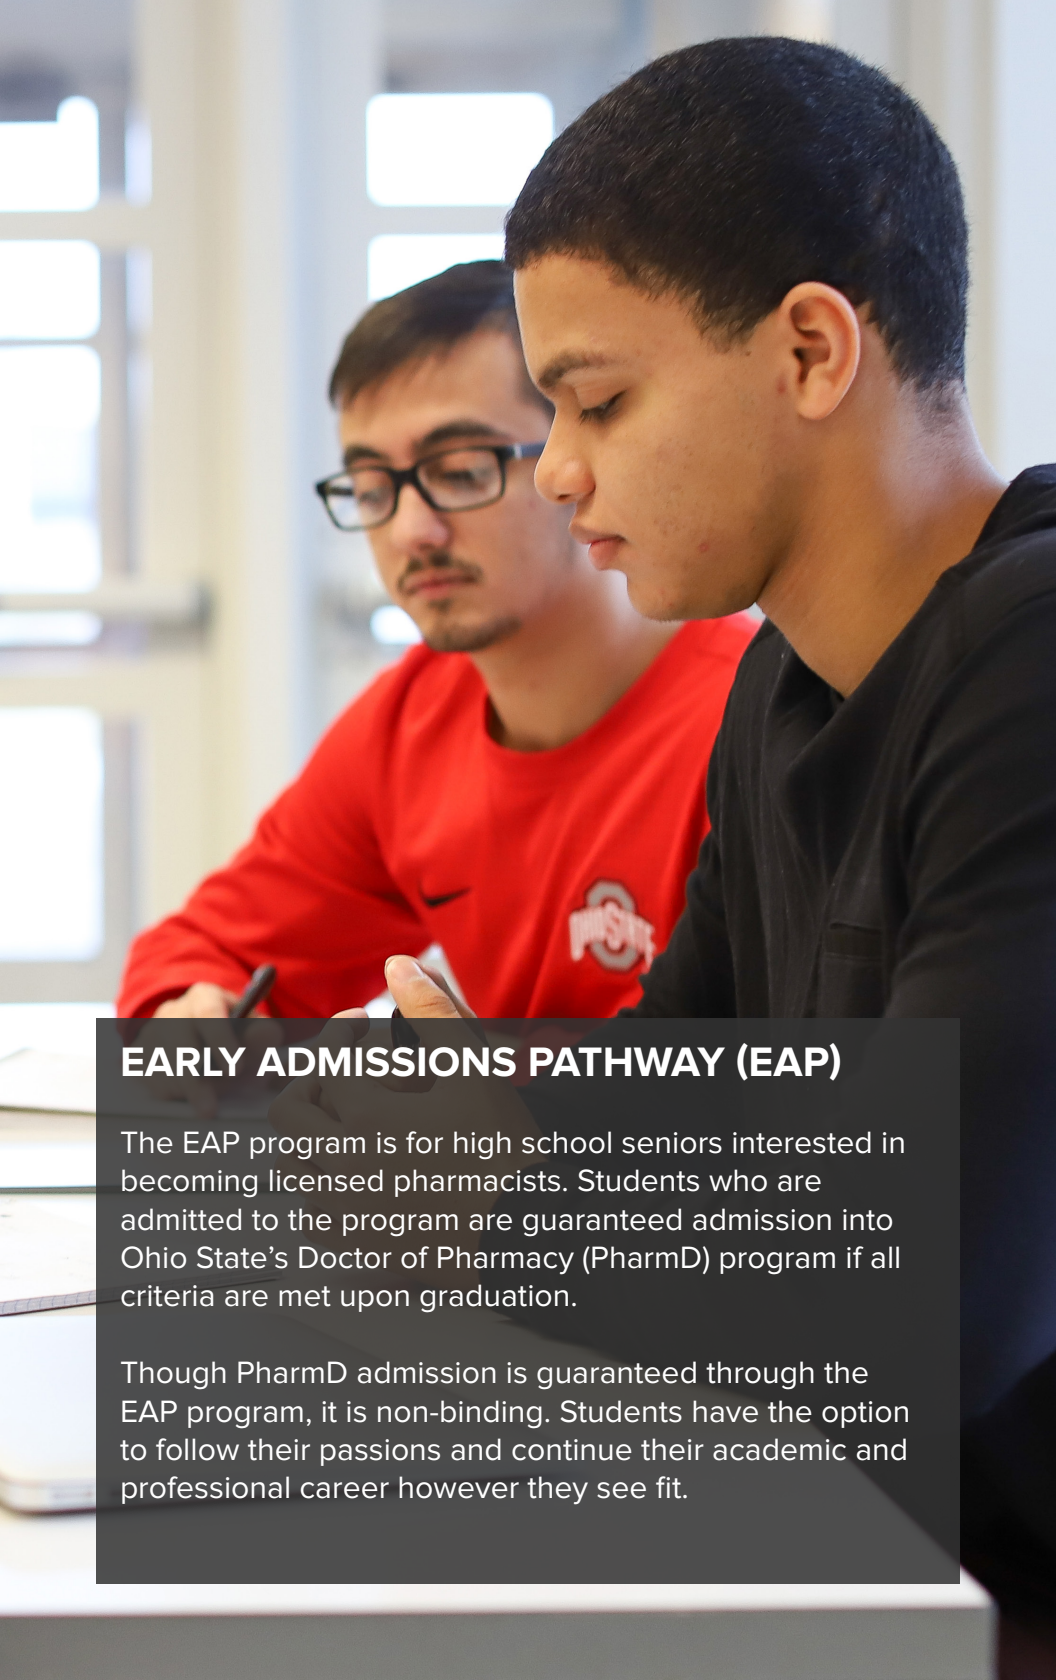

Students have the opportunity to engage in clinical-, laboratory-, and community-based research experiences, preparing them for any biomedical field that interests them.

The BSPS major introduced concepts and ideas that prepared me for my future in medicine. I've learned about diseases, medications, and received hands-on experience specific to my career path.

**Brooke Olson,  
2018 BSPS graduate**

## **EARLY ADMISSIONS PATHWAY (EAP)**

The EAP program is for high school seniors interested in becoming licensed pharmacists. Students who are admitted to the program are guaranteed admission into Ohio State's Doctor of Pharmacy (PharmD) program if all criteria are met upon graduation.

Though PharmD admission is guaranteed through the EAP program, it is non-binding. Students have the option to follow their passions and continue their academic and professional career however they see fit.

## **SEVEN-YEAR COMBINED BSPS/PHARM D DEGREE**

The college offers a seven-year combined degree for undergraduate students who are interested in completing a Doctor of Pharmacy degree from Ohio State.

The program identifies course efficiencies between the BSPS and PharmD curricula in order to provide a seamless, streamlined student learning experience.

Students pursuing this option (typically) complete three years of the BSPS curriculum and then matriculate into the four year PharmD program. Students will receive their bachelor degree at the end of their first year of PharmD. As such, the time to both degrees is lessened by one year.

A photograph of a modern, multi-story building with a glass facade, identified as The Ohio State University Wexner Medical Center. The building is illuminated from within, and the sky is a clear blue. The text 'THE OHIO STATE UNIVERSITY WEXNER MEDICAL CENTER' is visible on the upper part of the building.

WEXNER MEDICAL CENTER

## **LARGE UNIVERSITY RESOURCES, SMALL COLLEGE ATMOSPHERE**

The College of Pharmacy is just steps away from The Ohio State University Wexner Medical Center, one of the top-rated hospital systems in the country. Students have access to state-of-the-art medical technologies and research.

Within our college, students are able to build tight-knit relationships with their peers and professors due to our student/faculty ratio of one professor for every 18 students. We also have a dedicated living/learning community called Pharmacy House for students with an interest in pharmacy.

Come see for yourself how  
we are improving lives  
across the country and  
around the globe.
