**COLORADO**  
Department of Agriculture

I am pleased to introduce the 2020 Colorado Agricultural Statistics Bulletin, an annually anticipated and important information source for major crop, livestock and agricultural data in the state of Colorado. As a product of the USDA, the data on the following pages is available to all and recorded for the sole benefit of agriculture.

The information compiled in this bulletin informs the Colorado Department of Agriculture and our state's farmers and ranchers about detailed crop values and yields, livestock inventory and production, economic impacts and much more. It also plays a critical role in updating our state and county governments and the Colorado State University system about emerging crops, movement of crops, research and development needs, and considerations when drafting farm policy.

We at the Department are grateful to the collaboration of so many who work together to gather and provide the data in this report every year--thousands of Colorado agricultural producers, the USDA Mountain Region Field Office, and dozens of field and phone enumerators.

These statistics are a vital component of our mission at the Colorado Department Agriculture to support and advance the work and products of all our state's invaluable ag producers, and I hope the data will serve as a useful and educational tool for you as well.

Kate Greenberg  
Colorado Commissioner of Agriculture

*The Colorado Agricultural Statistics Bulletin is compiled by the National Agricultural Statistics Service, Mountain Region Field Office, which is an agency within the U.S. Department of Agriculture, in cooperation with the Colorado Department of Agriculture.*

October 2020

Dear Friends of Agriculture:

If any year could challenge the resilience of Colorado's farmers and ranchers, this would be the one. Good information is crucial in times like these and whether it's used to help write disaster programs or help make decisions going into the future, reliable statistics are invaluable. Therefore, I am pleased to present the 2020 Colorado Agricultural Statistics Bulletin made available through the Mountain Regional Field Office of USDA's National Agricultural Statistics Service in cooperation with the Colorado State Department of Agriculture. Our agency strives to deliver timely, accurate and useful statistics that the agricultural industry depends on. On the following pages, you will find much of that information including acreage, production and economic data from 2019 and earlier at the state and county level. This information is used for marketing decisions, planning, research, insurance and disaster programs, and policy decisions.

To the farmers and ranchers who took valuable time out of their busy schedules to provide the data needed to produce these statistics, thank you! This information would not be possible without you. I also want to thank all the agribusinesses, extension educators and USDA's Farm Service Agency for contributing information for this bulletin and providing support for our programs.

This report would also not be possible without the dedicated effort of field and telephone interviewers who collect this data and the office staff that compiles it. I would like to thank Emily Sierra of Berthoud, CO for the cover photograph, and a special thanks to the Colorado Department of Agriculture for covering the costs of printing this bulletin.

Sincerely,

A handwritten signature in black ink, appearing to read "W. Meyer", written over a white background.

<sup>1</sup> Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year.

<sup>2</sup> Stocks held by producers.

<sup>3</sup> Average price per pound based on expanded sales.

<sup>4</sup> Value of production is equal to production multiplied by average price per pound.

## National Agricultural Statistics Service (NASS) Reports and Data

The NASS Internet homepage provides easy access to the wide range of reports, data and general information published throughout the year. All data in this bulletin is published at an earlier date and can be found most quickly via the Internet.

**NASS Homepage – <http://www.nass.usda.gov>**

**Colorado Homepage – [https://www.nass.usda.gov/Statistics\\_by\\_State/Colorado/index.php](https://www.nass.usda.gov/Statistics_by_State/Colorado/index.php)**

Through a cooperative agreement with Cornell University, the Albert R. Mann Library distributes NASS, Economic Research Service (ERS), and World Agricultural Outlook Board (WAOB) periodicals and data files via the USDA Economics and Statistics System on a web server. Over 500 NASS reports annually are available free of charge. All NASS reports along with WAOB's World Agricultural Supply and Demand Estimates (WASDE) are available electronically seconds after release.

A calendar of scheduled releases is available from the NASS Homepage by clicking on **Publications**. The next screen is the Reports Calendar where you can choose the year and month of interest.

### Free E-Mail Subscriptions to NASS Reports

When a current report is released, it can be sent free of charge via e-mail to the list of subscribers for that report. From the NASS homepage, select the **Publications drop down**, then follow the instructions under **Receive Reports by Email**. The four report options available in Colorado are:

Colorado All Reports  
Colorado Crop Weather  
Colorado Press Releases

**There is no charge for e-mail subscriptions via Internet.** You will receive a confirmation message to your email address you provide. You must verify that you subscribed to the releases before you start receiving the releases in your inbox. You may unsubscribe at any time by going to the **Subscription Page** and unchecking the reports you wish to discontinue.

### Agricultural Statistics Data Base (Quick Stats)

Published **U.S., State, and County** information is also available in an online database **FREE OF CHARGE**. The database allows custom extracts based on commodity, year, State, and other selection criteria and produces an output file compatible for updating databases and spreadsheets for selected commodities. The database can be accessed from the NASS homepage then selecting **Data and Statistics**. From there you can retrieve National, State, or County level data. The Census of Agriculture is also available in Quick Stats. The database allows custom extracts based on commodity, year, selected counties within a State, or all counties in one or more States. The county data include totals for the Agricultural Statistics Districts (county groupings) and the State. Video tutorials and other information can be found by selecting **Help**.
